HENDERSON, KY. (MARCH 6) BUSINESS WIRE - Farmers Bank & Trust Co. in Henderson, has announced merger plans with Old National Bancorp (NASDAQ:OLDB) of Evansville, Ind.

The companies have signed a letter of intent to merge in an all-stock transaction valued at just over $18 million. The merger plan calls for Farmers Bank shareholders to receive 28 Old National Bancorp shares for every share of Farmers Bank, subject to stockholder and regulatory agency approval.

Farmers Bank & Trust Co. is the largest bank in Henderson and Henderson County, with assets of $115 million. It has exhibited outstanding growth and performance in recent years. The bank has three full-service offices.

Old National Bancorp Chairman Dan W. Mitchell says the addition of Farmers Bank opens an important market for the company. ''With its very strong position in Henderson, Farmers Bank is an excellent complement to the leadership of Old National Bank in the adjoining community of Evansville.''

Farmers Bank Chairman and CEO Phelps L. Lambert noted, ''The alliance between the two organizations brings additional strength and stability into our community and will help us serve the needs of Henderson both now and in the future.''

The addition of Farmers Bank brings Old National Bancorp assets to nearly $2.4 billion.

#90065b0868 03/06/1990 ~Business Wire
NEW ORLEANS (FEB. 6) BUSINESS WIRE - Freeport-McMoRan Energy Partners Ltd. (NYSE: FMP), an 80-percent owned affiliate of Freeport-McMoRan Inc. (NYSE: FTX), Tuesday declared a cash distribution for the first quarter of 1990, of 55 cents per unit payable March 28, 1990, to unitholders of record at the close of business on March 16, 1990.

The cash distribution for the first quarter of 1990 will be FMP's twentieth consecutive quarterly cash distribution of 55 cents per unit and concludes FMP's policy of making quarterly cash distributions of at least 55 cents per unit for a five-year period that began in April 1985, when the partnership became a publicly traded entity.

In November 1989, FMP and FTX, majority owner and special general partner of FMP, announced their intention to convert FMP from a master limited partnership to a publicly traded corporation. This restructuring is expected to occur on or about March 30, 1990.

A prospectus/consent solicitation statement is being distributed to unitholders to solicit their consent to this transaction. The name of the new corporation will be Freeport-McMoRan Oil & Gas Company and will be listed on the New York Stock Exchange under the symbol ''FMP.''

Although the dividend policy of the new subsidiary has not yet been established, it is anticipated that, following the restructuring, substantially all of its available cash will be used for the exploration, development and acquisition of oil and gas properties.

FMP explores for, develops, and produces oil and natural gas offshore and onshore in the United States, where it is one of the largest independent oil and gas operators.

#90065b0873 03/06/1990 ~Business Wire
FLORENCE, AL. (MARCH 6) BUSINESS WIRE - AlaTenn Resources Inc. (NASDAQ:ATNG) Tuesday announced that as a result of certain one-time charges the company will report a loss for the year ended Dec. 31, 1989, of $7.7 million, or $3.39 per share, including a fourth quarter loss of $8.6 million, or $3.75 per share.

The results for 1989 reflect special charges, net of income taxes, for potentially unrecoverable take-or-pay expenses in the amount of $6.4 million and for a loss of $2.6 million from the anticipated disposal of End Devices Inc., the company's flow monitoring and control unit.

The company had net income of $2.5 million, or $1.09 per share, for 1988 and $313,000, or 13 cents per share, for the fourth quarter of that year.

For 1989, the company posted net earnings from continuing operations, excluding a $1.1 million loss, net of income taxes, associated with the operations of End Devices and before the special charges for potentially unrecoverable take-or-pay expenses and for the anticipated disposal of End Devices, of $2.4 million, or $1.03 per share, compared to net earnings from continuing operations of $2.8 million, or $1.24 per share, in 1988.

With respect to the special charge relating to take-or-pay expenses, Jerry A. Howard, president and chief executive officer of the company, stated: ''Through Dec. 31, 1989, the company has recorded a cumulative liability for take-or-pay obligations to its principal gas supplier of $14.8 million on which it has made substantial payments.

''The company is contesting its obligation to make such payments, and a recent court decision has invalidated the methodology utilized by the supplier for allocating those expenses to the company.

''Although the company presently is unable to predict the outcome of its challenge to such liability, and despite the company's intention to seek to recover these expenses from its customers, the company has made a special charge in the fourth quarter of 1989 for those take-or-pay expenses which it may not be able to recover from its customers.''

With respect to the decision to dispose of the flow monitoring and control unit, Howard stated, ''In view of the changes in the oil field service industry over the past five years and the company's intention to concentrate its efforts in its core business, the company has concluded that End Devices does not fit well in the company's future operations.''

Commenting on current activities, Howard noted that the company has completed arrangements for construction and operation of a 38-mile intrastate pipeline in northwest Alabama and for the transportation through this pipeline of natural gas to Champion International Corp.'s recently completed cogeneration facility.

The company expects the addition of the pipeline to result in increased throughput on the company's pipeline systems beginning in the second quarter of 1990 and to make a meaningful contribution to earnings. In order to finance the new pipeline and to fund take-or-pay obligations, as well as to provide funds as needed for other purposes, the company

recently entered into a $20 million revolving credit agreement.

Howard also noted that the company has executed a definitive agreement for sale of Colony Energy Corp., as previously announced. The sale of that subsidiary is expected to be completed in March 1990.

Howard also reported that, as a result of regulatory filings made in 1989, Alabama-Tennessee Natural Gas Co. became an open-access pipeline on Feb. 1 1990. In commenting on the effect of this change, Howard stated: ''Since Alabama-Tennessee is already transporting significant volumes of gas for its customers, the implementation of open-access transportation is not expected to have a material impact on the company's earnings.''

In conjunction with its open-access filing, Alabama-Tennessee filed for a rate increase which becomes effective April 1, 1990, subject to refund. Howard noted that, although the outcome of the rate case cannot be determined at the present time, the company is optimistic that the decision in this proceeding will have a favorable impact on present and future earnings.

AlaTenn Resources Inc. is a holding company with interests in natural gas gathering, transmission, distribution and marketing.

#90065b0885 03/06/1990 ~Business Wire

CHERRY HILL, NJ (MARCH 6) BUSINESS WIRE - Infotron Systems Corp. Tuesday announced earnings of $2,890,000, or 56 cents per share, a decrease from 1988 results of $4,030,000, or 78 cents a share.

Contributing to the decrease were costs relating to the May 1989 acquisition of LICOM Inc. and relatively flat revenues.

Revenues were $94,059,000 in 1989, compared to 1988 revenues of $94,728,000, with over $1 million of the reduction in revenues being related to the impact of the weaker British pound.

However, Infotron's 1989 operating profits were $5,180,000, representing an increase of 12 percent over 1988 operating profits of $4,634,000. These results mark 11 consecutive quarters of operating profits.

Chairman and Chief Executive Officer James C. Castle characterized 1989 as a repositioning period and expressed optimism about the company's potential for the 1990s.

WASHINGTON (MARCH 6) COMTEX - The 8-K report filed at the SEC shows on Feb. 23, 1990, Terramar Corp. dismissed the services of Peat Marwick as its independent public accountant. The company engaged Ken Green and Co. as a replacement.

Terramar decided to engage an accounting firm "more commensurate with Terramar's size and whose fee structure more closely approximated Terramar's ability to pay," explained Lawrence C. Hanratty, CEO of Terramar.

For the previous two years, audits performed by Peat Marwick contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

The executive office of Terramar Corp. is located at Norwood Plaza II, Suite 201, 1848 Norwood Plaza, Hurst, TX 76054, and its telephone number is (817) 280-0070.

#90065c0066 03/06/1990 ~Comtex
WASHINGTON (MARCH 6) COMTEX - The 8-K report filed at the SEC shows on Feb. 12, 1990, FB&T Corp. announced that it had completed execution of an agreement to acquire Monumental Savings Bank, F.S.B. of Baltimore, MD.

In accordance with the agreement, Monumental would convert from a federally chartered mutual savings bank to a capital stock savings bank, with FB&T simultaneously acquiring all of that newly created capital stock. Monumental would thereby become a wholly owned subsidiary of FB&T.

The acquisition transaction is subject to certain conditions and approvals, including the approval of Monumental's depositors and that of regulatory authorities including the Office of Thrift Supervision.

As of Dec. 31, 1989, Monumental had capital assets of approximately $6.2 million and a capital-to-assets ratio of 6.5 percent.

Lawrence J. LaMaina, Jr., Chairman and CEO of FB&T, stressed that the acquisition was a very positive move for FB&T.

WASHINGTON (MARCH 6) COMTEX - The 8-K report filed at the SEC shows on Jan. 19, 1990, United Trans-Western Inc. announced that it had completed payments in settlement on the purchase of an interest in several oil and gas properties located in the Oklahoma counties of Woods, Ellis and Woodward.

These payments totaled $1.80 million, and sealed the joint acquistion between itself and MJM Resources Inc., an Oklahoma City company unaffiliated with United Trans-World. The joint acquisition entitles United Trans-Western to a 75% interest in the properties at a cost of 80% of the total price paid, in exchange for which MHM Resources will operate the properties. The acquisition was effective Oct. 31, 1989.

The executive office of United Trans-World is located at 16200 Dallas Pkwy., Suite 270, Dallas, TX 75248, and its telephone number is (214) 931-9384.

WASHINGTON (MARCH 6) COMTEX - The 8-K report filed at the SEC shows on

dates through Feb. 14, 1990, Digital Products Corp. had completed six transactions designed to increase working capital. The transactions are as follows:

Digital Products retained F.N.W. as its placement agent by providing F.N.W. with 10% convvertible subordinate debentures through a private placement of up to $400,000 of these debentures.

Digital Product consumated these debentures and thereby received $300,000 in cash and distributed to five persons a $300,000 principal amount of the debentures as considerations. Each of these persons made representations to Digital Products that the debenture purchases were for investment purposes only, and that they were each an "accredited investor", as defined under the Securities Act of 1933.

Grossman and Cohen agreed to loan Digital Products $300,000.

Digital Products made an agreement with F.N.W.: that Digital Products would expand its board, and that one appointment to a new five-member board or two appointments to a new seven-member board would be made with F.N.W. approval. Digital Products also made an agreement with F.N.W. to appoint a mutually agreeable chief executive officer to head Digital Products.

Grossman and Cohen agreed to vote all their shares for the nomination of board members in accordance with the above-stated agreements between Digital Products and F.N.W.

STAMFORD, CT (MARCH 6) COMTEX - Hayward Bio-Response Inc., currently in bankruptcy proceedings, sold substantially all its assets to Baxter Healthcare Corp. for $9 million in cash.

Under a Jan. 9 asset purchase agreement approved Jan. 31 by the U.S. Bankruptcy Court, Bio-Response sold cash, deposit accounts, rights to payment, deposits, capital equipment, inventory and certain proprietary rights and records to Baxter, according to a filing with the Securities and Exchange Commission.

Proceeds from the sale have been paid to Bio-Response's estate for distribution to creditors pending confirmation by the bankruptcy court of a reorganization plan.

Baxter was a major Bio-Response customer, accounting for about 60 percent of the company's contract revenue for the nine months ended Sept. 30.

#90065c0156 03/06/1990 ~Comtex

STAMFORD, CT (MARCH 6) COMTEX - San Clemente Savings Bank, the thrift subsidiary of American Pacesetter, has asked its parent for a cash infusion to allow San Clemente to meet the new capital requirements under the federal thrift bailout bill.

Because the Office of Thrift Supervision rejected San Clemente's capital plan, the OTS has placed certain restrictions on San Clemente preventing it from making loans over a certain amount, selling certain assets, making certain capital expenditures, declaring dividends, increasing officers' salaries and making transactions with certain affiliated persons.

In order to have the restrictions lifted, San Clemente may need to sell some commercial or multifamily mortgage loans that it may not otherwise have sold, according to a Securities and Exchange Commission filing.

San Clemente believes it will be able to meet all the necessary capital requirements in the near future, but American Pacesetter may see a reduction in profits in order to do so.

This 8-k Filing was submitted to the Securities and Exchange Commission on MARCH 5, 1990

RICHARD C ROSE OWNS 83,985 SHARES (3.44%) OF DATAFLEX CORP (TICKER: DFLX) OF EDISON, NJ.

ANNOUNCEMENT:

Rose, Gordon J. McLenithan, Dataflex and Jeffrey A. Lamm entered into several agreements on Feb. 23, 1990 whereby Lamm will sell shares to Rose,

McLenithan and the public.

Lamm will resign as CEO, but will remain as the chairman of the board, with Rose remaining as president and becoming CEO.

McLenithan will remain as CFO and become executive VP, COO, and a director.

Rose and McLenithan will acquire 100,000 shares from Lamm, at a price to be disclosed in a registration statement, plus an option for 240,000 common shares.

Dataflex will grant them an option for an additional 320,000 shares.

The SEC has determined that an incomplete filing has been received and that the exhibits to the document have been requested.

#90065c0482 03/06/1990 ~Comtex

WASHINGTON (MARCH 7) COMTEX - The 8-K report filed at the SEC shows on Feb. 5, 1990, U.S. Precious Metals received notice from their independent auditors of Guthrie, Harwood & Co. that those auditors would decline to stand for reelection.

Following the end of its last fiscal year, U.S. Precious Metals progressed from being an exploration company to being a mining company. Guthrie, Harwood & Co. therefore advised U.S. Precious Metals that they would do well to hire an auditor who had expertise in the auditing of mining operations. The audit committee approved this recommendation and passed it on to the board of U.S. Precious Metals.

For the previous two years, audits performed by Guthrie, Harwood & Co. contained no adverse opinion or disclaimer of opinion nor were they modified as to uncertainty, audit scope, or accounting principles.

For the previous two years, there were no disagreements between those former auditors and the company.

#90065c0493 03/06/1990 ~Comtex
WASHINGTON (MARCH 6) COMTEX - Securities industry executives said today that the present period of consolidation, downsizing and declining profits rocking Wall Street is a corrective cyclical response to the leveraged excess of the 1980s and predicted the United States will continue its role as world leader in the 1990s.

"By the late 1980s there was a feeding frenzy -- leverage was overutilized and margins of safety eroded," John Gutfreund, the chairman and chief executive officer of Salomon Inc., told the Senate Subcommittee on Securities. "We're still the envy of the world. If you want to raise capital, liquidity in the U.S. is the best in the world."

Philip Purcell, the chairman and chief executive officer of Dean Witter Financial Services Group, concurred. "The securities industry created problems for itself because of excesses and overcapacity," he said. "The U.S. securities industry is still the world leader. We are going through a period where we are getting these excesses out of the system now. When we are through, the U.S. will still be the best marketplace in the world."

The subcommittee called the hearing to examine the condition of the securities industry, which was jolted by last month's collapse of Drexel Burnham Lambert.

The Wall Street leaders conceded that index arbitrage is here to stay, but in order to restore small investor confidence, called on Congress to establish the Securities and Exchange Commission as the single regulatory body for both equity and stock-index futures markets.

"The SEC should be given authority over all equity-related derivative products, such as stock index futures," said Purcell. "A single regulator should be given authority to establish minimum margin requirements for all equities and equity related products."

"Ending the split regulation between the equity and equity-related markets could be the single most positive step towards rebuilding confidence of individual investors," said Robert Downey, chairman of the Securities Industry Association (SIA). Downey added the single regulator should be the SEC.

The Commodity Futures Trading Commission presently has jurisdiction over stock index futures. Index futures allow investors to bet on the overall direction of the stock market as measured by a benchmark such as the Standard & Poor's 500-stock index. They are controversial because they are part of some market-moving program trading strategies. If there were a change of jurisdiction, the SEC surely would insist on higher margins -- good faith money required to initiate trades -- on index futures.

In addition to restoring small investor confidence in the securities markets, it was also recommended Congress take steps to specifically encourage individuals to save and invest.

"The SIA supports the reestablishment of a preferential capital gains rate, the elimination of double taxation on dividends (first when earned by the corporation and then again when paid to individual shareholders), and other measures to restore investor incentives," Downey said.

Purcell agreed with the above measures and added Congress should expand the tax deductability of Individual Retirement Accounts and establish a "family savings account" as outlined in the administration's 1991 budget.

The SIA, which represents over 600 firms active in the securities business, announced it is developing a proposal to create a new nonfederally insured entity, an investment banking financing company (IBFC), which could be established both by bank holding companies and securities firms. This proposal was brought about partly by fear that banking organizations, with their federal support and credit clout and too-big-to-fail status, can be unfair to competitors in nonbanking businesses such as the securities business.

This new entity could engage in wholesale credit and depositary activities, and could interact fully with affiliates engaged in the wholesale

securities business. At the same time the IBFC and its securities subsidiaries would be totally prohibited, with very limited exceptions, from contact with any affiliated federally insured bank.

"This mechanism could permit banking and securities activities to be conducted within the same commercial banking organization without forcing the deposit insurance system to shoulder the securities risks and without triggering "too-big-to-fail" status," explained Downey.

Dean Witter supports legislation introduced by Senators Alan Cranston of California, Alphonse D'Amato of New York and Jake Garn of Utah. This legislation would permit financial and non-financial companies to affiliate with each other, but require the different financial activities be conducted in a separately capitalized subsidiary of the holding company.

Downey and Purcell also agreed that the SEC should be able to monitor the financial conditions of holding companies of brokerage houses providing it relates to the financial industry. Both individuals stressed they endorsed SEC oversight, but not regulation on this issue.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 5

GROUP LED BY TROON PARTNERS LTD OF TEXAS OWNS 2,664,493 SHARES (46.30%) OF CODA ENERGY INC (TICKER: CODA) OF DALLAS, TX.

ANNOUNCEMENT:

Coda had proposed an underwriting of 4.6 million shares of common stock including an overalotment option for 600,000 shares to be granted to Prescott Ball and Turben as underwriters.

Certain partners of Troon verbally agreed to participate in the proposed underwriting by granting PBT a thirty day option to acquire 500,000 shares at a price equal to the same price per share received by Codo from the sale of the new shares.

Pursuant to the underwriting agreement, each partner in the filer will agree for a period of 120 days from the execution date of the agreement to refrain from selling any shares of stock received from Troon.

On July 25, 1989 Mr. Miller received a $150,000 loan from T. Boone Pickens Jr. in the form of a promissory note due on July 25, 1990.

Pursuant to the loan agreement, Mr. Miller is required to assign 50,000 shares to Mr. Pickens when Milmac has distributed to Mr. Miller his share of Milmac's holdings of common stock.

The agreement also provides that Mr. Miller will assign to Mr. Pickens all shares of stock which he may receive from Milmac not to exceed 250,000 shares.

Three of Coda's directors nominated in 1987 by Troon, A. Charles Funai, Anthony F. Kramer, and Mr. McAuley, have indicated that they are considering resigning from the board following completion of the proposed underwriting agreement.

LATEST TRANSACTION:

On March 2, 1990 Troon distributed 727,273 shares of Coda's stock to its partners for the purpose of making common stock available to certain of its partners who intend to grant PBT an option on 500,000 shares of common stock.

PURPOSE:

Distribution of shares.

JAKARTA (MARCH 6) - Indonesia Tuesday authorized five foreign firms disqualified from a previous tender to re-tender for a multi-million dollar telephone network expansion project.

State Secretary Murdiono said President Suharto had decided that five finalists disqualified in the first tender for failing to meet the government's financial terms, would be allowed to compete again for the 300 million dollar project to build Indonesia's second digital telephone system.

The five firms, shortlisted from 40 bidders, are a Dutch unit of the French company Alcatel, NEC Corp and Fujitsu of Japan, an Australian subsidiary of Sweden's Ericsson, and a Dutch subsidiary of American Telephone and Telegraph (AT and T).

The terms of the project remained unchanged and a decision on the winner should be made within six months, he added.

Indonesia had announced last week that all five final bidders were disqualified from the tender.

Rumours had spread alleging intervention by the governments of some of the participants to help them win the project, whose eventual worth could climb to two billion dollars with repeat orders and spare part supplies.

Officials said in mid-February that the government had shortlisted the bidders to AT and T and NEC Corp, and that a decision from Mr. Suharto was expected towards the end of February.

U.S. President George Bush wrote to Mr. Suharto in early February alleging that pressure had been exerted by the Japanese government, Indonesia's main aid donor, and demanded that ATT be given an equal opportunity to win the tender.

Jakarta has denied the allegation.

Mr. Murdiono reiterated the terms sought by Indonesia: that the network meets Indonesia's technical needs and that the loan package has a minimum repayment period of 25 years, a grace period of seven years and a maximum interest rate of 3.5 per cent a year.

The bids will be examined and evaluated by the Coordinating Minister for the Economy Radius Prawiro, but the final decision will rest with President Suharto, he said.

The government has ruled that the eventual winner of the project would have to work with PT Eletrindo Nusantara, a private firm controlled by one of Mr. Suharto's sons.

#90065d0990 03/06/1990 ~French/German News Agency

MANILA (MARCH 6) - The Philippines' year-on-year inflation rate dropped to 12.8 percent in February, down from the 13.1 percent annual rate posted in January, a spokeswoman for the National Statistics Office (NSO) said here Tuesday.

The February rate however was still higher than the 8.6 percent rate posted in February 1989.

Inflation rose to double-digit levels in mid-1989 for the first time in three years and the country's average inflation rate for the whole year hit 10.6 percent.

The NSO spokeswoman attributed the slowdown in inflation last month to the greater abundance of foodstuffs, especially fish and vegetables.

#90065d1230 03/06/1990 ~French/German News Agency

SEOUL (MARCH 6) - South Korea has agreed to buy enriched uranium from the Soviet Union at much less than it pays to sellers like the United States, France and Australia, an Energy Resources Ministry spokesman said Tuesday.

The import of uranium from the Soviet Union, which at 3.5 percent enrichment falls far bellow nuclear weapons capacity, will begin this year

and will last until 1999, he said.

Negotiators are now meeting here over the price of the annual shipments, put by the ministry at some 40 tons.

Reports said Seoul was seeking to pay some 20 million dollars for the 40 tons, or about half the price it now pays for enriched uranium to the United States. The spokesman however refused to confirm the reports.

South Korea currently imports refined uranium ore from Australia, Canada and France and has it enriched in France and the United States before it is used in the country's nine nuclear power stations.

The ministry stressed that the new contract would not damage the existing ones but would augment South Korea's growing need for fuel. The Soviet uranium would not be used until 1996 and would be stored until then, the spokesman said.

In exchange for the purchases of the uranium, the Soviet Union has offered to buy South Korean electronics goods amounting to 30 per cent of the price of the uranium sales.

The ministry arrived at its decision at the end of February and has told the Korean Electic Power Company (KEPCO) to negotiate with Soviet counterparts.

The idea originated with the Soviet Union, which "suggested" the sale to the South Koreans, the spokesman said.

The Soviet Union is also reported to be helping communist North Korea in the expansion of a nuclear facility which was shown in recent satellite pictures.

Moscow, one of North Korea's main allies along with China, agreed late last year to establish consular ties with Seoul.

#90065d1330 03/06/1990 ~French/German News Agency

Bangkok (MARCH 6) - Vietnam has signed a petroleum exploration and exploitation agreement with Sweden's Secab concern, radio Hanoi said Tuesday.

It is the sixth such agreement with a foreign concern since Vietnam opened itself up to foreign investment in late 1987.

The other agreements have been signed with Shell Oil and British Petroleum, Enterprise Oil of Australia, Total of France and Hil of India.

American companies are excluded from Vietnam's oil scene by the U.S. government's ban on ''doing business with the enemy.

Under the PetroVietnam-Secab agreement of February 27, the Swedish company has two concession areas offshore from the central city of Hue, not far from the Shell Oil concession.

The agreement is for 25 years. During the first five years, extensive exploration work will be carried out with an investment of tens of millions of U.S. dollars, said radio Hanoi.

All past agreements have been under a production sharing arrangement, a system considered most favourable to the host country.

TOKYO (MARCH 6) - Japanese share prices fell 0.2 percent Tuesday with the Nikkei Stock Average closing 54.12 yen lower at 33,791.08 yen.

Brokers said futures-related selling drove prices down towards the close. Turnover rose from 422 million shares to an estimated 530 million shares.

The broader Tokyo Stock Price Index in the major first section of the market finished 0.89 point higher at 2,536.37.

Investors were concerned about a possible hike in the official discount rate by the Bank of Japan, the central bank, brokerage sources said.

Construction and other public works-related stocks ended higher, while steel and machinery company stocks were lower.

Market participants were affected by rumors that machinery makers' earnings were declining, brokerage sources said.

JAKARTA (MARCH 6) - Indonesia's PT Unggul Indah Corp (UIC) Tuesday signed a licensing agreement with Universal Oil Process (UOP) of the United States to double output of alkylbenzene, a raw material for detergents, to 120,000 tons by 1992.

Under a royalty and engineering agreement signed with Nikki Universal of Japan, UOP's representative company, PT UIC will use the U.S. firm's technology to boost production at its existing plant in west Java.

Company officials declined to give details of the agreement or the cost of the project, saying only they were similar to the deal on the current plant, built by Mitsui and Chisso Engineering of Japan in the mid-1980s at a cost of some 35 million dollars.

This time, however, the construction contract will be put up for tender by local companies, the officials said.

PT UIC, Indonesia's only producer, sells about 90 percent of output domestically but the officials said they hoped to expand exports when the second production train came on stream in 1992.

Of other raw materials, most are supplied by UOP while the company currently relies on benzene from Singapore. However from 1991 it expects to get its benzene from an aromatics plant being built by state oil company Pertamina and a foreign consortium.

TOKYO (MARCH 6) - Japan's Mitsubishi Heavy Industries Ltd. said Tuesday it had received an order from Denmark's Odense Steel Shipyard Ltd. to build five marine diesel engines for an undisclosed sum.

The eight-cylinder engines will be used to power five very large crude carriers being built for Danish carrier A.P. Moller and are to be delivered from 1992, the company said. The engines have a maximum output of 32,000 horsepower.

BONN (MARCH 6) - Daimler-Benz, West Germany's leading industrial group, and Japan's Mitsubishi group of companies said Tuesday they were holding talks on possible cooperation.

The discussions included all the activities of the West German group - cars, electromechanics, aeronautics and services, Daimler-Benz said in a statement.

In Tokyo, Mitsubishi Corp said that senior managers from four Mitsubishi group companies met with Daimler-Benz executives in Singapore at the weekend.

"The talks were held to encourage mutual understanding and to explore the potential for cooperation, a Mitsubishi statement said.

"There was a far-reaching exchange of ideas about ways to expand the

relationship beyond the automotive sector," it added, referrring to existing ties between the groups' auto divisions, Mercedes Benz and Mitsubishi Motor Corp.

Other Mitsubishi firms involved were Mitsubishi Heavy Industries Ltd., Japan's biggest manufacturer of ships, aircraft and arms, and Mitsubishi Electrical Corp, the country's third-biggest electrical machinery maker.

"The areas explored included high-growth industries such as aerospace, electronics and the service sector that would benefit from the development on a global scale and make effective use of the skills of both groups."

Mitsubishi said executives from both groups "agreed to hold further meetings in due course."

Daimler-Benz said that the "discussions appear promising."

The two groups considered that their activities "complement each other both in terms of products and the geographical location of their operations, and that intensive cooperation could strengthen the competitivity" of them both, Daimler-Benz said.

Daimler-Benz in November denied press reports that it had reached agreement with Mitsubishi on developing a low-pollution diesel engine for industrial vehicles.

The West German group has said several times that it was seeking a partner in the Far East for its new subsidiary Deutsche Aerospace (DASA) which groups virtually all of the West German aerospace industry.

NUREMBERG, West Germany (MARCH 6) - The number of jobless in West Germany fell two percent in February over the January level to 2.15 million, the federal labour office said here Tuesday.

The unemployment level stood at 7.4 percent, down from 7.7 percent in January and eight per cent in February last year.

The labour office said the situation of the labour market had been very favourable in February due to a good economic climate and the mild winter.

The number of refugees from East Germany and other Eastern European countries without jobs rose in February however, to 278,000, an increase of some 9,000.

HELSINKI (MARCH 6) - Two leading Finnish companies, United Paper Mills Ltd and Rauma-Repola Oy announced on Tuesday that they intend to form a single industrial group.

The boards of directors of the two companies have decided to present a merger proposal to their shareholders.

Under the proposal, the industrial operations of the companies would be regrouped in three divisions within the new parent company, Repola Ltd.

United Paper Mills Ltd will group activities in the forestry industry, Rauma Ltd. will cover metals and engineering, and W.Rosenlew Ltd plastic packaging).

The new Repola group will employ 35,000 people, with sales this year estimated total 25 billion Finnish markka (6.25 billion dollars).

PARIS (MARCH 6) - French air services will be disrupted by a 24-hour strike by pilots Wednesday, with airlines cutting up to 60 percent of flights on some routes.

The French pilots are staging the strike to call for better training, arguing that many pilots are under-qualified and that this threatens flight safety.

Air Inter will be operating only 40 percent of its normal schedule, while Air France has said it will maintain all long-haul services but operate only 60 per cent of its medium-haul schedule.

#90065d2470 03/06/1990 ~French/German News Agency
PARIS (MARCH 6) - OPEC crude oil production rose by 100,000 barrels a day (bd) in February from the January level to 23.2 million bd, the International Energy Agency (IEA) said in a report published here Tuesday.

This is more than a million bd above the Organisation of Petroleum

Exporting Countries' production ceiling of 22 million bd for the first half of 1990.

With Organisation of Economic Cooperation and Development production at 16.1 million bd, world oil supply in February was 0.2 million bd above the January level at 53.9 million bd.

Net exports by planned economy countries to the west stood at 1.7 million bd, the same as in January, but down from the 1.9 million bd in the first quarter of 1989.

The IEA said that Eastern European countries had imported more non-Soviet crude following a reduction in Soviet deliveries, and had exported less to the west.

But there was no evidence that Soviet exports to industrialised countries in the OECD had fallen more sharply than usual during the winter.

OECD consumption is expected to increase by 0.3 million bd or one per cent in the first quarter of this year compared to the same period of 1989, to reach 38.7 million bd.

OECD consumption for the year is expected to average 37.9 million bd, up one per cent of 0.4 million bd.

Among OPEC countries, Kuwait continued to produce above its quota in February, at 1.9 million bd against a quota of 1.5 million, and the United Arab Emirates produced two million bd against a quota of 1.095 million.

Saudi Arabia also exceeded its quota of 5.38 million bd, producing 5.6 million.

But both Iran and Iraq were below their quotas of 3.14 million bd, with Iran producing 2.9 million and Iraq 2.8 million.

Indonesia, at 1.2 million bd, was also producing below its quota of 1.37 million.

The IEA also noted that spot prices for crude had fallen by almost a dollar at the end of February compared to the January level.

#90065d2600 03/06/1990 ~French/German News Agency

WARSAW (MARCH 6) - Poland has taken a step closer to a market economy with the adoption by the cabinet of a draft law on privatising state enterprises, newspapers said here Tuesday.

"The privatisation process will be carried out in a steady manner, in stages and not at one fell swoop," the government daily Rzeszpospolita said.

There are some 7,000 state enterprises in Poland, and the draft law envisages the privatisation of about 100 large businesses this year and "not more than 200 next year," the report said.

"To safeguard the interests of the state" the privatisation process will be subject to strict parliamentary control, with parliament drawing up a list each year of enterprises to be privatised.

Enterprises of strategic, financial or social importance would be privatised only after approval by the cabinet.

Gazeta, the Solidarity trade union newspaper, said that enterprises which perform well would have priority for privatisation.

Employees would be given the chance to acquire up to 20 per cent of capital in privatised enterprises.

The law will not go before parliament for at least a month.

SINGAPORE (MARCH 6) - The Singapore government on Tuesday announced a relaxation in its foreign workers' policy, saying that it would allow them to be recruited in more sectors of the economy.

Labour Minister Lee Yock Suan told a news conference that the move was to help ease the tight labour market in Singapore.

Previously, foreign workers were only recruited for the manufacturing, hotels, construction and domestic maid sectors.

Mr. Lee also said that employers can have up to 10 per cent of their workforce from neighbouring Malaysia.

But the employers will have to pay a foreign workers' levy of 280 Singapore dollars (150 U.S.) per month which will go up to 300 dollars (161 U.S.) per month from August 1.

Employers of foreign maids currently pay a levy of 220 dollars which will go up to 250 dollars from August.

Mr. Lee said the liberalisation would be carried out gradually to avoid a sudden surge in demand for foreign workers.

Mr. Lee said employers would no longer need to hire illegal workers in the light of this liberalisation.

For errant employers who still hire foreign workers illegally, Mr. Lee said the law would be amended to penalise them by relating the penalties to the foreign worker levy and the seriousness of the offence.

LAGOS (MARCH 6) - Newly discovered oils wells have raised Nigeria's

estimated 16.8 billion barrels' crude reserves by some 300 million barrels,

Nigerian National Petroleum Corporation (Nnpc) sources said here Tuesday.

The 11 wells discovered by the Gulf Oil Company of Nigeria were also said to contain at least 1,000 billion standard cubic feet of gas.

Before the lastest finds the virtually unexploited natural gas reserves had been estimated at more than 100 trillion standard cubic feet.

Nnpc sources said the new wells may not be exploited immediately, being kept instead for the national strategic oil reserve now being built up.

Nigeria currently has a daily production quota of 1.6 million barrels set by the Organisation of Petroleum Exporting Countries (Opec).

#90065d3000 03/06/1990 ~French/German News Agency

ABU DHABI (MARCH 6) - The six members of the Gulf Cooperation Council are to produce lead-free petrol by 1995 in a move to protect vital oil exports against global environmentalist pressures, refining officials said here Tuesday.

They were speaking to reporters on the second day of a meeting on refining cooperation among the GCC states, Saudi Arabia, the United Arab Emirates, Kuwait, Qatar, Bahrain and Oman.

"All GCC states now have their own programmes to produce lead-free petrol," said Mahmoud Sayar of the GCC general secretariat.

He said the meeting had agreed that production of lead-free petrol would begin in some of the countries' 14 refineries as early as 1993, the rest following suit over the next two years.

The six GCC states saw oil export earnings slump to 45 billion dollars in 1988 from 200 billion dollars in 1981.

Industry officials are concerned that calls by anti-pollution lobbies in the West to cut oil consumption could affect exports and the future of their crude reserves, estimated at 500 billion barrels or half the world's total.

Council members have launched programmes to upgrade refining capacity to reduce heavy reliance on crude oil exports.

The total GCC refining capacity currently amounts to 2.8 million barrels per day, of which Saudi Arabia accounts for 1.67 million barrels a day.

TOKYO (MARCH 6) - Japan's Sharp Corp. said Tuesday it had developed a facsimile machine that can transmit full-color images with superior quality.

The machine with digital image processing technology can transmit a single A4-size sheet of paper in three minutes to anywhere in Japan, the major electronic equipment maker said.

It will be put on the market this autumn at a retail price of 3.5 million yen (23,500 dollars), the company added.

-30- 624
#90065d3060 03/06/1990 ~French/German News Agency
BEIJING (MARCH 6) - Beijing city authorities expect the capital's jobless rate to grow by 0.5 percentage points to one percent this year, the highest in six years, the China Daily newspaper said Tuesday.

It did not say exactly how many workers would be unemployed out of a total population of 10.211 million.

But in a report quoting the city's labor bureau, it indicated that local authorities were unable to find jobs for 20,000 out of 120,000 young people who joined the job market last year.

Unemployment in China has been growing as a result of an 18-month austerity campaign that has forced many rural and collectively owned factories to shut down.

Last week, China Daily said urban unemployment was set to jump this year from 2.7 percent to four per cent, representing 5.5 million out of the total urban work force.

Experts say about one million people in Beijing at any one time are transients, including thousands of job seekers from the countryside who could once seek manual labor in the now-stagnant construction industry.

-30- 1247
#90065d3150 03/06/1990 ~French/German News Agency
TOKYO (MARCH 6) - The Japanese cabinet on Tuesday adopted bill that would revise a controversial consumer tax, in line with a promise made by the ruling Liberal Democratic Party (LDP) during last month's election campaign.

The bill due to go before the lower house of parliament is expected to mark the beginning of a long struggle between the government and the opposition, which controls the upper house.

The Japanese government imposed a three per cent value added tax on virtually all goods and services last year that elicited widespread public disapproval and became a hot campaign issue.

Under the revision prepared by the finance ministry, retail food products would be exempt from the tax, and the levy imposed on those products at the time of manufacture and wholesale distribution would be reduced to 1.5 per cent.

The bill would also eliminate taxes on school fees, rents, childbirth costs and funerals.

But the four opposition parties led by the Japan Socialist Party (JSP) have already opposed such a revision. Abolishing the tax served as their battle cry during the elections last month.

The upper house in December even voted to scrap the tax but to no effect as the lower house was dissolved a month later before voting on the bill.

To resolve the issue, Prime Minister Toshiki Kaifu agreed immediately after the elections to begin a dialogue with the opposition in an effort to find a compromise.

But JSP chairwoman Takoko Doi demanded that before any negotiations there should be a freeze in the next budget on revenues drawn from the consumer tax.

Mr. Kaifu rejected her demand, saying the February election result - which widened the LDP's majority in the lower house - showed that the Japanese were not opposed to the tax.

On Tuesday the prime minister urged the opposition to discuss the revised text.

It is now expected that the opposition in mid-March will propose a new bill for abolishing the tax.

Imposed at each stage of production and distribution, the tax ends up being paid by the consumer - the reason it is so unpopular.

TOULOUSE, FRANCE (MARCH 6) - The assembly line of the Airbus A320 at Toulouse will close down for two weeks in April due to a shortage of wing parts following an 18-week strike at British Aerospace (BAe), where they are made.

The dispute at BAe was resolved last week, but Aerospatiale official Claude Terrazzoni said it would be four weeks before any new wings could be completed,

and it would not be possible to continue assembling Airbus A320's in the meantime.

Production has already fallen to an average 1.3 aircraft per month because of the strike from a normal level of seven.

But Mr. Terrazzoni stressed that workers at Toulouse would not be laid off while the assembly line was shut down.

During the strike about 200 of the 300 assembly line workers have been transferred to other plants or sent on training courses.

Mr. Terrazzoni said that the assembly line would be turning out seven to eight planes a month in July, and 10 from September, and could reach 12 in the following months, in a bid to make up for lost production and have deliveries back on schedule by the end of 1991.

#90065d3290 03/06/1990 ~French/German News Agency

TOKYO (MARCH 6) - Japanese business conditions weakened slightly in February from three months earlier but remained relatively strong amid growing fears of an acute labor shortage, the Bank of Japan said Tuesday.

The central bank, quoting a quarterly survey of more than 7,000 companies, added that brisk sales and moderate profit increases were expected to continue in the coming year due to strong domestic demand and improved export earnings.

A bank official said the latest survey indicated that Japan's economy was still driven by domestic demand but was not overheating.

The business outlook index for major manufacturers was mostly favourable but fell from 53 points in November to 52 points in February.

"Sales and profits for the second half of fiscal 1989 remained favorable due to steadily growing domestic demand which outpaced a decrease in exports," the bank said.

The index for major non-manufacturers declined more sharply, from 52 points to 49 points.

"But both sales and profits sustained solid growth, particularly in industries related to private consumption and construction," it added.

Most repondents reported an insufficient number of employees with the corresponding index rising from 35 points to a record 40 points. The index for the manufacturing sector climbed from 34 points to 38 while that for the non-manufacturing sector jumped from 38 points to 43.

"Both large and small enterprises felt that the labor shortage has further intensified," the bank said.

The central bank added that the short-term outlook for business conditions in the new fiscal year starting in April was buoyant.

"Manufacturers foresee continued brisk sales due to buoyant domestic demand and expected increases in export earnings," it said. "Manufacturers' profits for the first half of fiscal 1990 are predicted to post a moderate increase. Under these conditions, most industries plan to increase fixed investments."

"Principal non-manufacturers likewise predict steady growth of sales in fiscal 1990 and also foresee continuing brisk profits and fixed investments."

The survey covered 4,067 manufacturers and 3,442 non-manufacturers including 691 major companies employing at least 1,000 people.

#90065d3300 03/06/1990 ~French/German News Agency

LONDON (MARCH 6) - British agrochemical, pharmaceutical and scientific equipment group Fisons said Tuesday its taxable profit rose 28 percent last year over the 1988 level to 169 million pounds (281.6 million dollars).

Turnover was up 23.8 percent at 1.02 billion pounds (1.7 billion dollars).

The final dividend was set at 3.85 pence, giving a total for the year of 6.2 pence, up from five pence.

The profit showing was better than market forecasts of around 165 millon pounds and Fisons shares rose three pence to 327 in mid-morning trading in London.

The pharmaceuticals division, the group's main activity, showed a 40 per cent rise in profit, with a 30 percent increase in U.S. sales of Intal,

used to treat respiratory infections.

#90065d3370 03/06/1990 ~French/German News Agency

TOKYO (MARCH 6) - Monetary authorities from the world's 10 leading industrial nations have agreed to emphasise measures to control inflation while supporting the yen and the mark, a Japanese news agency reported Tuesday.

Jiji Press said the agreement came at the end of a two-day meeting of finance ministry and central bank officials from the Paris-based Organisation for Economic Cooperation and Development (OECD) in Ito, south of Tokyo.

"Participants agreed on the need to place emphasis on measures to control inflation," the report said, without quoting any sources. "They also agreed to cooperate with each other to stop the depreciation of the yen and the mark."

The OECD group, known as Working Party No. 3, meets four times a year to exchange views on macro-economic policies. It comprises the Group of Seven industrial countries -- the United States, Japan, West Germany, France, Britain, Italy and Canada -- plus the Netherlands, Sweden and Switzerland.

"Participants agreed that world economic growth is still strong but that the risk of inflation is higher than the risk of a slowdown," the report said. "Given this perception, they have agreed to take middle and long-term policies to contain inflation."

The report said that mos" of the participants agreed that the downward trend in the U.S. economy had bottomed but that all agreed that the decline of the mark and the yen against the dollar "should be averted."

The group also agreed that the economic aspects of the proposed unification of West and East Germany were positive, it said.

In addition, participants agreed to establish closer OECD links with Asia's mewly-industrialised economies -- South Korea, Taiwan, Hong Kong and Singapore -- and with Asian countries in general. But many participants also called for import liberalisation and financial deregulation in these countries, it said.

Group of Seven participants are reportedly planning to meet separately Wednesday while the OECD group itself is to meet again in Paris in June.

#90065d3900 03/06/1990 ~French/German News Agency

SOFIA (MARCH 6) - The Bulgarian parliament on Tuesday adopted a budget for 1990 which sets the country on the road to a market economy, the BTA news agency said.

State spending on investment and subsidies will be cut, but agriculture will be given special treatment, with subsidies almost twice the 1989 level at 1.78 billion leva (1.778 billion dollars at the official rate).

The budget deficit has been slashed to one billion leva, against a cumulative deficit of some 11 billion over the past three years.

Parliament also adopted the country's first law on strikes, which lays down a conciliation process through a mediator before a strike can begin.

At least half the workers would then have to vote for a strike, and would have to give a week's notice before stopping work.

Workers in the health, energy and telephone and telegraph system as well as the military and interior ministry employees would only be allowed to stage "symbolic" strikes which would involve no work stoppages.

The parliament also approved a restructuring of Bulgaria's television and radio network, making it more independent of the state and the party, with the state commission for radio and television being replaced by a separate independent and impartial body for each service.

During a two-day session which ended Tuesday, parliament also adopted a

simplified procedure to enable Turkish and Moslem minorities to resume their Islamic names, after they were forced to adopt Bulgarian names by the former government in November.

#90065d3980 03/06/1990 ~French/German News Agency

BRUSSELS (MARCH 6) - The European Commission on Tuesday said it had succeeded in breaking an agreement between 26 telecommunications authorities that imposed a 30-per-cent surcharge on circuits they lease to private firms.

"This is a landmark case in the application of Community competition law to telecommunications," the European Economic Community's executive said.

In April 1989, the European Conference of Postal and Telecommunications (CEPT), gathering PTTs in 26 countries, including the 12 EEC members, agreed a "recommendation" that imposed a special surcharge or access fee of 30 percent on international circuits leased to third parties by the public networks.

Leased lines are used by large corporations, airlines and banks to carry data such as credit card transactions, ticket reservations and electronic mail, a Commission spokesman said.

The Commission received complaints from a users' organisation and a private company, which warned the recommendation would "substantially increase" telecommunications costs and limit the growth of value-added services, the spokesman said, declining to identify the plaintiffs.

Probing the agreement, the Commission found that the recommendation violated the EEC's competition rules by having the aim of restricting price competition.

The CEPT, in a meeting on February 20 and 21, agreed to scrap the recommendation, the Commission said in a statement.

The move "re-establishes competition" between telecommunications operators to the benefit of users, the Commission said, noting it was the first time that the Community had applied competition rules to the CEPT.

Telecommunications are considered one of the most jealously protected areas of national economies.

Ministers agreed on December 8 to liberalise value-added services, such as electronic mail and banking, from 1993.

The accord will cover a fast-growing sector that in 1988 was worth 90

billion dollars. But it does not include telephone and telex services.

#90065d4150 03/06/1990 ~French/German News Agency

LONDON (MARCH 6) - Metals analysts here said Tuesday the London Metal Exchange (LME) authorities could step in to limit the backwardation (premium of metal prices for nearby delivery over forward dates) on LME lead contracts.

Jim Lennon of Shearson Lehman Hutton said "There are expectations among operators" that the LME might act to limit the backwardation.

The premium of cash metal over three months metal at mid-session on Tuesday stood at around 140 pounds per tonne, compared with just 30 pounds two weeks ago.

Cash lead prices reached a 10-year high last week and continue to rise this week, dragged up by severe nearby supply shortages, particularly for mid-March delivery dates.

Analysts said the distortion looked set to continue with demand strong and world stock levels low. LME lead stocks recently reached their lowest for more than two years.

International Lead and Zinc Study Group figures show that at the end of 1989 refined lead stocks held by producers totalled 185,000 tons, equivalent to only just over two weeks western world consumption, which in 1989 reached a record 4.4 million tons.

Last week's news that the 84,000 ton per year Porto Vesme lead smelter in Sardinia, closed since August, was likely to remain out of production until June, and the general bull trend among base metals, are factors keeping the pressure on.

But a move by the LME to limit the distortion could prove controversial.

In December the LME imposed a limit of 20 dollars per ton on the daily backwardation on its Special High Grade Zinc contract after the premium of cash over three months metal had widened out to 70 dollars per ton.

The exchange said the step was taken to prevent "an undesirable situation" from developing.

The limit was removed in February, but not before the LME's action had received severe criticism from some members who lost out as a result of the action.

DESSAU, EAST GERMANY (MARCH 6) - Hundreds of East Germans were on hand Tuesday to give an enthusiastic welcome to a veteran Ju-52 aircraft owned by West Germany's Lufthansa airline as it landed on a grass runway near the former Junkers aircraft factory in Dessau, 55 years after rolling off the assembly line here.

Oskar Stolle, 80, had tears in his eyes as he pushed through the crowd to get near the corrugated metal three-engined plane with the registration number D-Aqui on its side, which he serviced as a Junkers engineer between 1935 and 1945.

''I didn't think I would ever see it again,'' he said.

More than 10,000 Ju-52s were manufactured up to the end of the Second World War at Dessau and in other countries under license from Junkers. ''Tante Ju'' (Aunt Ju) was a model of reliability and pilots all over the world loved it because it was easy to fly.

In its early years D-Aqui was used on the route between Germany and Norway. The German army appropriated it as a transport plane during the war and in 1947 it was acquired by Norwegian owners.

In 1950 it was bought by a South American operator who used it for 12 years, then left it to rot. In 1975 an American enthusiast bought the veteran, repaired it and used it for demonstration flights until the early 1980s.

Lufthansa acquired the remains of the old plane in 1983. In a company hangar it was completely dismantled, rebuilt with many old and new replacement parts and officially licensed again as a passenger plane.

After spending over 500,000 dollars, Lufthansa now uses D-Aqui for ''nostalgia flights''.

SANTIAGO (MARCH 6) - Chile will restore diplomatic relations with the Soviet Union, Yugoslavia, East Germany, Czechoslovakia and Poland hours after President-elect Patricio Aylwin takes office Sunday, diplomats said Tuesday.

The re-establishment of ties will take place at a ceremony Sunday afternoon to be attended by Chile's new foreign minister, Enrique Silva Cimma, and representatives of the five Socialist countries due to attend the

inauguration, they added.

The Soviet Union and other East Bloc countries broke off diplomatic ties with Chile in September 1973 following the military coup that toppled the leftist government of Salvador Allende and brought General Augusto Pinochet to power.

BUCHAREST (MARCH 6) - Several hundred demonstrators surrounded a statue here Tuesday of Petru Groza, who became the leader of Romania's first communist government exactly 45 years ago, demanding that it be demolished.

The protest came after workers, using a U.S.-built heavy duty crane, succeeded Monday in removing a 12-ton statue of Lenin from the capital after three days of efforts in which local equipment proved inadequate for the task.

No incidents were reported and no police were visible here Tuesday.

Mr. Groza's statue, on a plinth of pink granite, is about two meters (six feet) tall and stands before the University of Medecine in central Bucharest.

Protesters put a pan over the head of the statue, a broom tied with a red scarf in its right hand and placed a banner which read "I'm voting for the NSF" -- the National Salvation Front which seized power in December's revolution.

The NSF now shares a provisional coalition government with other groups.

Demonstrators expressed their anger in graffitti on the plinth which accused Mr. Groza of having falsified results of a November 1946 election which gave the communists a complete monopoly on political power.

He was also accused of having been "the initiator of the Romanian gulag", referring to vast canal-building between the Danube River and the Black Sea, and of having jailed "more than 60,000 people". Protesters also dubbed him "Stalin's subordinate".

Mr. Groza died in 1958 after being president of the republic's praesidium for six years.

#90065d4470 03/06/1990 ~French/German News Agency

GENEVA (MARCH 6) - Textile exporting countries on Tuesday opposed U.S.

and Canadian moves for a transitional formula within GATT for global quotas ahead of a complete liberalisation, saying it would only increase restrictions.

The United States and Canada have proposed a global quota system for textile exports which would remain in force for a 10-year transitional period as a replacement for the protectionist Multi-Fibre Arrangement (MFA), which expires in July 1991.

But Hassan Kartadjoemena of Indonesia, chairman of the International Textiles and Clothing Bureau, said that the exporting countries "cannot accept a proposition that would lead to a further increase in restrictiveness in this sector so vital for the economic development of our members."

"Furthermore, it conflicts with the commitment of further liberalisation of world trade in the Uruguay Round" of negotiations on the General Agreement on Tariffs and Trade.

If the U.S. and Canadian proposal were accepted, it would mean that "domestic industry will continue to be isolated from market forces during the whole process," Mr. Kartadjoemena said.

Domestic industry would not be competing with foreign producers, a prime objective of market opening, and foreign producers would simply be competing among themselves for a market, he added.

"Any change over from the present restrictive system to another one will inevitably lead to dislocation of trade," he said.

"Existing commercial relations between the exporters and importers will be disrupted until new ones are established. This will result in uncertainties."

#90065d4510 03/06/1990 ~French/German News Agency

MAPUTO (MARCH 6) - Striking teachers in the Mozambican capital on Tuesday agreed that they would return to work Wednesday.

A statement from the ad-hoc committee that has been leading the strike said that the decision had been taken "for the sake of the children" and "without a feeling of defeat".

The strike broke out on February 19 and the following day the government suspended the 1990 school year, which was to have restarted Tuesday, but in Maputo many schools remained closed.

The statement added that the ad-hoc committee would continue to function "in order to improve teachers' living and working conditions".

The teachers started out with demands for wage rises of 100 per cent - but scaled this down eventually to 45 per cent for those on the lowest salaries, and 10 per cent for higher paid teachers.

But the government insisted that neither the ministry of education budget nor other sources available to the state could meet these demands.

#90065d4520 03/06/1990 ~French/German News Agency
LISBON (MARCH 6) - The rebel Mozambique National Resistance (RENAMO) denied Tuesday that it had "given in to demands" set by the government in Maputo as a precondition for peace negotiations.

Mozambican President Joaquim Chissano said last Wednesday that the rebels had begun to accept a "platform of principles" including "recognition of the legal existence of the state and of the government RENAMO must negotiate with."

But in a statement released to Agence France-Presse here Tuesday, RENAMO said it still did not recognize the single, ruling National Liberation Front (FRELIMO) government, "nor the constitution, revised or not, nor the the current legal order in Mozambique."

"If FRELIMO persists in laying down preconditions, RENAMO in exchange demands its own recognition (by the Maputo government), as well as the unconditional withdrawal of all foreign forces from Mozambican territory," the statement said.

Mr. Chissano had suggested that there had been a change in the rebels' position during indirect talks about talks.

Zimbabwean and Tanzanian troops are in Mozambique to help government forces protect vital infrastructure from attack by RENAMO guerrillas. There has been civil war in the southern African country since independence in 1975.

#90065d4650 03/06/1990 ~French/German News Agency
BANGKOK (MARCH 6) - Military commander General Chaowalit Yongchaiyuth has been offered the posts of deputy premier and defense minister in a possible cabinet reshuffle, an advisor to the prime minister said here Tuesday.

Premier Chatichai Choonhavan had proposed a reshuffle of his six-party

coalition government, said Kraisak Choonhavan, the premier's son and his advisor on labor affairs.

Thai-language newspapers have speculated that General Chaowalit, army chief and acting supreme commander, might soon resign from the military's top slot to join Mr. Chatichai's administration.

The reports, which quoted Mr. Chatichai as saying that the change would involve "many portfolios," speculated that his plan for a new lineup was intended to make way for Gen. Chaowalit.

"There will be no removals of any minister, but changes would be voluntary, as deemed suitable by the other coalition parties," Mr. Kraisak said.

Gen. Chaowalit told reporters here Monday that he would keep his pledge of "early retirement" and would resign after receiving an honorary award from King Bhumibol Adulyadej on March 27.

Newspapers here said Chatichai and Gen. Chaowalit met behind closed doors Monday at Pitsanuloke House, the seat of the prime minister's policy advisors.

The reports said the meeting lasted about an hour. Mr. Kraisak, who heads the team of advisors at Pitsanuloke House, would only say that the "atmosphere during the meeting was good," but declied to provide details.

Opposition leaders, opposed to the move because Gen. Chaowalit would not be entering the political arena as an elected MP, said Mr. Chatichai had wanted to use the general's influence and charisma to shore up his government.

They said the appointment would not violate the constitution, but that Gen. Chaiwalit would be in an awkward position as he had not been popularly elected.

A close advisor to Gen. Chaowalit said Tuesday that the military chief had remained noncommittal to Mr. Chatichai's overtures, adding that he still had "plenty of time to make a decision as to when he should resign."

The aide said Gen. Chaowalit "will surely resign, but no dates have been set, and this does not mean that he will be retiring on March 27...he could resign any time after that date."

#90065d5100 03/06/1990 ~French/German News Agency
TEHERAN, March 6 (AFP) - Iranian clergymen are becoming increasingly polarized, with hardliners accusing moderates of promoting "American Islam" and discarding the ideas of the late spiritual guide Ayatollah Ruhollah Khomeini.

The legacy of Imam Khomeini is at the heart of the dispute, which pits the country's political leadership and reformist clergy against Islamic hardliners tied to former prime minister Hussein Musavi and his interior minister Ali Akbar Mohtashemi.

The pragmatists contend that the ayatollah's Islamic system authorizes the current spiritual leader, Ayatollah Ali Khamenei, to reverse some of the late leader's decisions if circumstances dictate.

The militants, sidelined by the new administration of President Ali Akbar Hashemi Rafsanjani and Ayatollah Khamenei, have denounced as sacrilegious all attempts at "de-Imamization" and "de-Islamization."

The debate is critical to efforts aimed at extracting Iran from the gridlock that has afflicted the country since Ayatollah Khomeini's death last June,
analysts have said.

The Rafsanjani-Khamenei team needs to free itself -- at least partially -- from the Khomeini legacy in order to implement national reconstruction in the aftermath of the Gulf war with Iraq.

To encourage the return of skilled Iranian professionals, for example, the leadership will have to permit a degree of relaxation in the strict Islamic code that so heavily influences daily life here.

President Rafsanjani and Ayatollah Khamenei must also change Iran's international image -- ridding it of the suspicious militancy of Ayatollah

Khomeini -- if they are to secure foreign investment.

Differences have meanwhile emerged over the interpretation in mosques and religious schools of Ayatollah Khomeini's decree last year condemning British author Salman Rushdie to death for his novel "The Satanic Verses," which many Moslems have denounced as blasphemous.

SRINAGAR, INDIA (MARCH 6) - Four Moslem militants were killed in a gunbattle with security forces during a curfew relaxation here, while a bomb blew up a telephone exchange outside the city, officials said Tuesday.

The explosion, blamed on Moslem militants, caused no casualties, police said, but the state-run "exchange was completely destroyed."

The four protestors were killed in downtown Srinagar, Kashmir's summer capital, when paramilitary Border Security Forces (BSF) returned fire from militants during a break in the four-day-old curfew, officials said.

Residents said thousands of people shut indoors almost continuously since Friday, had rushed out to shop during the four-hour break.

Police said there were about half a dozen incidents of shooting and attacks by militants in this mainly-Moslem city of 800,000 during the curfew break.

The curfew, imposed a day after widespread Moslem separatist violence left nearly 40 people dead, has paralyzed life in this once idyllic summer resort.

The militants are campaigning for a plebiscite to determine whether the population wants independence or Indian rule for northern Jammu and Kashmir, India's only Moslem-majority state.

Security personnel have launched house-to-house searches in Srinagar for illegal arms and ammunition, sources here said without giving details.

Armed BSF troops patrolling Srinagar streets were seen at every street corner and behind sand-bagged pillboxes at other places.

The Kashmir government Tuesday announced suspension of a senior police

superintendent and the transfer of a superintendent for "negligence of duty." Officials said the action was taken because three Moslem militants taken into custody had escaped in Srinagar and Anantnag, another Kashmir town.

A government spokesman denied a Radio Pakistan report that "Kashmiri freedom fighters" had shot dead an Indian Army colonel Monday. The spokesman described the report as a "tissue of lies."

He said a security guard had opened fire on two people approaching in the dark, killing a non-commissioned officer and injuring another at Anantnag.

Meanwhile, Prime Minister Vishwanath Pratap Singh Tuesday held inconclusive talks with leaders of political parties in New Delhi to arrive at a consensus on how to tackle the Kashmir situation, officials said.

A fundamentalist Indian Moslem organisation meanwhile issued a call in New Delhi on Tuesday for a protest across India on March 16 because of what it said was the deteriorating situation in Kashmir.

Maulana Asad Madni, president of the Jamiat Ulama-I-Hind, said "killings of innocent people have become the order of the day" after new Kashmir Governor Jagmohan took over.

"It is advisable that talks be initiated with political leaders for finding a solution by democratic and constitutional means," he said.

Pakistani Foreign Minister Sahabzada Yaqub Khan arrived in Dhaka meanwhile Tuesday for talks with Bangladesh leaders on a stalled regional summit and the situation in Kashmir, the local UNB news agency said. During his three-day visit, Mr. Khan is to brief Bangladesh leaders on the situation in Kashmir.

#90065d5190 03/06/1990 ~French/German News Agency

WASHINGTON (MARCH 6) - After 10 years in a Vietnamese re-education camp, former South Vietnamese army colonel Huynh Van Duc and two other ex-prisoners were reunited here with their families in a joyful ceremony.

"Here it is like the promised land," he said.

The ex-army colonel and his companions are among some 7,000 former prisoners who are to leave Vietnam by September under an accord signed by Washington and Hanoi last July 29.

The former colonel, his wife and their three children, all arrived wearing identical dark blue cotton shirts which bore their names and identification

numbers.

The three men carried a bag containing their travel documents and X-rays of their lungs which they had taken in Bangkok, where they embarked on their U.S. journey with little hope of returning to their homes in southern Vietnam.

These recent arrivals may some day obtain a U.S. passport. But Washington forbade its citizens from traveling to communist-ruled Vietnam after ending relations with that country 15 years ago.

In 1975, communist forces from North Vietnam ousted the U.S.-backed government in South Vietnam and reunified that Southeast Asian nation.

Huynh Van Duc said life in the re-education camp was difficult.

"It was hard. But it was okay if you followed the rules. If you didn't -- like to steal food when we were starving, you were punished," the former colonel said.

The former prisoners, some of whom arrived with family members, were welcomed at the airport by several joyous well-wishers, including Khuc Minh Tho, 51, dressed in traditional Vietnamese pants and an embroidered black silk dress.

When Saigon (now known as Ho Chi Minh City) fell to communist forces in 1975, Mrs. Tho was working in the Vietnamese Embassy in Manila. Since then, she has not seen her country -- or her husband, a former army colonel who was interned at a re-education camp.

Although her husband was released last year, he has been awaiting an exit visa from Hanoi.

In 1977, Mrs. Tho founded the Association of Families of Vietnamese Political Prisoners (FVPPA) to work for the release of those internees.

"We have been putting pressure on Congress, the White House and the United Nations for 12 years. We have won," said Mrs. Tho, referring to the July agreement.

On the wall of her office -- located in her suburban Washington home -- hung a picture frame containing the pen with which U.S. Senior Deputy Assistant Secretary of State Robert Funseth signed the U.S.-Vietnamese accord.

The FVPPA hopes that the July accord, which took seven years to negotiate, will allow some 100,000 Vietnamese re-education camp internees and their family members to leave Vietnamese annually in the coming years, Mrs. Tho

said.

Those permitted to depart were military officers or government officials under the former U.S.-backed government in Saigon.

The promised land and the American dream which the arrivals have eagerly anticipated could prove hard to get for some of them.

Although many released Vietnamese prisoners speak a second language, their first foreign language is often French -- not English. After years of deprivation in the camps, many are in poor health. Most of the ex-internees are in their forties, an age at which it is often difficult to begin a second career.

In some cases, they also must re-acquaint themselves with children here whom they have not seen in 15 years and who have become totally Americanized.

"There is a lot of apprehension among those who arrive. They ask how are they going to adjust to their new life", Mrs. Tho said in her office.

Mrs. Tho said her next battle would be to work for an accord permitting the emigration of families of South Vietnamese military officers who committed suicide after the communists seized power or who died in the prison camps.

#90065d5330 03/06/1990 ~French/German News Agency

LONDON (MARCH 6) - Price movements on the commodities market hold out little hope for the economies of African exporters, whose falling standards of living are leading to social unrest, Western experts say.

Africa produces too much coffee and cocoa, whose prices are at their lowest for 14 years in London but which represent as much as 90 per cent of the

export income of countries such as Uganda.

But African mines are unable to satisfy world demand for metals, due to a lack of investment, specialists say.

Ivory Coast President Felix Houphouet-Boigny, who faced unprecedented mass protests in the streets of Abidjan last week, on Monday blamed the "low price policy" of multinationals for his country's economic woes and spoke of deliberate efforts to destabilise Africa.

But analysts here said that African countries were victims of the law of supply of demand.

Virtually all price-support agreements in commodities reached in the 1970's by consumer and producer countries have fallen by the wayside: tin in 1985,

cocoa in 1988, and coffee last year, with rubber the only one still protected.

"Thirty years ago, only a few countries had a very large market share," said Robin Bhar, an analyst with brokers W.I. Carr.

"Nowadays the increasing number of players makes the establishment of price agreements very difficult.

"As for quotas, you will always get some countries who disagree with any quotas you set and will produce more than they are allowed to."

Since 1975, the European Economic Community has compensated 66 African, Caribbean and Pacific (ACP) countries for export losses due to falling prices.

But the measure has had only limited success, Mr. Bhar said. Last year the EEC reimbursed only half the ACP's losses, at a cost of 315 million European Currency Units (ECU's) (375 million dollars).

World demand for raw materials has been rising, but "the problem is not the growth in demand, but simply that the growth in production has been even faster," one London cocoa trader said.

"The big thing with tropical commodities is that you have such long-term lags between movements in prices and actual production."

"Production today is still influenced by trees which were planted five, 10 or 15 years ago when demand prospects were better."

#90065d5380 03/06/1990 ~French/German News Agency
ANCHORAGE, AK (MARCH 6) - Four Japanese attempting to climb Alaska's Mount McKinley have not been seen in nearly two weeks due to harsh weather conditions surrounding the 6,193-meter (20,320-foot) peak, officials said.

Although they are all experienced mountaineers, Park Service rangers fear low temperatures and winds, which on McKinley can exceed 300 kilometers (175 miles) per hour, may have caused a mishap.

They were climbing the mountain's dangerous West Buttress, they added.

A pilot hired by the group last made visual contact February 22. Bad weather kept him from returning to the area, as was scheduled, a week ago.

The expedition set out February 11 and gave March 15 as the "last due out" date, which is when a search should begin if they do not return, the pilot said.

Storms on Mt. Mckinley, located in the Denali National Park, claimed the lives of three Japanese climbers a year ago and of a fourth in 1984.

If the group accomplishes the climb, it would be the first time Japanese mountaineers would have conquered Mt. McKinley's West Buttress in winter.

#90065d5400 03/06/1990 ~French/German News Agency
PARIS (MARCH 6) - Reforms carried out in the Soviet Union have "removed an external threat" to Czechoslovakia and opened a "new road to Europe", Czechoslovak parliament Speaker Alexander Dubcek said here Tuesday.

Speaking at a press conference at the end of his first visit to the French capital, Mr. Dubcek said he felt "very deeply about developments in the Soviet Union and particularly the reform movement which opened the road for Poland and Czechoslovakia."

"This movement has removed an external threat to our country," he said.

Referring to the "Brezhnev-style Stalinism" that ended his country's 1968 liberalization, Mr. Dubcek said "that kind of communism, that kind of socialism" would not come back.

Mr. Dubcek, the leader of the Prague Spring reform movement that was crushed by Soviet-led Warsaw Pact tanks in August 1968, late last year emerged from years of disgrace to become speaker of his country's parliament.

"Without freedom of the individual, there can be no free society and without freedom of the local community, there can be no free state," he said.

Turning to the economic aspects of Czechoslovakia's "velvet revolution" that ushered in western-style democracy last November, Mr. Dubcek warned "not to encumber the future with debts."

"We must get prepared for our entry in Europe (and) meet a certain number of conditions toward our people and you," he said addressing the Franco-Czechoslovak chamber of trade.

Getting inflation under control would have to be one of the main targets of government policy.

During his two-day visit Mr. Dubcek, who was accompanied by his wife Anna and by Jiri Hajek, the man who served as his foreign minister during the abortive 1968 reform movement, met with President Francois Mitterrand, Prime Minister Michel Rocard and other French leaders.

#90065d5430 03/06/1990 ~French/German News Agency

WASHINGTON (MARCH 6) - Japan overtook the 12-nation European Economic Communithy (EEC) as the biggest purchaser of U.S. farm produce last year, the U.S. Department of Agriculture (USDA) said Tuesday.

The Soviet Union, which increased its purchases of U.S. agricultural commodities by 71 percent, lept from sixth to third place, said USDA. China's purchases rocketed by 142 per cent.

Japan's purchases of U.S. farm goods increased by 12 percent in the year ended last October 31 to some 8.15 billion dollars, while the EEC lowered its purchases by 13 percent to 6.54 billion dollars.

With the 71 percent increase, Soviet purchases were worth 3.19 billion dollars.

Other major buyers of U.S. farm goods were Mexico (2.77 billion dollars, representing a 60 percent increase), South Korea (2.45 billion dollars, up nine percent), Canada (2.19 billion dollars, up 11 percent), Taiwan (1.59 billion dollars, up one percent), China (1.48 billion dollars, up 142 per cent), Egypt (930 million dollars, up 20 percent) and Iraq (770 million

dollars, up six percent).

Overall, U.S. farm exports totalled 39.67 billion dollars in the 1988-89 marketing year, up 12 perent compared to the preceding 12 months.

#90065d5450 03/06/1990 ~French/German News Agency

VIENNA (MARCH 6) - Hundreds of angry people blocked the road to the Austrian village of Kaisersteinbruch, near here, Tuesday in a bid to thwart plans to settle 800 all-male asylum seekers from Romania, officials said.

Kaisersteinbruch has a population of about 200, and one demonstrator said the presence of 800 men housed in an army barracks would be "a threat to our free environment."

Villagers, who were joined in Tuesday's protest by several hundred people from neighboring localities, called the provisional settlement project an "inhuman decision" but said they would accept a few families with children.

Demonstrators raided the barracks on Monday and threatened on Tuesday to block a much travelled highway between Vienna and Budapest if authorities failed to reverse their decision.

Interior Minister Franz Loeschnak would not rule out Tuesday that families -- up to 200 people -- will ultimately be housed in the barracks.

Austrian authorities are processing 20,000 requests for asylum, according to the minister. Since the start of the year 5,000 refugees including 3,000 from Romania have crossed into Austria and are planning to stay, compared with only 400 in the same period last year.

The Traiskirchen refugee camp, south of here, which was built to house a maximum 1,600 people is bursting with 2,700 refugees.

JERUSALEM (MARCH 6) - A Palestinian suspected of collaborating with Israeli authorities was found Tuesday hanging by the neck in an orange grove near Beit Hanun village in the occupied Gaza Strip, Arab sources said.

Fahmi Shaaban Za'ani, 21, was abducted from his home three days ago by unknown assailants, thought to be Palestinians, they said.

About 190 Palestinians have been killed on similar charges by fellow Arabs since the start of a Palestinian uprising in the occupied territories in December 1987, according to Arab sources and the Israeli army.

In other developments, Israeli soldiers shot and wounded nine Palestinians during clashes in the Gaza Strip, Palestinian sources said.

Earlier, two Palestinians were jailed for life for a bomb attack on an Israeli bus last year which caused little damage and no injuries, military sources said.

Adel Youssef Kadim, 23, and Abdel Hamid Mahmoud Dawas, 30, both from the Gaza Strip, admitted putting the time-bomb in a bus at the main Tel Aviv station.

The men, members of the outlawed Popular Front for the Liberation of Palestine, also admitted trying to set fire to a textile plant near Tel Aviv.

#90065d5640 03/06/1990 ~French/German News Agency
East Berlin (MARCH 6) - The East German Volkskammer (parliament) Tuesday passed a number of laws intended to pave the way for the country's transition from a planned economy to a social market economy.

Only 12 days before a new parliament is due to be elected in the country's first free general polls, an overwhelming majority of deputies passed draft laws on tax reform, the powers of the trade unions and the foundation of private enterprises.

Under the new laws, trade unions will have far-reaching powers and be independent of the state and party. The new law required a change in the East German constitution which so far has defined trade unions as the ''organisation of the working class'', making it in effect part of the formerly ruling Communist party Sed.

With the new trade union law, East Germany approaches West German regulations, but in some areas it goes far beyond West German law.

The law establishes the right to strike, bans lock-outs and gives the trade unions full negotiating power. In all matters regarding people's working and living conditions, the unions have the right to submit draft laws to parliament.

Under the new trade laws, all East German citizens have the right to set up their own companies. The tax law calls for a single company tax bracket of 50 per cent.

The West German Federation of Industry (Bdi) immediately criticised East Germany's new economic laws. A statement said the new trade union law was a ''first-class investment prevention measure'' that would deter rather than encourage possible investors.

BEIRUT (MARCH 6) - A plan by a Vatican-sponsored committee to separate Lebanon's rival Christian forces has been under study for 48 hours as a cease-fire seemed to be holding in and around east Beirut, various sources said Tuesday.

The plan aims, as a first stage, to deploy Lebanese gendarmes in the Christian areas, the sources said.

Gendarmerie sources said gendarmes had been ordered to assemble at various points on Wednesday at 9:00 a.m. (0700 GMT) to proceed to positions held by forces loyal to General Michel Aoun and by the Lebanese Forces (LF) militia led by Samir Geagea.

A precarious truce, one of many, has held since Saturday, halting fighting which has killed at least 800 people and wounded more than 3,000 others since January 31.

A Christian official who declined to be identified told AFP that "for the first time, each side has realized that the military option leads to stalemate and finds itself forced to favor dialogue."

"The gendarmes' deployment will help to freeze the situation and keep the rivals apart," a mediation committee source said. "It must provide the necessary conditions to start a serious dialogue."

The LF's Voice of Lebanon began its main newscast by saying: "The (Christian) eastern regions are convalescing and will soon be fully healed."

Gen. Aoun's radio said that contacts and mediation efforts aimed at securing a definitive peace were underway.

But neither station suggested a political agreement between Gen. Aoun, who seeks to incorporate the LF militia into his ranks, and Mr. Geagea who opposes such a move.

JOHANNESBURG (MARCH 6) - Negotiations over South Africa's future were useless while blacks were "busy hacking one another to death," Zulu leader Chief Mangosuthu Buthulezi said here Tuesday.

Black unity and an end particularly to the ongoing violence in Natal province which has claimed more than 2,700 lives had to precede talks with the government to end apartheid, Chief Buthelezi said.

He was speaking on arriving from London, where he met British Prime Minister Margaret Thatcher, whom he praised as "courageous" for refusing to implement more sanctions and moving to lift some against Pretoria.

The Zulu leader is president of the 1.5 million-strong conservative Inkatha movement, which opposes sanctions and whose members have been battling rival alliance the left-leaning United Democratic Front for control of Natal townships.

Chief Buthulezi said he and Nelson Mandela, deputy president of the main anti-apartheid exile movement the African National Congress, "share a concern over this violence."

Echoing recent statements by Mr. Mandela -- released after 27 years in jail on February 11 and now on a trip abroad -- Chief Buthelezi said he hoped they could meet soon to discuss the Natal conflict.

Both Chief Buthelezi and Mr. Mandela have called for the conflict to end, but the clashes have continued -- apparently mainly as splinter groups wage isolated vendettas -- and police have said they can do nothing to stop them.

SOFIA (MARCH 6) - Former Bulgarian leader Todor Zhivkov is in good health and judicial proceedings against him can go ahead, the Communist Party newspaper Rabotnitchesko Delo reported Tuesday.

The daily said a French cardiologist, Dr. Bernard Morin, had examined the 78-year-old Mr. Zhivkov and found that his heart was in "very good conditon for his age."

Mr. Zhivkov has been in detention since January 18 and was hospitalized on February 3 at Sofia's military academy suffering from diabetes.

A panel of Bulgarian neurologists and psychiatrists, which included a U.S. professor, William Fields, said on Friday that Mr. Zhivkov was doing well and that interrogation could continue in hospital.

Bulgaria's long-time Communist Party leader is facing charges of abuse of power, misuse of public funds and of inciting ethnic hatred.

CAIRO (MARCH 6) - Tunisian President Zine el-Abidine Ben Ali met here late Tuesday with his Egyptian counterpart Hosni Mubarak for talks that were to deal with the possible return to Cairo of the Tunis-based Arab League, the official MENA news agency said.

A 1978 Arab summit ordered the "provisional" removal of League offices from Cairo to Tunis to protest the Camp David accords that Egypt signed that year with Israel.

Egypt, which signed a peace treaty with Israel in 1979, lost its membership in the League as well as diplomatic ties with most of its members.

But Cairo's readmission to the Arab League last year and its renewal of relations with all its members except Libya strengthened speculation that a return to Egypt of League headquartes would follow, although Egyptian authorities have made no formal request for the transfer, according to Arab sources in Tunis.

Mr. Mubarak and Mr. Ben Ali also discussed the problem of Lebanon and the situation in the Gulf as well bilateral ties, the agency said.

Mr. Ben Ali, who arrived on Tuesday, is the first Tunisian head of state to visit Egypt in 25 years.

LONDON (MARCH 6) - Shareholders in troubled British electronics group Ferranti approved Tuesday an issue of special shares enabling investors to possibly re-coup some of their losses, after an alleged false contracts fraud at a U.S. subsidiary.

The approval came at a shareholders meeting here, amidst legal proceedings against those accused of being involved in the alleged fraud, uncovered last year at International Signal and Control (ISC).

The special issue had been announced in January, along with pre-tax losses for the Ferranti group of 15.4 million pounds (24.7 million dollars) for the six months ending September 31 last year.

The special shares, with a nominal value of one penny, will be offered to those holding Ferranti ordinary shares on March 9, with one special exchanged for 10 ordinary shares.

They new issue will not be quoted on the Stock Exchange and the return on them will be based on any monies which may be recovered from the United States.

The alleged fraud was discovered last September, when Ferranti noticed major accounting irregularities. Some 215 million pounds (370 million dollars) had been missing from ISC, prior to its acquisition by Ferranti in 1987.

PRETORIA (MARCH 6) - Black South African anti-apartheid activist and widely acclaimed "people's poet" Mzwakhe Mbuli has finally been granted a passport, following intensive talks between the West Germany embassy and the government, the embassy said here Tuesday.

Mbuli, whose songs and chanted verse are nationally popular, had been denied a passport due to his "commitment to peaceful change and to the abolition of apartheid," the embassy said in a statement.

It did not say when the passport had been granted.

Mbuli will soon visit West Germany to address a trade union seminar, the embassy said, and will go on to Sweden to speak at a mammoth rally organized in honour of the deputy president of the African National Congress, Nelson Mandela.

BEIJING (MARCH 6) XINHUA - SOUTH KOREA PLANS TO IMPORT ENRICHED URANIUM FROM THE SOVIET UNION THIS YEAR TO GENERATE ITS NUCLEAR POWER PLANTS, ACCORDING TO LOCAL REPORTS REACHING HERE TODAY.

A SPOKESMAN FOR THE ENERGY RESOURCES MINISTRY OF SOUTH KOREA WAS QUOTED AS SAYING AN AVERAGE OF 40 TONS OF URANIUM CONCENTRATE WILL BE IMPORTED ANNUALLY FROM THE SOVIET UNION DURING 1990-1999.

THE SPOKESMAN SAID WORKING-LEVEL NEGOTIATIONS WILL OPEN BETWEEN TECHSNOABEXPORT, A SOVIET NUCLEAR FUEL EXPORTING AGENCY, AND KOREA ELECTRIC POWER CORP., BEFORE A FORMAL 10-YEAR CONTRACT IS SIGNED.

SOUTH KOREA'S ATOMIC POWER PLANTS CURRENTLY RECEIVE NUCLEAR FUEL FROM THE UNITED STATES, FRANCE, CANADA AND AUSTRALIA.

#90065h0088 03/06/1990 ~Chinese News Agency

MOSCOW (MARCH 6) XINHUA - SOVIET ECONOMIC GROWTH FELL SHORT OF THE PLANNED TARGET THE FIRST TWO MONTHS OF THIS YEAR, SOVIET FIRST DEPUTY PREMIER LEV VORONIN SAID.

VORONIN SAID IN A TELEVISED SPEECH MONDAY THAT ETHNIC CONFLICTS IN THE SOUTHERN CAUCASUS REGION RESULTED IN A DIRECT LOSS OF 700 MILLION ROUBLES (ABOUT 1.3 BILLION U.S. DOLLARS).

ALTHOUGH FOOD PRODUCTION ENJOYED AN INCREASE OF 4.2 PERCENT DURING THE FIRST TWO MONTHS OF THIS YEAR, THE ACUTE SHORTAGE OF FOOD FORCED THE GOVERNMENT TO IMPORT FOOD COMMODITIES WORTH 13.5 BILLION ROUBLES (ABOUT 22.1 BILLION DOLLARS), VORONIN ADDED.

THE SOVIET NEWSPAPER IZVESTIA HAS REPORTED THAT THE COUNTRY'S INDUSTRIAL OUTPUT VALUE IN JANUARY FELL BY 1 PERCENT THIS YEAR AS COMPARED WITH LAST YEAR, WHILE THAT OF THE ARMENIAN AND AZERBAIJAN REPUBLICS FELL BY 16 PERCENT AND 38 PERCENT RESPECTIVELY OVER THE SAME PERIOD LAST YEAR.

SLOW ECONOMIC GROWTH IS CONTRIBUTED TO SOCIAL INSTABILITY AND POOR WORKING PRINCIPLES. THE PAPER SAID THAT THE CLOSURE OF AT LEAST 1,000 MAJOR ENTERPRISES, WHICH ARE SUBJECT TO POLLUTION RESTRICTIONS AND SHRINKING MILITARY MARKETS, ARE ALSO ADVERSELY AFFECTING THE SOVIET ECONOMY.

NIKOLAY SLIUNIKOV, SECRETARY OF THE SOVIET PARTY CENTRAL COMMITTEE IN CHARGE OF INDUSTRY, DISCLOSED AT A CENTRAL PLENUM IN FEBRUARY THAT 1,150 OUT OF 1,200 SOVIET CONSUMER GOODS FELL SHORT OF SUPPLY.

ACCORDING TO LOCAL REPORTS, SOME ESSENTIAL AND BEST-SELLER CONSUMER GOODS AND FOODS ARE BEING SOLD BY A RATION SYSTEM.

BUDAPEST (MARCH 6) XINHUA - HUNGARY AND THE SOVIET UNION ENDED TRADE TALKS IN MOSCOW LAST WEEK BY FAILING TO SIGN THE 1990 TRADE AGREEMENT BETWEEN THE TWO COUNTRIES, THE HUNGARIAN NEWSPAPER NEPSZABADSAG REPORTED TODAY.

THE SOVIET REFUSAL TO SETTLE LAST YEAR'S 800 MILLION ROUBLE ACCOUNT WITH HUNGARY BY PAYING IN U.S. DOLLARS WAS DIRECTLY CONTRIBUTED TO THE FAILURE OF A NEW TRADE AGREEMENT, THE PAPER SAID.

HUNGARY DEMANDED THAT THE PROPORTION OF SETTLING BILATERAL TRADE ACCOUNTS THIS YEAR BE PAID HALF IN U.S. DOLLARS AND HALF IN ROUBLES, THE PAPER SAID ADDING THAT THE SOVIET UNION REGARDED SUCH A PROPOSAL AS BEING INAPPROPRIATE AND UNACCEPTABLE.

MOREOVER, HUNGARIAN TELEVISION REPORTED ON MONDAY THAT HUNGARY WILL RECEIVE A RAISE OF 1 BILLION U.S. DOLLARS IN FOREIGN EXCHANGE IF THE SOVIET UNION PAYS IN U.S. DOLLARS.

THE TWO COUNTRIES WILL RESUME TALKS IN BUDAPEST NEXT JULY.

#90065h0113 03/06/1990 ~Chinese News Agency

NEW YORK (MARCH 6) XINHUA - SHEARSON LEHMAN HUTTON INC. WILL CLOSE 50 RETAIL BROKERAGE OFFICES ACROSS THE COUNTRY AS PART OF ITS CUTBACKS IN FACE OF WALL STREET'S WEAKNESS.

THE REDUCTIONS ARE PART OF AN OVERALL ADJUSTMENT LAUNCHED BY AMERICAN EXPRESS, THE MAJOR WALL STREET INVESTMENT FIRM'S PARENT COMPANY.

SOME OF THE OFFICE CLOSINGS ARE TO TAKE EFFECT IMMEDIATELY, LAST FRIDAY AND TODAY.

SHEARSON WOULD NOT DISCLOSE SPECIFIC OFFICES TO BE CLOSED. AS THE SECOND LARGEST U.S. RETAIL BROKERAGE FIRM, IT HAS ABOUT 10,000 BROKERS AT 600 OFFICES NATIONWIDE.

THE FIRM'S SPOKESWOMAN SUZANNE QUIGLEY SAID MONDAY THAT 45 TO 50 OFFICES WOULD BE CLOSED BY APRIL 1.

LAYOFFS WOULD OCCUR, BUT THE SPOKESWOMAN WOULD NOT GIVE SPECIFIC NUMBERS.

SHEARSON ANNOUNCED LAST WEEK IT WOULD LAY OFF 2,000 OF ITS 35,500 EMPLOYEES BY THE END OF THE MONTH. REPORTS SAY LAYOFFS WERE OCCURRING DAILY IN VARIOUS DEPARTMENTS.

THE CUTBACKS COME IN A WAVE OF LAYOFFS IN WALL STREET, WHERE MERRILL LYNCH ANNOUNCED IN LATE JANUARY TO CUT 3,000 PEOPLE FROM ITS PAYROLL.

#90065h0116 03/06/1990 ~Chinese News Agency

OTTAWA (MARCH 6) XINHUA - CANADIAN SALES OF NORTH-AMERICAN MANUFACTURED AUTOS DECLINED DRAMATICALLY IN FEBRUARY WHILE THE SALES OF FOREIGN CARS AND TRUCKS CHUGGED AHEAD.

THE PASSENGER CAR SALES OF THE BIG THREE NORTH AMERICAN AUTOMAKERS -- GENERAL MOTORS, FORD AND CHRYSLER -- SLID 14.5 PERCENT IN FEBRUARY FROM YEAR-EARLIER LEVELS TO 37,705 UNITS, THE LOCAL PRESS REPORTED TODAY.

THE BIG THREE'S SALES OF LIGHT TRUCKS -- INCLUDING MINIVANS AND LIGHT PICKUPS, AN AREA THE NORTH AMERICAN AUTO INDUSTRY HAD HOPED WOULD REMAIN STRONG -- SKIDDED 19 PERCENT TO 23,904 VEHICLES.

HARDEST HIT WAS THE CHRYSLER CANADA LTD., WHOSE AUTO SALES DROPPED BY 18 PERCENT. ITS TRUCKS SALES PLUNGED 30 PERCENT.

MEANWHILE, FOREIGN AUTOMAKERS -- MAINLY JAPANESE AUTO GIANTS -- SOLD 22,373 CARS, UP 9.5 PERCENT FROM FEBRUARY 1989. THEIR TRUCK SALES ADVANCED 9.2 PERCENT TO 4,332 UNITS.

COMBINED DOMESTIC AND FOREIGN CAR SALES DROPPED BY 6.9 PERCENT TO 60,078 UNITS WHILE OVERALL TRUCK SALES WERE DOWN 15.7 PERCENT TO 28,236 UNITS DURING THE MONTH.

IN TRYING TO EXPLAIN THE REASONS FOR THE ABRUPT SALES CHANGE IN FEBRUARY, SOME AUTO MAKERS SAID PUBLIC APPREHENSION ABOUT THE EFFECT OF THE FEBRUARY 20 CANADIAN FEDERAL BUDGET ON FUTURE INCOME AND INTEREST RATES WAS A FACTOR IN KEEPING BUYERS OUT OF SHOW ROOMS.

"THERE WAS CONFUSION AND APPREHENSION ON THE PART OF BUYERS IN FEBRUARY BECAUSE THEY DID NOT KNOW WHAT WAS GOING TO HAPPEN IN THE FEDERAL BUDGET," OR HOW IT WAS GOING TO AFFECT THEM, GENERAL MOTORS SPOKESMAN NICK HALL SAID.

"THERE WAS A LOT OF APPREHENSION ABOUT INTEREST RATES, AS WELL," HE ADDED.

CANADA'S CENTRAL BANK TRIGGERED A THREE-QUARTERS-OF-A- PERCENTAGE-POINT RISE IN THE PRIME LENDING RATE ON FEBRUARY 15 TO A HIGH OF 14.25 PERCENT.

#90065k0021 03/06/1990 ~Japanese News Agency

NEW YORK (MARCH 6) KYODO - TOYOTA MOTOR CORP. HAS OUTSTRIPPED HONDA MOTOR CO. IN U.S. SALES FOR THREE CONSECUTIVE MONTHS SINCE LAST DECEMBER, TOYOTA OFFICIALS SAID MONDAY.

IF THE SALES CONTINUE AT ITS CURRENT PACE, IT IS ALMOST CERTAIN THAT TOYOTA, THE LARGEST JAPANESE AUTOMAKER, WILL BECOME THE TOP JAPANESE SELLER THIS YEAR IN THE U.S. MARKET, THE OFFICIALS SAID.

ACCORDING TO THE OFFICIALS, TOYOTA'S U.S. SALES IN FEBRUARY SURGED 58 PERCENT FROM A YEAR BEFORE TO SOME 64,600 VEHICLES, INCLUDING IMPORTED CARS.

HONDA'S SALES STOOD AT 61,000 VEHICLES, UP 13 PERCENT, THEY SAID. THE MAIN REASON FOR THE SURGE WAS THE GOING INTO FULL OPERATION OF TOYOTA'S U.S. PLANT IN LEXINGTON, KENTUCKY, AND AN ACCOMPANYING SALES DRIVE, THE OFFICIALS SAID.

AL WAGNER, VICE PRESIDENT OF TOYOTA MOTOR SALES, USA INC., SAID HE EXPECTS TOYOTA'S ANNUAL U.S. SALES TO REACH 1-1.1 MILLION VEHICLES THIS YEAR AGAINST THE 1989 SALES OF 923,000 VEHICLES.

IF TOYOTA ACCOMPLISHES THE ANNUAL SALES TARGET AS EXPECTED, THERE IS A POSSIBILITY THAT ITS U.S. SALES WILL TOP THOSE OF CHRYSLER CORP. IN 1990, POSING A MAJOR THREAT TO THE ''U.S. BIG THREE,'' INDUSTRY SOURCES SAID.

#90065k0075 03/06/1990 ~Japanese News Agency

SINGAPORE (MARCH 6) KYODO - JAPANESE AUDIO MANUFACTURER, AIWA CO., WHICH MAKES MORE THAN HALF ITS PRODUCTS IN SINGAPORE, IS PLANNING TO EXPAND ITS MANUFACTURING ACTIVITY HERE BUT IS WORRIED ABOUT THE LABOR SHORTAGE IN THE CITY STATE.

HAJIME UNOKI, DEPUTY PRESIDENT OF AIWA CO., TOLD A NEWS CONFERENCE THAT HIS COMPANY IS PLANNING TO INVEST MORE THAN 65 MILLION SINGAPORE DOLLARS

IN SINGAPORE OVER THE NEXT THREE YEARS TO STEP UP PRODUCTION CAPACITY.

UNOKI SAID HE PLANNED TO INCREASE AUTOMATION IN THE COMPANY'S THREE FACTORIES IN SINGAPORE AND DOUBLE THE NUMBER OF ENGINEERS WORKING IN THE COMPANY'S RESEARCH AND DEVELOPMENT CENTER HERE.

''THE REASON I'M HESITATING,'' HE SAID, IS TO CONSIDER ''WHETHER WE CAN ACHIEVE THIS OBJECTIVE.''

HE SAID HIS COMPANY WILL HAVE TO CONSIDER THE AVAILABILITY OF LAND AND LABOR IN SINGAPORE. ''WE FEEL IT'S VERY DIFFICULT TO ACQUIRE MANPOWER IN SINGAPORE,'' HE SAID.

LAST YEAR, AIWA MANUFACTURED 60 PERCENT OF ITS PRODUCTS IN SINGAPORE. LESS THAN 40 PERCENT -- MAINLY FOR THE JAPANESE MARKET -- WERE PRODUCED IN JAPAN, HE SAID.

''SINGAPORE IS NOT ONLY A MANUFACTURING AREA. I'M PUTTING A LOT OF EMPHASIS ON SINGAPORE AS A FINANCIAL CENTER,'' HE SAID.

''SINGAPORE IS LIKE A NERVE CENTER OF RESEARCH AND DEVELOPMENT OF THE ENTIRE AIWA PRODUCT LINE,'' HE ADDED.

UNOKI, WHO WAS IN SINGAPORE TO ATTEND AIWA'S INTERNATIONAL SALES CONFERENCE, ESTIMATED THAT HIS COMPANY ENJOYED A 30 PERCENT SALES GROWTH IN THE 1989 FISCAL YEAR.

#90065p0023 03/06/1990 ~PR Newswire

MELBOURNE, FL (MARCH 6) PR NEWSWIRE - The Goldfield Corporation (AMEX: GV) announced today net income of $2,637,177 ($.09 per share) for the year ended Dec. 31, 1989, compared to net income of $2,771,714 ($.09 per share) for 1988.

Total revenue for 1989 was $18,162,979, compared to $17,230,875 for 1988. For the year ended Dec. 31, 1989, the mining operations had revenue of $7,676,978 and an operating profit of $2,525,568, compared to $7,964,290 and $3,114,133, respectively, for the like period in 1988. Electrical construction earned contract revenue of $10,166,556 and had an operating profit of $1,556,146, compared to $9,125,955 and $1,069,422, respectively, for the like period in 1988.

For the quarter ended Dec. 31, 1989, Goldfield had total revenue of $4,554,820 and net income of $690,825 ($.03 per share), compared to $5,352,100 and $1,514,525 ($.05 per share), respectively, for the like period in 1988. For the quarter ended Dec. 31, 1989, the mining operations had revenue of $1,877,626 and operating profit of $786,369,

compared to $3,121,743 and $1,818,569, respectively, for the like period in 1988. Results of the 1988 period reflected an unusually high level of copper production and price. Electrical construction earned contract revenue of $2,475,811 and an operating profit of $280,229, compared to $2,176,255 and $112,665, respectively, for the like period in 1988.

As previously announced, the company reaquired from its lending bank the Getchell gold and Harlan coal royalties for $1,518,475. This transaction was completed effective Dec. 1, 1989. For the one month ended Dec. 31, 1989 the royalties produced $140,805.

John H. Sottile, president of Goldfield, stated that the company's performance in 1989 continued to reflect favorable results in both mining activities and electrical construction.

Sottile also noted that the effect of the completion in early 1990 of the company's mining joint venture with Cyprus Metals is expected to be offset at least in part, by ore production from its Midnight mine and income from the Getchell gold and Harlan coal royalties.

Goldfield is engaged in the business of mining base and precious metals and electrical construction.

#90065p0025 03/06/1990 ~PR Newswire

WASHINGTON (MARCH 6) PR NEWSWIRE - The State of California Department of Health Services Food and Drug Branch (FDB) has approved the first human

testing in the United States of a unique AIDS vaccine called HGP-30 that targets for destruction the heretofore unheralded p17 core protein of the AIDS virus.

The vaccine is designed to protect uninfected individuals from all strains of the deadly disease. Twenty-four healthy HIV-negative volunteers at Medical Centers in Los Angeles and San Francisco will receive escalating doses of HGP-30 and will be monitored for at least one year following the first injection.

The Phase I clinical trial will be conducted by Dr. Peter N.R. Heseltine (chief physician and hospital epidemiologist, LAC-USC Medical Center, and associate professor of medicine, U. Southern California School of Medicine) and Dr. James Kahn (assistant professor of medicine, UC-San Francisco and AIDS/Oncology Division at the UCSF-affiliated San Francisco General Hospital).

The vaccine for the California AIDS trials was jointly developed by Alpha 1 Biomedicals, Inc. (NASDAQ: ALBM) of Washington, and the Cel-Sci Corporation (NASDAQ: CELI) of Alexandria, Va. The vaccine is the first to be approved by the State of California FDB for testing in healthy HIV-negative individuals. HGP-30 is also the first AIDS vaccine to be tested in humans where the active component is a totally "man-made" synthetic molecule produced by solid-phase peptide synthesis. Because it contains no live or dead virus components, there is "no chance" that administration of HGP-30 could cause AIDS infection.

Dr. Allan L. Goldstein, Ph.D., of the George Washington University School of Medicine in Washington, headed the research team that discovered HGP-30. "For an AIDS vaccine to work," Dr. Goldstein explained, "it must neutralize the virus and also stimulate the body's immune system to destroy infected cells and thus prevent its replication." HGP-30 targets p17, a protein largely hidden in the virus "core" that is common to all strains and is found on the surface of infected cells. The p17 protein does not constantly mutate through a defensive process called "genetic drift." "Once successful immunization with HGP-30 is achieved," Dr. Goldstein said, "an individual should be protected from all the various strains of the AIDS virus."

The vaccine is different from other vaccines undergoing human trials in that its active component, HGP-30, is a synthetic version of a highly conserved region of the p17 inner "core" protein of the AIDS virus as compared to "envelope" proteins. "Core" proteins of the AIDS virus are able to effectively elicit T-cell mediated immunological responses and increase the number of "killer" T-cells. It is now thought that such "killer" T-cells working in combination with antibodies to the AIDS virus are essential for a successful vaccine.

Worldwide rights to HGP-30 are owned by Viral Technologies, Inc., a joint venture of Cel-Sci Corporation and Alpha 1 Biomedicals, Inc.

GAITHERSBURG, MD (MARCH 6) PR NEWSWIRE - Genex Corporation (NASDAQ: GENX) today announced a series of biotechnology products that will provide immunologists and cell biologists with new tools for studying cancer, immune diseases and other medical conditions.

Introduced and demonstrated at the 1990 Pittsburgh Conference and Exposition in New York (Booth 4963), the new products include:

- Anti-fluorescein SCA(tm) - A single-chain antigen-binding protein developed to facilitate the study of cell surface receptors;

- AdheraCell(tm) - a recombinant, engineered bioadhesive protein that provides an optimum environment for cell culture;

- Genex(R) System 100 - a biocompatible affinity purification system that provides researchers with an easy-to-use, automated method of purifying proteins;

- GammaBind Fab Separator - a recombinant, engineered protein used to isolate antibody fragments that are being studied to improve in vivo imaging and laboratory assays.

"By announcing the availability of a broad array of scientific research tools, Genex Corporation has successfully brought to market products resulting from its major areas of concentration, including single-chain antigen-binding proteins, bioadhesives and affinity proteins," said Donald Murfin, president of Genex Corporation. "This is significant since it

demonstrates our unique ability to understand and address the needs of scientists for efficient, timely and cost-effective tools for biomedical research."

Genex developed Anti-fluorescein SCA by using its proprietary protein engineering expertise in X-ray crystallography and 3-D computer modeling. Anti-fluorescein SCA has useful applications for researchers working with fluorescein labels in cytochemistry studies. SCA proteins lack the portion of conventional antibodies often associated with poor research results due to non-specific binding. In addition, SCAs are made by recombinant techniques to provide lot-to-lot reproducibility and economy often not possible with antibodies. The product is priced at $90/0.125 mg.

Genex's bioadhesive AdheraCell provides the solid surface support necessary for optimal growth of anchorage-dependent cells. This natural adhesive protein securely attaches cells to many surfaces under ideal growth conditions for cell culture. AdheraCell is priced at $95/2 mg and $230/5 mg.

Genex System 100, a fully automated, medium-pressure chromatography system was developed by Genex to provide researchers with a quick and user-friendly means of purifying proteins. The biocompatible system combines the sophistication and power of High-Performance Liquid Chromatography (HPLC) with the familiarity of open column techniques. It offers four modes of operation, including a programmable mode for customized applications and an automated mode that is optimized to allow antibody purifications in less than 30 minutes. The compact system occupies minimal bench space and is ideal for research, process development, quality control or production. Genex System 100 is priced at $16,500 complete with GammaBind(R) G Columns, buffers and recorder.

Genex also introduced the GammaBind Fab Separator for isolating human or rabbit IgG antibody fragments. Unlike other Protein G products, GammaBind Fab Separator was specifically engineered to bind only to the Fc region of IgG antibody, allowing high-yield purification of Fabs with a one-step procedure. Fab fragments are used to reduce undesirable false positives in lymphocyte studies and to conduct more specific fluorescent cell-staining assays. GammaBind Fab Separator is available in 5 ml and 25 ml sizes and is priced at $270 and $830, respectively.

In addition to the new products, Genex recently announced GammaBind Plus, the first form of Protein G engineered for increased binding of mouse monoclonal antibodies. Monoclonal antibodies are being investigated for diagnostic and therapeutic uses. The product is price at $295/5 ml and competitively priced in large quantities for production-scale use.

Genex Corporation is an applied biotechnology company that uses its proprietary protein engineering expertise to design, manufacture and

market specialized proteins and affinity protein products for the research diagnostic and process separations marketplace.

COATESVILLE, PA (MARCH 6) PR NEWSWIRE - Lukens (NYSE: LUC) Chairman and Chief Executive Officer W.R. Wilson, today announced the realignment of responsibilities of senior executive officers in the manufacturing and administrative functions of the corporation.

Wilson said the four operating groups of Lukens Inc. -- steel, safety products, corrosion protection and diversified -- will report to Harry I. Skilton, 51, newly elected president and chief operating officer of Lukens Inc. Albert W. Eastburn, 62, a Lukens Inc. senior vice president, continues as president and chief operating officer of Lukens Steel Co. John R.Bartholdson, 45, a senior vice president of Lukens Inc., was named president and chief operating officer of industrial operations. In his new position, he is responsible for the Safety Products and Corrosion Protection Groups and the materials- handling companies.

Robert Schaal, 47, Lukens Inc. senior vice president-administration, continues to report directly to Wilson. Staff and support services organizations reporting to Schaal include management information services, process control, engineering and environmental compliance services, human resources and corporate affairs.

In addition to Skilton and Schaal, the organizations continuing to report directly to Wilson include controller, legal, corporate secretary, treasury, and corporate growth.

Lukens Inc. is a multi-industry, "Fortune 500" company headquartered in Coatesville. Its subsidiaries provide plate steels, pipe coating services, cathodic corrosion protection services, heavy materials- handling equipment, industrial screening products and highway construction-zone safety products.

RICHMOND, VA (MARCH 6) PR NEWSWIRE - Circuit City Stores, Inc., (NYSE: CC) today announced record February sales of $143.2 million, which represents a 25 percent increase from February 1989 sales of $114.3

million and includes a 4 percent increase in comparable store sales.

The company also announced record sales for the fiscal year ended February 28, 1990. Total sales for the fiscal year were $2.10 billion, a 22 percent increase from $1.72 billion in fiscal 1989. Comparable store sales increased 2 percent for the year.

"February's comparable store sales increase exceeded our expectations and was produced despite a strong prior year comparison. Sales were aided by unseasonably warm weather," said Richard L. Sharp, Circuit City's president and chief executive officer. "We believe that the overall environment for consumer durable sales continues to be weak, and we remain conservative in our sales expectations for the coming months.

"The success of our geographic expansion again produced strong total sales growth," said Sharp. "This trend should continue in fiscal 1991 as we increase our share in the five new markets entered last year and expand into Cincinnati, Ohio, and St. Louis, Mo."

Circuit City Stores, Inc. is the nation's largest specialty retailer of brand-name consumer electronics and major appliances. With headquarters in Richmond, Va., it operates 125 Superstores, 20 Circuit City stores and four Impulse mall stores in the Eastern United States and in California, Nevada and Arizona.

SAN JOSE, CA (MARCH 6) PR NEWSWIRE - Radius Inc., the leading manufacturer of high resolution graphics display systems and graphics engines for personal workstations, today introduced the Radius Pivot(TM). The Radius Pivot is the only display for Macintosh that provides both portrait (vertical) and landscape (horizontal) orientations in a single display. The Radius Pivot Display System is available immediately and lists for $1,690.

The Radius Pivot mechanical design includes special weights which balance the display during and after reorientation. To ensure that the display characteristics remain unchanged when the orientation changes, a uniquely designed magnetic shield which isolates the deflection circuitry from the Earth's magnetic field had to be developed. The internal circuitry has been laid out to allow optimum cooling in both orientations and the EMI shielding performs equally well in either portrait or landscape mode.

RadiusWare Pivot, proprietary Radius system software included with the display system features Tear-off Menus, Screen Capture, Bit Depth Changer,

Screen Saver and Enlarged Menu Font.

Pivot will display 2 or 4 shades of gray and may be upgraded to 16 shades of gray with the addition of the Radius Gray Shades Upgrade Kit.

The Pivot full page 640 x 864 portrait and 864 x 640 landscape resolution minimizes scrolling and window resizing. The high 69Hz refresh rate creates flicker-free images in either display orientation.

The Radius Pivot Interfaces for the Macintosh SE/30 and Macintosh II family of computers takes full advantage of Pivot's dual orientation capability. In addition, Pivot will operate in portrait-only position when configured with a Radius FPD Interface. Radius FPD Interfaces are available for the Macintosh Plus, SE, SE/30 and II family. Price and Availability

The Radius Pivot Display carries a suggested list of $995. The Radius Pivot Interface for the Macintosh SE/30 and Macintosh II family of computers lists for $695. The Radius Gray Shades Upgrade Kit which will upgrade Pivot from 4 to 16 shades of gray lists for $150. Radius FPD Interfaces for the Macintosh Plus, SE, SE/30 and II family list for $595.

The Radius Pivot Display system is available immediately worldwide through Radius Authorized Resellers.

ANKENY, IA (MARCH 6) PR NEWSWIRE - Strong gasoline volume contributed to record sales for Casey's General Stores (NASDAQ: CASY) in the convenience store chain's fiscal third quarter ended Jan. 31. Sales were up 20.6 percent from a year ago, while earnings advanced by 14.6 percent.

Chairman and CEO Donald F. Lamberti said Casey's expects to end the current fiscal year stronger than a year ago, when the company experienced a fourth-quarter earnings loss due to inventory adjustments at the store level.

Sales for the third quarter were $120.4 million, compared to last year's $99.9 million. For the nine months, sales reached a record $381.9 million, up 21.9 percent over $313.4 million in sales last year.

Earnings in this year's third quarter totaled $2.0 million, or 17 cents a share, compared to $1.7 million, or 15 cents a share in the 1989 fiscal third quarter. For the nine months, Casey's earnings were $7.8 million, or 68 cents a share, compared to $8.2 million, or 72 cents a share last

year.

Casey's gasoline sales grew by 22.8 percent in the third quarter. Casey's sold 58.6 million gallons, compared to 47.7 million a year ago. Lamberti attributed the gain to competitive pricing and new merchandising techniques.

"At many stores, we're now offering customers three grades of unleaded gasoline, including one with ethanol," Lamberti said. "Our customers appreciate the broader selection. Many are choosing the super unleaded blend with ethanol, a product that is good for the environment and good for agriculture in the Midwest."

New stores will include canopies and multi-product gasoline pumps. Casey's plans to update l00 existing stores with these new gasoline features over the next 12 to 24 months.

Casey's opened 11 new stores during the quarter. As of Jan. 31, the company had 762 stores in its eight-state market area, 557 corporate-owned units and 205 franchise outlets.

EVERETT, WA (MARCH 6) PR NEWSWIRE - Cornerstone Columbia Development Co. launched a major new development thrust today with the purchase of Seaway Center, one of the five major business parks in The Technology Corridor. Long known for its pioneering urban redevelopment projects in downtown Seattle, Tacoma and Portland, Cornerstone Columbia has made a major commitment to suburban office and industrial development. Cornerstone Columbia plans to invest over $100 million annually in suburban development ventures, including approximately 200,000 square feet (sq. ft.) of buildings it will construct at Seaway Center beginning this July.

Seaway Center is a 301 acre master-planned business park located just north of Paine Field in southwest Everett. Cornerstone Columbia acquired from HDMC Development 98.3 acres of the park and the rights to acquire the remaining acreage. Cornerstone Columbia has also acquired the right to purchase an additional 23-acre parcel in Seaway Center from H & MV Associates that had been sold earlier by HDMC. HDMC first announced the formation of Seaway Center in 1986.

In a separate transaction, Cornerstone Columbia has acquired the 56-acre Merrill Creek parcel adjoining Seaway Center from Merrill Creek Associates and will add its acreage to the business park.

Seaway Center is located just two miles west of Interstate 5 with State Route 526 providing the principal access. The business park counts John Fluke Manufacturing, Intermec and the Boeing Company as its immediate neighbors. The Applied Technology Training Center, a training center for high tech industries that is a joint venture of The Technology Corridor and the Everett and Edmonds Community Colleges, is located at the entrance to Seaway Center on Seaway Boulevard.

In the purchase of Seaway from HDMC Development, which closed Feb. 22, Cornerstone Columbia acquired 98.3 buildable acres and a option on another 35.5 acres. Both figures are quoted net of all set asides for open space, wetlands and forest preserves.

As one of the five business parks in The Technology Corridor, Seaway Center is part of one of the most successful marketing and private economic development stories on the West Coast. Founded in 1985 by private developers who saw a commonality in their master- planned business parks, The Corridor has attracted over 200 companies and occupied over 3 million square feet of office and industrial space. Much of that growth has come from the region's booming high technology industries.

MIAMI (MARCH 6) PR NEWSWIRE - Baker Cummins Pharmaceuticals, Inc., a wholly owned subsidiary of IVAX Corporation (AMEX: IVX), announced today the national launch of the new prescription hypnotic agent, Doral. The combined sales forces of Wallace Laboratories, a division of Carter-Wallace, Inc. (NYSE: CAR), and Baker Cummins Pharmaceuticals will call on physicians, drug chains, independent pharmacies, hospitals, wholesalers and buying groups.

Doral, a new benzodiazepine hypnotic agent, is currently being marketed in several European countries by Schering-Plough Corporation.

Dr. Phillip Frost, chairman of IVAX Corporation, said, "The entire team at Baker Cummins Pharmaceuticals is quite enthusiastic about the opportunity to introduce this important new drug to help those who suffer from sleep problems. We are particularly pleased to be working with Wallace Laboratories, known for its high level of professionalism in achieving sales goals."

IVAX Corporation is a holding company consisting of four operating divisions: IVAX Industries, Inc., a chemical specialties business; Baker Cummins Pharmaceuticals, Inc., a pharmaceuticals company; Best Generics,

Inc., a distributor of generic pharmaceuticals; and Diamedix Corporation, a medical diagnostics company.

#90065p0049 03/06/1990 ~PR Newswire

TAMPA, FL (MARCH 6) PR NEWSWIRE - Nutmeg Industries, Inc., (NASDAQ: NUTM) today reported net sales of $50,706,000 for the fiscal year ended January 27, 1990, a 26.4-percent improvement over the previous year's sales of $40,127,000.

Net income for the 1990 fiscal year, after one-time pre-tax charges of $1,643,000, was $293,000 or $.05 per share compared to $3,219,000 or $.60 per share in fiscal 1989. Included in the fiscal 1990 results is the cumulative effect on prior years of a change in accounting principle of $113,000 or $.02 per share.

For the fourth quarter ended January 27, 1990, net sales were $10,818,000 compared with $10,408,000 in the fiscal 1989 fourth quarter. The company reported a $1,868,000 net loss or $.28 per share in the fiscal 1990 fourth quarter after the one-time charges referred to above, compared with net income of $516,000 or $.10 per share in last year's fourth quarter.

Richard E. Jacobson, Nutmeg chairman and chief executive officer, said that the fiscal 1990 results were "obviously disappointing" despite the 26.4-percent sales increase. He said that the one-time charges, which decreased net income for the year by $1,027,000, included the write-off of unfavorable production cost variances generated primarily as a result of the previously reported shortfalls in sales the company experienced in the latter part of fiscal 1990. He added that the one-time charges also included reserves provided to cover anticipated losses in connection with the company's decision to accelerate the disposition of excess inventory.

Mr. Jacobson went on to say, "We have endured a year of substantive growing pains. We believe, however, that we enter fiscal 1991 a much stronger company. We have enhanced our computer capabilities, added key managers to an already strong and dedicated team and substantially improved our balance sheet. Our new 'Saturday's Hero' joint venture, we believe, will prove to be very profitable. Our current backlog, including the new 'Saturday's Hero' joint venture, stands at approximately $20 million compared to $13 million at this time last year. We believe the results of our efforts will become more evident as the year progresses."

Nutmeg Industries designs, manufactures and markets high-quality sportswear bearing the insignias, names, colors, cartoon characters or

other identifying symbols that various organizations have authorized the company to use. The company distributes its products to department and sporting-goods stores and specialty retailers under the "Nutmeg Mills" label and, through a joint venture it controls, to mass merchants and chain stores under the "Saturday's Hero" label.

NEW YORK (MARCH 6) PR NEWSWIRE - Members of the Writers Guild of America, East and West, voting at meetings last night (March 5) in New York, Washington, D.C., Chicago and Los Angeles, overwhelmingly approved the agreement recommended by their negotiating committee, the WGAE Council, and the WGAW board of directors for a new three-year contract with CBS covering network and local television and radio newswriters (some of whom also serve as producers), editors, desk assistants, researchers, promotion writers and graphic artists. The vote was 87.2 percent in favor of approval, 12.8 percent against.

The 325 employees covered include Writers Guild, East, news staffers at CBS network TV and radio in New York and Washington (including Guild members at "CBS Evening News with Dan Rather," "CBS Morning News," and other CBS network TV and radio shows); at WCBS-TV and WCBS Radio, New York; and at WBBM-TV and WBBM Radio, Chicago; Writers Guild, West, news staffers at KCBS-TV and KNX Radio in Los Angeles; and WGAE promotion writers in New York and WGAW promotion writers in Los Angeles.

The agreement, providing wage increases, increases in special fees, improvements in employee safety, and other benefits, is retroactive to March 2, 1990. The new pact succeeds the three-year contract that was signed in 1987 following a bitter seven-week strike against CBS by the Writers Guild, East and West.

Mona Mangan, executive director of the Writers Guild of America, East, who was chief negotiator in the talks, said, "The overwhelming votes of approval for this contract and earlier for the ABC contract are most gratifying. We are pleased with the outcome of both negotiations. The networks seem to have learned from three years ago when their unyielding attempts to gut our contract left our members with no alternative except to strike. This is a welcome change."

WGAW Executive Director Brian Walton stated: "We are pleased an agreement has been reached, pleased that CBS showed a businesslike flexibility and did not force the members to strike. We note that in recent years several significant union contracts, including this one, have been concluded without the necessity of a work stoppage. Perhaps employers in our industry have come to recognize that there is 'a better way' that makes sense for everyone."

ALLEN, TX (MARCH 6) PR NEWSWIRE - Matra Communication and Wang Laboratories, Inc. (AMEX: WAN) today announced that they have signed a letter of intent under which Matra Communication would acquire InteCom, Inc., a wholly owned subsidiary of WANG and a premier manufacturer of integrated voice/data switching equipment. The closing is expected by April, 1990.

Maurice Remy, chairman of Matra Communication commented, "We are excited about the opportunities this acquisition can provide us. The synergies between Matra Communication and InteCom create a powerful combination of R&D resources and complimentary product lines and technology that can leverage our economies' scale. Among its assets, InteCom has a solid installed base of major accounts and strong U.S. sales distribution channels that supports MATRA's goal to penetrate the North American marketplace."

InteCom, Inc. will continue operations under the same name as a subsidiary of Matra Communication. It will be headed by its current president and chief executive officer Thomas R. Mayer. Headquartered in Dallas, InteCom has revenues of approximately $75 million in PBX sales.

Mayer commented, "InteCom is very excited at becoming a part of a company the size and stature of Matra Communication, which has achieved great prominence in the European telecommunications market. MATRA's contribution will create enhanced opportunities for our employees and will allow us to significantly expand the products, service and capabilities we offer our customers at both the domestic and international level.

Headquartered in Paris, Matra Communication is the telecommunications subsidiary of MATRA, S.A. with sales of more than $850 million (4.850 billion French francs), a work force of more than 7,000 people, and seven manufacturing facilities in France and abroad. Matra Communication is France's second-largest telecom supplier.

InteCom is a leading supplier of technologically advanced voice/data switching systems. InteCom manufactures and markets the TELARI and Integrated Business Exchange (IBX) systems, ranging in size from 300 to 21,000 voice/data lines.

CHARLOTTE, NC (MARCH 6) PR NEWSWIRE - CCAIR, Inc., doing business as USAir Express (NASDAQ: CCAR), today reported a 12.5 percent increase in passenger boardings in February 1990 when compared to the same month of 1989. Advance passenger reservations for the next 30 days have increased approximately 11 percent per week since mid-February, 1990.

The Company also reported an approximate $13.00 increase in revenue per passenger ticket in February, 1990 as compared to December, 1989.

In addition, the Company announced that it has reached agreement with its two largest creditors, who account for more than half the airline's current liabilities. The agreements provide for a workout of past due accounts while the Company is attempting to return to profitability.

CCAIR operates 252 flights in 23 cities, daily, in 6 southeastern states and employs 692 people.

	February		
	1990	1989	Change

#90065p0057 03/06/1990 ~PR Newswire

WEBSTER, NY (MARCH 6) PR NEWSWIRE - Photographic Sciences Corporation (NASDAQ: PSCX) today reported that sales for the year ended Dec. 31, 1989, totaled $12,210,000, a 20 percent increase over the previous year's sales of $10,137,000.

Net income for 1989 rose to $353,000 compared to a net loss of $181,000 in the prior year, an increase of $534,000 according to L. Michael Hone, president and chief executive officer. The increase included $145,000 of non-recurring income related to disposal of assets. "We are very pleased to see continued strong growth in our core bar code equipment business," stated Hone. "Revenues from sales of our bar code products alone grew at a rate of 151 percent for the quarter and 67 percent year to date, compared with the comparable period in 1988."

The company reported that sales revenues for the fourth quarter of 1989 were $3,916,000, an increase of 54 percent over the previous year's final quarter. Profits for the period improved to $142,000 from a fourth quarter 1988 loss of $118,000.

Hone also said that earnings per share data for the year were $.07, up from a negative $.04 per share in 1988. He observed that the expanding market for all bar code products including the PSC scanners, as well as the new line of PSC Quick Check (TM) bar code verifiers, contributed to 1989's performance.

"We are encouraged by the progress we made in 1989 and feel we can continue to keep pace with the industry in the future," he stated.

Photographic Sciences Corporation is a leading manufacturer of equipment serving the worldwide bar code industry with principal manufacturing operations based in Webster. Its products include hand- held bar code laser scanners, bar code verifiers, interface wedges, decoders and bar code film masters.

SANTA ANA, CA (MARCH 6) PR NEWSWIRE - Southland Communications Inc. (NASDAQ: SCII) is commencing a private placement which is intended to raise up to $5 million. The private placement is being offered to a select group of foreign investors. A portion of the proceeds from the private placement is intended to be used to finance the acquisition of A+ Beepers of California, with the majority of the balance of such proceeds to be used as working capital. The company believes that it will close

such a placement by the end of March 1990.

The company also announced that it has reached an agreement in principle for the acquisition of A+ Beepers of California for a combination of stocks and notes. The consummation of the acquisition is subject to the execution of a definitive merger agreement and other conditions. The company believes that it will consummate such an agreement shortly after the closing of the private placement memorandum.

The combined entities will have approximately 75,000 pagers in service, thus ranking the new company among the top five paging companies in California. The synergies that exist between both companies will provide for a higher cash flow once both companies are fully integrated.

Southland Communications Inc. does businees as National Paging, providing electronic paging services for individuals and business subscribers.

TALLAHASSEE, FL (MARCH 6) PR NEWSWIRE - Coastal Caribbean Oils & Minerals Ltd. (Boston: CCO-B; CCO-BN) today reported that its 14.5-million-share

common stock offering to shareholders ended last week, with about 30 percent of the new shares sold.

The offering, which terminated on February 26, entitled shareholders to purchase one new share for every two shares held of record (as of January 8) at a subscription price of 20 cents a share, with an oversubscription privilege available to participating shareholders.

The company said its shareholders subscribed for approximately 4.3 million shares; that all the shares subscribed for are being issued; and that the subscription agent, American Stock Transfer & Trust Company, is now mailing new stock certificates to participants.

A Coastal Caribbean spokesman said that, as a result of the offering, the company now has in excess of $1.2 million in working capital with which to fund the near-term legal and exploration expenses of its 90-percent-owned subsidiary, Coastal Petroleum Company.

The spokesman also noted that Coastal Petroleum Company has applied for a permit from the Florida Department of Natural Resources to perform a geophysical gravity survey on the northern portion of the company's state drilling lease 224-A, specifically, in the offshore working- interest area (and in the federal waters to seaward) adjacent to Gulf, Franklin, Wakulla Jefferson, Taylor, and Dixie Counties.

The objectives of the survey is to delineate known structural features that extend through state waters and to pin-point associated oil and gas prospects in the prolific Smackover formation, the spokesman said.

TROY, MI (MARCH 6) PR NEWSWIRE - R.P. Scherer Corporation announced today that it will commence expansion of its softgel operation in Kakegawa, Japan.

In making the announcement, the company said that the expansion is in response to the significant growth of its Japanese operation and further evidence of Scherer's commitment to the Japanese market. In addition to installing additional capacity, the expansion will bring the Kakegawa plant in full compliance with the future anticipated regulatory requirements for the Japanese pharmaceutical market, the world's second-largest. Scherer expects to complete the expansion by the end of the current calendar year.

Scherer established its Japanese operation in 1979.

R.P. Scherer is a leading developer and manufacturer of drug dosage delivery systems. Scherer's proprietary and patented dosage delivery systems optimize the efficacy of drugs by regulating dosage, rate of absorption, and place of release. In addition to being the world's largest developer and manufacturer of softgels, Scherer's drug dosage delivery range includes the patented Scherersol(R) and Zydis(R) systems. The company operates a global network of 14 facilities in 13 countries.

R.P. Scherer is now a subsidiary of RPS Corporation (OTC: RPCPP).

NEW YORK (MARCH 6) PR NEWSWIRE - United Capital Corp. (AMEX: ICU) announced today that it plans to sell the operations conducted through its Metex Corporation subsidiary.

Metex has two main operating divisions: Dorne & Margolin, which designs and manufactures airborne antenna systems and satellite communication antenna systems for military, commercial and general aviation customers, and Technical Products, which manufactures knitted metal products with applications in high temperature and/or corrosive environments for automotive and industrial markets. Metex has a third operating division, a transformer business that sells to manufacturers of heavy-duty motor controls.

United Capital will use the proceeds from the sale to continue the growth and diversification of its real estate portfolio.

The company has engaged Donaldson, Lufkin & Jenrette Securities Corporation to act as financial adviser in connection with the sale.

BARTLESVILLE, OK (MARCH 6) PR NEWSWIRE - Phillips Petroleum Company today announced it has completed a Hydrisom process design for the Petromin-Mobil Yanbu Refinery Company Ltd. (PEMREF), a joint company owned 50 percent by Mobil Oil and 50 percent by Petromin, the Saudi General Petroleum and Mineral Organization. The Hydrisom unit would be installed at the PEMREF refinery in Yanbu, Saudi Arabia.

Hydrisom is Phillips Petroleum's selective diolefin hydrogenation process, with specific isomerization of butene-1 to butene-2. The Hydrisom unit selectively hydrogenates butadiene from the refinery's fluid catalytic cracking unit (FCCU), using a liquid-phase reaction over a commercial catalyst in a fixed bed reactor.

The Hydrisom unit will be built upstream of PEMREF's already operating Alkylation unit -- also developed by Phillips Petroleum -- to upgrade olefins to gasoline, thereby boosting refinery income.

The Hyrdisom process was developed by Phillips Petroleum Corporate Engineering and Research & Development groups, with the help of Phillips 66 personnel at the company's Sweeny refinery, where the process and unit design were proven.

Hydrisom, Alkylation and other proprietary, profit-enhancing refining processes are available for licensing from Phillips Petroleum.

CONTACT: George Bukota or Tim McCormack of G+A Communications, 212-221-2267, for Phillips Petroleum.

FAIRFAX, VA (MARCH 6) PR NEWSWIRE - Mobil Oil Corporation has won a $22.4 million, five-year contract to supply lubricants and engineering service to the U.S. Navy's Military Sealift Command (MSC).

This is the first time the Navy's supply support group has awarded a worldwide contract to one supplier for commercial brand lubricants.

Mobil will supply 13 different products, estimated to be in excess of one million gallons in the first year, to 110 ports. Approximately 85 vessels ranging in size from a 2,000 deadweight-ton oceangoing tugboat to a 40,000 deadweight-ton oil tanker will be supplied. The products include diesel engine oil, gear oil, hydraulic oil, steam turbine lubricating oil and synthetics. All these products are commercially available.

The MSC's industry-wide request was for a single supplier of lubricating oils who could also test and analyze oil from MSC ships. Mobil's response focused on its ability to provide the wide range of needed lubricants on a worldwide basis. Mobil also agreed to provide the shipboard lubricating and hydraulic oil testing and analysis equipment that could meet the specific needs of MSC vessels operating under extremely demanding conditions. Added factors were Mobil's ability to provide hands-on training of MSC personnel regarding lubricant condition monitoring techniques and the field engineering service capability of Mobil worldwide.

PARK RIDGE, NJ (MARCH 6) PR NEWSWIRE - Ron Sommer will join Sony Corporation of America as deputy president, a new position, it was announced today by Neil Vander Dussen, president and chief operating officer.

Sommer has been with Sony Deutschland GmbH, Cologne, since 1980 and was named president in 1986. He will leave Sony Deutschland GmbH and join Sony Corporation of America effective April 1.

"We are very pleased to have an individual with the leadership ability and talent of Ron Sommer join Sony's management team in America," Vander Dussen stated. "For the past several years, our company has grown at twice the rate of the consumer+electronics industry, and we expect to accelerate that growth in the years to come. Ron's experience and management skill will help us accomplish that goal."

Commenting on this appointment, Masaaki Morita, chairman and chief executive officer of Sony Corporation of America, said, "To be successful, global corporations like Sony must fully utilize the accumulated skills of its international management.

"Ron Sommer's appointment to Sony Corporation of America's management team adds an important new dimension to Sony's long-term strategy of globalization.

ATLANTA (MARCH 6) PR NEWSWIRE - Manville Corp. (NYSE: MVL) announced recent results from two ground-breaking research studies involving the fiber release characteristics of man-made and organic fibers, and fiber solubility.

In a presentation before the American Society of Heating, Refrigeration and Air Conditioning Engineers (ASHRAE) here, William B. Bunn, M.D., J.D. M.P.H.; senior director, health, safety and environment for Manville; provided details of the company's research.

The first study tested the fiber release from fiber glass and organic air filters. The results show that the levels released by organic fiber and

fiber glass air filters are extremely low. "The levels are literally millions of times lower than the levels of fibrous glass which has been tested in laboratory animals that did not produce disease," Bunn said. An additional study revealed both media reduce the total number of fibers in ambient air.

The second test studied fiber solubility to predict its persistence in the lung. The study showed that organic fibers, such as polycarbonate (used by organic fiber companies like Viledon) used to manufacture air filters, were much more durable than fibrous glass. It was also more durable than asbestos, which was used as a positive control. For instance, at six months, no dissolution of the organic fibers could be documented. Fibrous glass dissolved much more rapidly with 30 to 70 percent of the fiber dissolving in the six month study.

"From our unique history we have learned that we must test our products for health and safety affects," Bunn said. "Although performing many studies may lead to results requiring difficult interpretation, Manville is committed to performing all indicated testing and making those results available in a timely manner to the appropriate governmental agencies, our customers and those who work with our products."

"Manville also is committed to testing organic fibers in both in- vitro and animal inhalation studies similar to our testing of fibrous glass products," Bunn said.

"As we have stated many times before, Manville will never knowingly produce any product which cannot be manufactured and used safely when appropriate work practices are followed," added Bunn.

Founded in 1858, Manville is an international manufacturing and natural resources company with businesses in paper and wood products, fiber glass, roofing systems and filtration and minerals. Headquartered in Denver, Manville employs more than 17,000 people at 60 facilities worldwide.

NEW YORK (MARCH 6) PR NEWSWIRE - A new delivery system technology is now available to end vaginal dryness, a medical problem suffered by nearly every woman at some point in her life. The non-hormonal product, called Replens(R), works by using a polymer -- polycarbophil -- to deliver moisture to the vagina, eliminating dryness for up to three days at a time Columbia Laboratories, Inc. (AMEX: COB) announced today.

A first in its field, Replens is unique in that it features the latest

delivery system -- bioadhesive technology. This technology delivers moisture to the vagina, coating the surface and continually moisturizing the vaginal tissue. Previously, women only had lubricating gels which enabled them to have sexual intercourse but didn't replenish moisture to the tissue for continuous relief.

Currently more than 50 million women in the United States suffer from vaginal dryness, and 40 percent of all women experience painful sexual intercourse due to the condition. Additional symptoms of vaginal dryness include itching, irritation, and a feeling of pressure and discomfort when wearing tight fitting pants.

Replens is marketed by Columbia Laboratories, of Miami, which holds the patent on the system's unique bioadhesive technology.

Replens is available without a prescription at pharmacies nationwide. It is sold in convenient packs of 12 disposable vaginal applicators. Each applicator provides up to three days relief from vaginal dryness. Replens cost is under $20.00 for a one-month supply.

ATLANTA (MARCH 6) PR NEWSWIRE - Vista Resources Inc. (NASDAQ-NMS: VIST) today reported a 52 percent increase in net income for 1989.

For the year ended Dec. 31, 1989, net earnings totaled $2,608,312 or $.70 per share compared to $1,714,673 or $.46 per share for 1988. Total sales for 1989 of $70,417,271 represented an all-time high for Vista's leather operations and were up 25 percent from 1988's revenues of $56,255,420. All per share numbers reflect the 400 percent stock dividend paid on Aug. 4, 1989.

For the fourth quarter, net income was $1,320,160 or $.35 per share vs. $662,732 or $.18 per share for the same period in 1988. Sales for the quarter were $19,964,937, a 21.5 percent increase over 1988 fourth quarter sales of $16,426,539.

Robert S. Prather Jr., president and chief executive officer stated: "We are very pleased with our operating results for 1989. We have an excellent management team heading our leather operations and we have made the necessary capital improvements to allow us to continue our growth into the future."

VISTA RESOURCES INC.

Year ended Dec. 31	1989	1988
Net sales	$70,417,271	$56,295,420
Income before federal income taxes	$ 2,877,312	$ 2,295,673
Federal income taxes	269,000	581,000
Net income	$ 2,608,312	$ 1,714,673
Net income per share	$ .70	$ .46
Shares used in computing net income per share	3,719,204	3,712,170

3 mos. ended 12/31	1989	1988
Net sales	$19,964,937	$16,426,539
Income before federal income taxes	$ 964,160	$ 911,732
Federal income taxes	(356,000)	249,000
Net income	$ 1,320,160	$ 662,732
Net income per share	$ .35	$ .18
Shares used in computing net income per share	3,735,023	3,712,170

Notes:

1. Shares used in computing net income per share are based on the average number of shares outstanding, plus common stock equivalents, all adjusted for the 400 percent stock dividend paid on Aug. 4, 1989. 2. Included in income before federal income taxes in 1989 was a charge of $500,000, representing severance benefit to a former officer and director of the company. 3. Included in federal income taxes in 1989 and the three months ended Dec. 31, 1989 was a credit of $630,000, representing an adjustment of estimated liabilities provided in prior years. 4. Included in income before federal income taxes in 1988 was $209,684, representing the excess of the assets in two terminated pension plans after distribution to employees of benefits earned by them and after providing for the related excise tax.

DALLAS (MARCH 6) PR NEWSWIRE - Comstock Resources, Inc. (NASDAQ-NMS: CMRE) (the company) announced today that it has completed the second phase of a real estate property exchange with certain holders of six percent notes payable of the company, which when combined with an earlier reported transaction, results in the retirement of over $1,466,000 in debt obligations that were payable in full on Dec. 31, 1990.

The second phase of the exchange was completed in March 1990, and accordingly the company will report a retirement of approximately $965,000 in debt obligations with a resulting gain on the sale of approximately $369,000 as part of the first quarter 1990 financial results. The company completed the first phase of the exchange in September 1989, and accordingly previously reported the retirement of approximately $501,000 in debt obligations as well as a gain on the sale of approximately $227,000.

M. Jay Allison, president and chief executive officer said that the combined property exchanges are extremely beneficial to the company because the transactions not only eliminate a significant obligation from current cash flow requirements, but also result in combined gains on the sales of approximately $596,000.

Allison stated, "These property exchanges are part of the company's ongoing business plan to sell all of the Nevada assets (except the company's patented and unpatented gold and silver claims). The company still owns approximately 1,000 acres of undeveloped land, 100 town lots and three multi-tenant rental properties, most of which it intends to sell for cash in 1990 to unrelated third parties, resulting in additional gains

on the sale of real estate," declared Allison.

Comstock Resources, Inc. owns and manages cash producing assets in oil, casinghead and natural gas, precious metals and real estate, with subsidiary operations since 1865. The oil and gas portfolio represents the company's primary income stream and currently includes ownership interests in more than 90,000 acres and nearly 400 properties in four states.

LIVERPOOL, N.Y. (MARCH 6) PR NEWSWIRE - Fay's Incorporated (NYSE: FAY) today reported financial results for the year and fourth quarter ended Jan. 27, 1990. The Jan. 27 year end reflects the adoption of a change in Fay's fiscal year end from Jan. 31 to the last Saturday in January.

Net earnings for the year were $10.4 million or $.68 per share, compared to $10.0 million or $.66 per share in the prior year. Revenues for the year increased 9 percent to $574.1 million, compared to $526.6 million a year earlier.

For the fourth quarter, net earnings were $3.5 million or $.23 per share, compared to $4.8 million or $.32 per share earned in the fourth quarter of fiscal 1989. Revenues for the quarter increased 7.9 percent to $161.7 million from $149.9 million in the fourth quarter of last year.

Per share figures have been adjusted for a 10 percent stock dividend distributed July 3, 1989.

Henry A. Panasci Jr., chairman of the board of Fay's, stated, "Soft sales of seasonal merchandise in the fourth quarter, resulting in larger than expected markdowns, negatively impacted operating results for the quarter. In addition, increases in adminstrative costs associated with the company's store expansion program and increases in operating expenses to support implementation of point-of-sale systems affected results for the quarter. I am confident that our marketing approach in all divisions and the measures being undertaken to contain expansion costs will result in Fay's re-establishing its consistent pattern of profitable growth witnessed over the last several years."

During the fiscal year, Fay's opened 11 super drug stores, 8 Wheels Discount Auto Supply stores, 3 Paper Cutter stores and purchased 11 bantam drug stores. In addition, six super drug stores were relocated and/or enlarged. One of the super drug stores opened during the year was a result of the conversion of a previously acquired bantam drug store. At year end, Fay's operated 174 drug stores in the states of New York and Pennsylvania, together with 24 Wheels Discount Auto Supply stores in the state of New York and 17 Paper Cutter Stores in the states of New York and Pennsylvania.

On Jan. 26, the Fay's board of directors declared a regular quarterly cash dividend of $.05 per share on the company's shares of common stock, payable April 13, 1990 to shareholders of record as of the close of business on March 30, 1990.

HAIFA, ISRAEL (MARCH 2) PR NEWSWIRE - Elscint Ltd. (NYSE: ELT) today announced completion of the agreement with the consortium of its creditor banks (the "banks"). Under the agreement, as previously disclosed, the banks exercised warrants held under a 1986 debt restructuring agreement and received 31,235,104 ordinary shares, or 44.3 percent, of the total Elscint ordinary shares outstanding. In exchange, the banks released Elscint from $50 million of its indebtedness. The agreement also provides for extending the term of the remaining credit and financing facilities of the company.

In a concurrent transaction, also announced previously, Elron Electronic Industries Ltd. (NASDAQ: ELRNF) converted its Elscint preference shares into 12,494,041 Elscint ordinary shares, thus increasing its shareholdings in Elscint to 17,401,717 ordinary shares, or 24.6 percent, of the total outstanding share capital.

In an immediately subsequent transaction, Elbit Computers Ltd. (NASDAQ: ELBTF), purchased the Elscint ordinary shares held by both the banks and Elron. Consequently, Elbit now holds 48,636,921 Elscint ordinary shares, or 68.9 percent, of the total share capital. The Elscint board of directors is considering the acquisition of restricted shares by certain key Elscint employees. If realized, Elbit's holdings may be reduced to about 63 percent.

Elbit has also undertaken to guarantee certain Elscint debt not guaranteed by other parties, and to invest a further $10 million in Elscint during the next two years.

Elscint Ltd. designs, manufactures, distributes and services medical diagnostic imaging equipment for selected international markets.

ARLINGTON, VA. (MARCH 6) PR NEWSWIRE - J. Keith Moyer, executive editor of the News-Press at Fort Myers, Fla., today was named editor of the Arkansas Gazette at Little Rock.

Moyer succeeds Walker Lundy, who becomes a general news executive at Gannett Co., Inc.

Moyer, 37, last year was chosen editor of the year in the annual Best of

Gannett competition. In 1988, under his leadership, the News- Press won the outstanding achievement award, recognizing the best newspaper over 40,000 circulation in the community newspaper division.

Moyer has been executive editor in Fort Myers since August 1986. A graduate of the University of Florida, Moyer began his newspaper career at the Tampa (Fla.) Times. He moved to the Lakeland (Fla.) Ledger, and in 1980 joined Gannett and the News-Press. In 1982, he was named features editor at the Rochester (N.Y.) Times-Union, and in 1984 moved to Westchester-Rockland Newspapers (N.Y.), where he was managing editor.

Lundy, 47, joined Gannett and Little Rock in January 1988. His career began at the Detroit Free Press, and he has held editing roles there, at the Charlotte (N.C.) Observer, the Tallahassee (Fla.) Democrat, and the Fort Worth Star-Telegram. In his new corporate assignment, he will work with Philip Currie, vice president-news, in the newspaper division.

Gannett is a nationwide news and information company that publishes 82 daily newspapers, including USA Today, and 52 non-daily publications, including USA Weekend, a newspaper magazine. It operates 10 television stations, 16 radio stations, Gannett News Services, and the largest outdoor advertising company in North America.

Gannett also has marketing, television news and program production, research satellite information systems, and a national group of commercial printing facilities. Gannett has operations in 40 states, the District of Columbia, Guam, the Virgin Islands, Canada, Great Britain, Hong Kong, Singapore and Switzerland.

NORTHBROOK, IL (MARCH 6) PR NEWSWIRE - Allstate Insurance Co.'s Assistant General Counsel Michael P. Duncan likened the New Jersey Assembly's approval late last night of Gov. Florio's auto insurance proposal to "the shrill whistle of a runaway freight train."

"While the assembly's action today isn't surprising, it is nonetheless disappointing. This bill has been on a fast track since the day it was proposed. Allstate feels New Jersey consumers are being taken for a ride and, when this plan collapses, will be the ones forced to pay," said Duncan. "Consumers will then realize that, once again, their needs have been ignored in the interest of a quick political fix."

Allstate says that while proponents of the bill promise rate decreases for

consumers, the proposal actually results in premium increases of about 30 percent. Rate increases will be necessary to offset an annual deficit of hundreds of millions of dollars that's expected to result from the governor's plan. The new annual deficit is in addition to the current deficit in the JUA of more than $3 billion.

"Enough is enough. New Jersey drivers and Allstate are fed up with this problem," said Duncan. "We've submitted a proposal that would cut rates for 70-75 percent of New Jersey motorists -- without running up another deficit. Yet our proposal has been ignored time and again. We had hoped the assembly would not make the same mistake."

FORT LAUDERDALE, FL (MARCH 6) PR NEWSWIRE - Harris Corporation's Systems Division today announced that Messerschmitt-Boelkow-Blohm (MBB) has selected Harris Night Hawk real-time computer systems as the primary simulation host computers in their engineering simulation facility in Ottobrun, near Munich.

MBB has awarded Harris Computer Systems Division a $1.5 million contract for Harris Night Hawk 3000 multiprocessing computer systems for use in research, development and training simulations for several European military aircraft and helicopter programs.

Emilio H. Dalle, Harris Computer Systems' vice president of European Operations, cited Harris' powerful real-time operating system, Ada environment and multiple array processing capability as reasons for the selection of the Night Hawk systems.

Barry A. Zimmerman, country manager for Harris Computer Systems in Germany said, "In spite of tremendous pressure to meet critical program milestones, MBB took several months to thoroughly evaluate options for their new simulation computer systems. With the Night Hawk, Harris was able to offer the best combination of performance, upgradability and company stability required for support of MBB's long-term simulation programs."

The Night Hawk 3000 computer systems selected by MBB are configured with Harris' CX/RT real-time operating system and the Harris Ada Programming Support Environment (HAPSE).

Based on industry standards, Night Hawk real-time computer systems are the first UNIX (UNIX is a registered trademark of AT&T) (R)-based systems proven to provide predictable, high-performance real-time processing with

an open-systems design. Night Hawk systems have been selected for major aerospace programs by companies such as McDonnell Douglas, Raytheon, General Electric and others.

"We are very pleased that MBB has selected Harris for this important simulation contract," said Martin S. Axelrod, general manager of Harris Computer Systems Division. "We believe that Harris Computer Systems Division is well-suited to provide outstanding technical solutions and long-term support to Harris customers in Europe. This contract award is evidence of the strategic importance of Harris Computer Systems Division to our parent company, Harris Corporation (NYSE: HRS)."

MBB is part of Deutsche Aerospace (DASA), a wholly owned subsidiary of Daimler-Benz AG.

SHELTON, CT (MARCH 6) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) stated yesterday that it had closed its voluntary exchange offer for the company's 8-1/4 percent convertible subordinated debentures due 2002 by accepting $13,532,000, approximately 41 percent of the old debentures, for exchange, and by waiving the 50 percent minimum condition. Data Switch corrected that announcement today, noting that under applicable Securities and Exchange Commission regulations, due to the waiver of the minimum condition, the company was not permitted to close the offering without affording debenture holders additional time to tender debentures or withdraw previously tendered debentures. Accordingly, debenture holders will have until 5 p.m. Monday, March 12, 1990, to make such tenders or withdrawals.

Rudolph G. Morin, executive vice president and chief financial officer of the company, said that based upon and subject to $13,532,000 of the old debentures having been exchanged, the company will realize a net reduction of long-term debt of approximately $5 million and extraordinary income, after expenses and income tax effect, of approximately $1.8 million ($0.17 per share).

Morin stated: "The minimum condition has been waived, and the old indenture will not be amended. Tendering debenture holders need not consent to the previously proposed amendments."

Under the terms of the exchange offer, for each $1,000 of principal amount of old debenture, a holder will receive $700 in principal amount of new 15

percent senior subordinated notes, bearing interest from Feb. 1, 1990, plus 56 warrants to purchase Data Switch common stock at $5 per share. The warrants, to be traded on NASDAQ (DASWZ), will first be exercisable on Jan. 1, 1991, and will expire Dec. 31, 1995, subject to extension. The new securities will be delivered to tendering holders at the window of the exchange agent, American Stock Transfer & Trust Company, on the open of business on Tuesday, March 13, 1990.

Data Switch is a leading manufacturer of management and control systems for the data processing and data communications markets.

NEW YORK (MARCH 6) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today predicted a constant rate of increase in construction costs for the first quarter of 1990.

According to the Turner Building Cost Index released today, construction costs during the first quarter will rise approximately 0.9 percent to 436, four points above the predicted level for the fourth quarter of 1989. Compared to the first quarter of 1989, construction costs for the first quarter of this year are expected to be 3.8 percent higher, up from 420 points.

"Inflationary pressures are building," said Leslie V. Shute, the Turner vice president responsible for calculating the Turner Building Cost Index, "but we feel that it would be premature to reflect a steepening of the cost curve at this time."

Turner has made its quarterly forecast for more than 50 years. Used widely by the construction industry and federal and state governments, the building costs and price trends tracked by the Turner Building Cost Index reflect the broad geographic experience of Turner's operating units nationwide.

The quarterly forecast accounts for the probable impact of both labor and materials, with productivity, efficiency and competitive conditions also considered. A national composite measurement, the Turner Building Cost Index may or may not reflect regional conditions in any given quarter. Regional conditions often vary from composite national trends.

Based in New York City, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and

healthcare, institutional, government, building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

During 1988, The Turner Corporation put in place approximately $3.6 billion of new construction and had a construction volume backlog of approximately $4.7 billion at year end.

SAN ANTONIO, TX (MARCH 6) PR NEWSWIRE - Datapoint Corporation (NYSE: DPT) today announced that customer delivery of its 20Mbps (megabits per second) ARCNETplus Development Kits will begin March 19, 1990.

"Tests with prototype ARNETplus kits demonstrate as great as six times the throughput of 2.5 megabit per second ARCNET technology," stated Robert E. Hollingsworth, Datapoint director of engineering.

With the kits, developers can establish prototype ARCNETplus networks and design optimizing components without waiting for the availability of production ARCNETplus chips, expected later this year.

Each development kit includes:

-- two 20Mbps ARCNETplus network interfaces (each interface comprises two full-size boards);
-- technical documentation;
-- connectivity components;
-- a NETBIOS-compatible DATALAN PC network operating system; and
-- software designed to facilitate the developers' work.

Interest in the kits has been expressed by developers of products such as:

-- network hardware -- for example, LAN adapter, capture, and analyzer boards and hubs;
-- software drivers for both proprietary and NETBIOS-compatible network operating systems;
-- software components to run capture and protocol analyzer boards, bridges, routers, and LAN management tools; as well as
-- organizations interested in assessing the new technology, such as computer manufacturers, military and factory-floor application developers, system integrators, and academic and research institutions.

"ARCNET has more than two million LAN connections installed worldwide,"

stated J.F. Raffestin, Datapoint director in charge of marketing the ARCNETplus technology. "It was originally designed as an interprocessor bus. Now, with its added capabilities, we expect manufacturers and systems integrators to use ARCNETplus for interconnections in client/server architectures and for high speed and graphics peripherals," Raffestin commented.

Production chips embodying the ARCNETplus technology are presently under development by Standard Microsystems Corporation (NASDAQ: SMSC) and NCR (NYSE: NCR) Microelectronics division. This is the result of an alliance formed by the two companies with Datapoint, announced Sept. 12, 1989, to bring Datapoint's ARCNETplus network technology to the personal computer, workstation, and LAN server marketplace.

NEW BRITAIN, CT (MARCH 6) PR NEWSWIRE - Richard Huck has been elected vice president and controller by The Stanley Works board of directors effective April 1, 1990," reported Richard H. Ayers, chairman and chief executive officer. "Mr. Huck will report to R. Alan Hunter, vice president, finance and chief financial officer."

Hunter commented: "Mr. Huck will function as our chief accounting officer. His responsibilities include internal controls and financial planning and analysis. He will have a strong working relationship with division controllers worldwide. Mr. Huck's high level of professionalism and wide range of experience at Stanley make him an outstanding choice for this position."

Huck earned both his Bachelor's and Master's degrees in Business Administration from the University of Hartford and joined Stanley in 1970 on the corporate staff as a general accountant. He progressed to financial analyst in the treasury department, and served as both budget analyst and manager of financial reporting at Stanley Tools, U.S. In 1982, Huck became controller of Stanley Air Tools in Cleveland, and in 1987 he assumed a similar position at Stanley Tools, U.S., continuing in that position to the present time. Huck and his family reside in Kensington, Conn.

The Stanley Works is a worldwide supplier of tools, products and services for home improvement and consumer use, as well as specialty tools and other products for industrial and professional applications.

BETHESDA, MD (MARCH 6) PR NEWSWIRE - Martin Marietta Corporation (NYSE: ML) has received a $5.5 million, one-year contract extension to continue software development and operation of a data center for the Kuwait Air Force.

Under terms of the contract from the U.S. Navy, Martin Marietta Information Systems Group will support development of software for the Kuwait Air Defence Automated Supply System. The contract is a follow-on to a Navy program that Martin Marietta began in 1982 and is managed through the Navy Fleet Material Support Office in Mechanicsburg, Pa. All contract costs are funded by Kuwait through a Foreign Military Sales agreement with the U.S. Navy.

Martin Marietta assisted in the design and construction of the computer

center and is helping the Kuwait Air Force operate and manage it. The data center supports the Kuwait Air Force in personnel administration, supply management, aircraft maintenance, and the automation of financial services.

The center's microwave communications network links air bases in Kuwait through a system of some 800 data terminals, a network expected to reach 1,400 within the next two years.

Martin Marietta Information Systems Group provides a variety of information management and engineering products and services to government and industry. The organization combines high-speed communications and information processing for command, control, communications, and intelligence; data processing; air traffic control; telecommunications; advanced computer simulation; and artificial intelligence.

ASHLAND, KY (MARCH 6) PR NEWSWIRE - John D. Van Meter has been appointed president of Ashland Oil International Ltd., a London, England-based subsidiary of Ashland Oil Inc. (NYSE: ASH), according to John R. Hall, Ashland chairman and chief executive officer.

In this position, Van Meter will be responsible for monitoring and coordinating Ashland's business interests outside the United States. He will serve as a liaison among operating people responsible for those interests and Ashland senior management. In addition, Van Meter will be responsible for developing and maintaining relations between Ashland and foreign crude oil exporters and for development of new business opportunities outside the United States. He will report to Hall.

"In this era of increasing U.S. dependence upon foreign crude oil supply and an increasingly international business community, the functions of Ashland Oil International are vital," Hall said. "We believe that attractive opportunities can be developed from the London office."

Van Meter joined Ashland in 1978 and served in the corporate law department until 1983, when he was named executive assistant to Ashland Chairman and Chief Executive John R. Hall. In 1989, he was promoted to administrative vice president of Valvoline Inc., a subsidiary of Ashland, based in Lexington, Ky.

A native of Owensboro, Ky., Van Meter is a 1978 graduate of the University of Kentucky Law School.

In a related move, Robert P. Moseley has been appointed vice president of Ashland Oil International, reporting to Van Meter.

Moseley joined Ashland in 1974 and has served in several management positions within Ashland's crude oil supply and Scurlock Oil Co. organizations. Prior to this appointment, he was vice president of crude oil trading for Scurlock Oil Co., a subsidiary of Ashland, based in Houston.

A native of Nowata, Okla., Moseley holds a bachelor of science degree in management from Tulsa University.

Ashland Oil Inc., the nation's 55th largest industrial company, is engaged in petroleum refining, transportation and marketing; retail gasoline marketing; motor oil marketing; chemicals; highway construction; coal; and oil and gas exploration and production.

RESTON, VA (MARCH 6) PR NEWSWIRE - Building on its 20-year history of providing affordable housing opportunities for families across the country Freddie Mac has invested $10 million in the 1989 National Equity Fund (NEF), Freddie Mac Chairman and CEO Leland Brendsel said today at a press conference to announce the investors in the 1989 fund.

Freddie Mac is the largest single corporate investor in the $77 million 1989 NEF.

NEF was created by the Local Initiatives Support Corporation (LISC) to attract corporate investment in low-income housing built and managed by non-profit community-based development corporations. New York-based LISC is the nation's largest private community development support organization.

The 1989 fund is designed to provide rental housing for the nation's poor and homeless in 15 cities over the next 18 months. The cities are Boston; Cincinnati; Hartford, Conn.; Indianapolis; Kalamazoo, Mich.; Kansas City, Mo.; Los Angeles; Miami; Minneapolis; Newark, N.J.; New York; St. Paul, Minn.; Philadelphia; Raleigh, N.C.; and the San Francisco Bay area.

Freddie Mac has been investing in low-income equity funds since 1988, Brendsel said, adding that the corporation will double its investments in 1990. In 1988 and 1989, Freddie Mac invested approximately $15 million as a limited partner in qualifying tax credit housing investments. Currently the corporation plans to invest $40 million in 1990.

One of the rehabilitation projects the 1989 NEF fund will invest is a 51-unit, 100 percent low-income complex located in the Eastside neighborhood of Indianapolis. Currently, all of the 29 buildings in the complex are vacant and in need of substantial repair. Ten of the units will be set aside for transitional housing for victims of domestic violence or abuse.

Through past investments in NEF, Freddie Mac has helped finance several low-income housing rehabilitation projects. Two examples are a 100 percent low-income, single-room occupancy (SRO) complex in Grand Rapids, Mich. and a 100 percent low-income apartment complex in Kansas City, Mo., conveniently located near shopping and transportation facilities.

Freddie Mac is a stockholder-owned corporation chartered by Congress in 1970 to create a continuous flow of funds to mortgage lenders in support of homeownership and rental housing. By linking the capital markets with the mortgage markets, Freddie Mac brings the efficiencies and lower costs of the secondary mortgage market to the lender, the investor and the homebuyer. Over the years, Freddie Mac has helped finance one in eight American homes, including more than half a million apartment units.

DANVERS, MA (MARCH 6) PR NEWSWIRE - GTE International, Inc. and Oy Airam Ab of Finland have formed a joint venture to manufacture lamps in Finland.

The joint-venture company, Oy Airam Electric Ab, is headquartered in Suutarila, Finland, and markets a full line of incandescent, fluorescent and high-intensity discharge lamps under the Airam brand.

The joint venture calls for 50-50 ownership by the two companies with GTE Sylvania S.A., GTE's European lighting subsidiary, managing the venture; other terms of the agreement were not disclosed.

"The Airam lamp brand is the only national brand manufactured in Finland, and it is a market leader in most product lines," according to Airam Chairman Anders Sjoblom.

"This joint venture fits our strategic objectives of maximizing global business opportunities consistent with geographic potential," said William S. Merchant, vice president and general manager of GTE's International Lighting Division. "We will participate in the growth of the Airam brand by providing management skills and technological expertise," he continued.

GTE's lighting business manufactures and markets a wide range of lighting products worldwide under the Sylvania, Claude, Concord, LeDauphin, Linolite and Lumiance brands. It participates in several joint-venture companies, including Focos S.A. in Mexico; Kondo Sylvania Limited in Japan; and Societa Industriale Vincentia Illuminazione S.p.A. in Italy.

Oy Airam Ab is a diversified company that manufactures and markets lamps, batteries, tungsten tire studs and related products.

#90065p0125 03/06/1990 ~PR Newswire
CHICAGO (MARCH 6) PR NEWSWIRE - United Airlines today reported that its total scheduled revenue passenger miles (RPMs) increased 10.1 percent in February compared with February of 1989.

The airline's total scheduled RPMs were 5,332,697,000, compared with 4,842,486,000 in February of 1989.

The passenger load factor was 65.4 percent, an increase of 3.9 points from 61.5 percent a year ago.

Commenting on the month, Stephen M. Wolf, chairman and president, said, "Our system traffic increase of 10.1 percent represents the sharpest month-over-month gain since May of 1987.

"Our Pacific traffic increased 35.0 percent in February, continuing an ongoing pattern of substantial growth. More important, our trans- Pacific traffic has surpassed our major competitors and established United as the number one carrier across the Pacific. United acquired a valuable asset in the Pacific Division in 1986; it is clearly much more valuable today," Wolf said.

For February, domestic revenue passenger miles totaled 3,862,652,000, an increase of 2.9 percent from 3,753,511,000 accumulated in February a year ago. Pacific revenue passenger miles totaled 1,470,045,000, an increase of 35.0 percent from 1,088,975,000 a year ago.

Total scheduled available seat miles (ASMs) were 8,148,249,000, up 3.6 percent from 7,868,304,000 a year ago. Domestic ASMs were 6,258,143,000, a decrease of 1.4 percent from 6,348,512,000 a year ago. Pacific ASMs totaled 1,890,106,000, up 24.4 percent from 1,519,792,000 a year ago.

The airline flew 4,038,000 passengers in scheduled service in February, an increase of 5.6 percent from 3,823,000 flown a year earlier.

Total cargo ton miles for February were 97,884,000, up 2.5 percent from 95,467,000 a year ago.

Total RPMs including charter flights for February were 5,337,165,000 up 10.1 percent from 4,846,035,000 a year ago.

January-February Traffic For the first two months of 1990, total system scheduled RPMs increased 7.6 percent to 10,760,864,000 from 10,001,745,000 in 1989.

Total scheduled ASMs increased 3.0 percent to 16,976,838,000 from 16,479,456,000 last year.

Passenger load factor during the two-month period was 63.4 percent, up 2.7 points from 60.7 percent in 1989.

Total cargo ton miles were 198,807,000, an increase of 3.7 percent from 191,722,000 in 1989.

Total RPMs including charter for the two months were 10,771,943,000, an increase of 7.6 percent from 10,013,585,000 in 1989.

All statistics are preliminary.

NEW YORK (MARCH 6) PR NEWSWIRE - Nina Lesavoy has been appointed vice president of sales at Chancellor Capital Management, Inc., the company announced today. In her new position, effective late March 1990, she will be responsible for marketing Chancellor's broad range of investment programs.

Before joining Chancellor, Ms. Lesavoy was an officer and account manager at The Putnam Companies. There she was responsible for selling investment products to public and corporate pension plans as well as to endowments and foundations located in New York and on the west coast. Ms. Lesavoy began her institutional sales career with the GTE Corporation in 1979, where she was responsible for marketing an array of products.

"Nina's highly successful track record and broad industry experience make her a valuable addition to the Chancellor team," said Robert G. Wade Jr., Chancellor's president and chairman of the board. "We are very excited that she is joining us."

Chancellor Capital Management is a subsidiary of USF&G Financial Services Corporation. Chancellor manages assets valued at close to $19 billion for public and private sector pension funds, all types of employee benefit plans, insurance companies and charitable organizations. Chancellor provides a wide range of investment programs including equities, fixed income, venture capital and investment technology.

CONTACT: Alexandra Trower of Chancellor Capital Management, 212-891-6662, or Peter F. Cullum of Donley Communications, 212-751-6126, for Chancellor Capital Management.

KERRVILLE, TX (MARCH 6) PR NEWSWIRE - LDB Corporation (NASDAQ-LDBC) has announced that the headquarters of its wholly owned subsidiary, Mr. Gatti's, is being moved from Austin to Kerrville, Texas, where the parent company is located.

Mr. Gatti's is a 25 year old regional pizza chain comprised of 300 restaurants.

One hundred thirty-three of the restaurants are company operated and 167 are franchised. The restaurants are located throughout the Southeast, Southwest and Midwest.

The announcement was made by L.D. Brinkman, chairman, president and CEO of the parent company as well as Mr. Gatti's.

This move will strengthen the company's operations through improved communications and coordination of all functions, and will result in cost reductions by combining the two offices.

Concurrent with the move, the duties of Mr. Gatti's key personnel will be realigned to provide more effective management.

Mr. Gatti's owned stores will be organized into two divisions, Northern and Southern, each under the full operating authority of a Division President, each of whom will report directly to Brinkman.

According to Brinkman, the newly assigned responsibilities "will allow our Division Presidents to concentrate 100 percent on stores operations without being concerned with administrative functions. At the same time, it will assure that both company operated and franchised stores receive all the support they need."

The above changes are effective immediately and the company states that plans are now underway to complete the physical move from Austin to Kerrville in an orderly fashion over the next 60 days.

LOS ANGELES (MARCH 6) PR NEWSWIRE - Rykoff-Sexton Inc. (NYSE: RYK) today reported net income of $610,000, equal to $.05 per share, for the third fiscal quarter ended Jan. 27, 1990.

The company had net income of $4,481,000, or $.38 per share, for the comparable prior year period. Sales for the third quarter rose to $343,433,000 from $317,160,000 a year ago.

For the nine months ended Jan. 27, 1990, net income amounted to $9,189,000 equal to $.78 per share, compared with $15,106,000 or $1.28 per share, a year earlier. Sales for the first nine months of the current fiscal year rose to $1,046,683,000 from $959,539,000 for the corresponding prior year.

Roger W. Coleman, president and chief executive officer, said the decline in earnings, as previously announced on Feb. 7, 1990, reflected lower than anticipated sales increases, along with delays in the full implementation of cost containment measures and certain non-recurring items.

Coleman noted that the company has experienced higher labor, rental, insurance and interest expenses, and during this third quarter, incurred a non-recurring $2 million pre-tax charge related to additional bad debt provisions and employee health care benefits.

"While revenues have improved, the rate of growth has not been sufficient to offset additional costs," said Coleman. "We have planned and are implementing cost reduction and containment programs which include the closing and consolidation of certain operations and other measures to reduce our operating costs," Coleman added.

Rykoff-Sexton Inc., consisting of S.E. Rykoff & Co. and John Sexton & Co., is a leading manufacturer and distributor of food and related products for restaurants, institutions and membership warehouse stores nationwide. DECATUR, GA (MARCH 6) PR NEWSWIRE - Decatur Federal Savings and Loan Association, headquartered in Decatur, Ga., and Southeast Federal Savings Bank, Rossville, Ga., have signed an non-binding letter of intent stating in principle that Decatur Federal will acquire the physical assets and assume the deposits of the Dalton branch office of Southeast Federal Savings Bank located at 509 South Thornton Ave., Dalton, Ga.

At Dec. 31, 1989, the Dalton branch of Southeast Federal had deposits of approximately $13.9 million.

Prior to negotiating a definitive agreement, the proposal must be approved by the boards of directors of Decatur Federal and Southeast Federal Savings Bank and regulatory authorities.

Robert C. McMahan, chairman of the board and chief executive officer of DFSoutheastern Inc., stated: "The acquisition of Southeast Federal's Dalton branch will enhance our presence in the North Georgia area. However, our plans at present call for relocating our Hamilton Street office to the newer Southeast Federal building."

Southeast Federal Savings Bank is a subsidiary of Bankers First Corp., headquartered in Augusta, Ga. The holding company's stock is traded in the NASDAQ over the counter securities exchange under the symbol "BNKS."

Decatur Federal Savings and Loan Association is the wholly owned subsidiary of DFSoutheastern Inc., headquartered in Decatur, Ga. The holding company's common stock is traded in the NASDAQ over-the-counter securities exchange under the symbol "DFSE."

HAUPPAUGE, NY (MARCH 6) PR NEWSWIRE - Graham-Field Health Products, Inc. (AMEX: GFI) today announced that it has completed the acquisition of M.E. Team, Inc., a privately held distributor of medical and healthcare products for use in the home. M.E. Team's operations will be merged into Graham-Field's warehouse and distribution facilities in Hauppauge. M.E. Team, Inc. has annual sales of approximately $4.7 million.

Jack Chambers, president of M.E. Team, will join Graham-Field as president of its consumer products division. Commenting on the acquisition, Graham-Field Health Products, Inc. Chairman Irwin Selinger said, "The acquisition of M.E. Team, Inc. broadens the range of our product line, and strengthens our position in the retail healthcare marketplace.

"M.E. Team's products are sold directly to chain drug stores, drug wholesalers and mail order companies under the widely known tradenames of Healthteam and Gentle Expressions. The acquisition will further our efforts to position our company as a 'one-stop-shopping' outlet for our existing customer base of home healthcare, physician, and hospital supply dealers, drug chains, and wholesalers. Additionally, we have an excellent opportunity to offer our significantly larger product base to M.E. Team's customers," he contined.

"As such, we eagerly anticipate the integration of M.E. Teams' operations into our own, and expect this acquisition to provide further impetus to the growth of the company," Selinger concluded.

Graham-Field Health Products, Inc. manufactures and distributes approximately 14,000 healthcare products to approximately 11,500 home healthcare, physician and hospital supply distributors and drug retailers and wholesalers.

#90065p0140 03/06/1990 ~PR Newswire

SOUTHFIELD, MI (MARCH 6) PR NEWSWIRE - For the second consecutive year, the Blue Care Network (BCN) health maintenance organizations (HMOs) have reported an operating surplus to the state insurance bureau.

The 1989 net income was $23.8 million, up substantially from the $4.7 million surplus reported for year-end 1988.

Blue Care Network is comprised of four separate HMOs affiliated with Blue Cross and Blue Shield of Michigan (BCBSM). Each of the four showed a positive net gain.

The network includes BCN of Southeast Michigan, which serves the five-county metropolitan Detroit area; BCN-East, with staff facilities in Flint, Saginaw and Bay City; BCN-Health Central, which serves Ingham, Eaton, Clinton, Jackson and Livingston counties; and BCN, Great Lakes, with area offices in Grand Rapids, Battle Creek, Kalamazoo, Muskegon and Traverse City.

"This dramatic financial rebound began in 1988 and was completed in 1989," said James Hayden, BCBSM vice president for managed care.

"We accomplished the turnaround by carefully managing the hospital and medical services used by our members." He explained that reviews by BCN medical personnel and visits to patients improved quality of care and substantially reduced the number of days members were hospitalized.

Some BCN HMOs benefited from new, longer-term contracts with providers reflecting cost increases which parallel more closely the medical component of the consumer price index (CPI).

Hayden said that statewide membership on Dec. 31 was 357,263. He predicted some growth during 1990 as more new providers participate, and as BCBSM's consolidated marketing department and independent agents enroll

new employer groups.

The 1989 revenue growth completes a financial turnaround begun in 1988 and contrasts with 1987 results which saw losses of nearly $69 million. Hayden noted that approximately 75 percent of the 1989 surplus will be used to reduce the debt owed BCBSM, which recapitalized BCN after the 1987 losses.

Blue Care Network is the combination of four Blue Cross and Blue Shield of Michigan affiliated health maintenance organizations (HMOs) located across the state. They include:

-- Blue Care Network of Southeast Michigan (Metro Detroit) -- Blue Care Network of East Michigan (Flint, Saginaw, Bay City) -- Blue Care Network - Health Central (Ingham, Eaton, Clinton, Jackson, and Livingston counties)

-- Blue Care Network, Great Lakes (Grand Rapids, Battle Creek, Kalamazoo, Traverse City, Muskegon)

Today, more than one in every four HMO members in Michigan belongs to a Blue Care Network HMO. The four Blue Care Network HMOs are conveniently located to serve the health-care benefits needs of their members. As affiliates of Blue Cross and Blue Shield of Michigan, they form Michigan's only statewide network of quality managed care. Yet, each Blue Care Network HMO is locally administered to respond to the needs of local employers and citizens.

Blue Care Network HMO members benefit from the experience of Michigan's oldest and largest provider of health coverage. And, BCN members have the security of a card with the world's most recognized symbols of health care -- the Blue Cross and Blue Shield.

SIMI VALLEY, CA (MARCH 6) PR NEWSWIRE - Datron Systems Inc. (NASDAQ: DTSI) today announced the receipt of two orders at the Systems division totaling more than $6 million. The first is a $3.6 million order for shipboard pedestals for use on the U.S. Navy MILSTAR program. This order for 34 pedestals is the first production lot of a quantity 396 units quoted through 1994. The second order is for additional electronic training equipment used by the Air Force to train pilots to evade hostile weapons radars.

"These two orders illustrate our belief that despite projected cutbacks in the U.S. Defense Department's budget, communications and electronic

training programs are becoming increasingly important in our country's defense strategy," stated David A. Derby, president and chief executive officer. "While we have successfully diversified our business, U.S. defense programs will continue to play an important role in our long-term growth."

Datron Systems Inc. is a leading designer/manufacturer of specialized communications systems and high quality radio products.

NORTH WILKESBORO, NC (MARCH 6) PR NEWSWIRE - Lowe's Companies, Inc. (NYSE: LOW) announced its February sales totaled $186.4 million, a 31 percent increase from February of 1989. Sales to retail customers increased 40 percent and sales to contractors increased 18 percent. The table below presents sales comparison's and trends:

4 Weeks Ended:		March 2, 1990		March 3, 1989	
	Pct Change	Total Sales (000,000)	Pct of Total	Total Sales (000,000)	Pct of Total
Retail Sales	+40	$112.1	60	$ 79.8	56
Contractor Sales	+18	$ 74.3	40	$ 62.8	44
Total	+31	$186.4	100	$142.6	100
Comparable Stores(a) (276)	+24	$165.4	89	$133.5	94
New Projects(b) (30)		$ 21.0	11	8.2	6
Closed Stores(c)		--	--	$ .9	--
Total Stores (306)	+31	$186.4	100	$142.6	100

(a) Stores open more than one year on February 1 with comparable square footage.

(b) Stores open less than one year and stores which have been retrofitted or relocated within the past twelve months.

(c) 2 stores closed through February 1990.

A relocated store opened in High Point, North Carolina in February. Stores in Newport News and Charlottesville, Virginia were converted to Contractor Yards during the reporting period. Incremental square footage increased by 41,000. Lowe's now operates 306 stores in 20 states, in the South Atlantic and South Central regions of the United States. Lowe's is a specialty retailer pursuing three businesses in each of our stores: the

home center do-it-yourself business, the consumer durables business, and the building contractor business. Lowe's monthly sales results are based on four-week, four-week, and five-week reporting periods. Lowe's quarterly news release on sales and earnings will continue to reflect precise totals.

#90065p0153 03/06/1990 ~PR Newswire

HOUSTON (MARCH 6) PR NEWSWIRE - Weatherford International (AMEX: WII) today reported a 1989 fourth quarter profit which reflects a significant improvement in its operational performance and a reduction in its interest costs.

The company reported that revenues for 1989 were up 6.3 percent to $129.9 million compared to $122.2 million for 1988. Net income for the year was $6.9 million, or $0.43 per common share, compared to a 1988 net loss of $500,000, or $0.19 per common share. The results included a $7.3 million or $0.58 per common share, extraordinary gain as a result of the financial restructuring completed by the company in the fourth quarter, and the favorable impact of a change in accounting for income taxes which increased net income and income per common share by $526,000 and $0.04, respectively.

The company reported that revenues for the fourth quarter of 1989 increased 3.6 percent to $34.9 million from $33.7 million for the same period in 1988. Fourth quarter income before extraordinary gain was $949,000, or $0.03 per common share. Net income in the fourth quarter was $8.3 million, or $0.46 per common share, which included a $7.3 million extraordinary gain, or $0.43 per common share. These amounts compare to net income of $80,000, or a loss per common share of $0.03, for the same period in 1988. These per-share calculations are after deducting preferred stock dividends of $384,000.

International operations, which provided 74 percent of the company's revenues, continued to record strong operating performances in virtually all regions. Domestic revenues and gross margins increased in the second half of 1989. The company said that a slowly improving business climate and industry forecasts of increased U.S. drilling activity should provide continued improvements in domestic performance during 1990.

Weatherford, a diversified international energy service and manufacturing company, provides tubular and cementing services used in oil and gas exploration and development and manufactures and markets specialty oilfield drilling products and equipment.

#90065p0156 03/06/1990 ~PR Newswire

GOTEBORG, SWEDEN (MARCH 6) PR NEWSWIRE - Volvo Group today issued the following report on 1989 operations:

Lowering operating Income Operating income was affected adversely by the higer level of costs in Sweden combined with weak growth in productivity. Research and development costs during the year, all of which are included in cost and expenses, amounted to SEK 6,176 M an increase of SEK 1,037 M, or 20 percent, compared with 1988 costs.

Unlike most other companies in the business, Volvo charges all research and development costs - including acquisition of type-specific tools - to income in the year in which the development activities are performed.

	1989	1988	Pct change
Volvo Group sales, SEK M	90,972	96,639	(6)
Operating income, SEK M	4,817	7,028	(31)
Inc. before allocations & taxes, SEK M	7,011	8,243	(15)
Income per share, SEK	63.30	73.40	(14)
(30 pct. standard tax)			
Net earnings per share, U.S. GAPP	69.60	63.80	9
Proposed dividend per share, SEK	15.50	14.00	11

After giving affect to forward currency contracts, the effective exchange rate for the U.S. dollar was lower than in 1988, reducing operating income by approximately SEK 800 M.

Operating income includes the capital gain of SEK 785 M on the sale of STC Scandinavian Trading company AB and Hilleshog AB.

During the last quarter of the year, operating income was charged with SEK 794 M through a write-off in the amount of SEK 444 M of all goodwill in connection with the acquisition of the Spanish general agency, Volvo Concesionarios, S.A., and SEK 350 M resulting from a change in accounting policies related to the valuation of supplies and spare parts for fixed assets. Excluding these costs, operating income for the fourth quarter was SEK 802 M compared to SEK 1.984 M for the last quarter 1988 (excluding strike compensation of SEK 395 M).

Effective in 1989, Volvo's substantial holdings in associated companies are stated in accordance with the equity method, rather than at cost, as in the past. Volvo's accounting method has thereby been adapted to international practice. As a result of this income after financial income and expense was increased by SEK 790 M in 1989 compared to 1988.

Increased sales were reported in the transport vehicle sector. Volvo Group sales in 1989 amounted to SEK 90,972 M, compared with SEK 96,639 M in 1988. The transport vehicle sector accounted for SEK 76,604 M (70,462) in sales in 1989, an increase of nine percent.

During 1989 Volvo sold all its shareholdings in STC Scandinavian Trading Company AB, J.S. Saba Continent BV and Hilleshog AB. The divested companies are not consolidated in 1989. Adjusted for the sale of the STC Group and Hilleshog, Volvo Group sales were seven percent higher than in 1988.

#90065p0159 03/06/1990 ~PR Newswire

OAK BROOK, IL (MARCH 6) PR NEWSWIRE - Champion Parts, Inc. (NASDAQ: CREB) a major remanufacturer of replacement parts for cars, trucks and farm equipment, today reported lower sales and a loss for the fourth quarter of 1989 and the year as a whole.

The 1989 results "reflect a disappointing period for Champion Parts and the automotive aftermarket in which it operates," said Charles P. Schwartz Jr., chairman and chief executive officer. "Intense competition was fanned by excess capacity at all levels of the market, combined with a lack of unit growth and pricing to cover increased material and overhead costs. We have undertaken a comprehensive program to meet these conditions so as to operate profitably within available revenues."

"We have done what we had to do," Schwartz said, "including instituting price increases, personnel and inventory reductions, as well as other conservative business decisions. We are confident that these measures will produce future benefits. Thus far, 1990 has been profitable for Champion Parts and is running better than expected. We anticipate improving results in the months ahead.

For the fourth quarter, the company reported a loss of $1,008,000 or 28 cents per share, compared to a net profit of $320,000 or 8 cents per share in the 1988 quarter. Net sales decreased to $33,485,000 from $33,881,000.

For the year ended Dec. 31, 1989, the company reported a loss of $2,468,000 or 68 cents per share, compared to a net profit of $1,621,000 or 45 cents per share in 1988. Net sales decreased to $123,914,000 from $129,489,000 in 1988.

In 1989, Champion Parts generated substantial cash from reduction of inventories and depreciation and amortization charges. At yearend, inventories were nearly $7 million below December 1988 levels, standing at under $41 million, compared to a little over $47 million. Total bank borrowings after rising during the year have now been reduced to year- ago

levels, and $4.5 million in long-term debt was also repaid in 1989.

"Overhead expenses have been substantially reduced, and many of the business factors and decisions which contributed to the fourth quarter and 1989 results should not recur. The inventory reduction was accomplished by reducing factory production for a number of months, which did not fully absorb overhead expense. This is now behind us," said Schwartz.

The company noted that new car prices are climbing, encouraging the driving public to repair their present vehicles. Currently, there are more than 185 million vehicles on U.S. highways with an average age of more than seven years. The company said it expects to benefit from these favorable vehicle demographics and the continuing increase in miles driven. Champion Parts should also benefit as more cars from high-production years in the 1980s enter the time when repairs peak. Vehicle owners will be attracted to quality remanufactured parts, providing a savings of 20 percent to 40 percent or more, compared to the cost of a new part, while performing just as well and carrying comparable or better warranties.

Champion Parts is the country's largest independent automotive replacement parts remanufacturer operating in the multi-billion-dollar automotive, truck and farm equipment aftermarkets. It remanufactures, tests and distributes about 5 million parts each year throughout the U.S. and Canada. Its major products, representing some 80 percent of the sales volume of rebuilt parts sold by automotive jobbers and retail outlets, include fuel-system products such as carburetors, and a complete line of automotive electrical and mechanical parts. The company employs 2,300 men and women and operates five major plants in the U.S. and Canada.

#90065p0163 03/06/1990 ~PR Newswire

ST. LOUIS (MARCH 6) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) today reported record fully diluted earnings per share from continuing operations of $3.64 for fiscal 1989, the 53 weeks ended Feb. 3, 1990, a 20 percent increase over $3.04 in fiscal 1988.

Net earnings from continuing operations in fiscal 1989 totaled $515 million, $67 million above $448 million in the prior fiscal year. Net retail sales for the 53 weeks of fiscal 1989 were $9.53 billion. On a 52-week basis, net retail sales for 1989 were $9.42 billion, an increase of 12.2 percent over the comparable period last year. Earnings in the 53rd week were immaterial.

The company also announced that it will recommend an increase in its annual dividend rate to the board of directors at its March 16 meeting.

David C. Farrell, chairman and chief executive officer, said, "We are pleased with the continued strong performance of May. We are particularly pleased that each of our store companies, including Foley's and Filene's which completed their first full fiscal year with May, contributed significantly to make 1989 our 15th consecutive year of record sales and earnings. Over the last three years, the compounded growth rate in earnings per share for the company has been 20 percent.

"In 1989, we made considerable progress in focusing on our department stores and Volume Shoe, and we are well along in divesting our discount segment companies, as previously announced.

"May is very well positioned for 1990 and beyond, and our expansion plan is aggressive. In 1990, we will open a record 21 department stores, adding more than two million square feet of retail space, and 244 net new Payless ShoeSource stores. Included in these openings are four recently acquired stores in the Richmond and Tidewater areas of Virginia, which are being converted to The Hecht Company. Also, 29 department stores will be remodeled during 1990, with nine of these being expanded. We expect another good year of progress in 1990."

For the 1989 fourth quarter, net earnings per share from continuing operations on fully diluted basis were $2.00, an 18 percent increase over $1.69 (before $.12 of unusual item expenses described in the attached notes) based on full year average shares. Net earnings from continuing operations in the fourth quarter totaled $283 million compared to $248 million (before $18 million of unusual item expenses described in the attached notes) last year. Net retail sales for the 13 weeks ended Jan. 27, 1990, were $3.14 billion, up 7.6 percent over the same period last year.

The annual LIFO impact for 1989 was a $17 million credit compared to a $3 million credit in 1988. The 1989 fourth quarter contained a LIFO credit of $29 million versus a LIFO credit of $13 million in the 1988 fourth quarter.

Pursuant to its previous announcement, May has reported its discount segment as discontinued operations. Caldor has been sold and the company is planning to spin-off Venture to May common shareowners later in 1990, pending certain events.

The May Department Stores Company is one of the largest retailers in the United States, operating 288 department stores, 2,746 specialty shoe stores and 75 Venture stores at fiscal year-end.

FRANKLIN PARK, IL (MARCH 6) PR NEWSWIRE - Burke B. Roche, president of Binks Manufacturing Co. (AMEX: BIN), announced today that Binks has learned that ITW intends to withdraw its nominees for election as directors at Binks' upcoming annual meeting.

Roche noted, "We are gratified at ITW's decision to withdraw its slate. From the very beginning our board of directors thought that ITW's actions were ill advised and inappropriate."

Roche added, "The purported expiration date placed on ITW's offer, and the manner in which they proceeded, raised serious doubt on the part of our board of directors as to ITW's motives. ITW's announcement of its acquisition of DeVilbiss confirms that doubt. In view of the combination of Ransburg and DeVilbiss, as well as the recent offer made by ITW for Binks, Binks intends to fully review its present situation and plans for its future relative to its stockholders."

Binks Manufacturing Co. is a leading designer, manufacturer and distributor of spray finishing and coatings application equipment. It distributes its products through 14 branch offices with warehouse facilities, 27 sales offices and a network of more than 5,600 distributors in the United States, and subsidiaries with manufacturing facilities and sales distributions force throughout much of the world.

WICHITA, KS (MARCH 6) PR NEWSWIRE - Latshaw Enterprises, Inc. (AMEX: LAT) announced today that net sales for the first quarter increased 11 percent to $7,695,000 compared to $6,926,000 for the same period last year.

Latshaw Enterprises gross profit was 23 percent of net sales in the fist quarter of 1990 compared to 18 percent in the same period of 1989. The improvement was the result of a shift in our product mix and new product introductions, both of which enjoy higher gross margins.

Due to an unrealized loss on investments of $739,000, a loss of $373,000 is reported in the first quarter of fiscal 1990. All start-up costs associated with the new premium quality garden tools developed by Latshaw Garden and Leisure were expensed this quarter and are currently scheduled for introduction to the retail market in the fall and winter of 1990.

A light winter in many areas of the company's major markets has resulted in extreme softness in the sales of snow removal equipment. Consequently, the backlog for sales to these markets is down for production in mid-1990. Plastics sales to the cosmetics markets appears soft for 1990, due to the cosmetics inventory surpluses in many retailers' showrooms. Sales, in general, are expected to follow the traditional reduction in the summer months. Due to the previously stated factors, sales may trend down more

in mid-1990 than in the company's previous year.

#90065p0179 03/06/1990 ~PR Newswire

NEW YORK (MARCH 6) PR NEWSWIRE - In one of the most ambitious product re-launches in American marketing, Ronald V. Davis, president and chief executive officer of The Perrier Group of America, announced today the return of Perrier to the American scene, supported by a $25 million marketing and promotion effort.

In a news conference at the French Consulate in New York, Davis said that the first bottles, newly labeled "Nouvelle Production," are already rolling off the production line in Vergeze, France. The first bottles of Perrier, the world's largest-selling sparkling mineral water, will arrive on shelves in New York within four weeks, though the full re-supply effort across the United States will not be completed until later this summer.

"The length of time for the re-launch is a tribute to the truly unique nature of Perrier," Davis said. "It is the product of a single mineral spring located in the south of France, and is bottled only at the source in the largest fully integrated bottling plant on earth. From there, it is shipped to 120 countries."

Davis further offered his assurances that the problem with Perrier has been identified and fixed. "It was never a health or a safety concern," Davis affirmed. "U.S. and French health authorities assured us of this after careful examination. But to ensure the good name of Perrier, Source Perrier ordered the recall of all the product currently in the market -- 160 million bottles in 120 countries."

The Perrier mineral water in the new bottles has been carefully tested and elaborate new quality control procedures have been installed at the plant in Vergeze, including double filtration of the gas and monitoring of the gas system.

In a tribute to Perrier's decision to embark on the worldwide recall and re-launch, Linda Golodner, executive director of the National Consumers League, the nation's oldest consumer organization, said: "We think Perrier took a very responsible action when they voluntarily recalled the product because it didn't meet their standards of purity. We compliment them."

More than 90 percent of Perrier bottles have been identified and are being crushed and recycled in 16 bottle recycling centers in the United States.

The first of the new bottles will begin arriving on shelves in New York in early April. Within 40-60 days, the top 10 markets will have received their first supplies. Within three months, the rest of the United States will have received the first supplies. However, all flavors and sizes will not be restocked before the end of this summer.

BOULDER, CO. (MARCH 6) PR NEWSWIRE - Cell Technology, Inc. (NASDAQ: CELL) the Colorado-based biotechnology firm specializing in the development of biologic response modifier (BRM) technology, today reported that ImuVert(TM), its anti-cancer BRM application, has shown significant results when tested in combination with a variety of leading chemotherapeutic agents used in conventional cancer treatments.

These conclusions reported today were developed in various independent research programs conducted throughout the United States during 1989 and 1990. Collectively, the data suggest the increased human therapeutic potential of ImuVert, particularly when used in direct combination with leading, widely prescribed chemotherapeutic products traditionally utilized in treating many human malignancies. In essence, these scientific findings suggest the effectiveness of ImuVert in comprehensively boosting an otherwise chronically suppressed immune system which has been subjected to various chemotherapeutic treatments, including those noted below:

Adriamycin(R) -- In a collaborative study conducted by the company and Colorado State University, ImuVert was used in conjunction with Adriamycin an immunosuppressive chemotherapeutic commonly used in treating cancer. White blood cells, critically important to killing cancer cells, were restored to elevated levels by the tenth day of treatment using ImuVert following the use of Adriamycin in canine specimens.

Cyclophosphamide -- Recent experiments conducted in Cell Technology laboratories have also provided evidence that ImuVert significantly reduces a number of serious side effects normally associated with the anti-cancer drug, Cyclophosphamide. Cyclophosphamide is utilized in the treatment of a number of blood tumors including Hodgkin's lymphoma, Burkitt's lymphoma, and a variety of leukemias. Cyclophosphamide has been shown to suppress the immune system's ability to combat infection while patients undergo chemotherapy. In these experiments, animals treated first with Cyclophosphamide, followed by ImuVert, showed a marked increase in overall healthy immune functioning when compared to non-ImuVert. Cyclophosphamide treated animals.

Cytosine Arabinoside (AraC) -- In a collaboration between the University of Miami (Florida) and Cell Technology, ImuVert was combined with Cytosine Arabinoside (AraC), another conventional chemotherapeutic agent used in treating various cancers, especially leukemia. The result of combining ImuVert with AraC to treat a form of leukemia, chloroleukemia, now suggests important scientific findings that the therapeutic utility and benefits derived from using this combination in animal models are superior to those when AraC is used alone. These findings further suggest that the combination of ImuVert and AraC may represent an addition to the arsenal of treatments used in the fight against leukemia and other cancers.

Frederick C. Pearson, Ph.D., vice president-scientific operations, stated, "Taken together, these results suggest that ImuVert may serve to offset many of the serious side effects of conventional chemotherapy in the treatment of cancer. These studies show the ever-increasing promise of ImuVert, not only as a stand-alone agent, but also as an adjunct to anti-cancer chemotherapy products."

Cell Technology, Inc. is a biotechnology company specializing in the field of immunotherapy. The company's innovative BRM products are being developed to activate the body's own immune response to fight cancer, viral infections, and to act as a general immunomodulating agent.

#90065p0188 03/06/1990 ~PR Newswire

PORT WASHINGTON, NY (MARCH 6) PR NEWSWIRE - Luxottica Group S.p.A. (NYSE: LUX) today reported record results for the year ended Dec. 31, 1989.

Highlights include:

-- Sales increased 22.8 percent to 312.3 billion lire in 1989 from 254.3 billion lire in 1988.

-- Net income computer in accordance with U.S. GAAP increased 28 percent to 39.7 billion lire in 1989 compared with 31.0 billion lire in the previous year.

-- Earnings per ADS computed in accordance with U.S. GAAP on a primary basis increased 15.8 percent to 2,606 lire in 1989 from 2,251 lire in 1988, and on a fully diluted basis increased 30.0 percent to 1,794 lire in 1989 from 1,424 lire in 1988. This is equivalent to primary earnings of $2.05 and fully diluted earnings of $1.41, computed at the exchange rate of $1.00 equals 1,270.5 billion lire on Dec. 31, 1989.

Sales increased 22.8 percent to 312.3 billion lire in 1989 from 254.3 billion lire in 1988. This increase is a reflection of the expansion of the company's designer lines, specifically, the introduction of the Giorgio Armani line in the U.S. at the end of 1988 and the introduction of three new lines -- Giugiaro, Genny and Byblos -- in Europe in 1989; price increases in the company's traditional lines; and favorable currency exchange fluctuations.

Gross profit for the year rose 26.9 percent to 208.8 billion lire compared with 1988 gross profit of 164.6 billion lire, largely reflecting an increase in higher margin sales associated with the company's designer products.

Primarily as a result of higher advertising and promotional expenses consistent with the introduction of the company's designer lines in the United States and Europe, selling, general and administrative expenses on a U.S. GAAP basis increased 28.0 percent to 138.0 billion lire compared with 107.7 billion lire in 1988. Moreover, the company incurred additional staffing and administrative costs in conjunction with the launch of its new Mirari sales division, which will begin operation in the United States in April 1990, and marketing, promotion, and general costs in conjunction with the introduction of the Valentino line in Europe and the U.S. in the first half of 1990.

Net income in 1989 computed in accordance with U.S. GAAP increased 28.0 percent to 39.7 billion lire compared with 31.0 billion lire the previous year. Earnings per ADS computed in accordance with U.S. GAAP on a primary basis increased 15.8 percent to 2,606 lire in 1989 from 2,251 lire in 1988 and on a fully diluted basis increased 30.0 percent to 1,794 lire in 1989 from 1,424 lire in 1988.

Net income in 1989 in accordance with U.S. GAAP is equivalent to $31.2 million, computed at the exchange rate of $1.00 equals 1270.5 lire on Dec. 31, 1989. Earnings per ADS in 1989, computed on a primary and fully diluted basis in accordance with U.S. GAAP, are equivalent to $2.05 and $1.41, respectively.

For the fourth quarter of 1989, sales rose 26.2 percent to 85.5 billion lire compared with 67.7 billion lire in the fourth quarter of the earlier year.

Income before income taxes and minority interests, computed in accordance with U.S. GAAP, increased 72.0 percent to 16.0 billion lire in the fourth quarter of 1989 compared with 9.3 billion lire in the fourth quarter of 1988.

Net income for the fourth quarter of 1989, computed in accordance with U.S. GAAP, was equal to 8.8 billion lire compared with 9.9 billion lire in the fourth quarter of 1988. Earnings per ADS for the fourth quarter of 1989 computed in accordance with U.S. GAAP decreased on a primary basis to 451 lire from 719 lire in fourth quarter of 1988, and on a fully diluted basis to 396 lire from 456 lire in the fourth quarter of 1988.

CHARLOTTE, NC (MARCH 6) PR NEWSWIRE - Three Duke Power Co. (NYSE: DUK) nuclear generating units are maintaining uninterrupted electricity production runs in excess of 100 days.

Two of these units have been supplying customers with electricity continuously since last September -- over 150 days.

McGuire Nuclear Station Unit 2 in Cornelius, N.C., has been on-line for 168 days without interruption, a record for the station.

Unit 1 at Oconee Nuclear Station in Seneca, S.C., has been operating continuously for 151 days, and Oconee Unit 2 has been on-line for 104 days without interruption.

In Clover, S.C., Catawba Nuclear Station Unit 2's only interruption in service since August 1989 was a four-day maintenance outage in January.

"Our nuclear units are doing just what they are designed to do -- supply our customers with safe, low-cost electricity with minimal downtime," said Mike Tuckman, general manager of nuclear support for Duke Power.

Tuckman credits aggressive preventive maintenance and skilled operators with the lengthy operating runs achived by the stations.

Seven nuclear units supply approximately two-thirds of the electricity consumed by Duke Power customers. Two generating units, McGuire 1 and Catawba 1, are presently out of service for planned refueling and maintenance outages.

#90065p0200 03/06/1990 ~PR Newswire
ACRE (MARCH 6) PR NEWSWIRE - Electrochemical Industries (Frutarom) Ltd. (AMEX: EIF) today reported results of operations for the year ended Dec. 31, 1989.

Sales for 1989 amounted to $117.8 million (NIS 231.3 million), compared with 1988 sales of $116.2 million (NIS 228.1 million). Net income for the year was $2.7 million (NIS 5.3 million) compared with net income of $8.6 million (NIS 16.9 million) in the previous year. Earnings per share were $0.18 (NIS 0.36) compared with $0.57 (NIS 1.13) a year ago.

Joseph Geva, chief executive officer and vice chairman of EIF, commented that the decline in earnings was due to lower world market prices for PVC, the company's major product, coupled with higher costs for principle raw materials. "However, we were able to partially offset this by obtaining higher prices for some of our inorganic chemical products, and through increased quantities produced and sold," said Geva.

Approximately 89,500 tons of PVC were produced in 1989, an increase of 12 percent over output a year ago. Production of inorganic products such as Caustic Soda, Caustic Potash and Potassium Carbonate also increased by 3.3 percent, 18.9 percent and 10 percent, respectively.

The company's major supplier of ethylene has advised EIF that it intends to close down its plant for renovation and expansion during the second quarter of 1990. EIF is currently taking measures to minimize the impact of this move on its production capacity.

During 1989, the company issued four series of debentures in Israel, the proceeds of which went to repay long-term loans and increase working capital. The company's ordinary shares were listed for trading on the American Stock Exchange in December 1989. These have been traded on the Tel Aviv Stock Exchange since 1976.

EIF invested approximately $6.5 million in its approved investment program in 1989.

Electrochemical Industries (Frutarom) Ltd. manufactures and markets chemicals, raw materials, flavors and essences for a wide variety of industrial applications. One of Israel's leading firms, it is the country's sole producer of PVC, which it markets both domestically and overseas.

#90065p0206 03/06/1990 ~PR Newswire

SAN ANTONIO, TX (MARCH 6) PR NEWSWIRE - Diamond Shamrock Inc. (NYSE: DRM) announced today that it has updated the company's Share Purchase Rights Plan adopted in 1987 to protect its stockholders from unfair or inadequate takeover bids or practices.

The action will be accomplished by the company redeeming the share purchase rights issued in 1987 simultaneously with the distribution of new share purchase rights to the holders of Diamond Shamrock's common stock. Like the existing rights, the new rights initially will trade together with the company's common stock and will not be exercisable unless certain triggering events occur.

The new Rights Plan is substantially similar to the original Rights Plan, except that the exercise price of the rights has been increased from $42 to $75 and the level of ownership of the company's Common Stock that would result in the Rights becoming exercisable has been reduced from 20 percent to 10 percent (the 20 percent threshold will, however, continue to apply to certain institutional investors and upon certain determinations by the company's Board of Directors).

The new Rights Plan also contains a number of additional changes to conform to current practice.

The new Rights Plan provides for the distribution of one new right for each outstanding share of the company's Common Stock held of record as of the close of business on March 21, 1990, at which time the rights issued under the company's original Rights Plan will be redeemed. The company will pay the 1 cent per right redemption price for the existing rights and will mail to stockholders additional information regarding the new Rights Plan, shortly after the March 21, 1990, record date for the redemption of the existing rights and distribution of the new rights.

Diamond Shamrock Inc. is a regional refiner and marketer of petroleum products with annual sales of approximately $2.1 billion. The San Antonio-based corporation has two Texas refineries, markets gasoline and diesel through approximately 2,000 Diamond Shamrock branded outlets, processes natural gas, and stores and markets natural gas liquids.

NEW YORK (MARCH 6) PR NEWSWIRE - The Centaur Partners Group, which owns more than 16.5 percent of the outstanding common stock of National Intergroup, Inc. (NYSE: NII), today began seeking the consent of stockholders to approve two proposals that would facilitate stockholder efforts to elect a new majority of directors to National Intergroup's board at its 1990 annual meeting on July 18.

"We are taking this action because we believe the common stock of National Intergroup is substantially undervalued," said Abbey J. Butler and Melvyn J. Estrin, the principals of Centaur. "In order for stockholders to realize the inherent value of their shares, we believe that a new majority of directors committed to the sale of assets and the provision of sale proceeds to stockholders must be elected to the board."

Centaur filed materials today with the Securities and Exchange Commission in Washington which it will use to solicit consents from all NII shareholders to increase the number of members on National Intergroup's board to 15 and to cut in half the 90-day advance notice that the company requires for identification of nominees for director.

Centaur holds 3,595,000 shares of National Intergroup's common stock and is the largest single stockholder of National Intergroup.

Centaur said it will begin mailing its solicitation to stockholders.

NEW YORK (MARCH 6) PR NEWSWIRE - The Outdoor Advertising Association of America (OAAA) has pledged $5 million worth of space to the Partnership for a Drug-Free America's fight against illegal drugs, it was announced today.

"Outdoor advertising is critically important to changing attitudes toward drug use," stressed Thomas A. Hedrick Jr., Partnership executive director. "It provides the public with a highly visible, constant reminder of the dangers of drugs."

"Individual companies have donated out-of-home space to the Partnership in

the past, but now the entire industry has put its resources into fighting illegal drugs," noted Mike Townsend, Partnership director of communications.

The Partnership, a non-profit, private-sector coalition of communications experts, creates powerful, targeted messages that are changing the way people feel about drugs. Recognizing that attitudes must change before behavior can, the Partnership's advertising aims to reduce drug use and build a national consensus of intolerance toward illegal drugs.

More than 5,000 billboards and signs across the country will display two striking Partnership messages throughout the year.

A new ad, created by the Patrick Agency, consists of a hand offering crack vials and the warning, "Addiction is Slavery." The message, designed to reach African-Americans, was unveiled to the public today during a ceremony on the grounds of the Capitol.

Austin Patrick, president of the agency that bears his name, discussed the impetus behind the message: "We have a moral obligation to fight for the community in which we work and live. So, we've chosen to evoke a 'race memory' that can empower our community to reject everything drugs stand for."

The "Cocaine Gun" series, which already appears in print and outdoor media will receive more exposure. Created by DDB Needham Worldwide, the newest version depicts a white teen pressing a gun to his nose in a symbolic gesture.

"In developing 'Cocaine Gun,' we wanted to make a simple statement with big impact that would unequivocally convey the dangers of cocaine use," said Catherine St. Jean, vice president, director of creative services, DDB Needham.

In announcing the pledge, OAAA President Roland McElroy said, "All of us, regardless of our profession or vocation, have a duty to be responsible stewards of the talents and resources we have been given. The outdoor advertising industry can think of no better way to exercise stewardship of its medium than to deliver a message that will help keep our nation's youth off drugs."

The initiative is led by Gannett Outdoor, which will post 850 30-sheet, 300 8-sheet and 200 bus-shelter signs in all of its 15 markets. Gannett's share of the pledge is worth $800,000.

The OAAA represents 80 percent of the industry and its affiliated representatives.

To date, 75 advertising agencies and dozens of production suppliers have donated their time to the Partnership. Sixty television messages, 47 radio spots and 107 print ads -- all aimed at "denormalizing" drug use -- have been created thus far. Print and broadcast media have donated the equivalent of some $310 million in time and space during the Partnership's first two years of operation.

DES MOINES, IA (MARCH 6) PR NEWSWIRE - Allied Group, Inc. (NASDAQ: ALGR) board Chairman and President John E. Evans today announced measures to initiate the restructuring plan proposed in October 1989. The original plan included replacing the existing pension plan with a leveraged employee stock ownership plan (ESOP) for all Allied employees, selling the life company to Allied Mutual, and infusing $28 million to Allied Group, Inc.'s property-casualty subsidiaries to increase their pooling participation percentage.

"The restructuring has had the approval of our stockholders since December " Evans stated. "We're still awaiting a favorable private letter ruling from the IRS regarding the exchange of our life company for Allied Group, Inc. common stock, but we must act now if the company is to benefit from the pooling change in the first quarter of 1990."

The board of directors approved the following interim steps:

- Establishing a non-leveraged ESOP. - Incurring a bank debt of $20 million. - Contributing the $20 million to the surplus of the company's property-casualty subsidiaries. - Increasing Allied Group, Inc.'s property-casualty subsidiaries' pool participation from 41 percent to 53 percent, effective Jan. 1, 1990.

Evans said he is confident the company will receive the favorable private letter ruling and the entire restructuring will be completed before the end of the year. The ruling will allow the exchange of Allied Life for 2.7 million shares of Allied Group, Inc. common stock. The ESOP will then be leveraged for $36 million to allow it to purchase 2.4 million shares of Allied Group, Inc. convertible preferred stock. Then, the $20 million bank loan will be repaid, and an additional $8 million will be transferred to the property-casualty subsidiaries to bring the total infusion to the proposed $28 million.

The board of directors also set the annual meeting date for May 17, 1990. Shareholders of record as of April 5, 1990, will be eligible to vote on

the election of directors.

Another board action was to increase the first quarter dividend to shareholders of record as of March 19 from 11 cents to 12 cents, payable March 30. The company has increased its annual dividend every year since 1986.

WASHINGTON (MARCH 6) PR NEWSWIRE - Twin United Technologies Corporation (NYSE: UTX) (UTC) Pratt & Whitney J58 engines again powered the U.S. Air Force/Lockheed Corp., SR-71 "Blackbird" reconnaissance aircraft, to break its previously held coast-to-coast records for speed.

J58 engine studies began in 1955. Design of the basic J58 engine -- which could dash to Mach 3 -- began in 1956 as a U.S. Navy program. The first engine run came on Christmas Eve 1957. It evolved to meet the requirements for an engine to operate continously at more than Mach 3 (2,000 miles per hour) and go higher than 80,000 feet.

Later, a unique design feature of the J58 was added. It was the bleed by-pass system, which consisted of three large diameter pipes running along each side of the engine. At high Mach, a portion of the air would by-pass the compressor and turbine sections, giving it stall-free operation. The bleed by-pass feature led to the popular description of the J58 engine as being a turbo-ramjet.

Prototype J58 engines were flown as early as 1962, and the first production engines, known as "YJs," flew a short time later.

The only major modification to the engine design occurred in 1964 when a light-weight afterburner and a variable vane inlet case were incorporated, making a "K" engine. Continous operation in military and afterburning conditions were also unique to this engine's design requirements. Today, it's the only engine rated for continous afterburning.

The engine can operate continously at more than Mach 3. Temperatures generated by this speed required that engine parts be made of high-temp alloys. Titanium in the very front of the engine was chosen for weight considerations, while Waspaloy, a nickel-iron alloy, was chosen for most other components. Other alloys used include: Inconel, Astroloy, Hastelloy-X and Haynes-25.

The control system of the J58 is purely hydromechanical, again because of temperature considerations in the nacelle. A remotely located,

closed-loop feedback electronic control is used for in-flight trimming of the engine.

The fuel is used not only for combustion, but as the hydraulic fluid, and as the primary coolant of all control system components. Even the engine oil is unique. It is pure synthetic, polyphenyl ether, and chemically stable up to 650 degrees Fahrenheit.

ATLANTA (MARCH 6) PR NEWSWIRE - WORLDSPAN Travel Agency Information Services today announced the signing of a long-term lease for 163,000 square feet of office space in the Galleria office complex in Cobb County.

The office space, located at 300 Galleria Parkway NW, Atlanta, will serve as world headquarters for WORLDSPAN. WORLDSPAN will occupy floors 15 through 21 and will house approximately 600 WORLDSPAN employees. WORLDSPAN is a joint venture of Delta Air Lines, Northwest Airlines, and Trans World Airlines to develop and market a global, neutral computer reservations system to the domestic and international travel agency marketplace.

Cal Rader, WORLDSPAN chief executive officer, said the Galleria complex, which is the former world headquarters of Nabisco, Inc., will include executive offices, legal, finance, human resources, and associated corporate personnel, as well as a customer assistance center, software development center, training and demonstration facilities, and the Southeastern regional sales office.

"WORLDSPAN will also maintain offices in Kansas City," he said, "where Efrain Zabala, WORLDSPAN chief operating officer, our marketing staff, customer service, development and product planning staffs, the WORLDSPAN Travel College, and a number of other departments are based."

Rader said WORLDSPAN was also evaluating several possible sites in the Atlanta area for a multi-million dollar data center to be constructed in the near future.

Occupancy of the Galleria office is expected to begin as soon as remodeling work can be accomplished.

#90065p0224 03/06/1990 ~PR Newswire
WASHINGTON (MARCH 6) PR NEWSWIRE - United Press International has filed for arbitration of its claim against Reuters that since January 1985 Reuters has deprived UPI of revenue by supplying former UPI customers with Reuters' photo service.

Under agreements between UPI and Reuters, Reuters is obligated to reimburse UPI for any revenue it loses as a result of UPI subscribers shifting to Reuters' photo service.

UPI's statement of claim in the arbitration seeks damages of more than $600,000, with the precise amount to be determined by the arbitrator. To determine the full extent of its damages, UPI has also asked that it be allowed to obtain additional information from Reuters about former UPI customers it now serves and how it has lured those customers away from UPI.

The request for arbitration was filed with the International Chamber of Commerce Court of Arbitration, as agreed in the photo exchange contract between UPI and Reuters.

On Feb. 27, 1990, the U.S. District Court in New York issued a temporary restraining order requested by UPI that barred Reuters from unilaterally terminating the flow of news photos from outside the United States to UPI

-- which UPI then sent to its clients -- under an arrangement that began Jan. 1, 1985.

Reuters had without warning halted the flow of Reuters pictures to UPI for more than four hours on Feb. 16, 1990. In a statement later that day, UPI described Reuters' unilateral actions as unjustified and as damaging to the interests of both companies' subscribers.

On March 12, the district court will hear UPI's request for a preliminary injunction against Reuters' attempts to terminate the photo agreement. UPI, founded in 1907, has nearly 200 bureaus and is represented in 90 nations. UPI is owned by Infotechnology, Inc. (NASDAQ-NMS: ITCH).

NEW YORK (MARCH 6) PR NEWSWIRE - Lord & Taylor announced today that its opening benefit to celebrate the store's grand opening in Westfield, N.J., will be moved to an earlier date of Wednesday, April 4. The private shopping reception, titled "A Salute to Westfield," will benefit the United Fund of Westfield and the Westfield Symphony Orchestra. The benefit will be underwritten in total by Lord & Taylor and hosted by Marshall Hilsberg, the company's chairman and chief executive officer. (Lord & Taylor has also announced that the Westfield store will open on Saturday, March 31.)

Guests at the benefit will be greeted by senior executives of Lord & Taylor including Hilsberg; Ronald F. Tanler, president; Earl F. Sluss, executive vice president, director of stores; Joan Madison, regional vice president, New Jersey area stores; Charles Marinello, managing director of the Westfield store; and representatives of the charities. Special highlights of the evening's festivities will include: an American feast, catered by Paul Guarino Enterprises of Northvale, N.J., featuring regional specialties representative of Lord & Taylor's presence throughout the country; a modeling presentation of Fashion AmericanStyle; performances by the Westfield Symphony Orchestra Brass Quartet; and music throughout the store. Guests will also receive a 20 percent discount on items purchased that evening.

Guests will contribute $50 to attend the event with all proceeds going to the United Fund of Westfield and the Westfield Symphony Orchestra. For more information, or to purchase tickets, contact Linda Maggio, executive director for the United Fund of Westfield, at 201-233-2113, or Janet

Smiljanic, general manager, Westfield Symphony Orchestra, at 201-232-9400.

AUGUSTA, GA. (MARCH 6) PR NEWSWIRE - Southeast Federal Savings Bank of Rossville, Ga. and Decatur Federal Savings and Loan Association of Decatur Ga. announced the signing of a non-binding letter of intent stating in principle that Decatur Federal will acquire the physical assets and assume the deposits of the Dalton Branch office of Southeast Federal Savings Bank.

At Dec. 31, 1989, the Dalton Branch of Southeast Federal had deposits of approximately $13.9 million.

Prior to negotiating a definitive agreement, the proposal must be approved by the boards of directors of Southeast Federal Savings Bank and Decatur Federal and regulatory authorities.

H.M. Osteen Jr., chairman and chief executive officer of Bankers First Corp., commented, "The sale of the Dalton Branch is part of our restructuring plan to sell branch banking facilities in communities that are outside of our primary markets."

Robert C. McMahan, chairman of the board and chief executive officer of DFSoutheastern Inc., stated: "The acquisition of Southest Federal's Dalton Branch will enhance our presence in the North Georgia area. However, our plans at present call for relocating our Hamilton Street office to the newer Southeast Federal Building."

Decatur Federal Savings and Loan Association is the wholly owned subsidiary of DFSoutheastern Inc., headquartered in Decatur, Ga. The holding company's commons stock is traded in the NASDAQ Over The Counter securities exchange under the symbol "DFSE."

Southeast Federal Savings Bank is a wholly owned subsidiary of Bankers First Corp., a financial services company principally serving the Augusta, Athens, Rossville, and Savannah, Ga. markets with 39 banking offices and 33 automated teller machines. The company's common stock is traded on the NASDAQ National Market System using the symbol BNKF. The abbreviation found in most newspaper listings is "Bankers First."

SANTA ANA, CA (MARCH 6) PR NEWSWIRE - Southland Communications Inc. (NASDAQ: SCII) is commencing a private placement which is intended to raise up to $5 million. The private placement is being offered to a select group of foreign investors.

A portion of the proceeds from the private placement is intended to be used to finance the acquisition of A+ Beepers of California, with the majority of the balance of such proceeds to be used as working capital. The company believes that it will close such a placement by the end of March 1990.

The company also announced that it has reached an agreement in principle for the acquisition of A+ Beepers of California for a combination of stocks and notes. The consummation of the acquisition is subject to the execution of a definitive merger agreement and other conditions. The company believes that it will consummate such an agreement shortly after the closing of the private placement memorandum.

The combined entities will have approximately 75,000 pagers in service, thus ranking the new company among the top five paging companies in California. The synergies that exist between both companies will provide for a higher cash flow once both companies are fully integrated.

Southland Communications Inc. does businees as National Paging, providing electronic paging services for individuals and business subscribers.

WILMINGTON, DE (MARCH 6) PR NEWSWIRE - Du Pont (NYSE: DD) today reported it is implementing a program to collect and recycle aluminum cans from several New Castle County sites.

The program will enable employees at Wilmington office buildings, Chestnut Run Plaza, Edgemoor and the Engineering Development Laboratory (EDL) to recycle aluminum cans from site vending machines, as well as those brought from home.

Proceeds from the office buildings and EDL collections support the Child Care Connection's "Cans for Kids" scholarship program, which helps low-income and moderate-income families pay for licensed child care.

Proceeds from the other locations will be donated to charities designated by site recycling committees.

"We are happy to be part of this program -- it is a real win-win situation " said H. Gordon Smyth, senior vice president - employee relations. "Recycling aluminum cans is environmentally responsible and provides funds to help support Child Care Connection and other Delaware organizations."

Du Pont employees also are recycling white paper at several county sites. The two programs are part of an effort that is expected to expand to company sites around the country.

"This program gives important new life to valuable materials through recycling and helps Du Pont achieve its goal of corporate environmental stewardship," said Archie W. Dunham, group vice president - polymer products.

In December, Du Pont introduced a pilot program for employees and their families to collect and bring in for recycling plastic beverage bottles and containers at eight county sites. The program has spread to 11 sites and further expansion is planned.

ROCHESTER, NY, (MARCH 6) PR NEWSWIRE - Genesee Corporation (NASDAQ: GNBB) today announced consolidated sales and earnings for the third quarter and nine months ended Jan. 31, 1990.

Third quarter gross sales improved 4.7 percent to $36,336,000 compared to the same period of the previous fiscal year. Nine month gross sales were $119,833,000, a slight increase over the prior year. The corporation also reported net earnings increased to $739,000 for the third quarter compared to a net loss of $785,000 last year.

Genesee Corporation officials noted increased sales revenues from the brewing and food subsidiaries contributed to the improvement for the quarter. Officials also attributed improved earnings to a more favorable package mix, lower ingredient costs and continued effort to contain costs at the Genesee Brewing Company.

Genesee Corporation president and CEO, John L. Wehle, Jr., noted that the corporation was encouraged by the improved results. Wehle stated, "We are seeing the results of our efforts to reverse sales trends and reduce costs and we are working to continue these positive trends in the months ahead."

COMPARATIVE STATEMENT OF EARNINGS

HOUSTON (MARCH 6) PR NEWSWIRE - Allwaste Inc.(NASDAQ: ALWS) has completed the acquisition of National Waste Companies Inc. of Dallas. National Waste owns and operates a wastewater pre-treatment facility and a fleet of liquid vacuum trucks which are used exclusively for transporting non-hazardous, liquid waste to the facility.

Consideration consisted of a combination of cash and Allwaste common stock and the acquisition will be accounted for as a purchase. Additional consideration, consisting of a combination of cash and common stock, is payable contingent upon earnings of the business over the next three fiscal years. David and Brian Bidelspach, two of the former owners of National Waste, have signed employment agreements to continue managing the operation.

According to R.L. Nelson Jr., Allwaste's chairman, "Since inception, Allwaste has pursued a strategy of accessing niche opportunities in the huge 'waste' market. This acquisition broadens Allwaste's sludge and wastewater treatment capabilities and strengthens our vacuuming and transporting services base. This business should experience rapid growth as a result of new environmental regulations regarding liquid waste disposal."

Allwaste Inc. is an environmental services company headquartered in Houston.

NEW YORK, (MARCH 6) PR NEWSWIRE - The 70th annual meeting of ITT Corporation (NYSE: ITT) shareholders will be held in the Sheraton Tucson

El Conquistador Hotel, in Tucson, Ariz. at 10:30 a.m. on Tuesday, May 15, 1990, Rand V. Araskog, ITT's chairman and chief executive, announced today.

"The selection of Tucson, the second largest city in The Grand Canyon State, continues ITT's policy of rotating our annual meeting among cities and regions where we have a significant number of shareholders and operating units," Araskog said. Over the past five years, ITT has held annual meetings in Bal Harbour, Fla., Seattle, New Orleans, Savannah, and Dallas.

In Arizona and the neighboring states of California, Nevada, Utah, Colorado and New Mexico, ITT generated 1989 sales and revenues of over $2 billion. In this region, ITT employs nearly 12,500 workers, has a payroll of $430 million and pays some $34 million in state and local taxes. There are approximately 10,500 ITT shareholders in the region who own 1.8 million shares of common and preferred stock. Approximately 10 million additional shares are held by institutional investors in the region.

The Sheraton Tucson El Conquistador is one of 40 properties in Arizona and the neighboring states franchised or operated by ITT Sheraton. The 440 room, four-star hotel and country club is a fine example of the urbanized desert culture being developed by Arizonans today.

Along with ITT Sheraton, all the company's nine major businesses are represented in the region, including sizable operations of ITT Hartford, ITT Financial and ITT Electronic Components.

ITT Corporation is a diversified multinational company that manufactures and sells products including automotive, electronic components, fluid technology, defense and pulp and timber and sells services including insurance, financial, communication and information and ITT Sheraton hotels. The company also has a 37 percent interest in the world's largest telecommunications manufacturing company, Alcatel N.V., a joint venture with CGE of France.

MIDDLETOWN, PA (MARCH 6) PR NEWSWIRE - The Three Mile Island Unit 1 reactor was shut down today at 10:42 a.m.

Operators began shutting down the plant at 9:12 a.m. as a precaution after receiving indications of a small leak, believed to be less than one gallon per minute, from the primary nuclear water to the secondary water in a steam generator.

An in-plant radiation montior is indicating that a minimal release is occurring from the plant above normal operating conditions. The release is not measurable on off-site radiation monitors. The shutdown is a precautionary measure and no emergency condition exists.

The release will continue at a minimal level until the plant reaches a cold shutdown condition tonight.

The plant was operating at 75 percent power when the leak was detected. Officials of the U.S. Nuclear Regulatory Commission, the Pennsylvania Bureau of Radiation Protection and the five TMI area counties have been notified.

RYE, NY (MARCH 6) PR NEWSWIRE - Supradur Companies, Inc. (NASDAQ: SUPD) today reported the results of its operations for the year ended Dec. 31, 1989. The results for 1989 have been restated to reflect the discontinuance of the company's electronic security systems business, Datura International, Inc., which was sold as of May 31, 1988.

Sales for 1989 decreased 10 percent to $25.9 million from $28,717,000 in 1988. Net income after taxes from continuing operations from 1989 was $1,019,000, or $1.08 per common share, compared to $1,936,000, or $1.88 per common share in 1988. Net income for the year was $1,116,000, or $1.18 per common share, as compared to $5,262,000, or $5.14 per common share, for 1988. Included in the 1989 results is an after-tax gain from discontinued operations on the disposal of assets (primarily the sale of Datura) of $97,000. In 1988 the gain was $2,321,000 along with extraordinary income of $1,005,000. Also, included in this year's results is a foreign currency exchange gain of $51,000 compared to an exchange gain of $10,000 in 1988.

K. Fred Netter, president, stated that 1989 results were adversely effected by the initial start-up costs at the new Montreal facility as well as development expenses being incurred in the Wind Gap, Pa., manufacturing facility in connection with the efforts to produce asbestos-free products. The decrease in sales was attributable to the decline in domestic construction activity which reduced demand for the company's roofing and siding products.

According to Netter, the Wind Gap facility shipped asbestos-free fiber-cement slate products for the first time during the fourth quarter 1989. The Montreal facility is now in full production and asbestos-free fiber-cement commercial and industrial products are being shipped on a

regular basis. He concluded by stating that the high-tech precision machining and sheet metal groups continue to show strong operating results.

Supradur Companies, Inc. is a diversified company with operating divisions throughout the United States, Canada and Europe.

MIAMI, (MARCH 6) PR NEWSWIRE - Cordis Corporation (NASDAQ-NMS: CORD) today reported that the Food and Drug Administration (FDA) has given final approval to its Orion catheter, an advanced angioplasty device for opening narrowed coronary arteries.

Robert C. Strauss, Cordis president, hailed the action, calling the device critical to Cordis' continued success. "Technologically," he stressed, "Orion positions Cordis among the industry leaders. Strategically, it opens a highly promising market to the company."

The Cordis president said that the new device, which the company has been marketing for several months in foreign markets, is now being shipped to sales representatives throughout the U.S.

Cordis is the world leader in coronary angiography, diagnostic procedures that involve the visualization of the internal anatomy of the heart. With

industry sales now approaching $300 million worldwide, Cordis products account for some 40 percent of the total. Moreover, the Miami-headquartered company manufactures and markets six of every 10 diagnostic catheters sold throughout the world.

Orion, Cordis officials contend, represents the company's best opportunity to date for success in angioplasty, a market in which it currently is a relatively minor player. Totaling some $600 million worldwide and increasing 15-20 percent per year, the coronary angioplasty market is twice the size of, and increasing twice as fast as, its diagnostic counterpart. Thus, coronary angioplasty, therapeutic procedures in which balloon-tipped catheters assist in opening narrowed arteries of the heart, represents a potentially attractive business opportunity for Cordis.

Miami-based Cordis Corporation manufacturers and markets a variety of medical devices and systems for the angiographic and neuroscience markets. Shares of the company's stock are traded on the NASDAQ National Market under the symbol CORD.

FAIRFIELD, NJ (MARCH 6) PR NEWSWIRE - Ogden Projects, Inc. (NYSE: OPI), announced today it has filed a registration statement with the Securities and Exchange Commission for the sale to the public of 1,500,000 shares of common stock. After completion of this offering, Ogden Corporation (NYSE: OG) will own approximately 85.6 percent of the outstanding common stock. The common stock of Ogden Projects, Inc., will be offered to the public through Merrill Lynch Capital Markets and Salomon Brothers Inc.

Ogden Projects, Inc., through its subsidiary, Ogden Martin Systems, Inc., is a leading full-service builder and operator of solid waste-to- energy facilities for counties and municipalities in the United States.

A registration statement relating to these securities has been filed with the Securities and Exchange Commission but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This announcement shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any state in which such offer, solicitation or sale would be unlawful prior to registration or qualification under the securities laws of any such state.

Copies of the prospectus relating to the offering of these securities may be obtained from Merrill Lynch Capital Markets, 250 Vesey St., New York,

NY 10281, or from Salomon Brothers Inc, One State Street Plaza, New York, NY 10004.

LANGHORNE, PA. (MARCH 6) PR NEWSWIRE - Cabot Medical Corp. (NASDAQ-NMS: CBOT) today announced record sales and net earnings for the first quarter ended Jan. 27, 1990.

Net sales for the first quarter were $5,396,000 compared to $4,492,000 in the prior year's first quarter. Net earnings for the period were $331,000 or $.05 per share, compared to the previous year's net earnings of $309,000 or $.05 per share.

Commenting on the first quarter results, Warren G. Wood, president of Cabot Medical Corp., stated, "Both sales and pre-tax earnings increased by 20 percent, but a higher effective tax rate this year reduced after tax earnings growth to 7 percent compared to the same period last year. Our 20 percent sales growth was divided equally between domestic and international sales, reflecting our success in simultaneously expanding our marketing activities in both areas."

Cabot Medical Corp. designs, develops, manufactures and markets a variety of medical devices and systems for improving female reproductive health care. These products are sold under the Cabot, KLI, Berkeley and Cryomedics brand names.

CHICAGO, (MARCH 6) PR NEWSWIRE - UNR Industries, Inc. (NASD: UNRI) reported 1989 sales totaling $385.1 million, and income before an extraordinary item and discontinued operations of $44.7 million, or $.97 per share. This compares with 1988 sales of $389.1 million and income before discontinued operations of $26.2 million, or $.57 per share. The results include after-tax amounts of $29.5 million and $7.5 million for asbestos insurance recoveries in 1989 and 1988, respectively.

The net loss in 1989 of $68.7 million, or $1.49 per share includes an extraordinary charge of $109.6 million, or $2.38 per share. This non-cash accounting adjustment was necessary to reflect the issuance of 42.4 million shares of common stock to creditors for settlement of all claims in accordance with the Company's Plan of Reorganization. Net income in

the prior year was $26.0 million, or $.57 per share.

Fourth-quarter sales in 1989 totaled $99.9 million with income before discontinued operations of $5.6 million, or $.12 per share. This compares with 1988 sales of $101.2 million and income before an extraordinary item and discontinued operations of $5.2 million, or $.11 per share. The 1989 results include after-tax amounts of $1.2 million for asbestos insurance recoveries.

Net income in the fourth quarter of 1989, after recording a $1.4 million loss from discontinued operations, was $4.2 million, or $.09 per share. In the fourth quarter of 1988, after recording a reversal of a first-quarter extraordinary credit of $1.1 million relating to net operating loss carryforwards and a discontinued operation loss of $0.1 million, the company reported net income of $4.0 million, or $.09 per share.

One June 2, 1989, the company emerged from the Chapter 11 proceedings instituted on July 29, 1982. On June 9, 1989, an appeal was filed from the order confirming the Plan of Reorganization. A motion is pending in the U.S. District Court to dismiss the appeal as moot. Requests for stays of the effect of the confirmation order have been denied by the Bankruptcy Court, the U.S. District Court and the U.S. Court of Appeals for the Seventh Circuit.

UNR INDUSTRIES, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(1) REORGANIZATION On July 29, 1982, UNR Industries, Inc. and certain subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the Bankruptcy Code. The filings were precipitated by contingent liabilities resulting from litigation arising out of asbestos-related

operations owned by UNR's predecessor corporations. On June 2, 1989, the company's Plan of Reorganization (the "Plan") was confirmed by the Bankruptcy Court following acceptance of the Plan by the company's creditors and stockholders. The principal terms of the Plan, which are reflected in the accompanying financial statements, are as follows:

a) Approximately 64 percent of the common stock of the reorganized company is to be issued to the trustees of a UNR Asbestos-Disease Claims Trust for the benefit of asbestos-disease claimants,

b) Approximately 28 percent of the common stock of the reorganized company is to be issued to a disbursing agent for the benefit of unsecured creditors other than asbestos-disease claimants,

c) Pre-petition stockholders will retain their stock, which represents approximately 8 percent of the common stock of the reorganized company. These stockholders received six-year warrants to purchase an additional 8 percent of the common stock of the reorganized company at $5.15 per share, and

d) Any recoveries from insurance companies and/or the U.S. government will become assets of the company.

On June 9, 1989, an appeal was filed from the order confirming the Plan of Reorganization. A motion is pending in the U.S. District Court to dismiss the appeal as moot. Counsel for the company have advised it that they expect to prevail on the motion. Requests for stays of the effect of the confirmation order have been denied by the Bankruptcy Court, the U.S. District Court and the U.S. Court of Appeals for the Seventh Circuit.

By another order effective June 2, 1989, the Bankruptcy Court permanently enjoined any actions against the company by asbestos-disease claimants and others. An appeal from the injunction order is pending. The company and their counsel believe that the appeal has no merit.

In 1989, the company recorded an extraordinary loss of $109.6 million that reflects the difference between pre-petition liabilities as recorded in the company's balance sheet prior to reorganization and the market value ($5.19 per share) of the 42.4 million shares of common stock issued to creditors in accordance with the Plan.

The Plan relieves the company of the burden of defending and settling thousands of asbestos lawsuits. This was accomplished through the creation of the UNR Asbestos-Disease Claims Trust to assume, administer, settle and pay claims. In lieu of bringing actions against the company, asbestos claimants must assert their claims against this trust, which owns 29,437,004 shares of common stock of the company. The order confirming the Plan of Reorganization, the injunction order and the Federal

Bankruptcy Code prohibit all persons from taking any actions against the company with respect to any past, present or future asbestos-related liabilities.

(2) INSURANCE RECOVERIES In 1989, the company entered into settlement agreements with a current value totaling $47.5 million with certain insurance companies against which the company filed suit in 1983. Under the terms of the settlement agreements, $8.6 million was paid to the company, $7.0 million was paid into an escrow account, and $40.0 million will be paid into an escrow account over a three-year period pursuant to certain non- interest-bearing notes entered into with a current discounted value of $33.6 million. These escrow accounts will be released to the company when appeals of the confirmation orders have been exhausted.

In 1988, the company received $11.9 million from certain of its carriers. Of this amount, $11.6 million was held and invested by the company pursuant to a court order and was released upon confirmation of the Plan of Reorganization.

The company continues to assert in pending litigation that certain insurance companies have substantial additional obligations in excess of $15 million under their insurance policies.

(3) INCOME TAXES For financial reporting purposes, the company has net operating loss carry-forwards of over $150 million, for which no tax benefit has been recorded. The extraordinary reorganization charges included in the 1989 statement of income are not deductible for income tax purposes at this time. These charges will be deductible for income tax purposes in the year distributions are actually made by the UNR Asbestos-Disease Claims Trust to claimants. However, the timing of future distributions is undeterminable. The related deductions will result in a reduction of that year's current tax liability and may also generate tax loss carry- backs or carry-forwards.

WHITE PLAINS, N.Y. (MARCH 6) PR NEWSWIRE - Standard & Poor's Corporation today announced that the ratings on senior debt of Texaco Inc. and related entities have been upgraded from single A to single A- Plus. Also, the rating on the company's preferred stock was upgraded from single A to single A-Plus.

James W. Kinnear, president and chief executive officer of Texaco Inc., said the company is delighted with Standard & Poor's announced upgrading. It was also noted that on Feb. 14, 1990, Moody's upgraded Texaco Inc.'s senior debt ratings from A2 to A1.

Kinnear stated that: "Both major rating agencies have taken action to ugrade the company's debt to the highest single A rating. These actions recognize the continued improvement in the company's financial position and operating performance. This upgrading is particularly rewarding for our bond holders and supports their confidence in Texaco. Further, we are pleased with the timing of the Moody's and Standard & Poor's announcements as the company proceeds with its financing plans for the current year."

The rating agencies based their actions on Texaco's improved operations and stable industry outlook. The following key factors were cited in the upgrades:

-- improved upstream performance through focused exploration programs and enhanced oil recovery projects;

-- improved financial flexibility as a result of strong cash flow and reduced debt levels;

-- strong downstream operations with increased market share in gasoline and motor oils;

-- the significance of Texaco's interest in Star Enterprise, a joint refining and marketing venture with Saudi Arabia having access to more than 4 billion barrels of oil over 20 years.

CADILLAC, MI (MARCH 6) PR NEWSWIRE - Kysor Industrial Corporation (NYSE: KZ) today reported financial results for the fiscal year ended Dec. 31, 1989. Sales were down slightly from the six consecutive record years culminating in 1988. The corporation experienced a loss as a result of writeoffs and other special charges, totaling $7,531,000 or $1.10 per share taken at year-end. The loss per share equated to $.94 for 1989 compared to earnings per share of $1.56 in 1988.

In addition, George R. Kempton, chairman of the board and chief executive officer, announced that the negotiations entered into between Kysor Industrial Corporation and Arneg Spa of Padova, Italy, whereby Arneg could acquire a joint venture interest in Kysor's wholly owned subsidiary, Kysor Warren Refrigeration GmbH of Limburg, Germany, have terminated. Kysor management has identified other European companies in a continuing effort to further evaluate strategic alliances for its Germany operations.

BOSTON (MARCH 6) PR NEWSWIRE - John Hancock Financial Services received the Catalyst Award for its innovative programs that help employees balance their work and family responsibilities. The Boston- based firm was one of three companies nationwide to be honored for its family care initiatives.

Hancock Chairman E. James Morton accepted the award at a ceremony at the Waldorf Astoria in New York City today. The award is presented annually by Catalyst to corporations whose programs and policies support recruitment, retention and leadership development of women.

Catalyst is a national organization dedicated to helping corporations foster career and leadership opportunities for women. Other recipients of the Catalyst Award this year were Eastman Kodak and US Sprint Communications.

John Hancock has long offered programs to help its employees juggle work and family responsibilities.

Hancock was one of the first firms in the Boston area to offer employees flexible working hours. Its employee assistance program, which provides on-premise counseling for job and family issues, stress, depression and substance-abuse problems, is one of the oldest in the country. The company was one of the first in the nation to launch an elder-care access program, which helps employees explore health-care options and locate the best possible care for elderly relatives through contact with a licensed geriatric social worker.

Hancock offers a child-care information and referral service, as well as a flexible spending account that allows employees to use pre-tax dollars for child- or elder-care expenses. It provides personal leaves for family care purposes, and reimburses employees for dependent-care expenses incurred during business travel that is not ordinarily part of their jobs.

This year, the company announced a stream of new family care initiatives, including: an on-site day care center for employees' children; supervised activities for employees' children during certain school holidays and vacations when Hancock is open (the "Kids-to-Go" program); a Summer Care

Fair to provide employees and the public with information on summer camps and vacations in New England; and the use of three salary continuance days for family care purposes.

Other family care programs include a psychological services program and physical wellness and sickness prevention programs.

Two-thirds of Hancock's home office worker population are women. Almost one-fifth of employees have at least one preschool-age child, and 15 percent have school-age children.

FORT LAUDERDALE, FL (MARCH 6) PR NEWSWIRE - BankAtlantic, A Federal Savings Bank (NASDAQ: ASAL) today reported a net loss of $3.6 million, or $1.11 per share, for the year ended Dec. 31, 1989, compared to a net loss (unaudited) of $4.2 million, or $1.37 per share, for the twelve month comparable period ended Dec. 31, 1988, according to BankAtlantic Chairman and Chief Executive Officer Alan B. Levan. The 1989 results included extraordinary gains of $2.3 million, net of tax, which resulted from the sale of Federal Home Loan Bank advances in the first half of the year. In 1988, BankAtlantic changed its year end from Sept. 30 to Dec. 31 to coincide with the year end of its holding company, BankAtlantic Financial Corporation (AMEX: BFC).

For the quarter ended Dec. 31, 1989, BankAtlantic reported a net loss of $2.8 million, or $.81 per share, as compared to net income of $50,000 or

$.02 per share, for the same period in 1988.

BankAtlantic's holding company, BankAtlantic Financial Corporation said today that it also expects to report a loss for 1989. BankAtlantic Financial Corporation owns approximately 65.6 percent of BankAtlantic's outstanding common stock. BankAtlantic is the holding company's principal asset and primary source of earnings. BankAtlantic Financial Corporation anticipates a loss for the year ended Dec. 31, 1989 of approximately $4.1 million, or approximately $2.46 per share, compared to a net loss of $4.3 million, or $2.35 a share, for the previous year. BankAtlantic Financial Corporation had a net loss in the fourth quarter of 1989 of $2.3 million, or $1.36 per share, versus net earnings of $62,000, or $.05 cents per share, for the same quarter in 1988.

"BankAtlantic continues to support FIRREA as the best means of stabilizing the nation's financial environment, including the more stringent regulatory capital standards which became effective on Dec. 7, 1989. We are pleased that BankAtlantic is in compliance with the tangible capital, core capital and risk-based capital standards of FIRREA. In addition, BankAtlantic has no brokered deposits and no junk bonds on its books, and accordingly has not been impacted by restrictions affecting those items," Levan said.

"BankAtlantic's loss for 1989 included a $5.4 million provision for possible loan losses and write downs of real estate owned of $1.0 million, including $877,000 relating to non-performing real estate loans being treated as in-substance foreclosures," Levan said. "BankAtlantic 's ratio of non-performing assets continued to be relatively low in 1989. It was 1.38 percent at Dec. 31, 1989, compared to 1.41 percent at Dec. 31, 1988.

"In addition, BankAtlantic loans in the consumer lending area increased to $412.7 million in 1989, compared to $317.1 million a year earlier. This growth included home improvement loans, which increased to $66.8 million in 1989, compared to $36.8 million in 1988," Levan said.

In late 1989, BankAtlantic began a bold new print and radio advertising campaign which challenges the public to compare their financial institution with BankAtlantic. "The public has responded strongly to the 'BankAtlantic Challenge,' particularly in the area of checking accounts. Since the campaign began BankAtlantic has opened 12,500 new checking accounts with total opening balances of $82 million," Levan said.

BankAtlantic, A Federal Savings Bank has assets of $1.89 billion and 46 banking locations in Broward, Palm Beach and Dade counties. A public company since 1983, BankAtlantic's shares are traded on the NASDAQ National Market System under the ticker symbol ASAL.

SOMERVILLE, NJ (MARCH 6) PR NEWSWIRE - Hoechst Celanese Corporation today reported record net earnings of $267 million on net sales of $6.0 billion for 1989.

Net earnings of $53 million on net sales of $1.5 billion were reported for the fourth quarter 1989.

Dr. Ernest H. Drew, Hoechst Celanese president and chief Executive officer said, "The excellent performance of the company was due to improved operational efficiencies corporate-wide, and is recognition of the importance of our quality values to the success of our business.

"We experienced favorable market conditions in most businesses, particularly in the first half of the year. The net earnings included a one-time gain from the sale of the Hoechst Celanese styrene plant at Bayport, Texas, to Huntsman Chemical Co., as well as increased earnings from affiliates, especially from Mexico," he said.

In 1989, the corporation spent $18 million on environmental, safety, and health operations for its more than three dozen plant and business sites. Hoechst Celanese Corporation is one of the largest U.S. chemical concerns, ranking among the Fortune 100 Industrials.

NEW YORK (MARCH 6) PR NEWSWIRE - Paramount Communications Inc. (NYSE: PCI) today reported earnings from continuing operations and net earnings for the first quarter of fiscal 1990 ended Jan. 31, of $21.2 million, or 17 cents per share. These results compared with earnings from continuing operations in the first quarter of fiscal 1989 of $11.7 million, or 10 cents per share, and net earnings of $69.2 million, or 58 cents per share, which included earnings of $57.5 million, equal to 48 cents per share, from discontinued operations.

The company said that results from continuing operations in the first three months of 1990 included net interest income of $37.9 million primarily resulting from the investment of the proceeds from the October 1989 sale of The Associates to a Ford Motor Company subsidiary.

Revenues for the fiscal 1990 first quarter were $844.6 million, compared with revenues of $773.1 million for the corresponding prior- year period.

Martin S. Davis, chairman and chief executive officer, reiterated the company's forecast for fiscal 1990 net earnings in the range of $2.10 to $2.60 per share. Net earnings, he said, are expected to include operating income from publishing operations of $150 to $175 million and operating income from entertainment operations of $200 to $250 million, as well as interest income from the investment of proceeds from the sale of The Associates. Davis further noted that, "In product- driven businesses such as ours, the achievement of any forecast is highly dependent on the performance of new products."

ATLANTA (MARCH 6) PR NEWSWIRE - Comunicaciones Celulares de Occidente, S.A. de C.V., a consortium of which BellSouth Mexico, Inc. is a major stakeholder, has been awarded the cellular license in the western region

of Mexico which includes Guadalajara, the second largest city in Mexico.

"By introducing cellular throughout Mexico, the Mexican government has once again demonstrated its commitment to modernizing its telecommunications infrastructure. BellSouth is pleased to play a role in this modernization effort," said Charles B. Coe, president of BellSouth International. "BellSouth continues to be committed to the development and expansion of the cellular industry in Latin America as evidenced by our activities in Buenos Aires, Uruguay and now Mexico."

"The Mexican partners are firmly committed to the development of telecommunications in Mexico, and we feel extremely proud to participate in such an important new business," said Carlos Hank Rhon, chairman of the board of Sociedad Industrial Hermes S.A. de C.V.

The network investment will be $97.3 million over the 20 year period of the license.

The Comunicaciones Celulares de Occidente system will be operational by the end of 1990 and is expected to serve 135,000 subscribers by the year 2000 and more than 265,000 by the end of the license.

The partners in Comunicaciones Celulares de Occidente are Sociedad Industrial Hermes S.A. de C.V., Promociones Industriales Banamex S.A. de C.V., BellSouth Mexico, Inc., Fabricas del Calzado Canada, S.A. de C.V., and Racal Telecom PLC.

BellSouth Mexico is a subsidiary of BellSouth Corporation (NYSE: BLS), the major provider of basic telephone service in the southeastern United States and one of the largest telecommunications companies in the world. BellSouth provides mobile systems services in the United States, the United Kingdom, France, Switzerland, Argentina, Uruguay and Australia.

ATLANTA (MARCH 6) PR NEWSWIRE - Delta Air Lines (NYSE: DAL) has filed for authority to serve Rome and Milan from its Atlanta hub. The new application is in response to a new bilateral agreement finalized in February between the two countries. This bilateral agreement provides for an additional U.S. carrier to be designated for service to Italy beginning April 1, 1992.

Delta's application calls for daily nonstop service from Atlanta to Italy. Rome and Milan would serve as co-terminals on the route.

"This application is being filed at this time as an expression of Delta's strong interest in serving the Atlanta-Rome/Milan market," the airline said in its application to the Department of Transportation. "Atlanta merits nonstop service to Italy and Delta is clearly the preeminent choice to provide such service.

"Delta will aggressively develop the Atlanta-Rome/Milan route and provide vigorous competition to existing U.S. - Italy services," Delta said in its proposal. Currently, Delta serves eight European cities from its Atlanta hub -- Dublin, Frankfurt, Hamburg, London, Munich, Paris, Shannon, and Stuttgart.

#90065p0335 03/06/1990 ~PR Newswire

NEW YORK (MARCH 6) PR NEWSWIRE - Isramco, Inc. (NASDAQ: ISRL) reported today that drilling on the Yam 2 had reached approximately 11,273 feet without encountering the zone of high pressure that caused a blowout and loss of the Yam 1, drilled one-half mile away in June 1989. Both wells are located in the Mediterranean off the coast of Ashdod, Israel. Drilling in the Yam 2 is proceeding.

In reporting on the drilling, Dr. Joseph Elmaleh, chairman, said that because of the possibility of a similar blowout in the Yam 2, it was decided to case the well up to the potential blowout level. This has been done, to a depth of 10,500 feet. The Yam 2 is budgeted for $17 million and is targeted for a total depth of 17,000 feet.

It had been thought that the sands that were encountered in the Yam 1 at approximately 11,000 feet might be part of a formation which extended to the Yam 2. These sands, which contained salt water and gases with carbon elements of hydrocarbon origin under high pressure, were believed to be coterminous with those in the Helez Oil Field onshore. Their absence at a similar level in the Yam 2 suggests that at the Yam 1 location they were part of vertical structure such as a channel, possibly pointing in a direction other than the Yam 2, Elmaleh said.

He also reported that Isramco had discontinued its joint venture to study and develop a wind energy program in Israel with U.S. Windpower.

"The government of Israel required the use of wind turbines of at least 250 watts generating capacity in order to award grants in aid to the program. At present U.S. Windpower's turbines generate 100 watts. In addition, U.S. Windpower sought 15-year contracts with Israeli utilities

in order to establish a program, whereas the utilities were willing to enter eight-year contracts.

"Although Isramco will reassess further participation in wind energy programs, our current priorities are the drilling of the Yam 2 offshore and the Bessor 1 onshore and the sulfur exploration program being conducted jointly with Israel Chemicals, Ltd. in the northern Negev Desert " Elmaleh said.

CONTACT: Dr. Joseph Elmaleh, chairman of Isramco, 212-888-0200, or John Swanson of Swanson Communications, 212-683-4890, for Isramco

ST. LOUIS (MARCH 6) PR NEWSWIRE - McDonnell Douglas (NYSE: MD), a pioneer developer of computer-aided software engineering (CASE) products, announces the licensing of its powerful new ProKit* WORKBENCH 2.0 to Price Waterhouse.

Citing McDonnell Douglas' commitment to systems integration, Price Waterhouse selected ProKit* WORKBENCH for unique features that support the entire systems development life cycle.

"We wanted a flexible CASE tool that can be tailored to our needs, and function in a project environment. ProKit* WORKBENCH packs the facilities we need into one tool for one price," says William J. Boyd, a consultant with the Software Engineering Support Group of Price Waterhouse.

ProKit* WORKBENCH, McDonnell Douglas' highly integrated software engineering technology, utilizes the best current practices in the industry. Providing immediate, quality results, ProKit* WORKBENCH makes system development more accurate, thorough and timely -- basic considerations for businesses that must quickly respond to competition.

Designed as comprehensive support for large projects, the new 2.0 version offers powerful features, such as relational data modeling, normalization assistance and schema generation. Other new features, such as presentation diagrams, ad hoc query/reporting and repository extender, add to the flexibility and power of ProKit* WORKBENCH. Prototyping capabilities employ sample data and feature a powerful screen editor and navigator that realistically models the system. Release 2.0 also produces high-quality color output in the form of plotted diagrams, sized up to three feet by four feet. All these features, included at no additional cost, are embedded in a highly integrated system that can adapt to the needs and standards of the customer.

The agreement between McDonnell Douglas Systems Integration Co. and Price

Waterhouse formalizes a relationship that elicits Price Waterhouse input regarding the future development of ProKit* WORKBENCH. Consultants are now learning about ProKit* WORKBENCH from Price Waterhouse instructors licensed to teach the product internally. Using the features of release 2.0, Price Waterhouse will tailor ProKit* WORKBENCH to conform to the firm's development methodology, System Management Methodology (SMM).

LOS ANGELES (MARCH 6) PR NEWSWIRE - PaineWebber Incorporated has expanded its Los Angeles public finance effort with the addition of three professionals, it was announced today by Paul B. Guenther, president of PaineWebber Incorporated.

Mark Adler has joined PaineWebber as vice president and manager of the L.A. Public Finance office; Timothy P. Carty has joined as vice president; and Daniel Gangwish has joined as associate. These three individuals will specialize in Mello - Roos transactions: California bond issues that fund the state's infrastructure, as well as assessment districts and certificates of participation.

PaineWebber also announced that the public finance office has relocated to 725 South Figueroa. The telephone number is 213-972-1511.

Guenther said, "We're pleased to have such talented individuals join our public finance effort in Los Angeles. This underscores our commitment to maintaining our leadership position in California public finance and strengthening our overall public finance effort by expanding into new areas of finance, such as Mello - Roos, higher education and derivative products."

Terry L. Atkinson, managing director and manager of PaineWebber's Municipal Securities Group, added, "Mello - Roos is a natural fit for PaineWebber, which has a strong California presence and a well respected retail distribution network. This group is well qualified to lead this effort for PaineWebber in California."

Adler, Carty and Gangwish join PaineWebber from Drexel Burnham Lambert's California Public Finance office. Adler, who joined Drexel in 1982, was most recently managing director and manager of Drexel's West Coast Public Finance Department. He received his B.S. in economics and M.B.A. from the Wharton School of Finance at the University of Pennsylvania. Carty has eight years' experience in the securities industry, serving most recently as a first vice president in Public Finance for Drexel.

He received his M.B.A. from the Wharton School of Finance and his B.A. in 1981 from the University of Chicago. Most recently a vice president at Drexel, Gangwish received an M.B.A. from Columbia University, a J.D. from the McGeorge School of Law in Sacramento, Calif., and a B.A. from Ottawa University in Ottawa, Kan.

PaineWebber Incorporated is one of the nation's leading full-service securities firms, serving the investment and capital needs of a worldwide client base.

DALLAS (MARCH 6) PR NEWSWIRE - American Airlines Inc., reported today that its passenger traffic in February climbed 13.6 percent, making it the best traffic performance for February in the company's history.

American's cargo traffic rose more than 30 percent in February, with strong gains in both domestic and international markets.

Last month, American flew 5.35 billion revenue passenger miles, compared with the 4.71 billion flown in February 1989. A revenue passenger mile is one paying passenger flown one mile.

American's capacity, measured in available seat miles, jumped 9.0 percent in February to 8.96 billion seat miles from 8.22 billion. The airline's load factor increased 2.5 points to 59.8 percent from 57.3 percent.

"Once again, American's aggressive focus on providing quality service has produced excellent traffic results," said Michael W. Gunn, American's senior vice president-marketing, "and we are looking for the trend to continue now that we are beginning to move into a busier time of the year."

Throughout its system, American boarded 5,294,100 passengers in February, up 12.7 percent from the 4,697,337 boarded last February.

For the first two months of the year, revenue passenger miles increased 10.3 percent to 11.0 billion from 10.0 billion in the same period of 1989. Available seat miles rose 8.1 percent to 19.00 billion from 17.57. The system load factor grew 1.2 points to 58.1 percent from 56.9 percent. Passenger boardings increased 9.0 percent to 10,760,306 from 9,875,326.

Freight ton miles rose 30.2 percent in February to 55.6 million from 42.7 million. Mail ton miles jumped 35.1 percent to 20.4 million from 15.1 million.

During the January-February period, freight ton miles increased 28.1 percent to 107.0 million from 83.5 million. Mail ton miles rose 38.9 percent to 43.5 million from 31.3 million.

"Last month's jump in cargo results was fueled primarily by our continued emphasis on this segment of the business and the overall growth of the airline," said William R. Boesch, American's vice president-cargo. "We have recorded more than 36 consecutive months of double-digit growth in cargo, which bodes well for American as we prepare to expand our cargo operation in the months and years ahead."

#90065p0374 03/06/1990 ~PR Newswire

RALEIGH, NC (MARCH 6) PR NEWSWIRE - North Carolina Electric Membership Corporation (NCEMC) Tuesday reaffirmed its commitment to building a peaking plant at Deep Gap in Watauga County.

The NCEMC Board of Directors voted to continue efforts to build the 30-megawatt diesel plant at Deep Gap despite concerns about the site that have been raised by residents of the community and by the board Blue Ridge Electric Membership Corporation (EMC), Lenoir.

In addition, NCEMC attorneys filed a motion with the North Carolina Utilities Commission (NCUC) asking that the agency move ahead to grant a "Certificate of Public Convenience and Necessity" for the plant without holding a hearing.

The motion notes that the commission had originally scheduled its hearing in Boone for Jan. 4, which was more than three months after NCEMC filed its application for the certificate. State law requires that if the commission sees fit to order a hearing in such cases, it must be hled within three months after the application for certificate is filed.

"We have absolutely no objection to presenting to the public all the facts concerning this plant," said Wayne D. Keller, executive vice president of NCEMC. "We have prepared testimony and scheduled expert witnesses to appear on our behalf at the hearing. But we felt it was necessary to formally object to the commission's handling of the matter as a means of protecting the legal rights of all electric co-op consumer-members across the state."

The plant would be used to provide power for NCEMC member co-ops during periods of peak demand for electricity and would operate no more than 340 hours a year. By using facilities of this type in this way, NCEMC can avoid buying expensive peaking power from investor-owned utilities.

The plant is expected to save NCEMC about $35 million over the life of the operation -- after construction costs have been recovered.

"We feel that this plant will be a model facility in terms of having minimal environmental impact," said Keller, noting that the project has already received an air quality permit from the North Carolina Division of Environmental Management.

"We're moving to build this plant and others like it in order to assure we have adequate supply of power to meet the needs of the state's cooperatives and their consumer-members through the 1990s. At the same time, we're trying to provide power at the lowest possible cost."

In addition to the Utilities Commission's approval, NCEMC must also obtain

clearance for the plant from the Rural Electrification Adminstration (REA) a federal agency that provides financing for electric co-ops. However, no REA funds will be used for the Deep Gap plant. NCEMC will use general funds for its construction.

NCEMC first announced plans for the plant last summer, using a timetable that called for the facility to be operational by the summer of 1990. That schedule was shifted after residents of Watauga County area objected to that plant's site about seven miles east of Boone.

Plans now call for building the plant in time for it to be in operation by the summer of 1991. The delay means NCEMC must pass up about $3 million in estimated savings for 1990.

#90065p0375 03/06/1990 ~PR Newswire

EVANSTON, IL (MARCH 6) PR NEWSWIRE - Packaging Corporation of America (PCA) has acquired Pressware International Inc., the leading producer of environmentally acceptable pressed paperboard trays in North America.

This move significantly boosts PCA's range of food packaging products. Pressware International, which posted annual sales of more than $24 million in 1989, manufactures and markets a variety of paperboard trays used for packaging food items in the frozen food, fast food, bakery, supermarket and institutional food industries. The company is based in Columbus, Ohio.

"Pressware International gives PCA a strong presence within the food processing market," said Monte R. Haymon, president and chief executive officer of PCA. "It adds a major component to PCA's already extensive capabilities in dual ovenable and microwave-only packaging, and positions it strongly in growing markets for recyclable microwave and take-out food packaging."

Consumer demand for the convenience of prepared food and microwave cooking has driven the pressed paperboard market in recent years.

According to Patrick J. Fortune, senior vice president and general manager of PCA's aluminum and plastics group, pressed paperboard products are not only cost effective but environmentally acceptable, a factor that will become even more important in the 1990s.

"Consumers want packaging which is economical, safe for use in microwave and conventional ovens, and environmentally friendly. Pressed paperboard

meets these requirements perfectly," Fortune said, "and Pressware's reputation for quality and service make them a particularly attractive acquisition for PCA."

Recent market research reveals that close to 85 percent of U.S. homes now contain microwave ovens, a figure which should reach 95 percent by the middle of the decade. Also, retail sales of frozen dinners should reach $18 billion, up more than 400 percent since 1986.

Packaging Corporation of America, a Tenneco company, is one of the nation's leading manufacturers of corrugated containers, containerboard, molded fibre products, disposable plastic and aluminum containers, folding cartons and recycled paperboard.

LOS GATOS, CA (MARCH 6) PR NEWSWIRE - Telenova, Inc. has completed its 1989 acquisitions of RCA Business Telephones and Memorex Telex Telecommunications and is moving toward consolidation of the businesses, it was announced today. Most corporate functions will be centered in Telenova's headquarters in Los Gatos.

With this restructuring and consolidation, Len Schneider, formerly president, located in Mount Laurel, N.J., has been replaced by Eric Evans.

Evans was the chairman and CEO of Communications Corporation of America (CCA) and a senior executive with the Hallwood Group, Inc., a New York Stock Exchange-listed merchant bank specializing in corporate turnaround.

Evans will serve as the president and general manager of RCA Business Telephone Systems while reporting to the chairman and CEO, E.J. Keane.

Keane commented, "Telenova's organizational changes are designed to most efficiently serve our customer base, prepare the new company to address changing market demands for new products and services and streamline operations and costs for maximum control and utility."

Telenova designs, manufactures and distributes advanced business telecommunications products internationally.

ATLANTA (MARCH 6) PR NEWSWIRE - The Georgia Public Service Commission (PSC) today rejected Southern Bell's push to change the way it charges companies that provide information over the telephone.

Southern Bell had proposed to charge the developing information services business on a per-call rather than a per-line basis. Information providers were the only companies that were targeted for such a tariff.

At a Dec. 7, 1989 PSC hearing, Cox Enterprises Inc., intervened, testifying that the proposed tariff was excessive and discriminatory and was motivated by Southern Bell's desire to eliminate competition in an industry it wants to enter.

Today, the PSC rejected, by a vote of four-to-one, Southern Bell's per-call tariff proposal. In addition, the PSC took steps to ensure that Southern Bell's entry into this field will be closely monitored and controlled.

"We are quite pleased that the Public Service Commission saw that this proposal would stifle development of the fledgling information services industry," stated William L. Killen Jr., Cox's director of financial analysis and planning.

The Georgia Public Service Commission also reduced Southern Bell's proposed premium flat rate (per-line) charge for lines affected by the tariff from $99 to $90. The charge for a standard business PBX line is $66.

"We're still concerned about the premium flat rate that the commission accepted. We don't think that Southern Bell proved that it will incur any additional costs when it offers these services, so a premium rate is not justified," said Killen.

"Nevertheless, the PSC's ruling rejecting the tariff is a strong step in the right direction and we commend them for it," he added.

Cox Enterprises provides information on sports scores, stock prices, weather and entertainment over the telephone via the Voice Information Services unit of the Atlanta Journal and Constitution.

In addition to Cox Enterprises, other intervenors against Southern Bell in the tariff proposal hearing included Prodigy Services Inc., Telenet Communications Corp., Georgia Association of Telemessaging Services, Dunn Communications and Message World.

Cox Enterprises also intervened in a hearing before the PSC, in January, opposing Southern Bell's request for accelerated depreciation which would make telephone customers pay higher rates to finance Bell's entry into new businesses such as cable TV. Cox operates cable systems serving 60,000 subscribers in Macon and Warner Robins, Ga. The PSC decided following that hearing to delay decision on the request until a rate case this spring when it may seek to reduce Southern Bell's overall level of earnings.

Headquartered in Atlanta, Cox Enterprises is a major media company whose primary businesses are newspaper publishing, cable television, and television and radio broadcasting. The company is also the largest operator of automobile auctions in North America.

WASHINGTON (MARCH 6) PR NEWSWIRE - Herbert F. Collins, chairman of the Board of Boston Capital Partners, Inc., has been appointed by Jack Kemp, secretary of Housing and Urban Development (HUD) and chairman of the Federal Housing Finance Board, as the new chairman of the board of directors of the Federal Home Loan Bank of Boston.

Collins also has been named a director of the bank. Both appointments are effective immediately.

The Federal Home Loan Bank of Boston is a $12 billion central bank in New England, promoting home finance by providing advances (loans) and other services to its 314 members. Use of the bank's services helps members operate profitably, expand their home lending activities, and offer their communities a wide range of financial services.

In announcing the Collins appointment Under Secretary of HUD Alfred A. DelliBovi stated: "Herb Collins' experience in financing low-and moderate-income housing and his commitment to those who need affordable housing, make him an ideal candidate for this position. He brings to the

chairmanship, goals strongly shared by Secretary Kemp."

Collins may be reappointed after his one-year appointment as chairman has expired. He will serve as bank director for a four-year term. As chairman, Collins succeeds Dr. Eli Shapiro, the Alfred P. Sloan professor emeritus of management at the Massachusetts Institute of Technology (MIT).

In accepting the appointment, Collins stated his intention to encourage the bank to be instrumental as a "prime mechanism" for providing funding for affordable housing. "Financing for affordable housing is much too limited today," Collins observed. "The Federal Home Loan Bank of Boston has an excellent record in making funds available for housing, and I want to expand upon this commitment so that the bank and its members play an even greater role in meeting affordable housing and community investment needs."

The Federal Home Loan Bank of Boston is part of the Federal Home Loan Bank System, a national network of over 2,900 member mortgage- lending institutions, 12 regional Federal Home Loan Banks, and the Federal Housing Finance Board in Washington. It was created by the U.S. Congress in 1932 to promote the growth of a strong home-financing industry.

ESCONDIDO, CA (MARCH 6) PR NEWSWIRE - ENB Holding Company (OTC "Pink Sheets") has announced that on Feb. 22, the Comptroller of the Currency approved the company's application to establish a new bank in the city of Temecula, county of Riverside. The new bank will be named "Temecula Valley National Bank."

ENB Holding Company is a multi-bank holding company with more than $200 million in assets, and is the parent company of Escondido National Bank in Escondido, and San Marcos National Bank in San Marcos, Calif. Temecula Valley National Bank will become the third bank owned by the company.

The new bank is now officially "In Organization," and the parent company, ENB Holding Company, headquartered in Escondido, plans a stock offering in the second quarter of 1990 to raise funds to capitalize the new bank. The new bank should then be ready to open late in the second quarter, or early in the third quarter of 1990.

Upon opening, the new bank will purchase and assume the assets and liabilities of the Temecula office of Escondido National Bank. The Temecula office currently has deposits of more than $17 million, and has

been open since October 1988. Larry Hancock, regional vice president for the existing office of ENB, will become the president of the new bank, and Joan Sparkman, vice president of ENB's Temecula office will become senior vice president/business development for the new bank. Brenda Woeckener, vice president in charge of operations at ENB's main office in Escondido will assume the duties of vice president and cashier for the new bank.

The new bank will temporarily reside in the current facilities of ENB's Temecula office at 27314 Jefferson, Building A; however, plans are progressing for a permanent 10,000- square foot building at the corner of Enterprise Circle North and Winchester, scheduled for completion in the second quarter of 1991.

The new bank's board of directors will include Harvey J. Mitchell, president of ENB Holding Company, Larry Hancock, proposed president of the new bank, Mark Baker and Mike Wexler of Escondido, Bryn B. Evans of San Marcos, and Temecula Valley area residents John W. Hoffee II, president and owner of Professional Hospital Supply Inc., and Medical Design Concepts Inc., Larry R. Markham, owner of Markham and Associates, a Temecula land development consulting firm, Peter Rosen, Temecula attorney and real estate developer and Harry Shull of Murrieta, division president of Sunland Housing Group.

ELK GROVE VILLAGE, IL (MARCH 6) PR NEWSWIRE - AAR Corp. (NYSE: AIR) said today that preliminary results for the company's third quarter, which ended Feb. 28, 1990, indicate approximately a 10 percent growth in net sales without an increase in earnings per share. These results are subject to final review.

Net sales for the quarter are expected to be $112,000,000 compared to $102,318,000 for the third quarter of fiscal 1989. Net income is expected to be $6,100,000, or 38 cents per share, compared to $6,045,000, or 38 cents per share, for the same period last year.

For the first nine months of the fiscal year, net sales are anticipated to be $325,200,000, an 11 percent increase over last year's $292,970,000. Net income should increase 11 percent to $19,422,000, or $1.21 per share, from $17,449,000, or $1.10 per share, for the first nine months of fiscal 1989.

Ira A. Eichner, chairman of the board and chief executive officer of AAR, commented on the preliminary results, saying, ''The indicated third

quarter results register the highest sales for any third quarter in the company's history; however, earnings are less than our operating plan which was prepared at the beginning of the fiscal year. There were some delays in expected business and typically, the third quarter is our softest quarter with its holidays and resulting fewer work days. Historically, the fourth quarter of the fiscal year has been our strongest.''

AAR Corp. is a leading supplier of aerospace/aviation products and services. The company primarily distributes parts and equipment, performs technical services, and manufactures proprietary products for the aviation industry in the United States and abroad.

#90065u0072 03/06/1990 ~United Press International

BANGKOK, THAILAND (MARCH 6) UPI - A group of dissident Vietnamese war veterans has been allowed to form an official association in a move apparently aimed at liberalizing Vietnam's strict one-party system, the official Vietnam News Agency reported.

The agency, in a dispatch late Monday, said the Vietnamese Veterans Association has been allowed to form a provisional executive committee in preparation for a founding conference scheduled for the middle of the year.

The group, previously called ''The Club,'' has functioned unofficially for the past several years as a critic of the Communist Party, the only party allowed in Vietnam.

Some Vietnamese and foreign observers have seen the group as an embryonic opposition party.

Among the three vice presidents named for the group is Lt. Gen. Tran Van Tra, a well-known critic of the government.

Tra led the final communist offensive which defeated the U.S.-backed regime in South Vietnam.

After the war, he published a memoir which criticized northern leaders for their conduct of the war, particularly their disregard for the loss of southern communist soldiers during the Tet offensive.

The book appeared only briefly before being banned, and Tra was dropped from all his official positions.

But in the past few years, Tra and his group of like-minded former

revolutionaries have criticized the government's economic blunders, the lack of democracy and the growing corruption among communist officials. The group has not called for the elimination of communism, only that it be made to work better.

The news agency said the statutes of the new group would be debated at the founding congress.

''The founding of this association aims to meet the requirements of the revolutionary tasks in the new stage, to promote the traditions of the Vietnam People's Army, to contribute to the efforts of the entire people to safeguard the gains of socialism,'' the report said.

The veterans group, after years of being ignored by the party hierarchy, was given official acknowledgement earlier this year when Communist Party General Secretary Nguyen Van Linh met them to hear their criticisms.

The Vietnamese Communist Party has expressed increasing concern over the crises of its fellow parties in Eastern Europe, but it has repeatedly insisted there is no need for a multi-party system in Vietnam.

(MARCH 6) UPI - First-class postage was made compulsory in 1885 when stamps were priced at 2 cents.

In 1917, the price of a first-class stamp increased to 3 cents.

In 1919, stamps dropped to 2 cents.

1932: 3 cents.

1958: 4 cents.

1963: 5 cents.

1968: 6 cents.

1971: 8 cents.

1974: 10 cents.

1975: 13 cents.

1978: 15 cents.

1981: 18 cents.

1981: 20 cents.

1985: 22 cents.

1988: 25 cents.

Between 1775 and 1885, postage was charged by the page, usually C.O.D. The lowest rate was 6 cents per sheet for deliveries under 30 miles, and 25 cents for letters going more than 400 miles.

In 1815, the rate rose to 50 cents a sheet for long-distance deliveries, a tariff Congress overturned the next year by fixing the charge at 8 cents a page.

Pony Express service, which began making deliveries in 1860, charged $5 for a 1/2 ounce of mail.

#90065u0230 03/06/1990 ~United Press International

(MARCH 6) UPI - Twenty-four hours after his death, the La Salle Explorers honored Hank Gathers the way he would have wanted.

Lionel Simmons, who along with his teammates decided to play their championship game despite the death of their close friend, scored 26 points and La Salle earned its third straight Metro Atlantic Athletic Conference title and an automatic bid to the NCAA Tournament with a 71-61 victory over Fordham.

''Hank would have wanted us to play,'' said Simmons who started sluggishly Monday night but had 18 second-half points to help the Explorers gain their 21st straight victory.

''I definitely wasn't into the game early,'' said Simmons. ''The best thing that happened was when coach took me out. It gave me the chance to concentrate and get into the game.''

The crowd at Albany's Knickerbocker Arena observed a moment of silence before the start of the game honoring Gathers. The La Salle players, five of whom grew up in Philadelphia with Gathers, wore black bands on their jerseys and several had marked ''Hank 44'' on their sneakers in honor of Gathers. Fordham's Samford Jenkins of Philadelphia also wore a black band.

Gathers, of Loyola-Marymount, the 11th-leading scorer in NCAA history, collapsed Sunday during the semifinal of the West Coast Conference tournament and died at a hospital without regaining consciousness. He was 23.

''I thought it was a character win for us,'' said La Salle Coach Speedy Morris. ''Fordham gutted it out. It was a real battle.''

LaSalle, 29-1, also received 10 points from Doug Overton - a high school teammate of Gathers in Philadelphia - and 11 from Jack Hurd.

Fordham, 19-12, and seeking an NCAA tournament bid for the first time since the 1970-71 season, resorted to fouling down the stretch. But the Explorers were able to convert their free throws in the final minute.

Damon Lopez led Fordham with 18 points and Jean Prioleau had 13. Andre McClendon, the Rams leading scorer, made only two out of 19 shots and finished with just 8 points.

''It wasn't like coaching a regular game,'' said Morris. ''Life goes on. They're going to have tragedies and adversities. The ones who make it through those tragedies are the ones who are successful.''

After Gathers' death, the remainder of the WCC Tournament was canceled.

Conference officials announced they would offer the bid to Loyola, the league's runaway regular-season champion. The NCAA tournament begins March 15.

Loyola-Marymount players have yet to decide whether they will except the bid.

''The fact that we haven't made a decision is because we haven't raised the question,'' Loyola Coach Paul Westhead said. ''If the question was, would the team play today or tomorrow or in three days ... we wouldn't play. Our concern right now is with Hank and his family.''

Last season, Gathers became only the second player in NCAA history to lead the nation in scoring (32.7) and rebounding (13.7). He had 28 points Saturday against Gonzaga, and his final dunk Sunday gave him 2,222 points for his college career.

-- AROUND THE NCAA --

In Top Twenty action, No. 15 Clemson was upended by South Carolina 54-53.

At Columbia, S.C., Jo Jo English's jumper with one minute left gave the Gamecocks the victory over state-rival Clemson. The 17th-ranked Tigers took a 53-52 lead with 64 seconds left on a David Young baseline jumper. English then hit an eight-foot jumper in the lane for the game-winner. Stefan Eggers scored a career-high 18 points and grabbed 12 rebounds to lead South Carolina, 14-13. Elden Campbell had 13 points and 13 rebounds for Clemson, 23-7.

Elsewhere, Richmond earned a berth in the NCAA's with a 77-72 over James Madison in the championship game of the Colonial Conference championship.

In the Sun Belt Conference Championship at Birmingham, Ala., Radenko Dobras scored 24 points, including a key jumper and four free throws in

the final two minutes, to lead South Florida to an 81-74 win over North Carolina-Charlotte and an automatic berth in the 64-team NCAA field.

In the Atlantic 10 Tournament semifinals, Temple used rebounding and defense to make up for a spotty offense and earn a chance to win its third Atlantic 10 tournament championship in the last four years.

The Owls will host Massachusetts in the championship game Thursday night. The Minutemen, who lost twice to Temple this season, reached their first title game with a 64-59 victory over Penn State.

In other action, Houston downed Texas 84-79 and Notre Dame bested Kentucky 80-67.

#90065u0308 03/06/1990 ~United Press International

(MARCH 6) UPI - Akeem Olajuwon led the Houston Rockets to a rare road victory Monday night.

Olajuwon scored 14 of his game-high 37 points in the final quarter to rally Houston to a 109-105 victory over the San Antonio Spurs. The victory

improved the Rockets' road record to just 6-24 this season.

Olajuwon played a key role down the stretch as he hit a turnaround jumper at 1:40 for Houston's first lead of the final quarter, 105-103. The Spurs' Willie Anderson tied the score on a right baseline turnaround shot with 55 seconds remaining.

Olajuwon then hit a 10-foot turnaround shot with 38 seconds remaining to give Houston a 107-105 advantage. Mitchell Wiggins, who was fouled by David Robinson, clinched it with two free throw with 11.8 seconds left.

''We just didn't give up tonight,'' said Olajuwon, who also pulled down a game-high 14 rebounds. ''We kept playing hard and hung in there and won the game.''

''Akeem played great,'' said Robinson. ''He made all the shots down the stretch. It's tough when you let ones like this get away, especially at home.''

San Antonio held a 95-90 advantage as Terry Cummings hit a free throw and Rod Strickland hit a layup at 6:14. Olajuwon and Mike Woodson dropped in back-to-back baskets and Houston closed to 95-94 with 5:35 remaining.

''We let this one get away,'' said Strickland, who finished with 14 points and 9 assists. ''We just can't do that. I think we rushed some shots when we were ahead when we should have taken some time off the clock.''

Otis Thorpe added 17 points for the Rockets. Floyd had 15, and Wiggins added 13.

Robinson led San Antonio with 29 points, and Cummings contributed 28.

-- AROUND THE NBA --

Elsewhere, Philadelphia pounded the LA Clpppers 128-105, Miami nipped Utah 105-104, New Jersey dumped Sacramento 128-111 and Golden State defeated Charlotte 138-117.

SIXERS 128, CLIPPERS 105

At Philadelphia, Hersey Hawkins scored 28 points and Mike Gminski added 25 to lead Philadelphia. The victory moved the Sixers within a game of the Atlantic Division-leading New York Knicks. Charles Smith finished with 22 points for Los Angeles.

HEAT 105, JAZZ 104

At Miami, Glen Rice hit a 20-foot jumper at the buzzer to give Miami the

victory. Rice's basket capped a 17-7 rally in the closing minutes and ended Utah's seven-game winning streak. Karl Malone finished with 32 points for the Jazz.

NETS 128, KINGS 111

At East Rutherford, N.J., Chris Morris scored 22 points and Sam Bowie and Purvis Short added 20 each as New Jersey had its best offensive output of the season. Wayman Tisdale finished with 27 points for the Kings.

WARRIORS 138, HORNETS 117

At Oakland, Calif., Mitch Richmond scored 21 of his 30 points in the third quarter to lead the Warriors. Charlotte, which has lost 25 of 26 games on the road, was led by Rex Chapman and Randolph Keys with 17 points each.

#90065u0314 03/06/1990 ~United Press International

MOSCOW (MARCH 6) UPI - Pro-democracy candidates who challenged the Communist Party in regional elections were poised to win in the nation's second- and third-largest cities, according to preliminary results released by opposition groups.

The official news agency Tass said Monday that maverick politician Boris Yeltsin easily won a seat in the Russian Parliament, and Yeltsin said he would seek the republic's presidency as the next step in his remarkable rebound from political disgrace.

About two years ago, Yeltsin was fired as Moscow party boss and kicked out of the ruling Politburo for contending President Mikhail Gorbachev's perestroika reforms were moving too slowly. Parliament will select the president of the republic.

Tass also reported that in special runoff elections Sunday, Lithuania's pro-independence movement overwhelmingly gained control of the Baltic republic's Parliament, setting up a confrontation with Moscow over secession.

The Sajudis nationalists won 18 more seats, giving them 88 of the 141 in the republican Parliament, Tass said. The first 70 Sajudis candidates were elected Feb. 24. A total of 116 of the 141 legislative seats have been filled. The remainder will be chosen Wednesday and Thursday.

Although Tass said official results of Sunday's regional parliament and city council elections in the Russian Republic, the Ukraine and Byelorussia will not be released immediately, early returns from opposition groups showed democratic bloc candidates leading.

The elections were the second stage of President Mikhail Gorbachev's reforms. In the first stage, a national Parliament was elected in multi-candidate balloting, but the second phase penetrates the regional communist strongholds that Gorbachev has said are blocking his economic reforms.

The elections in the three republics accounting for nearly three-fourths of the Soviet Union's 290 million population offered voters an array of candidates ranging Russian nationalists, orthodox communists and radical reformers. In some places, as many as 20 candidates vied for one spot.

At stake were 1,068 seats in the Russian Parliament, 450 places for the Ukrainian legislature and 310 in Byelorussia's, and hundreds more in city and regional councils. Gorbachev called the vote a ''referendum on perestroika.''

Results announced by the opposition Rukh Nationalist Movement monitors in the Ukrainian capital of Kiev and independent monitors in Leningrad showed the orthodox communists were defeated in those metropolitan centers.

Kiev's population is 2.5 million and Leningrad's 4.3 million, behind only Moscow's 8.6 million.

Orthodox party candidates did well in Moscow, where party chief Yuri Prokofiev and the present chairman of the city council, Valery Saikin, gained 43.26 percent and 43.74 percent, respectively, Tass said.

Still, the results in the capital were mixed. Vladislav Starkov, the popular editor of the nation's largest-circulation newpaper, Argumenti i Fakti, won on the first ballot with 50.65 percent. Another first-round winner was radical economist Gavriil Popov with 49.3 percent.

In Kiev, Rukh spokesman Grigori Maximenko said out of 22 districts, 21 were going to the pro-democracy candidates who made it to the runoffs. Elected outright in the first round was popular liberal Vitaly Karpenko, editor of the Vecherniy Kiev newspaper.

Vladimir Ivashko, the Communist Party leader of the Ukraine and a Politburo member, advanced to the runoffs.

''The Communist Party has no long-range future in the Ukraine,'' Maximenko said. ''They are losing their power in many (regions).''

''Only very rare party members win the elections, if they are supported by or participate in the democratic movement,'' he said. One such party member he said was Ivan Drach, chairman of Rukh, elected in the Western Ukraine.

In Leningrad, only one candidate managed to win the required 50 percent of the vote for outright election on the first round, said an independent news group, the Northeast News Agency.

The sole outright winner was Bella Kurkova, the enormously popular editor of the anti-establishment television program ''Fifth Wheel,'' which has been criticized by extreme nationalist circles as ''the Fifth Column.''

Yelena Zelinskaya, editor in chief of the Northeast News Agency, said all other seats in Leningrad will have to be decided in runoffs, but that far more than 80 percent of those advancing to the runoffs were ''democratically minded candidates.''

In a telephone interview with United Press International from Leningrad, she said such democratic candidates were either Greens, from informal organizations or from the Russian Popular Front or Leningrad Popular Front.

STOCKHOLM, SWEDEN (MARCH 6) UPI - Maverick Soviet politician Boris Yeltsin, having easily won a seat in Parliament, expressed a willingness to seek the presidency of the Russian Republic.

''I have promised my voters not to say no if I'm suggested (as a presidential candidate),'' Yeltsin told reporters Monday after his arrival in Stockholm.

The former Communist Politburo member was in Sweden on the second leg of an eight-nation Western tour to promote his new book, ''Against the Grain '' which was released Monday in 15 countries.

Earlier, on a stopover in Amsterdam, Netherlands, Yeltsin said the result of Sunday's elections in the three largest Soviet republics would give added impetus to the reforms begun by Soviet President Mikhail Gorbachev.

''The vote has made it possible to strengthen reforms and permit new measures to be taken,'' Yeltsin said of the elections, in which democratic candidates trounced orthodox communists in many districts.

''I will advise (Gorbachev) to push forward faster and to propose a tax and property reform to give perestroika a legal framework,'' Yeltsin said.

A contruction engineer by profession, the popular Yeltsin was ejected from the Soviet Politburo and as Moscow Communist Party leader in Moscow in November 1987 for criticizing Gorbachev because his economic reforms were progressing too slowly.

But since then, the charismatic Yeltsin has continued to win popular

support around the country, culminating in Sunday's election in which he won 85 percent of the votes in his Sverdlovsk constituency.

He called Sunday's 80 percent voter turnout ''a sign of people's lacking faith in perestroika.''

''We have had perestroika for five years, and 1990 is a critical year,'' Yeltsin said. ''The people won't take any more unless they get real improvements in their standard of living. If the people come out on the streets, will we have a peaceful development as in Czechoslovakia or one as in Romania?''

Yeltsin said his book discusses the power struggle in the Soviet Union. Although it is being published in 15 countries, it has not been published in the Soviet Union.

''We are only halfway toward real glasnost yet,'' he said. ''All the Soviet publishers withdrew their offers to print the book when I said nothing could be censored out of it.

''But a publisher in Riga in Latvia has promised to print it for the Baltic states, and a group of independent authors in Leningrad have said they are ready to publish it despite the risks,'' he added.

Yeltsin said proceeds from his book would be donated to research of acquired immune deficiency syndrome.

#90065u0397 03/06/1990 ~United Press International

NEW YORK (MARCH 6) UPI - A nearly $1 million fund for runaway teens at Covenant House was used to make loans to various officials at the shelter, including the sister of founder Rev. Bruce Ritter, The New York Times reported Tuesday.

The financial dealings occurred without the knowledge of most of Covenant House's governing board, the Times said.

The fund's seed money came from Ritter's salary, which in turn was paid for by contributions to the internationally known institution for runaway teenagers, the report said. Eventually, Convenant House made donations directly into the trust fund, which has holdings valued at $900,000.

Whether the loans were illegal will depend in part on what information was given to the Internal Revenue Service and state attorney general, the Times said. The trust received tax-exempt status in 1984.

Ritter told the Times he thought ''I was doing a good thing, to take care

of the kids.'' The two board members who received loans and purchased land through the trust have resigned.

Meanwhile, Covenant Houzse's lawyer, Edmund Burns, described a ''meltdown'' atmosphere that is threatening the future of the international charity, the Times said.

Ritter himself resigned as president of the organization last week after months of allegations of sexual misconduct.

Burns - himself a participant in one of the fund's private land transactions - said all information on the fund would be turned over Tuesday to state Attorney General Robert Abrams. He said the fund will be liquidated.

The disclosure of the fund, the Times said, was prompted by Abrams' decision last week to investigate the legality of other personal loans provided to some of the chairty's executives, including Ritter.

Ritter told the Times he created the trust fund in 1983 to support programs the charity otherswise was unable to afford. Little of the money has ever been disbursed to Covenant House, the Times said.

''It was my salary. God help me, I earned it, seven days a week, year-round,'' Ritter said.

In 1986, Ritter said he arranged for his then-$98,000 salary to be set at $38,000, with the remaining going into the trust. Ritter told the Times part of the reason for the arrangement was his fear critics would attack him for earning so much.

The two board members who resigned recently were James Maguire, a Manhattan lawyer, and Dr. James Kennedy, who remains as Covenant House's medical director.

One of the first people aided by the fund was Ritter's sister, Cassie Wallace of Trenton, N.J., who needed a ''bridge loan'' while she tried to sell her house to move with her husband, James, to North Carolina. The $131,000 loan was repaid with interest, the Times said.

In 1986, the Times said, Maguire sold the trust five acres of land on an estate he owned in Rhinebeck, N.Y., for $80,000. Last year, the trust sold the land to Kennedy for $120,000, with Kennedy paying $30,000 and the trust taking a 10 percent mortgage on the rest.

In December 1988, Maguire also borrowed $100,000 for a year at 10.5 percent interest. The loan is still outstanding, the Times said.

#90065u0412 03/06/1990 ~United Press International

MANAGUA, Nicaragua (MARCH 6) UPI - President Daniel Ortega warned President-elect Violeta Chamorro that using Contra rebels to rebuild Nicaragua's Popular Sandinista Army would raise the threat of civil war.

Chamorro was to meet Tuesday with Costa Rican President Oscar Arias in the Costa Rican town of Liberia, near the Nicaragua border, government sources in San Jose, Costa Rica, said Monday. They said the talks would focus on continuing a regional peace process.

Chamorro, who defeated Ortega in the Feb. 25 election, has also named a three-member team to meet Tuesday with the U.S.-backed Contras in Honduras to discuss demobilization. About 10,000 Contras, who have waged an 8-year-old war against the Sandinistas, are based in camps along the Honduran-Nicaraguan border.

Ortega, opening the school year at the Maestro Gabriel Institute in Managua, softened his warning Monday by saying, ''I am here to cooperate in every way to assure a peaceful transfer of power'' to Chamorro, who takes office April 25.

''The new government of Violeta Chamorro must not try to change the current Sandinista armed forces for a new army composed of (Contras),'' Ortega said. ''That would be a signal in Nicaragua for an outbreak of a national war against the mercenaries.''

Ortega said Chamorro must respect the integrity of the Sandinista Popular Army and the police force, which is run by the Interior Ministry. Chamorro has said she intends to replace Defense Minister Humberto Ortega, the president's brother.

Aristides Sanchez, a member of the Contras' Political-Military Commission, said Monday that the Contras will not disarm until Chamorro and her National Opposition Union takes power and Humberto Ortega and Interior Minister Tomas Borge resign.

''We are going to put down our arms under the new government,'' Sanchez told United Press International in a telephone interview from Tegucigalpa, Honduras.

''Our exact position is that we will deliver our arms to Mrs. Violeta (Chamorro) and we will work to achieve this. ... We will not deliver our arms to the CIAV or any foreign country,'' Sanchez said, referring to the joint Oganization of American States-United Nations Commission charged with overseeing Contra demobilization.

Following Chamorro's victory over Daniel Ortega, Chamorro urged the Contras to disarm immediately, and Ortega declared a unilateral cease-fire with the rebels.

In Washington, top Chamorro advisers began talks Monday with U.S. officials about future U.S. financial aid to Nicaragua, but officials from both sides said it was too early to discuss specific amounts.

Francisco Mayorgo, Chamorro's economic adviser, and Alfredo Cesar, a leading political adviser, met with Secretary of State James Baker and Assistant Secretary of State Bernard Aronson. Cesar called the talks ''positive and encouraging.''

The Contras also issued a statement urging Chamorro to work toward a national reconciliation and to demilitarize Nicaragua. ''It is fundamental that the country be demilitarized,'' said the statement signed by Cristobal Sobalbarro, known as ''Commander Ruben'' of the rebel high command.

The statement also said the Contras have begun to take steps toward disbanding, such as establishing contacts with the UNO and the CIAV. ''The resistance (Contras), conscious that in an authentic democratic process it has to modify its role as an insurgent army to political and civic activities, has started to take the necessay steps toward demobilization '' it said.

Luis Guzman, a UNO deputy-elect to the National Assembly, said talks resumed Monday between UNO and the Soviet-backed Sandinistas to discuss the transfer of power to Chamorro following 10 years of Sandinista rule.

Luis Carrion, a member of the Sandinista Directorate and minister of commerce, was quoted Monday in Barricada, the official Sandinista newspaper, as saying the talks would be ''very serious and delicate.''

#90065u0538 03/06/1990 ~United Press International

(MARCH 6) UPI - Around the world... around the clock... U-P-I has the latest news.

Veteran stage and screen actor Gary Merrill has died after battling lung cancer for the past two years. The 74-year-old Merrill, whose film credits included ''Twelve O'Clock High,'' and ''All about Eve,'' once said he NEVER labored at his craft and liked ''doing as little as possible.''

It looks like the cost of mailing a package or letter in the United States will be going up. The Postal Service Board of Governors meets today, and it's expected that the panel will approve a rate hike that will lift costs

for all classes of mail by 19 percent. The proposal would still need to be O-K'd by the Postal Rate Commission.

As the strike by some nine-thousand Greyhound workers enters its fifth day union leaders have issued an urgent request for the company to resume stalled talks. The union also says the company should make public the driving record of the substitute driver who hit and killed a picketing driver during the weekend in California.

The Los Angeles County Coroner's Office says it will be at least a week before test results will be available from the autopsy performed on college basketball star Hank Gathers. Friends say Gathers had recently cut down on medication he was taking for a heart condition. He died during a game Sunday.

After winning a seat to the Russian parliament, maverick politician Boris Yeltsin says he will NOT refuse a request to run for president of the Soviet Union. Earlier, Yeltsin told reporters in the Netherlands that the results of Sunday's elections in the country's three largest republics support reforms begun by President Gorbachev .

MOSCOW (MARCH 6) UPI - Moslem Uzbeks, demanding the removal of Meskhetian Turks, rampaged in Tashkent in ethnic violence that left dead four people and reached deeper into the Soviet Union's Moslem Crescent of republics, the official Tass news agency said Tuesday.

The violence peaked Saturday and Sunday, forcing authorities to evacuate some 4,000 Meskhetian Turks from areas near the capital and settle them elsewhere, Tass said.

In a similar scenario of pogroms followed by evacuation in June, the Meskhets were removed from Uzbekistan's Fergana Valley but were sent into European Russia, where they have since found work on collective farms and in businesses.

''Four people were killed and dozens were wounded in ethnic unrest that erupted in several settlements in the the Tashkent region,'' Tass said.

It said the violence then spread to the Akkurgan and Pskent regions of Tashkent. The Uzbeks, it said, demanded resettlement of the Meskhets from a rest home.

The Uzbeks then stormed a police station, and clashed with security troops Tass said. To calm tension, the authorities evacuated the Meskhets. It did not say where the Meskhets were sent.

Some 50 million Moslems live in six republics in the Soviet Union - five in Central Asia and one, Azerbaijan, in the Caucasus. The Azerbaijanis are Shiite Moslems and the Central Asian Moslems are largely Sunnis.

The Meskhets also are Moslems, but the turmoil this summer and its resurgence over the weekend appears to stem from grievances over housing, jobs, prices of goods and other economic and social conditions.

The five Central Asian republics of Kazakhstan, Uzbekistan, Tadzhikistan, Kirghizia and Turkmenistan along with Azerbaijan are loosely called the ''Moslem Crescent'' of the Soviet Union.

Ethnic violence has wracked all the Moslem republics - with the exception of Turkmenistan - during President Mikhail Gorbachev's five years in power.

(MARCH 6) UPI - The Bulgarian parliament has approved legislation ensuring the country's ethnic Turks the right to keep their Moslem names. During the past decade, the former hard-line government forced thousands of Bulgarians to adopt Bulgarian names and imprisoned Moslems who refused to take part in the program.

Dr. Elizabeth Morgan has arrived in New Zealand to be with her seven-year-old daughter, Hilary Foretich, after being separated more than two and a half years. Hilary is the center of an international custody fight that pits her mother against her father, Dr. Eric Foretich.

Officials of the Iditarod sled dog race in Alaska say they're UNsure of the fate of the musher whose sled was attacked by a moose. Two pilots reported seeing a moose tangled in the harnesses of a dog team, but clouds of volcanic ash prevented them from making a rescue attempt. Blowing ash also kept snowmobilers from approaching the site.

There are NO reports of casualties or damage from the South Pacific island nation of Vanuatu following a major earthquake that measured seven-point-one on the Richter Scale. Hong Kong's Royal Observatory says the tremor's epicenter was located near the island, which is about 500 miles west of Fiji.

The United States has a new Mrs. America. Five-foot-nine model Jennifer Johnson of Edmond, Oklahoma, walked away with the crown. The wife of a lawyer and mother of two young sons faced competition from wives and mothers from all 50 states. Her advice to aspiring contestants is ''be yourself.''

TOKYO (MARCH 6) UPI - Former Prime Minister Noboru Takeshita, who remains a strong behind-the-scenes player in Japanese politics, plans to leave Saturday on a trip to Washington and Brazil, government officials announced Tuesday.

Takeshita, Japan's prime minister from November 1987 to June 1989, resigned after being linked to a bribery scandal.

Takeshita leads the largest faction within the ruling Liberal Democratic Party and was re-elected to his seat in Parliament Feb. 18.

He continues to play a major role in Japanese politics and was instrumental in the selection of Toshiki Kaifu as Japan's prime minister.

Takeshita will travel to Brazil as a special ambassador to the inauguration of President-elect Fernando Collor de Mello on March 15 with a stopover in Washington, said Taizo Watanabe, the Foreign Ministry's chief spokesman.

Takeshita will arrive in Washington Saturday and meet with President Bush March 12 to discuss trade and other issues, according to news reports.

Takeshita and Bush will discuss the ongoing trade negotiations aimed at reducing the nearly $50 billion U.S. trade deficit with Japan, the reports said.

Watanabe would not confirm the dates or purpose of Takeshita's stopover in Washington.

CORTLAND, NY (MARCH 6) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS,

total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

(MARCH 6) UPI - Judges limit striking Greyhound workers... Italy's prime minister comes to the White House... the cost of mail may go up... and actor Gary Merrill is dead. Those stories and more, next from U-P-I.

It's day-five of the strike by nearly nine-thousand Greyhound employees.

As the increasingly violent labor action nears the end of its first week, judges in at least five cities have ordered picketers to tone down their demonstrations.

Courts in Los Angeles, Scarenmento, California, Portland, Oregon, Jacksonville, Florida, and Philadelphia have told strikers they must curtail activities aimed at keeping Greyhound from continuing its operations.

Since drivers, mechanics, baggage handlers and ticket agents walked out

last Friday morning, the company has offered limited services using NON-striking and NON-union labor.

Union officials have issued an urgent request to resume talks. But so far, the two sides have NOT made contact to discuss the request.

Labor leaders also asked the company to release the driving record of the substitute driver who hit and killed a picketer in northern California during the weekend.

Italian Prime Minister Giulio Andreotti is in Washington and will meet President Bush today.

While an administration official says the meeting does NOT concern ''any particular problem,'' it's expected that Andreotti will bring up his concern over the lack of input by NATO allies toward German re-uinfication.

Bush is pushing for German re-unification to take place within the framework of the two Germanys and the major World Wat Two allies- the United States, the Soviet Union, Britain and France.

But many of the 13 NATO countries excluded from the so-called two-plus-four talks feel slighted and are pushing for a conference to air their concerns and desires in terms of a single German state.

Andreotti is also scheduled to meet with other senior administration officials to talk about U-S-Italian trade and the international war on drugs.

#90065u0697 03/06/1990 ~United Press International

(MARCH 6) UPI - It looks like the price of a first-class stamp is going to jump from a quarter to 30 cents.

The Postal Service Board of Governors is scheduled to meet this afternoon to announce plans to hike postal rates an average of 19 percent for all classes of mail.

In addition to rate hikes, the plan calls for discounts for bar codes for first- and third-class postage, Express Mail and some priority mail. Insurance coverage on C-O-D and insured mail also would jump.

If O-K'd by the governing board, the plan still needs final approval from the Postal Rate Commission, which has 10 months to reach a decision. The Postal Service says it wants the new rate structure to take effect in February 1991.

The Post Office is facing losses of as much as one-BILLION 600-Million dollars this year. The last rate increase was March 1988 when the price of a first-class stamp jumped from 22 cents to 25 cents.

The Postal Service underwent a corporate-like re-organization in 1980 and now functions as an independent government agency supported by the sale of its service, NOT federal tax revenue.

Jury selection resumes this morning in a Washington, D-C, courtroom in the Iran-Contra trial of former national security adviser John Poindexter.

U-S District Judge Harold Greene began questioning potential jurors yesterday. They were asked about their backgrounds and exposure to news coverage of the Iran-Contra scandal. Most of those accepted from a pool of more than 200 people knew little about the scandal.

By the end of the day, 27 potential jurors had been questioned and 21 of them were judged qualified for service. Six were disqualified.

Poindexter is the highest-ranking official charged in the worst scandal of the Reagan administration. He on trial on five criminal charges... including accusations that he obstructed congressional inquiries and made false statements to Congress about the Iran-Contra scandal.

#90065u0711 03/06/1990 ~United Press International

(MARCH 6) UPI - The missing key witness to last summer's killing of a black teen in Bensonhurst, New York, surrendered last night to the F-B-I in Dayton, Ohio.

The disappearance of 21-year-old John Vento forced a judge in New York to delay the trial of six whites charged with murder in the case.

Vento had been missing since December. He's being held in Dayton on federal charges of unlawful flight. His lawyer says Vento will waive extradition and return to New York, possibly today.

Prosecutors made a deal with Vento for his testimony in state Supreme Court in Brooklyn about the August 1989 death of Yusuf Hawkins. The black teen was killed by whites after he ventured into Brooklyn's Bensonhurst section with three friends to look at a used car.

The deal called for the prosecutor's office NOT to pursue charges against Vento in exchange for his testimony against the six whites accused of murder in the case.

However, the F-B-I says it's unclear whether Vento would testify.

Patrick Clark, a spokesman for Brooklyn District Attorney Charles Hynes... said Vento's surrender indicates he probably will abide by the deal.

After battling lung cancer for more than two years, actor Gary Merrill has died at his seaside cottage near Portland, Massachusetts. He was 74.

Merrill's stage and screen career spanned seven decades and included roles in such notable films as ''Twelve O'Clock High,'' and ''All about Eve.''

Merrill appeared in 42 films in a movie, stage and television career that spanned more than 40 years, but once told an interviewer he had never labored at his craft and liked nothing better than ''doing as little as possible.''

He won the best actor award at the Monte Carlo televison film festival in 1970 for his role as a lobsterman in ''Summer is Forever,'' which was filmed on the Maine coast.

While filming the critically acclaimed movie ''All about Eve,'' Merrill met Bette Davis. They married in July 1950 and spent the next decade involved in a stormy marriage.

After their breakup, the two did NOT communicate for more than 20 years until Merrill publicly criticized a harsh biography of Davis written by her daughter.

Merrill was also known for mild eccentricities.

One summer day he appeared in downtown Portland sporting a skirt. When asked why, he answered that he believed...''in wearing NO clothes at all, and this is the closest you can get to it in public.''

Among his T-V credits were starring roles in ''Young Doctor Kildare,'' and ''The Seekers.''

#90065u0826 03/06/1990 ~United Press International

WINSTON-SALEM, NC (MARCH 6) UPI - A newspaper reports Tuesday embattled basketball coach Jim Valvano will remain at North Carolina State University for one more season and then leave.

The Winston-Salem Journal quotes an unnamed source close to the university's athletic department as saying the offer came from Valvano and his attorney, Art Kaminsky.

''He's asking for one more year as coach, and then he'll leave,'' the newspaper quoted the source as saying Monday. ''His attorney made the offer. That's the fact. It's the money. They can't get rid of him because of the money.''

Valvano and university lawyer Becky French did not comment in the printed report. The deal would absolve both parties of any financial obligations, the newspaper reports.

Faculty members, students and some fans are calling for Valvano's ouster following the disclosure last week that a former player received more than $65,000 from two men, including an agent and a man who was linked to allegations of point-shaving.

New Jersey authorities said Monday they did not find any evidence of point-shaving in their part of the probe. New Jersey businessman Robert Kramer has admitted he loaned some money in 1987 to former Wolfpack basketball player Charles Shackleford, now with the New Jersey Nets.

An anonymous man who said he was a teammate of Shackleford's in 1987 told ABC News last week that he, Shackleford and two other Wolfpack players were paid to shave points to help gamblers win games. The State Bureau of Investigation is looking into the North Carolina aspects of that charge.

The sticking point in the negotiations between Valvano and the university is a buyout clause in the 10-year contract Valvano and the school negotiated in 1983, the year N.C. State won the NCAA Tournament and the national title.

Each August, Valvano's pact rolls over into a five-year agreement. It includes a $500,000 buyout clause for the protection of both sides.

Valvano would get the $500,000 if fired for any reason other than knowledge or participation in a major NCAA violation or criminal act. The school would get it if Valvano wanted to leave for another job. The buyout was among the reasons Valvano didn't go to UCLA in 1988.

According to sources and published reports, Valvano's contract calls for him to receive $875,000 if he is fired. The figure comes from the $500,000 buyout clause plus another $250,000 in a trust and $150,000 in an annuity.

The New Jersey investigation was turned down ''in the absence of any evidence that would warrant criminal prosecution in this jurisdiction,'' said Lee Trumbull, the Morris County prosecutor.

Valvano and the university's basketball progam were the targets of a book last year by sports writer Peter Golenbock. In ''Personal Fouls,'' Golenbock accused the program of widespread corruption that included changing grades and hiding positive drug tests for players with threatened eligibility.

An investigation by the University of North Carolina system found no

evidence to substantiate the claims in the book. However, system president C.D. Spangler said academic policies ''had been bent'' to accommodate basketball players.

The NCAA investigated the claims and placed the basketball team on probation when it found eight violations, including players selling complimentary game tickets and game shoes.

N.C. State can play in the Atlantic Coast Conference Tournament this weekend, but is banned from the NCAA Tournament.

#90065u0914 03/06/1990 ~United Press International
(MARCH 6) UPI - The head of the National Association of Letter Carriers

says even if the cost of a first class stamp goes up a nickel to 30 cents, Americans will still be getting a bargain. Later today, the Postal Service Board of Governors is expected to approve a proposal that would lift the cost of all classes of U-S mail by an average of 19 percent. Such a plan would still need to be O-K'd by Postal Rate Commission.

A published report says various officials at New York City's embattled Covenant House borrowed money from the shelter's nearly one-Million-dollar fund for runaway teens. Whether the loans were illegal depends on how they were presented to the Internal Revenue Service. Last week, the founder of the internationally known institution stepped down after charges of sexual misconduct.

The University of Michigan says raising the speed limit along Michigan's rural highways has led to a substantial increase in fatalities and injuries since 1987. A U-of-M report says in the first 13 months of the higher speed limit, highway deaths rose more than 19 percent, and serious injuries increased nearly 40 percent.

Britain's Environment Secretary says the country will try to shed its ''dirty man of Europe'' image by ending the dumping of UNtreated sewage into the North Sea before the end of the decade. But environmental groups say anything short of an immediate end to present dumping practices will be too late. Greenpeace estimates Britain will dump 50-Million tons of contaminated sewage sludge into the North Sea during the next eight years.

#90065u0918 03/06/1990 ~United Press International

(MARCH 6) UPI - Beware the Ides of March. The Calgary Flames are getting ready for the playoffs.

After looking sluggish earlier in the season, the Flames are suddenly explosive, and Monday night they devastated the Kings 5-0 to move into first place in the Smythe Division, one point ahead of the Edmonton Oilers.

In the only other NHL game Monday night, the New York Rangers edged the Detroit Red Wings 3-2.

Backup goaltender Rick Wamsley of the Flames, in his second straight start in place of Mike Vernon, made 26 saves for his second shutout of the season. Both of the shutouts have come against Los Angeles.

Wamsley robbed Steve Duchesne with a glove save early in the opening period and made a stick save in close on Luc Robitaille on a power play midway through the game.

The loss was the Kings' third straight on a three-game Smythe Division

road trek.

Rookie Paul Ranheim fired a 25-foot wrist shot by goaltender Robb Stauber on the glove side at 2:18 of the opening period for his 22nd goal of the season.Joel Otto deflected Ranheim's shot along the ice from the slot 57 seconds into the second period, making the score 2-0.

Joe Nieuwendyk and Tim Hunter scored 80 seconds apart for Calgary's 4-0 lead.

Nieuwendyk beat Stauber on the glove side along the ice with a 20-foot wrist shot for his 38th goal of the season and 16th on the power play, at 13:38. At 14:58, Hunter deflected Dana Murzyn's slap shot from the point for his second goal of the season.

Nieuwendyk scored his second of the game at 14:40 of the final period, beating Stauber through the legs.

-- AROUND THE NHL --

Rangers 3, Red Wings 2

At New York, Brian Mullen broke a tie with 72 seconds remaining in the third period to rally the Rangers with his 20th goal of the season. The Rangers increased their lead in the Patrick Division to six points over the idle Pittsburgh Penguins, and the Red Wings maintained a one-point edge over Minnesota for the final Norris Division playoff spot. New York is 7-1-1 in its last nine games.

NEW YORK (MARCH 6) UPI - The New York Stock Exchange reported Tuesday these odd lot transactions by principal dealers through NYSE facilities for March 5: Purchases of 313,404 shares and sales of 534,333 shares including 26,808 shares sold short.

-30- 395

#90065u0971 03/06/1990 ~United Press International

(MARCH 6) UPI - Snow closed schools in the Northeast and blanketed roads along the Great Salt Lake in Utah Tuesday, while showers spread across the southern Plains and dry winds tossed sand around in California's Mojave Desert.

The National Weather Service issued an advisory for freezing drizzle that it warned could ice roads in northern Indiana. Rainshowers covered eastern Missouri and southern Illinois.

Snow made roads slippery for morning commuters in parts of Connecticut and caused schools in many communities to either cancel classes for the day or open later than usual. Up to 3 inches was reported in New Canaan.

Salt and sanding crews were dispatched well before dawn to make road travel easier.

A snowstorm struck Utah overnight Monday, dumping the white stuff in the state's mountains and valleys. Nine inches fell in Little Cottonwood Canyon, east of Salt Lake City.

''The Utah Highway Patrol reports that Interstate (Highway) 80 along the south shore of the Great Salt Lake is snow-packed and very slick,'' NWS forecaster David Carpenter said.

The snowfall began decreasing around dawn but Carpenter said additional accumulations of 3 to 6 inches were possible in the mountains.

Skies were generally clear along the Great Lakes, with temperatures falling to the teens in Wisconsin and below zero in Michigan.

Scattered rain fell across northeast New Mexico and part of the Texas Panhandle early Tuesday, and the weather service issued a snow advisory for much of the region. Light rain also covered parts of Oklahoma and Arkansas.

A dome of high pressure kept the South generally fair and unseasonably warm, although some high cloudiness over Mississippi and southeast Florida threatened light rain. Temperatures ranged from 46 at Knoxville, Tenn., to 52 in Atlanta and Charleston, S.C., 55 in Jacksonville, Fla., and 67 in Miami.

In Southern California, gusts near 60 mph cut through the Mojave Desert and the mountains north of Los Angeles. High temperatures were in the 60s in residential areas, with overnight lows dropping to the 40s.

Clouds blanketed much of western Oregon, which had some spotty light rain, while Washington state looked forward to another mild day.

Light snow mixed with rain fell on most of western Pennsylvania, while flurries were reported in eastern areas of the state. Accumulation of an inch or more was reported in the west, where lows were in the teens and 20s.

Mostly cloudy skies let loose some flurries and sprinkles over southern New Jersey, where lows were around 30, and patches of rain appeared in West Virginia and Maryland.

High clouds hovered across most of New England and some light snow was reported over Cape Cod and coastal Rhode Island. Temperatures were slightly colder than usual across the region, with the mercury dipping into the 20s in Massachusetts and the teens in Maine.

ZURICH, SWITZERLAND (MARCH 6) UPI - Switzerland's national airline Swissair announced Tuesday the preliminary sale Tuesday of its worldwide Swissotel hotel operations to the giant Aoki/Westin group of Japan. The price was not disclosed pending final agreement.

Swissotel fully owns or has a major stake in 12 luxury hotels including four in the United States - the Drake in New York, Lafayette in Boston, the Swiss Grand in Chicago, and the Swiss Grand in Atlanta. Swissotel, which has a total of 3,130 employees, also manages five other leading hotels.

A spokesman for Swissair said the sale will become final as soon as smaller shareholders in some of the hotels approve the transaction. "It was decided to seek a buyer because Swissotel failed to reach the total of 30 or so hotels which were seen necessary to make operations profitable," the spokesman said. "Aoki/Westin was chosen because it will give Swissair access to nearly 100 top hotels around the world."

Aoki-Westin and its Westin Hotels and Resorts subsidiary have 76 hotels in 11 countries and an annual revenue of $2.6 billion, Swissair said. Besides the four hotels in the United States, the Japanese group will acquire in Switzerland the International in Zurich, the Palace hotels in Lausanne and Montreux on Lake Geneva, and the Plaza in Basel.

Elsewhere, it will take over the Ascot and the Chateau Marquette in the Netherlands, the Swiss Grand in Seoul, and the Bosphorus Swissotel in Istanbul.

Management will also be acquired of the prestigious Bellevue Palace in the Swiss capital of Bern along with the President in Geneva, the Swiss Grand in Beijing, the Swissotel Rheinpark Neuss in West Germany and the Swissotel in Toronto.

TOKYO (MARCH 6) UPI - Japan is ready to comply with U.S. demands to ease enforcement of a law regulating the establishment of large retail stores, the minister of international trade and industry said Tuesday.

U.S. trade negotiators listed Japan's large retail store law as one of several barriers to American imports to Japan. "At the moment I think it will be sufficient to ease the law, but in three years we may have to make a drastic change," said Trade Minister Kabun Muto.

Prime Minister Toshiki Kaifu, who promised action on reducing trade barriers in his summit with President Bush last weekend in Palm Springs, Calif., instructed Cabinet ministers Monday look for ways to meet U.S. trade demands.

The United States and Japan are engaged in trade talks aimed at changing the economic structures in both countries which have led to the nearly $50 billion annual trade imbalance in Japan's favor.

The retail store law, designed to protect tiny family stores, requires large stores to seek approval of the smaller stores in a neighborhood before opening. The law is blamed for causing delays of up to ten years in the establishment of new large retail outlets.

The law increases the expense and time it takes American retailers to open shop in Japan. It also reduces the number of large department stores that tend to stock more U.S. imports than smaller stores.

Muto was asked if the law would be abolished in three years, which the U.S. negotiators have reportedly requested. "I cannot say it that clearly but we may have a drastic change," Muto answered.

JERUSALEM (MARCH 6) UPI - The Israeli navy detained a boat off the Lebanese coast last month and arrested a senior PLO official and a second person identified as ''a wanted terrorist supporter,'' the army spokesman said Tuesday.

The boat and remaining passengers were released Tuesday, the spokesman said.

The spokesman said a routine Israeli navy patrol seized a ''suspicious boat'' Feb. 23 and after a preliminary investigation identified a senior official of the Palestine Liberation Organization and a suspected terrorist supporter.

The two are being held in Israel for further interrogation, the spokesman said.

#90065u1040 03/06/1990 ~United Press International
WASHINGTON (MARCH 6) UPI - Corporate leaders said Tuesday they have raised $77 million for a program that will create about 2,000 units of low income housing worth $200 million.

The $77 million fund represents the largest single corporate investment in community-based low income housing ever made in the United States, according to leaders of the National Equity Fund.

The Local Initiatives Support Corporation, the nation's largest non-profit community development support organization, created the fund three years ago. The fund uses corporate money as equity investments in low income housing that will be developed, owned and managed by non-profit developers.

The $77 million will leverage investments in the program from other

sources.

The linchpin of the program is the Low-Income Housing Tax Credit, which offers investors a credit against federal income taxes based on the cost of acquiring, rehabilitating or constructing low income housing.

The tax credit is one of the few remaining housing production programs for low income people still remaining but is scheduled to expire at the end of 1990. Bills to extend the tax credit permanently are expected to be introduced in both the House and Senate, but the Bush administration has called for a year's extension.

''Through the use of the Low-Income Tax Credit and with the help of the National Equity Fund, coprorate America is demonstrating its willingness to address the housing crisis in our nation,'' said Paul Grogan, president of the Local Initiatives Support Corporation.

''When given the opportunity, corporations will invest in even the poorest communities of our nation; when provided the resources, non-profit developers can effectively meet their communities' needs and when given a solid performance record, government does respond to success with needed support,'' he said.

Leland Brendsel, chairman of the Federal Home Loan Mortgage Corporation, which put $10 million into the fund, said the fund is a good way for corporations to invest in affordable housing.

''By creating an equity investment pool that diffuses corporate risk, and by selecting non-profit developers who we can be sure are both technically skilled and who are only interested in aiding their communities, NEF has provided corporate America with a sound way to meet the needs of our country and our corporations,'' Brendsel said.

Among the big corporations investing in the fund are American Telephone and Telegraph New York Inc., Aetna Life and Casualty Co., American Express CBS Inc., Capital Cities/ABC, Hallmark Cards Inc., J.C. Penny Company, Inc., Knight-Ridder, Inc., and Xerox Corp.

''In three years, groups like NEF have not only made the tax credit work, but have provided a model for federal housing policy,'' said Senate Democratic leader George Mitchell of Maine.

''This program, which both provides needed housing and stretches taxpayer dollars should be replicated and the tax credit that makes it possible should be extended for the long run.''

The National Equity Fund created its first corporate housing partnership in 1987, investing $14.3 million raised from 13 corporations to create 857

housing units. In 1988, NEF raised $51 million from 40 corporations to develop 2,000 units.

The 15 cities the 1989 funds will be invested in are Boston; Cincinnati; Hartford, Conn.; Healdsburg, Calif.; Indianapolis; Kalamazoo, Mich.; Kansas City, Mo.; Los Angeles, Miami; Minneapolis, Minn.; Newark, N.J.; New York; Philadelphia; Raleigh, N.C.; and St. Paul. Minn.

WASHINGTON (MARCH 6) UPI - Slower demand for cars and airplanes caused factory orders to plunge by 5.4 percent in January, the biggest decline since a seven percent dive in December 1974, the Commerce Department said Tuesday.

January's $13.1 billion drop to $227.7 billion followed a revised 0.4 percent increase in December to $240.7 billion, and a 2.4 percent hike in November to $239.7 billion, the department said. All the numbers were adjusted to reflect seasonal factors.

A $11.1 billion, or 28.8 percent, drop in orders for transportation equipment, a big gainer in December, accounted for the loss and led to a 10.5 percent, or $13.9 billion fall in orders for durable goods, items made to last three or more years.

"Aircraft and parts, motor vehicles and parts, and shipbuilding and (military) tanks all declined," the department's Census Bureau said in its monthly status report on American industry.

Not counting transportation equipment, factory orders in January decreased by only one percent, the department said. Not counting defense orders, factory orders were off by 4.4 percent in January, the department said. In other categories:

- January orders for electrical machinery were down $3.5 billion, or 15.5 percent, to $19.2 billion, "most of which was communications equipment," the department reported.

- Non-electrical machinery increased by $500 million, or 2.4 percent, to $22.3 billion in January.

- Primary metals climbed by $100 million in January, or 1.2 percent, to $11.1 billion.

- New orders for non-durable goods were up by $800 million, or 0.8 percent, to $109.9 billion.

Factory inventories - an important harbinger of an economic slowdown - increased by $2.8 billion, or 0.7 percent, in January to $373.9 billion, "nearly offsetting the 0.5 percent decrease in December," the department said.

January shipments were down by $4.4 billion or 1.9 percent to $226.6 billion, while unfilled orders increased by $1 billion in January, or 0.2 percent, to $515.5 billion, the department said.

ISLAMABAD, PAKISTAN (MARCH 6) UPI - More Pakistanis fear an outbreak of war with India now than at any time in the past decade, an opinion poll published Tuesday showed.

The Gallup poll published in the nationally circulated newspaper The Nation said 40 percent of people questioned believed the chances of a fourth war with Pakistan's arch-rival are very high.

The newspaper said the response was the highest recorded to the same question in annual opinion polls taken during the past decade.

It said that in a poll taken in 1981 only 19 percent of people had the same opinion. This figure was down to 9 percent last year during a thaw in relations between India and the government of then newly elected Prime Minister Benazir Bhutto.

The renewed fears of war were apparently sparked by rising tensions over the uprising in the north Indian state of Jammu and Kashmir.

More than 160 people have died since the movement began Jan. 20, mostly demonstrators shot by Indian security forces. New Delhi has accused Pakistan of training and arming the militants, charges Islamabad denies.

Pakistan has lost three wars with India since 1948 involving the disputed region, which is divided along a U.N.-monitored cease-fire line into Pakistani and Indian-controlled sectors. A 1949 U.N. resolution called for a plebiscite in Kashmir to decide the region's future, a poll which has not taken place.

The latest opinion poll said 15 percent of people answered ''none'' when asked what are the chances of another war with India. This compares to 47 percent this time last year and 16 percent in 1981. Another 37 percent thought there was ''some chance'' of war.

Fifty percent of those polled believed Pakistan should sign a no-war pact with India, while 73 percent held that opinion one year ago.

Asked whether the United States would support Islamabad in an Indo-Pakistan war, 41 percent answered ''yes,'' compared to 33 percent in 1981 and 31 percent in 1986. The newspaper attributed the change to a perceived strengthening in Pakistan-U.S. relations under Bhutto.

The poll was conducted in February in urban areas throughout the country, The Nation said.

#90065u1091 03/06/1990 ~United Press International

MANILA, PHILIPPINES (MARCH 6) UPI - Sen. Juan Ponce Enrile was freed

temporarily Tuesday while the Philippine Supreme Court debated the validity of charges he plotted to oust President Corazon Aquino.

''It is a triumph of justice,'' said Enrile, tears streaming down his face before he walked out of the suburban Quezon City police headquarters. ''Democracy is really taking roots in our land.''

The high tribunal, voting 10-4 with one abstention, issued a four-page resolution granting Enrile provisional liberty just hours after a special hearing in which defense lawyers said the charge of rebellion complexed with murder against the senator was ''non-existent.''

The resolution said the decision was reached ''considering the fundamental far-reaching and complex nature of the legal issues raised before the court and in order to give the court opportunity for full consideration of the arguments.''

It also said the possibility of Enrile escaping was ''fairly remote'' and stressed the action did not mean it was ''passing upon the legal issues'' raised in the case. Enrile was required to post bail of $4,500 before he was freed.

The lone opposition member in the 23-seat Senate was arrested and indicted Feb. 27 for rebellion with murder in connection with the Dec. 1-9 coup attempt in which at least 119 people were killed and more than 500 were wounded.

Enrile, 66, as a former defense minister helped oust Ferdinand Marcos in a popularly backed uprising in 1986. He was fired by Aquino after his aides were implicated in a coup attempt nine months later.

Retired court justice Serafin Cuevas, arguing for Enrile, said the complex crime of rebellion with murder was stricken from statute books in a landmark decision in 1956 and was ''illegal, violative of the constitution and without any basis, factual or legal.''

Cuevas maintained there was only a simple crime of rebellion and it absorbed murder and other lesser offenses.

The charge of rebellion allows for a suspect to post bail, and is punishable by a maximum 12 years in jail upon conviction. The charge of murder does not allow for bail. If convicted of murder, the suspect could be sentenced to life in prison.

Solicitor General Francisco Chavez said it was time to review the 1956 ruling and an adverse decision would setback Aquino's campaign against right-wing elements that have staged six coup attempts in her four years as president.

''The moment they are out, they are free to continue with their rebellious activities,'' Chavez said. ''If we do not act vigilantly, if this honorable court will not act on time, then the next coup d'etat may just find us outside this courtroom.''

The resolution Tuesday freezes the case filed Feb. 27 against Enrile and six others before a regional trial court.

But any decision of the Supreme Court on the validity of the charges also does not nullify the case against Enrile. His arraignment on Monday was deferred pending the outcome of the final Supreme Court decision.

Press secretary Tomas Gomez said Aquino had been informed of the ruling.

''She is unperturbed because the provisional release granted by the Supreme Court does not diminish the quality of evidence in the hands of the government,'' Gomez said.

Cagayan province Gov. Rodolfo Aguinaldo, one of the six people charged with Enrile, on Sunday resisted arrest and mounted a rebellion in Tuguegarao city, 220 miles north of Manila. Armed forces civil relations chief Brig. Gen. Oscar Florendo was killed in the shortlived uprising.

Aguinaldo said before the uprising Sunday, he was willing to face the charge of rebellion, but not murder because he did not kill anyone.

Sen. Rene Saguisag said the decision of the Supreme Court showed ''democracy is something that is worth preserving. Of course this will not prevent another coup because these guys who want to oust Aquino have made up their minds they don't want her.''

#90065u1129 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - A Gallup Poll of Episcopal church members released Tuesday found that the denomination has a clear sense of direction but that members want more involvement in environmental, peace and justice issues.

The poll also found that 66 percent of the church's members support the ordination of women to the priesthood but that 64 percent disapprove of the church's blessing marriage-like relationships between homosexuals or lesbians.

Just less than a majority - 49 percent - said they did not approve of efforts to make the language of the liturgy less masculine and more inclusive while a quarter of those responding said they had no opinion on

the issue.

Presiding Bishop Edmund Browning was to release the poll's finding at a meeting of the church's executive council in Kansas City, Mo. It was commissioned by the church in preparation for a ''Decade of Evangelism'' campaign aimed at reinvigorating the denomination.

Browning, in a statement, said the poll showed the church has ''much to celebrate'' but it also revealed where the church is ''challenged to do better.''

George Gallup Jr., who identifies himself as an ''evangelical Episcopalian'' and who conducted the poll, said the survey showed the church has ''a fairly clear sense of direction and mission,'' contradicting the charge often leveled by conservatives within the 2.5 million-member denomination that the church ''is suffering from a major crisis of identity.''

Like other mainline denominations, the Episcopal Church has been suffering a membership decline since the 1960s - a decline many attribute to the church's liberal stance on a number of social and political issues.

But Gallup said the decline has resulted from a broad set of factors that have affected all churches, including ''societal, lifestyle and demographic factors ... and not specifically denominational issues'' such as controversies over revision of the Prayer Book, ordination of women and homosexuality.

''One of the major challenges facing the church in the years ahead is to close the wide gap between religious belief and practices,'' Gallup said.

''A substantial majority of members - nationwide and by each province - would like to see the national Episcopal Church become more involved in these areas: ecology, matters of justice and war and peace.''

Gallup also strongly recommended that the church encourage the use of small groups for deepening the spiritual life of the church and to serve as ''an entrance to the church community and as a support group for those who find the church setting too impersonal and the church leadership too controlling.''

#90065u1136 03/06/1990 ~United Press International

LONDON (MARCH 6) UPI - United Press International today announced the appointment of John Phillips to the post of bureau manager in Paris.

Phillips, 34, has served as a UPI correspondent in Rome, the Persian Gulf

and Paris and was part of the UPI team that won an Overseas Press Club award in 1985 for coverage of the TWA hijacking in Beirut.

Born in Bradford, Yorkshire, Phillips started journalism as a reporter with the South London Guardian. He joined UPI in Rome in 1983 and in 1987 was sent to the gulf to open a bureau UPI in Bahrain, from where he covered the Iran-Iraq war.

Phillips was transferred to Paris in 1988 and succeeds Elizabeth Ricci as manager. She was reassigned to the Boston bureau as New England regional editor.

Eduardo Cue, 38, rejoined UPI as correspondent in Paris, Goldner said.

Mexican-born, Cue has worked as a freelance journalist in Spain, for the Washington Post in Washington, D.C., for The Times of London in Paris and South America and most recently for the English-language service of the West German economic news agency VWD in Paris and Frankfurt, West Germany.

Cue previously worked for UPI in New York in 1979 and 1980.

#90065u1141 03/06/1990 ~United Press International

BRUSSELS, BELGIUM (MARCH 6) UPI - The European Community will reach agreement on trade pacts with all Central and Eastern European nations except Romania before EC heads of state meet next month, a top official said Tuesday.

The pacts will open the way to negotiations in the second half of the year toward "second generation" association agreements, which call for closer financial ties and even political discussions.

The 12-nation EC is moving quickly toward trade and economic cooperation agreements with Czechoslovakia, Bulgaria, and East Germany, said Frans Andriessen, the Community's external affairs commissioner.

Similar pacts have been signed earlier with Poland, Hungary, and the Soviet Union. An agreement with Yugoslavia was reached in 1980, and the Yugoslav prime minister is scheduled to come to Brussels Thursday to discuss further ties.

By the time EC leaders meet in Dublin April 28, "we will have concluded bilateral agreements with all Eastern European countries with the exception of Romania, where things are going rather slowly," Andriessen told a news conference.

Andriessen said the new agreements would not necessarily be signed by April

28, due to formalities, but all negotiations will have been concluded. He said talks with Romania were dragging because "the actual government of Romania is much more of a caretaking government than the other governments in the area and is therefore not the easiest partner with which to negotiate."

The EC Commission vice president said there was no reason not to conclude a pact with East Germany, despite upcoming changes stemming from the country's March 18 elections and plans to unify with West Germany.

Association agreements were once seen as an automatic step toward full EC status, but officials have recently stressed that such agreements with Eastern European countries do not guarantee future membership.

EC foreign ministers Monday gave the Commission approval to negotiate formally with Czechoslovakia, and officials also announced that a pact with East Germany was ready to be initialed. A round of talks was held last week with Bulgaria and the negotiations are expected to be concluded shortly in another round.

#90065u1143 03/06/1990 ~United Press International

ABIDJAN, IVORY COAST (MARCH 6) UPI - Each spring the Harmattan wind blows south from the Sahara and cools the humid coastal cities of West Africa, carrying with it a thin film of desert sand.

But this year the seasonal pattern has been broken and the cool breeze has become a fiery heat as if in sympathy with feverish political change in the region.

Demands for democratic reform and an end to one-party rule have suddenly become strident in an area hard hit by mounting economic crisis and a slump in world commodity prices.

In the past two weeks strikes, demonstrations and street battles between police and campaigners for reform have spread from Niger in the southern Sahara to Gabon, Benin and Ivory Coast.

And at a time when mass demonstrations are challenging the traditionally tight grip of West Africa's post-independence leaders, enforced austerity measures are beginning to bite, discrediting governments as their ability to steer a popular course is thrown into doubt.

''The great winds carrying democracy that have triumphed in the countries of eastern Europe will not shake the coconut trees in Africa,'' the daily National Gabonese newspaper trumpeted last week.

But in reality the change is already happening, both in oil-rich coastal Gabon and elsewhere in the region.

Gabon's President Omar Bongo, who has ruled the relatively stable country since 1967, on Feb. 23 disbanded the ruling Democratic Party after demonstrations and strikes in the capital Libreville, and replaced it with the new grouping, the Social Democratic Rally.

On Friday, university lecturers went on strike and doctors at the country's largest hospital refused to treat patients because they had not been paid since December. Strikes also led to the closure of Libreville airport for three days last week.

Bongo announced on Saturday that the reformed party would have a broad political platform, and said that he would be prepared to step down if voted out. At the same time the national assembly embarked on a program of democratic reform, which will lead to elections in six months' time.

Banned opposition parties also resurfaced for the first time last week. The Opposition Movement for National Redress, which was forced underground in 1981, on Saturday held its first party congress. Its leaders, Noel Ngwa and Simon Pierre Oyomo, have the establishment of multi-party democracy as their main goal.

A week of dialogue between deposed presidents, teachers, politicians and ministers in Benin at the end of February all but saw the end of the 18-year autocratic rule of Brig. Gen. Mathieu Kerekou.

A financial crisis in the country has left banks with severe liquidity problems. Civil servants and teachers have not been paid for up to six months. Strikes last November led Kerekou to renounce Marxism-Leninism as the official ideology and he agreed to hold a national conference to draw up a new constitution.

The conference then appointed former World Bank official Nicephore Soglo as prime minister. He will take up his post March 12.

While Kerekou remains head of state and chief of the armed forces, a new minister of defense will effectively control the country's security.

The conference also elected an entirely new Cabinet, with former Kerekou ministers prevented from holding office. A general election is planned for Jan. 27, 1991.

The new government announced on Saturday that all political prisoners, even those who had allegedly been involved in coup plots in 1981 and 1988, were to be freed in an effort to create political pluralism.

A similar eruption of demonstrations and rioting has shattered the peace of the Ivory Coast in the past two weeks, though dramatic political reform is unlikely. Demands by opponents of President Felix Houphouet-Boigny for multi-party democracy have long been rejected on the grounds that it would result in tribal conflict along party lines.

Houphouet-Boigny, who has ruled the Ivory Coast since independence from France in 1960, says the country is not ready for democracy.

Two weeks ago students took to the streets demanding cuts in university costs.

NEW YORK (MARCH 6) UPI - Latest metal market prices as quoted Tuesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 67.00-66.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 131.80 c-lb.

Lead, common, U.S. primary producers 44.00-45.00 c-lb.; U.S. non-primary (secondary) producers 44.00-48.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $3.54-$3.66 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $130.00-132.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $507.00-$508.00; dealer-approx., $508.00-$509.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $98.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.80 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 298.50 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b.

shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 70.50 c-lb.

#90065u1220 03/06/1990 ~United Press International

CHANTILLY, VA (MARCH 6) UPI - The Air Force's SR-71 reconnaissance plane, popularly known as the Blackbird, retired with style Tuesday on a record-shattering one-hour flight from the West Coast to the East Coast.

The nation's fastest operational airplane took off from Edwards Air Force base at 4:30 a.m., refueled offshore and headed back to Edwards where - without landing and at supersonic speeds that triggered a 6:01 a.m. sonic boom - shot through the dawn sky toward Washington, D.C., on record-breaking flight of just over an hour.

The Blackbird entered Washington, D.C, airspace at about 10:50 a.m. EST. The Dulles airport control tower said the flight time was 1 hour, 4 minutes.

On the way to its retirement home at the Smithsonian Institution's National Air and Space Museum, the airplane shattered four flight time records including the world record of 4 hours, 12 minutes and 10 seconds for a flight from Los Angeles to Washington, D.C.

''We figured it would make it in about an hour,'' said Barbara Kornylo of Lockheed, the builder of the airplane.

The Air Force said the plane flies at Mach 3, three times the speed of sound, at an altitude greater than 80,000 feet.

The SR-71 model airplanes were officially retired Feb. 26, but Lockheed requested one of them to publicly break some records on its last flight, something that the plane has been doing - but on a classified basis - for years, Kornylo said.

In addition to breaking the world Los Angeles-to-Washington record set several years ago by pilot Brooke Knapp in her Lear jet 35A, the Blackbird was after three other records: the national East-to-West Coast record for fastest 2,400-mile flight, and records for flights from Kansas City, Kan., to Washington and from St. Louis to Cincinnati.

The Blackbird, after fueling offshore from an Air Force KC-135, a type of flying gas station, passed through a radar screen and quickly accelerated

past the speed of sound.

Residents from across the San Fernando Valley called the Devonshire police station to report the noise as an explosion or earthquake, Sgt. James McClard said.

WASHINGTON (MARCH 6) UPI - The Federal National Mortgage Association, better known as Fannie Mae, said Tuesday it is introducing a new, "two-step" alternative mortgage to the commonly available fixed-rate and adjustable-rate mortgages.

"It's a mortgate designed for the 1990s," said Roger Birk, president and chief operating officer of Fannie Mae, the congressionally chartered,

shareholder-owned company that is the nation's largest investor in home mortgages.

"In this mobile society, homeowners move, and therefore, repay their mortgages about every seven years," Birk said. "So today's homebuyer wants to pay as little as possible in the initial years yet have protection from interest rate changes if they do not move again."

Under the two-step mortgage, starting rates will be as much as three-eighths of a percentage point lower than a traditional 30-year fixed-rate mortgage for the first seven years of the loan, Birk said.

But unlike most adjustable rate mortgages, which adjust yearly or more frquently, the two-step rate adjusts only once - at the end of the seventh year - and then remains the same for the next 23 years.

The second step of the two step process starts only if homeowners stay in their homes beyond seven years, at which point the interest rate is reset based on an index tied to the ten-year Treasury bond.

Fannie Mae officials said the new mortgage tool is expected to aid 110,000 more homebuyers to qualify for an $83,000 mortgage, the average loan amount of mortgages purchased by Fannie Mae in 1989.

The officials also said the new mortgage instrument would require a minimum down payment of ten percent and would have an interest rate cap of six percentage points above the initial rate.

According to the officials, an estimated 18 percent of Americans move each year, or about 16 million families. In 1987, of the 18 percent of families moving, 6.6 percent moved to a different county and 2.8 percent moved to another state. And between 1980 and 1985, more than 40 percent of Americans changed homes at least once.

Among people in their 20s - those beginning career-building years and buying their first homes - roughly one-third changed homes in 1986-1987. Birks said the new mortgage was designed especially for first-time homebuyers, military families, and those frequently relocated by corporations.

(MARCH 6) UPI - Soviet Foreign Minister Gennady Gerasimov says fighting has erupted at the Kabul airport in Afghanistan. Gerasimov says he's UNsure who is involved in the clash, but- in his words... there's ''talk of a coup.'' Soviet forces withdrew from Afghanistan last year after some 10 years of supporting the Moscow-backed government.

Senators Ted Kennedy and Orrin Hatch are scheduled to introduce a 500-Million-dollar legislative package for AIDS victims. In prepared remarks, Kennedy says the AIDS virus ''remains a great threat to communities across the nation.'' The 13 cities hardest hit by the disease would get half the money.

The Philippine Supreme Court has allowed opposition Senator Juan Ponce Enrile to go free while the high court considers the validity of charges that he plotted against President Aquino. Enrile declared the verdict ''a triumph of justice.'' Government attorneys argued that if freed, Enrile would again try to overthrow Aquino.

Experts in Iranian affairs say Tehran is the likely source of recent rumors that some or all of the 18 Western hostages held in Lebanon would be released in the near future. The political analysts say Iran probably revived the hostage issue to try to ease tense U-S-Iranian relations.

Jury selection in John Poindexter's Iran-Contra trial continues today in the courtroom of U-S District Judge Harold Greene in Washington. Among the 21 potential jurors deemed qualified yesterday are a woman who was babysat by one of Poindexter's defense attorneys and a janitor who says NOBODY can sway her once she believes in something.

Proceedings are set to resume in the Captain Joseph Hazelwood's Anchorage oil spill trial. Yesterday's events included a prosecution witness angrily denying that his testimony was tied to the state's case against Hazelwood. The judge cleared jurors from the court at one point and questioned the validity of the state's case.

(MARCH 6) UPI - It appears that emotions have calmed in the nominally independent homeland of Ciskei after a bloodless coup ousted the president-for-life during the weekend. There are reports that as many as 20 people died after the takeover. Yesterday, Pretoria sent troops to the area to protect South African properties.

A Washington County, Pennsylvania, coroner's jury has recommended filing criminal charges against Chrysler Corporation and a children's car-seat maker in the death of a child last month. Two-year-old Noah George was tossed from his child restraint seat and died in an accident involving his mother's Dodge Caravan.

Nicaraguan President-elect Violeta Chamorro is scheduled to meet with Costa Rican President Oscar Arias today to discuss the Central American peace process. Top Chamorro advisers are in Washington for talks about

future financial aid to Nicaragua. The aides say it's too early to set an exact figure on U-S assistance.

Veteran star of the big and little screens, Gary Merrill, has died. 74-year-old Merrill, whose film credits include ''Twelve O'Clock High,'' and ''All about Eve,'' had been battling lung cancer for the past two years. Merrill is also remembered for his T-V roles in ''Young Doctor Kildare'' and ''The Seekers.''

Washington has recalled the American ambassador from Guatemala to highlight growing U-S concerns that the Guatemalan government is NOT taking effective steps to combat increasing incidents of terrorism. The belief in Guatemala is that recent activity is related to right-wing death squads protected by the military.

#90065u1295 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Italian Prime Minister Giulio Andreotti opened a three-day state visit to the United States Tuesday by expressing concern about the U.S.-backed proposal to reunify Germany.

Andreotti, seated beside President Bush in the Oval Office, told reporters that all 16 members of NATO - not just the United States, Britain, France and the Soviet Union - must have input into the reunification of Germany.

''I think that all the member countries of the Atlantic alliance must handle together these problems, and provided that the specific problems related to Berlin must be handled by the four countries,'' Andreotti said.

Bush, in greeting Andreotti at a ceremony on the White House South Lawn, said, ''I look forward to exchanging views with you ... on the dramatic

developments in Europe, east and west.

''We agree on the foundations of a new Europe,'' Bush said. ''We welcome the prospect of overcoming Europe's artificial division.''

Andreotti maintains that Italy and other NATO nations must be heard by the Big Four allies before any unification occurs.

U.S. and Italian officials said the prime minister's talks with Bush would center on the changes in Europe. But the two leaders are also certain to touch on U.S.-Italian trade, the need for more aid to emerging democracies in Panama and Nicaragua and the war on drugs.

Andreotti was to meet later Tuesday with Secretary of State James Baker, U.S. Trade Representative Carla Hills, Attorney General Dick Thornburgh and Treasury Secretary Nicholas Brady.

The prime minister and his wife, Lidia, were to return to the White House late Tuesday as guests of a state dinner hosted by the Bush and his wife, Barbara.

Andreotti, 70, elected in July to his sixth term as prime minister, is highly concerned about the ''two-plus-four'' German reunification formula.

Under it, East Germany and West Germany are to negotiate economic and political terms of unification as a prelude to discussions on security issues with the Big Four allies.

Italy and other NATO members have suggested that a conference be held to address the reunification.

The Bush administration opposes such a conference, but says NATO members will be consulted. Unification talks are to formally begin this week between the two Germanys, with the Big Four allies joining discussions next week.

Bush, in his arrival remarks, told Andreotti, ''I am confident that we share the commitment that (West Germany) Chancellor (Helmut) Kohl and I expressed at Camp David nine days ago, that a united Germany should remain a full member of NATO, including particpation in its military structure.''

Andreotti, in his remarks, said, ''These are fresh and exciting prospects that are awakening in Europe today. New balances lie on the horizon, full of promise yet also fraught with problems.

An administration official said the Andreotti-Bush meeting was not convened to address ''any particular problem or set of problems.''

Instead, the official said, the meeting reflects a mutual desire ''to stay in touch, to have a close exchange of views, which is something that is very important in these times when events are moving very fast in Europe.''

Andreotti's five-party coalition of Christian Democrats, Socialists, Social Democrats, Republicans and Liberals - Italy's 49th government since World War II - has been shaky in recent weeks because of internal divisions.

But the prime minister's power as an international statesman remains strong. An administration official described him as a longtime ''player on the international scene.''

Italian officials said another major topic of the Andreotti talks will be the future of NATO, which is expected to be transformed eventually from a military to a political force.

#90065u1312 03/06/1990 ~United Press International
SEREIPHEAP, CAMBODIA (MARCH 6) UPI - Khmer Rouge forces are gaining political and military strength inside Cambodia and the best way to stop them from returning to sole power is to draw them into a power-sharing arrangement, resistance leader Prince Norodom Sihanouk said.

Sihanouk said he wished the Khmer Rouge leader, Pol Pot, would die.

''More and more villages, more and more peasants support the Khmer Rouge because our people are proud people,'' said Sihanouk in an interview Monday at a base near the Thai border.

''To be killed by the Khmer Rouge is terrible for them but for Cambodia to be swallowed up by Vietnam is worse,'' he said.

Sihanouk, who leads a three-party resistance coalition that includes the Khmer Rouge, said the Chinese-backed group has engaged on a ''hearts and minds'' campaign distributing medicine and clothes, and emphasizing the threat of Vietnamese colonialism to the continued existence of the Cambodian nation.

More than 11 years after Vietnam' s invasion, the nationalist propaganda was proving effective, he said.

''Time is working for the Khmer Rouge,'' he said. ''They are convincing the people that the Vietnamese are swallowing Cambodia,'' he said.

The prince insisted he was not an apologist for the Khmer Rouge, who are blamed for the deaths of more than 1 million Cambodians during their rule from 1975-1979.

''I have lost five children and 14 grandchildren, killed by the Khmer

Rouge. I cannot forget that,'' he said.

Sihanouk said he had urged the Khmer Rouge leader, former Prime Minister Pol Pot, to go into exile in Beijing and offered him use of his palace there.

But he said the offer was refused because ''Pol Pot is a warmonger'' who wants to continue fighting.

Sihanouk said Pol Pot, 63, had malaria and was often in poor health.

''I am a Buddhist and I am not supposed to wish this but I wish he would die. But he refuses to die. It is very disturbing,'' he said.

Sihanouk said the Khmer Rouge were willing to agree to U.N.- organized elections in Cambodia because they were confident they would do well.

He said the fanatical guerrilla group controls large areas of the countryside where they have the support of the poor peasants. The Khmer Rouge are likely to launch a campaign of assassination against supporters of the Vietnamese-backed government if the administration is not dismantled, he said.

Sihanouk said the Khmer Rouge could surprise people by winning more than 40 percent of the vote.

But he said the alternative to bringing them into a peace settlement would mean there would be continued war and a possible Khmer Rouge military victory.

Sihanouk said the terrible image of the Khmer Rouge in the West, popularized by the movie ''Killing Fields,'' had blinded Westerners to the distasteful necessity of dealing with them.

''You can get rid of the Khmer Rouge in your newspapers ... but you cannot get rid of them on the ground,'' he said.

The West was too far away from the realities of Southeast Asia to play a constructive role in Cambodia, he said.

Sihanouk said he had personal assurances from Chinese leader Deng Xiao-ping that the Khmer Rouge would not be allowed to use a peace settlement as a stepping stone to sole power.

''The Khmer Rouge are intelligent enough to know they cannot remake their mad policy of April 1975 to December 1978.'' he said.

Any return to the radical communist policies that turned the country into

a vast forced labor camp would meet strong objections from their Chinese backers and the Cambodian people, he said.

#90065u1319 03/06/1990 ~United Press International

HOLLYWOOD (MARCH 6) UPI - ''The Hunt for Red October'' torpedoed all its competition at North America's movie houses, setting box office records for a non-summer non-Thanksgiving release by grossing $17.2 million during its debut.

Paramount's film version of Tom Clancy's Cold War thriller, starring Sean Connery and Alec Baldwin, posted a stunning per-screen average of $14,010 at 1,225 theaters.

The submarine adventure scored its impressive debut despite warnings that improved East-West relations could make audiences less than enthusiastic.

''Red October'' took in nearly half of the ticket sales of the top 10 films, which grossed $38.8 million during the weekend, up 35 percent from the $28.7 million generated during the previous weekend.

''Driving Miss Daisy,'' still cruising with nine Academy Award nominations moved into second place after two weeks in the top spot with $5.1 million a modest fall of 17 percent from last week.

Warner Bros.' ''Daisy'' still did a solid business of $3,554 per screen at 1,432 theaters. The comedy-drama about an elderly Jewish widow and her black chauffeur has now taken in $60.3 million in 12 weeks of release.

Warner's ''Hard to Kill'' moved from second to third, but continued to perform respectably with a gross of $4.2 million. The martial-arts action film posted an impressive per-screen average of $2,798 in 1,508 theaters.

''Hard to Kill,'' starring Steven Seagal, has become a major box-office surprise this year, grossing $33.3 million in four weeks of release.

Orion's wacky ''Madhouse'' also fell one spot, from third to fourth place, with ticket sales of $3.1 million for a slight decline of 10 percent. The film, starring John Larroquette and Kirstie Alley as the hosts of house guests who won't leave, posted a per-screen average of $1,989 at 1,555 theaters.

''Madhouse'' has taken in $13.4 million in three weeks of release.

Universal's ''Born on the Fourth of July'' remained at No. 5 with $2.1 million, a slim 16 percent decline from last week, and a per-screen average of $1,470 in 1,434 theaters.

''Born on the Fourth of July,'' which recounts Ron Kovic's journey from Marine and Vietnam War supporter to anti-war protester, has grossed $59.7 million in 11 weeks of release.

Columbia's ''Revenge,'' Kevin Costner's first film since ''Field of Dreams '' slid from fourth to sixth with $2 million, a hefty 32 percent decline from the previous week for the sharpest drop among the top 10. ''Revenge'' had a per-screen average of $1,463 at 1,335 theaters and has grossed $12.9 million in three weeks.

Warner's ''Men Don't Leave,'' starring Jessica Lange, fell from sixth to seventh place in its second week of wide release with a 30 percent decline to $1.4 million. The film, starring Jessica Lange as a widow with two sons took in a per-screen average of $1,760 at 802 theaters and has totaled $4.3 million in five weeks.

The Civil War saga ''Glory'' remained in eighth place with a $1.3 million gross, averaging $1,645 at 811 screens. The Tri-Star release has grossed $20.2 million in 12 weeks.

Last week's box office total of $61 million was down from the $67.8 million for the same week last year. It brought the year-to-date gross to $647 million, off from last year's year-to-date figure of $683 million.

The top 10, last week's gross, total gross, weeks in release:

1. ''The Hunt for Red October,'' $17.2 million, 1 week.

2. ''Driving Miss Daisy,'' $5.1 million, $60.3 million, 12 weeks.

3. ''Hard to Kill,'' $4.2 million, $33.3 million, 4 weeks.

4. ''Madhouse,'' $3.1 million, $13.4 million, 3 weeks.

5. ''Born on the Fourth of July,'' $2.1 million, $59.7 million, 11 weeks.

6. ''Revenge,'' $2 million, $12.9 million, 3 weeks.

7. ''Men Don't Leave,'' $1.4 million, $4.3 million, 5 weeks.

8. ''Glory,'' $1.3 million, $20.2 million, 12 weeks.

9. ''Stella,'' $1.28 million, $17.4 million, 5 weeks.

10. ''Steel Magnolias,'' $1.2 million, $74.4 million, 16 weeks.

#90065u1344 03/06/1990 ~United Press International
NEW YORK (MARCH 6) UPI - The TV ratings world was back to normal last week as ''60 Minutes'' - with Andy Rooney and without competition from ''America's Funniest Home Videos'' - won its time period and NBC won the week, it was reported Tuesday.

CBS displaced ABC from second place, with help from its classy Sunday movie, ''The Incident,'' and from the Miss USA Beauty Pageant, which came in 20th and was up 10 percent in the ratings over last year.

NBC won five nights of the week - Monday, Tuesday, Wednesday, Thursday and Saturday, while CBS took Friday and Sunday. ABC had none, but it did have the top-rated show of the week, ''Roseanne.''

''60 Minutes'' with Andy Rooney came in fourth for the week, up about three share points from its average showing with a 22.0 rating and a 37 share.

''America's Funniest Home Videos,'' back in its regular time slot instead of opposite the CBS news magazine, came in fifth with a 21.8 rating and a 33 share.

There was no contest in the Sunday movie department, with ''AT&T Presents: The Incident'' in seventh place with a 20.5 rating and a 33 share - the highest rated Sunday movie on any network this season.

The opposition was a pair of theatrical films - ABC's ''Star Trek IV: The Voyage Home'' tied for 39th place with a 13.0 rating and a 22 share, and NBC's ''Ferris Bueller's Day Off'' in 43rd with a 12.7 rating and a 20 share.

American viewers have a ghoulish streak - if they know somebody's going to get killed on a show, they watch. Last Friday Shawn Weatherly was eaten by a shark on ''Baywatch'' and the show had its highest numbers since premiere week.

''Rescue 911'' on CBS, with a segment on the Stuart murder in Boston, came in 29th with its highest ratings of the season.

In the disaster category was ''H.E.L.P.,'' which premiered on ABC on Saturday night and wound up in 79th place, the lowest rated show on the three major networks.

Also in trouble is ''Elvis,'' which follows ''Home Videos'' on ABC Sunday nights but doesn't hold its audience. ''Home Videos'' was in fifth place; ''Elvis'' tied for 52nd with half the share of audience. ''The Bradys'' on CBS also have little to laugh at - they're in 74th place.

NBC won the ratings race for the week for the 20th consecutive time, and 88th out of the last 89 weeks. The network took the week ending March 4 with a 14.4 rating and a 24 share, according to the A.C. Nielsen Co. CBS moved up to second place with a 13.1 rating and a 21 share, while ABC was third with a 12.4 rating and a 20 share.

The 24-week-old season-to-date ratings show NBC with a 14.9 rating and a 24 share, ABC with a 13.0 rating and a 21 share, and CBS with a 12.3 rating and a 20 share.

In the evening news ratings, ABC's ''World News Tonight'' with Peter Jennings continued as No. 1 with an 11.1 rating and a 21 share. The Jennings news has been in sole possession of first place or tied for first for 21 of the last 22 weeks. ''NBC Nightly News'' with Tom Brokaw was second with a 9.8 rating and a 19 share, while ''CBS Evening News'' with Dan Rather was right behind with a 9.7 rating and an 18 share.

Each ratings point represents about 921,000 households and a share is the percentage of TV sets tuned to a particular show.

The top 10 programs for the week ending Sunday, March 4, according to the A.C. Nielsen Co., were:

1. Roseanne (ABC)

2. The Cosby Show (NBC)

3. Cheers (NBC)

4. 60 Minutes (CBS)

5. America's Funniest Home Videos (ABC)

6. A Different World (NBC)

7. The Incident, CBS Sunday movie

8. Golden Girls (NBC)

9. Empty Nest (NBC)

10. Wonder Years (ABC)

#90065u1350 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - With the nation's population growing by one

person every 14 seconds, Census Bureau demographers estimated the United States hit the quarter-billion mark of 250 million people Tuesday.

The estimate came three weeks before the nation takes part in ''the big count,'' or the April 1 once-a-decade census. Bureau officials said they can make a more accurate estimate of when the population passed the 250 million milestone after the results of the decennial census are known.

A population total of 250 million people would represent a 10.4 percent increase over the 1980 count of 226,545,805. The nation totaled 200 million on Nov. 20, 1967, officials said.

The first census in 1790 counted fewer than 4 million people. By 1880, the population had reached 50 million and by 1915 the nation's population totaled 100 million; in 1949, it hit the 150 million mark.

Census projections indicate that the population could reach the 300 million mark in about 30 years.

According to the demographers, the nation is growing by about 6,300 people daily, with some 4,400 coming from a surplus of births - 10,600 daily - over deaths - 6,200 - and an average of 2,000 new immigrants a day.

Census demographers said the net gain of one person every 14 seconds is based on one birth every eight seconds, one death every 14 seconds, one immigration every 35 seconds and one person leaving the country every three minutes.

The 250 million people make the United States the world's fourth most populous nation - a ranking it has held for many decades. Nation's with larger populations include China, with 1.1 billion people, India, 833 million and the Soviet Union, 289 million people.

Just trailing the United States are Indonesia, with 188 million people, Brazil, 151 million people, Japan, 123 million people, and Nigeria and Bangladesh, each with 115 million people. Rounding out the top 10 most populous countries is Pakistan, with 110 million people.

(MARCH 6) UPI - Soviet Foreign Ministry spokesman Gennady Gerasimov says new fighting at the Kabul airport in Afghanistan may be part of a possible coup attempt. Gerasimov said at a briefing he did NOT know who was fighting at the airport and that he had only just learned of the clashes. The Soviet Union invaded Afganistan in 1979 and withdrew last year after some 10 years of backing the government.

The Soviet news agency Tass says an unidentified plane bombed the presidential palace in Kabul . The Tass report says anti-aircraft guns returned fire... and that gunfire can be be heard near Kabul's international airport and the defense ministry building. There was NO immediate confirmation from the Afghan government.

President Bush will hold talks this morning with Italian Prime Minister Andreotti at the White House. Andreotti is expected to use his meeting with Bush to push for a greater Italian voice in German re-unification. Andreotti says Italy and other NATO nations must be heard by the Big Four allies before any German unification takes place.

Army chief of staff, General Carl Vuono says eight-BILLION dollars in Pentagon budget cuts advocated by the House Budget Committee could be devastating. Democratic Representative Les Aspin, chairman of the House Armed Services Committee, will testify before the Budget Committee today on how much of the proposed defense budget should be approved.

#90065u1367 03/06/1990 ~United Press International

(MARCH 6) UPI - The Philippine Supreme Court today granted Senator Juan Ponce Enrile's request for temporary release. Enrile is charged with plotting to overthrow the government of President Aquino. The 66-year-old Enrile is a former defense minister who helped helped oust the late dictator Ferdinand Marcos in a popular uprising in 1986. Enrile called his release ''a triumph of justice.''

Israeli Labor Party leader Shimon Peres has informed leaders of Israel's coalition government that his party will withdraw from the coaltion if the Cabinet does NOT approve a U-S plan on Israeli-Palestinian peace talks. Labor objects to conditions set by the right-wing Likud Party for the talks to begin. Likud rejects any role for the P-L-O in peace negotiations.

A report says American troops returning home from Panama after the December invasion may be smuggling narcotics. The report quotes anonymous senior U-S military commanders as saying one American serviceman has confessed to recruiting soldiers to work as couriers to carry cocaine to the United States on military flights. The Pentagon had NO comment on the report.

Officials in Los Angeles say a Michigan man has been arrested for allegedly mailing more than 200 threatening letters to actress Stephanie Zimbalist. The F-B-I says 43-year-old Michael Shields was taken into custody at the Valley Hilton Hotel in Sherman Oaks where he was registered. The 33-year-old Zimbalist starred in ''Remington Steele'' from 1982 until 1987.

BANGKOK, Thailand (MARCH 6) UPI - The government Tuesday dismissed the governor of the nation's central bank after five years of service, the finance minister said.

Finance Minister Pramual Sabhavasu declined to elaborate on the dismissal of central bank chief Kamchorn Sathirakul except to say that it was done for ''suitable reasons''.

Prime Minister Chatichai Choonhavan said the government felt ''we should circulate this post among other officials.''

Kamchorn was reported to have got into conflict with Pramual over interest rates which Kamchorn preferred to raise to curb inflation while Pramual argued that higher rates would be a heavy burden on business.

The new bank governor will be Kamchorn's deputy Chavalit Thanachanan, the finance ministry said.

#90065u1384 03/06/1990 ~United Press International

DAR-ES-SALAAM, TANZANIA (MARCH 6) UPI - Thousands of people braved dark skies and heavy rains to welcome black South African leader Nelson Mandela upon his arrival Tuesday in Tanzania on the third leg of a 17-day tour.

Mandela, 71, accompanied by his wife, Winnie, and officials of the African National Congress, stepped out a Boeing 707 to be greeted by former president and national figurehead Julius Nyerere.

Dressed immaculately in a black suit, Mandela embraced the former president before turning to greet a very emotional crowd, including

numerous South African exiles who he had not seen in almost 30 years.

Mandela, who spent 27 years in a South African jail until his release last month, had a special greeting for Hashim Mbita, executive secretary of the Organization of African Unity's Liberation Committee, which for years has focused African opposition to South Africa's apartheid regime. OAU Secretary-General Salim Ahmed Salim was also there to welcome him.

Before his departure from Harare, Zimbabe, the second leg of a foreign tour, Mandela told reporters that three conditions set by the ANC for talks with de Klerk still had not been met, notably the release of all political prisoners and removal of security legislation which prevented political activity.

There was no public change in the ANC's position on armed struggle after two days of talks with Mandela at the movement's headquarters in Lusaka, Zambia, last week. That position commits the movement to opposing Pretoria by military means until a formal ceasefire is negotiated.

''I am optimistic,'' Mandela said at an airport news conference before leaving Zimbabwe. ''I am not a prophet but I hope a solution is not very far off.

''It is our intention that sooner or later the mistakes, the injustices and the cruelties of the past must be forgotten so that we can get all population groups in the country concentrating on the task of building their country.''

Hundreds of thousands of Tanzanians lined the 15 miles of road from the Dar-Es-Salaam airport to the State House.

Mandela rode in an open-topped black Rolls-Royce, punching the air with his fist in the traditional ANC salute as the crowds chanted his and Nyerere's name in turn.

The black nationalist leader has not been to Tanzania since 1962, when with the permission of the government, he set up military training facilities at several locations for the ANC's armed struggle against the South African government. He is scheduled to visit the camps at Iringa, 250 miles southwest of Dar-Es-Salaam and near Morogoro, 120 miles west of the city.

Deputy president of the ANC since Friday, Mandela has asked that his visit to the camps go unreported. Tanzanian authorities have refused permission for the reporters to accompany him.

Mandela, who was released from jail Feb. 11, is not in Tanzania as the guest of the government but of the country's only political party, the

socialist Chama Cha Mapinduzi. President Ali Hassan Mwinyi was not even in Tanzania Tuesday, having left for a state visit to the United Arab Emirates.

In addition to attending a rally Wednesday at the Dar-Es-Salaam sports stadium with Nyerere, Mandela will be granted the freedom of Dar-Es-Salaam and the city's Port Access Street is to be renamed Nelson Mandela Street. On Thursday, he is to visit the island of Zanzibar.

He is scheduled to leave Tanzania Sunday for Sweden to visit ANC President Oliver Tambo, who is recovering in a Stockholm clinic from a stroke he suffered last year.

As deputy president, Mandela was effectively given leadership of Africa's oldest liberation movement because of Tambo's convalescence.

#90065u1392 03/06/1990 ~United Press International

SANTA FE, NM (MARCH 6) UPI - The lobbyist determinedly walks the halls of the state capitol building, seeking out those he hopes to persuade.

Seeing a reporter he does not know, he extends his hand.

''Hello. I'm Don Schmidt and I have AIDS.''

The handshake serves a purpose. That person has touched someone with AIDS.

While the response from those he greets is warm, not long ago some lawmakers would head the other direction when they saw Schmidt coming.

''They suffered from AFRAIDS - Acute Fear Reaction to AIDS,'' said Schmidt who lobbies on behalf of the New Mexico Association for People with AIDS.

The reaction was expected.

''Who first got sick? Gays. Junkies. Society places less value on us. People bought the myth,'' he said.

But having AIDS helps more than hurts his cause, Schmidt said.

After five years of legislative sessions, lawmakers know him and the truth about AIDS.

''I have been in and around this building each and every year since 1986. I've had incredible support from both the Republicans and the Democrats. Education works.

''It's not a partisan issue. They understand AIDS doesn't take a survey. It doesn't ask your political party, your age, before it hits.''

When Schmidt first began lobbying state lawmakers on AIDS issues in 1986, barely a year after he learned he was infected with the human immunodeficiency virus (HIV), he was director of New Mexico AIDS Services. Before that he had monitored state compliance with a federal court order on foster care.

''I already have a reputation for running social programs. I'm a resource for the administration. I'm a resource for legislators. I'm a resource for people in this state who need to grapple with the issue,'' he said.

But he won't be back next year.

''It's already a statistical fluke that I'm here today. It will be a greater statistical fluke if I'm alive next year.

''When one has limited time to live, I don't know how the individual chooses to live that time,'' he said.

Friends and family have told him he was crazy for working as hard and as long as he has. In addition to his lobbying work, he's on the national

boards of the AIDS Action Council and the Insurance Industry AIDS Initiative and active in New Mexico Association for People Living with AIDS.

''I'm desperately committed to seeing this society be the positive society it can be,'' he said. But, already, working more than 20 to 30 hours a week is hard on him. He's among the 20 percent of the people still alive who were diagnosed with pneumocystis carinii pneumonia in October 1987.

He plans to stay active with the AIDS council and hopes to find someone with AIDS to replace him on the insurance board. But he won't be traveling to Washington, D.C., as much. Mostly, he wants to enjoy himself, relax and spend more time with his partner.

In the past year, he said, he and his partner who also has AIDS have been ''much less well.''

''I have limited time. I have spent five years on this issue. I don't want to spend all the rest of my time playing health care politics.''

Schmidt has helped New Mexico become a leader in public action on AIDS despite the state's relatively few cases - some 240 for a population of 1.5 million. New Mexico was the first state to fund in-home care for people with AIDS, a program that keeps them out of the hospital, and was among the first to pass laws banning discrimination against people with AIDS. This year, Schmidt's lobbying efforts helped get a nearly $1 million increase for AIDS care in the state budget.

Schmidt, who also works on AIDS education with high school students, said he personalizes the AIDS issue.

''It's as important for lawmakers as for school children to put a face on this epidemic,'' he said. ''There are no private sources for funding for AIDS services. The only money is in the state Legislature.''

About half the people infected with the human immunodeficiency virus have no health insurance and either go without expensive medical monitoring or quit their jobs to be eligible for federal assistance, he said. The state can make the difference by helping early on.

And for lawmakers, Schmidt is living evidence of the position he supports - that the state needs to commit money to the early treatment of people infected with HIV to postpone the onset of full-blown AIDS so they can can stay well longer and continue to contribute.

''You can feel pretty good between the times you feel bad,'' he said. ''They see me every day and they can understand I'm not that unique.

''It's a cost effective and compassionate response to a horrible disease. It's in the state's best interest to keep people as taxpayers as long as possible,'' he said.

#90065u1445 03/06/1990 ~United Press International

SEOUL, SOUTH KOREA (MARCH 6) UPI - The Rev. Frank Chikane of South Africa called on clerics and lay people from some 140 countries to fight injustice, sexism and poverty in a keynote speech Tuesday opening a weeklong gathering sponsored by the World Council of Churches.

''We need to stop injustice and oppression in the world,'' said Chikane, secretary-general of the South African Council of Churces. ''We need to stop racism and sexism. We need to stop poverty and the burdening of poor nations with debts they could not conceivably pay.

''In this struggle for justice and peace we shall be able to jointly address ourselves to the struggle to preserve God' creation,'' he said.

The Seoul meeting is scheduled to end next Monday with the adoption of affirmations that express the commitment of the participants on justice, peace and the integrity of creation.

About 1,000 delegates from some 140 foreign countries and thousands of Korean Christians are taking part in the gathering - the World Convocation on Justice, Peace and the Integrity of Creation, a spokesman for the organizing committee said.

During the meeting the participants will try to identify the major threats to life and propose to churches acts of mutual commitment in response to them, the spokesman said.

#90065u1473 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The Senate confirmed Clarence Thomas as an appeals court judge Tuesday amid speculation the young black conservative is being groomed for the Supreme Court.

The Senate by voice vote approved Thomas, chairman of the Equal Employment Opportunity Commission, as a member of the U.S. Court of Appeals for the District of Columbia.

President Bush nominated Thomas, 41, for a lifetime seat on the court where he succeeds Robert Bork, who resigned after the Senate rejected his nomination by President Ronald Reagan to the Supreme Court.

The Washington appeals court is considered second only to the Supreme Court in power, since its jurisdiction includes federal agencies and their rules.

Speculation that Thomas might eventually be named to the Supreme Court to succeed Thurgood Marshall, 81, the first and only black on the high tribunal, first surfaced at the time Bush made the appointment. The Washington appeals court is frequently used as a steppingstone to the high court.

Although the Senate Judiciary Committee approved the Thomas nomination 17-1, several Democratic senators made it clear in their comments at the time that they were not bound should he be named to the Supreme Court.

In debate Monday, Thomas was highly praised by Republican senators but the two Democrats who participated, Sens. Howard Metzenbaum, D-Ohio, and David Pryor, D-Ark., voiced their opposition.

They both faulted the Equal Employment Opportunity Commission under Thomas' tenure for allowing thousands of age discrimination claims, filed with state agencies, to linger beyond the statute of limitations.

Pryor said that for eight years, ''Rather than Clarence Thomas, the director, running the bureaucracy, the bureaucracy ran him. I think the bureaucracy ran him to a very dangerous extent, so that Clarence Thomas decided no longer to look at what was happening in that agency.''

Pryor said if 10 or 20 age discrmination claims had been allowed to lapse that ''might have been different'' but said there were 15,000, representing the right of Americans ''snuffed out, literally by a bureaucracy run by Mr. Thomas.''

Born in Pinpoint, Ga., in 1948, Thomas has spent almost his entire career in public service. After graduating from Holy Cross College and Yale Law School, Thomas worked for almost three years as an assistant attorney general in Missouri.

For two years, he worked for the Monsanto Co., and in 1979 he joined the staff of Sen. John Danforth, R-Mo., as a legislative assistant. Two years later, Reagan nominated Thomas as assistant secretary for civil rights in the Education Department and in 1982 Reagan named as him chairman of the Equal Employment Opportunity Commission, a post he has held since.

#90065u1474 03/06/1990 ~United Press International

CHICAGO (MARCH 6) UPI - The Bulletin of the Atomic Scientists moved the hands on its Doomsday Clock Tuesday back four minutes to 10 minutes to

midnight because of the recent developments in Eastern Europe.

Bulletin editor Len Ackland said the revolutionary changes overseas have ''significantly diminished'' the risk of global nuclear war.

''Now, 44 years after Winston Churchill's 'Iron Curtain' speech, the myth of monolithic communism has been shattered for all to see, the ideological conflict known as the Cold War is over,'' a Bulletin editorial concluded.

The Doomsday Clock first appeared on the Bulletin's cover in 1947 and has become a symbol of how close the world is to Armageddon. It has been reset a dozen other times.

''Much remains to be done before the greatest short-term threat to the planet - the risk of nuclear war - is eliminated,'' the editorial said. ''Still the termination of the Cold War has lifted a grim weight from the human psyche. It has returned to humanity its hope for a future, and the chance to create one.''

The editorial called for the speedy conclusion of treaties reducing nuclear arsenals, greater effort to block the proliferation of weapons of mass destruction and a halt to nuclear testing.

Ackland said environmental considerations played no major role in Tuesday's change ''although the end of the Cold War means that resources can be reallocated to protect the planet's environment.''

A board of directors including 16 Nobel laureates determines the clock's position.

The hands were placed closest to disaster in 1953 when they were moved to two minutes before midnight following the successful U.S. testing of a hydrogen bomb. The world was safest according to the clock in 1972 when the first SALT agreement was signed, putting the hands at 12 minutes to midnight.

The clock had been last adjusted in 1988, when the hands were moved to the six-minute mark.

The Bulletin was founded in 1945 by Albert Einstein and other concerned scientists who wanted to alert the public to the dangers of nuclear war.

#90065u1482 03/06/1990 ~United Press International

SEOUL, SOUTH KOREA (MARCH 6) UPI - President Roh Tae-woo warned his North Korean counterpart, Kim Il-sung, Tuesday that provocations such as underground invasion tunnels would be North Korea's ''tomb of

self-destruction.''

Roh, in an address at the commencement ceremony of the (South) Korean Military Academy, referred to underground tunnels such as one discovered last weekend under the divided country's border with North Korea.

''I hereby make an unequivocal warning to the top authority of North Korea that what North Korea may gain through anti-national manueverings is the tomb of self-destruction,'' Roh said.

Roh said South Korea must defend peace by defeating any North Korean provocations and force North Korea to seek peaceful national reunificiation, giving up its goal of a communist takeover of the South.

The tunnel under an eastern sector of the Demilitarized Zone between the two Koreas was the fourth North Korean tunnel found along the border since 1974. Government officials suspect that there are at least 25 more such tunnels constructed by North Korea.

Mlitary officials said the newly discovered tunnel about 100 miles northeast of Seoul is 6.5 feet wide and 6.5 feet high, large enough for artillery pieces and troops to flow through at a speed of 30,000 men per hour.

The officials said sweep operations in the tunnel by soldiers have been called off because of many booby traps installed and water pooling inside.

On Sunday a mine blast killed a sentry dog when a search-and-clear team had advanced about 760 yards toward the north. There were no other casualties.

The searchers had to stop at that point and are now erecting a temporary barricade in the tunnel with sand bags.

#90065u1512 03/06/1990 ~United Press International

BRUSSELS (MARCH 6) UPI - The European Community will reach trade agreements with every Eastern European nation except Romania before the group's heads of state meet next month, a top official said Tuesday.

The pacts will open the way to negotiations in the second half of the year toward ''second generation'' association agreements, which call for closer financial ties and political discussions.

The 12-nation European Community is moving quickly toward trade and economic cooperation agreements with Czechoslovakia, Bulgaria and East Germany, said Frans Andriessen, the group's external affairs commissioner.

Similar pacts were signed in the past 18 months with Poland, Hungary and the Soviet Union. An agreement with Yugoslavia was reached in 1980 and a top Yugoslav delegation comes to Brussels on Thursday to discuss further ties.

By the time EC leaders meet in Dublin, Ireland, April 28, ''we will have concluded bilateral agreements with all Eastern European countries with the exception of Romania, where things are going rather slowly,'' Andriessen told a news conference.

Andriessen said the new agreements would not necessarily be signed by April 28, due to formalities, but all negotiations will have been concluded.

He said talks with Romania were going slow because that nation was being led by an interim government ''and is therefore not the easiest partner with which to negotiate.''

Andriessen said there was no reason not to conclude a pact with East Germany, despite upcoming changes stemming from the country's March 18 elections and plans to unify with West Germany.

Association agreements were once seen as an automatic step toward full EC status, but officials now say such agreements with Eastern European countries do not guarantee future membership.

-30- 1995

#90065u1546 03/06/1990 ~United Press International

NEW YORK (MARCH 6) UPI - Eastern Air Lines and its parent, Texas Air Corp., planned Tuesday to announce actions challenging an examiner's report showing Texas Air drained assets from its subsidiary before the carrier filed for bankruptcy.

Eastern and Texas Air scheduled a news conference for 2 p.m. in Manhattan.

The report by court-appointed examiner David Shapiro, submitted Thursday in U.S. Bankruptcy Court in New York, recommended Texas Air pay Eastern more than $280 million, saying several transactions between the two companies appeared to have left Eastern with less than fair market value.

Texas Air initially agreed to the settlement, but later disputed Shapiro's findings and announced it would challenge the report.

Shapiro's report was ''so fundamentally misleading that serious and considered actions will be taken to clear the companies' names,'' Texas Air and Eastern said in a statement after the report was submitted.

Texas Air said it had agreed to the settlement ''solely to continue to provide Eastern with the resources and revenues to complete its rebuilding as a viable airline, 100 percent owned by Texas Air.''

In his report, Shapiro said he found ''a host of transactions where Eastern has apparently suffered from conflicts of interest on the part of Texas Air and the interlocking officers and directors it has put into place.

''Indeed, there are indications that from time to time Texas Air's officers entertained the notion to 'cherry-pick' Eastern's assets for the benefit of Continental,'' its sister carrier, Shapiro said.

Shapiro estimated the value of the 12 transactions in question was between $285 million and $403 million.

All of the transactions took place prior to Eastern's bankruptcy filing March 9, 1989, five days after its unions launched crippling strikes.

Shapiro cautioned that he did not try to determine whether any of the transactions were ''made with actual intent to defraud or disadvantage creditors.''

He said he did not know Eastern or Texas Air would prevail if the transactions were to be battled out in litigation.

The largest transaction in question was the sale of Eastern's SystemOne computer reservation system to Texas Air in 1987 for a $100 million note. Shapiro said estimates showed Texas Air paid $150 million to $250 million less than the system's value.

Eastern also appeared to receive less than full value in its acquisition by Texas Air, management fees paid to the parent company, participation in a joint sales force with Continental and the sale of aircraft and gate leases to Continental, Shapiro said.

The settlement, submitted to U.S. Bankruptcy Court Judge Burton Lifland, must be approved by the bankruptcy court.

-30- 2972

#90065u1549 03/06/1990 ~United Press International

NASHVILLE, TN (MARCH 6) UPI - Alan Jackson is a long tall drink of water. His Georgia drawl is authentic, he's got himself a top 20 country hit and he has an album out.

It doesn't get much better than that.

The lanky singer doesn't fit the mold of a lot of the ''country'' boys who tool into Nashville to become a big star.

Jackson came to town about 4 1/2 years ago and by his own admission he was a little green.

''I grew up in Newnan, Ga. I didn't grow up with no guitar in my hand. I pretty much was a working guy. I did a little music on the weekends and I got married and had a regular job,'' he said.

''But by the time I was 25 I decided to sell everything and go to Nashville to see if I had a shot at it. It was a spur of the moment thing. My wife wasn't surprised. I was always a wheeler dealer. I'm crazy. I'd buy and sell houses all the time. I'd buy a house and sometimes sell it before the grass came up. She's pretty used to my doing things on the spur of the moment,'' Jackson said.

In fact, his wife, a flight attendant, supported Jackson while he was trying to make it in the music business and actually provided him a lead before he came.

''I knew nothing about the music business when I came to Nashville. I mean I didn't know what a producer was. My wife was on a flight with Glen Campbell and she went over and introduced herself and told him we were moving up here to pursue a music career. He gave her a card with his Nashville office. I went in and introduced myself. I said, 'I'm here. What do I need to do.''

Jackson was told to move to Nashville and get himself a ''day job.'' And two weeks later he was working in the mailroom at The Nashville Network.

Jackson stayed there a year then quit, formed his band and worked for Campbell's small music publishing business. He played the bars and finally did a showcase for Arista Records and landed a deal.

The entertainer said he was suprised by a lot of things in the music business.

''I guess what surprised me was that things like in the quest for a record deal and getting started it seems that talent is almost the last thing on the list. It was like almost that perseverance, waiting for the right opportunity at the right time and having the right people to represent you was almost as important as talent. Talent alone won't sustain you if you get a shot,'' he said.

''They assume you have talent. The thing that overwhelmed me is that I would go to these clubs in town and hear these guys singing and I said

most of them are better than half of what you hear on the radio. I said, 'What am I doing down here? these people are 10 times better than I'll ever be.''

''What do you do? I guess you have to be a little hard-headed and hang in there. I got passed on by everybody in town.

Jackson wrote or co-wrote nine of the 10 songs on his album, ''Here In The Real World.

His first release, ''Blue Blooded Woman,'' went into the 40s. But the title cut is already top 20.

On his approach to songwriting, Jackson said:

''I don't try to write like I think others want me to write. I write what I like. I think what I like is what the people back home, my friends, all like. It's traditional country music.

''About five years ago when I was deciding to get into music, we liked Merle Haggard, Charlie Pride and George Jones - all classic traditional country singers. At that time five years ago there weren't any traditional singers. People like Randy Travis hadn't come along.''

Jackson said there are plenty of traditional singers now but the secret to success is the song itself.

''You just hope that the songs will be different and stand out. When I came to town my writing wasn't that good. So I went out to try to find some songs. They won't give you the good songs until you've got a deal. Finally I said I would try to write the stuff myself. That's why I buckled down and concentrated on writing my own stuff for the past three years. Man, getting a top-20 hit was like a wake up, a slap on the face.''

SOFIA, BULGARIA (MARCH 6) UPI - Parliament, turning up the heat in a dispute with Yugoslavia, accused Belgrade Tuesday of trying to whip up anti-Bulgarian sentiment with tales of alleged persecution of ethnic Macedonians.

A declaration adopted by the legislators denied the existence of a Macedonian community in Bulgaria and warned Yugoslavia to stop meddling in its affairs.

Yugoslav Communist Party leader Milan Pancevski shot back by calling on Sofia to recognize ''the existing reality'' and renounce ''19th century

chauvinist theses,'' the official Yugoslav news agency Tanjug said.

The exchanges were the latest salvos in a dispute that began in the closing months of World War II, when Yugoslav leaders proposed the annexation of the Pirin region of southwestern Bulgaria, which they claimed was part of the ''Macedonian nation.''

Ethnic Macedonians are concentrated in the Yugoslav republic of Macedonia, with small communities in Greece and Albania. Bulgaria maintains there are virtually no Macedonians within its borders.

The Yugoslav Parliament reopened the controversy Feb. 14 when it passed a resolution denouncing what it described as a campaign of forced assimilation of ethnic Macedonians in Bulgaria. Six days later, 150,000 demonstrators staged a rally in Skopje, capital of the Macedonian republic calling for an end to ''ethnocide'' by the Sofia government.

In its declaration Tuesday, the Bulgarian Parliament accused Yugoslavia of fabricating stories about persecution of ethnic Macedonians in an attempt to divert attention from nationalist unrest within its own borders.

''The attempts at forming and endorsing an anti-Bulgarian campaign within the socialist republic of Macedonia and the unfounded claims in connection with the non-existent Macedonian community in Bulgaria are doomed to failure,'' the resolution said.

It said Sofia would view further ''anti-Bulgarian propaganda'' by Belgrade as ''interference in Bulgaria's internal affairs and an encroachment upon its national sovereignty.''

Pancevski said he expected better of Bulgaria's new communist leaders, who in January reversed a policy of forced assimiliation of ethnic Turks.

''We expected that the new policy of Bulgaria and its Communist Party, as well as the undoubtedly significant democratic climate, would lead to a change of attitude toward the Macedonian minority in Pirin Macedonia,'' Tanjug quoted Pancevski as saying.

He said denying the existence of ethnic Macedonians was ''contrary to (Bulgaria's) proclaimed democratic policy,'' Tanjug reported.

WASHINGTON (MARCH 6) UPI - Amid warnings that ''the darkest days'' of the AIDS crisis lie ahead, Sens. Edward Kennedy, D-Mass., and Orrin Hatch, R-Utah, proposed legislation Tuesday providing $600 million to help states and hard-hit cities care for victims of the disease.

The sponsors said the bill would provide ''disaster relief'' for 13 city health systems crumbling under the weight of the epidemic as well as prepare smaller towns and rural areas where the rate of increase in AIDS is now the greatest.

The 13 cities, accounting for 60 percent of the nation's AIDS cases, are New York, Los Angeles, San Francisco, Houston, Washington, Newark, N.J., Chicago, Miami, Philadelphia, Atlanta, Dallas, Boston, and San Juan, Puerto Rico.

AIDS activists, including actress Elizabeth Taylor, founding chairwoman of the American Foundation for AIDS Research, praised the legislation, but said even more money would be needed in coming years to care for AIDS victims.

''Sadly, the darkest days of the AIDS crisis still lie ahead of us. Hundreds of thousands of lives hang in the balance unless we begin to confront AIDS as a true national medical emergency,'' Taylor said.

''Isn't it time we stopped fooling ourselves about the threat of AIDS and launch an all-out assault on this heinous monster?'' she said. ''We need money - we need lots of money and we need it now.''

The money from the bill will be divided between the 13 cities and states with large numbers of AIDS cases. The bill originally was to provide $500 million, but the sponsors decided Tuesday to increase that figure to $600 million.

Hatch said among the most important features of the bill is that it encourages programs that care for AIDS victims outside hospitals and allows different regions to develop their own solutions.

''In terms of pain, suffering and costs, AIDS is as severe a disaster as any earthquake, hurricane or drought,'' Kennedy told the news conference.

''America responded within days to the California earthquake. We have pledged tens of billions to rescue the savings and loan industry. AIDS is a comparable disaster and we need to respond accordingly.''

Jean McGuire of the AIDS Action Council, who estimated the costs of caring for AIDS victims would require $3 billion in government funding three years from now, said the proposal fills a ''void'' left by the Bush administration.

Hatch said he believed the administration was taking the AIDS epidemic ''very seriously'' along with other problems such as the budget deficit. But he added, ''If we don't face this problem now, if we don't face this

straight up and squarely, it's going to cost us a lot more money in the future.''

A similar theme was sounded at the news conference by Mayors David Dinkins of New York, Raymond Flynn of Boston and Richard Berkley of Kansas City, Mo.

''New York needs help in dealing with this epidemic. Our hospital system is overburdened by the twin epidemics of AIDS and drug abuse,'' Dinkins said.

''The American people better wake up to the problems in American cities,'' added Flynn. ''There's a war going on.''

Kennedy said another problem will be the growth in AIDS cases outside big cities. He said AIDS cases are rising at a rate of 5 percent in cities with more than 500,000 people, compared with 37 percent in other areas.

For example, metropolitan areas experiencing an increasing of more than 200 percent in AIDS cases last year included Fort Pierce and Naples, Fla., Lake Charles, La., Indianapolis and Gary-Hammond, Ind.

#90065u1578 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The U.S. Postal Service's Board of Governors approved a proposed postal rate increase Tuesday that would raise the price of a first-class stamp from 25 to 30 cents.

The plan still needs final approval from the independent Postal Rate Commission to become the 15th rate change since the 2-cent stamp became compulsory in 1885 and the first since March 1988, when the price of a first-class stamp jumped from 22 to 25 cents.

If approved by the commission, the increase, which includes all classes of mail, would represent an overall increase of 19 percent - the largest in Postal Service history.

The commission has 10 months to reach a decision.

The Postal Service has said it would like the new rate structure to take effect in February 1991.

''If our service is good, consistent and reliable, the American ratepayer will not object to paying $10 to $11 more for postage per year, which is how the new rates will impact the average household,'' said Assistant Postmaster General Deborah Bowker.

Postal officials said rates must be ''periodically adjusted'' because the Postal Service relies primarily on the revenue it generates from the sale of its services.

Stephen Gold, director of the Office of Consumer Advocate of the Postal Rate Commission, said the rate increase reflects the need for more citizen involvement in postal decisions.

''The call for increased consumer input into the postal decision-making process must be renewed,'' Gold said Tuesday. ''The Postal Service must be held accountable to both citizens and Congress.''

Gold said public access to postal decisions can be increased by initiating public hearings prior to closing post offices or making other changes that have a significant public impact, and establishing a Post Office consumer action group.

''It is only through the implementation of such measures that consumers will be given their deserved role in the future of the U.S. Postal Service '' Gold said.

The Postal Service, which was reorganized along the lines of a private corporation in 1980, reported a $404 million surplus for the first quarter of fiscal 1990, but higher operating costs are pushing it toward a loss that is expected to be between $1.4 and $1.6 billion.

Bowker said the proposed rates will include several new amenities for mailers, including discounts for those who apply bar codes to first-class and third class letters.

Volume discounts will be offered for Express Mail, as will new flat rates for 3-, 4- and 5-pound express and priority mail, Bowker said.

There also will be a single 75 cent rate for all money orders, and insurance coverage on COD and insured mail will be raised from $500 to $600, Bowker said.

KHARTOUM, SUDAN (MARCH 6) UPI - Rebels in southern Sudan charged Tuesday that closer ties between Sudan and Libya indicate the military government in Khartoum has no interest in a peaceful solution to the country's civil war.

Meanwhile, a government conference in El Obeid, 230 miles southwest of Khartoum, decided against negotiating with leaders of the Sudanese People''s Liberation Movement operating in Kordofan province.

The predominantly Christian SPLA, based in the south, has fought a secessionist war against the predominantly Moslem north since 1983. All recent peace talks have ended in failure.

Sudan and Libya, after wide-ranging talks on military and economic cooperation, agreed last week as a first step to open their mutual border to free travel without visas.

Clandestine SPLA radio said the talks betweem Libyan officials and Sudan's military ruler Gen. Omar al Bashir were more sinister.

''The deal helps the junta to obtain military assistance to intensify the war in the Sudan ... Al Bashir's government has been adding more fuel to the war, by throwing previous peace agreements into the waste-bin and pledging to fight to the last soldier to crush the SPLA,'' it said.

The accusation went unanswered in Khartoum but news reports said a conference on peace plans in El Obeid had rejected the idea of talks with some rebel leaders.

A proposal to send a delegation to senior SPLA leader Youssuf Kuwa, commander of the rebels in southern Kordofan province, was rejected. The conference decided instead, local press reports said, to call on the SPLA unconditionally to lay down its arms and to make it compulsory for the entire male population of southern Kordofan to join the ''People's Defense Force,'' set up to combat the SPLA.

Al-Bashir's 7-month-old military regime last held talks with the SPLA in December last year, under the supervision of former President Jimmy Carter.

The talks failed, but both sides have continued to say they seek a negotiated settlement.

#90065u1582 03/06/1990 ~United Press International

(MARCH 6) UPI - Afghan government radio reports say the nation's defense minister has been replaced following what appears to have been a failed coup attempt. The broadcast says the rebellious minister acted in league with a Pakistan-based rebel group in trying to oust President Najibullah. The failed takeover came amid Soviet reports of fighting at Kabul airport.

West German Chancellor Helmut Kohl joined leaders of the coalition government in agreeing to respect Poland's government. Conservatives of Kohl's Christian Democratic Union and the Free Democratic Party were split on the border controversy. Coalition leaders decided that both East and West German lawmakers should adopt a declaration stating the inviolability

of Polish borders.

In Washington, a second day of jury selection is under way for John Poindexter's Iran-Contra trial. The process moved relatively quickly yesterday, with most potential jurors recalling much less about the former national security adviser than Oliver North. Poindexter is the highest-ranking Reagan administration official charged in the Iran-Contra scandal.

The U-S Postal Service appears to be on the verge of raising postal rates, including boosting the price of a first-class stamp from 25 cents to 30 cents. But consumer advocate Ralph Nader argues against an increase. He told T-V interviewers that the cost of postage has risen faster than inflation, while postal service has declined. The Postal Service Board of Governors meets today. It is expected to unveil plans for an average 19 percent price hike on all classes of mail.

#90065u1584 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Richard Doerflinger, a top anti-abortion official for the National Conference of Catholic Bishops, said Tuesday the church wants Catholics to question environmental groups that back changes in U.S. family planning policy.

But Doerflinger, associate director of the bishops' Secretariat for Pro-Life Activities, said the church is ''stopping one step short'' of endorsing a bocyott of three environmental groups called by the National Right to Life Committee, the nation's largest grass roots anti-abortion group.

Doerflinger said proposed legislation to overturn the so-called Mexico City policy that denies U.S. population funds to overseas programs that provide abortion services or counseling ''is a really bad bill and we agree with the National Right to Life Committee about this.''

''Such proposals ... do not deserve the support of anyone who wishes to foster respect for all fragile life on our planet, which includes the vulnerable life of the unborn child,'' he said.

But Doerflinger said that while the church wants environmental groups to ''rethink their priorities'' in supporting the legislation and while he is encouraging ''pro-life Americans who contribute to these organizations to make their concerns known,'' he was not endorsing the boycott.

He said a statement issued Monday was not meant to endorse the boycott but was in response to a request to say something ''supportive'' of the NRLC's position.

Last week NRLC called for a boycott of three major environmental groups for being ''downright dishonest in concealing their pro-abortion activities from concerned pro-life members.''

Each of the three groups - the Sierra Club, the National Wildlife Federation and the National Audubon Society - denies it supports abortion but they have called for reversal of the Mexico City policy, arguing it has harmed efforts to promote family planning abroad and bring world population growth under control.

#90065u1590 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - President Bush appointed a senior Treasury Department official Tuesday to temporarily fill the vacancy created by the resignation in December of M. Danny Wall as director of the Office of Thrift Supervision.

Salvatore Martoche, the Treasury's assistant secretary for enforcement, will serve as the top regulator for the nation's savings and loan association until a permanent director is in place, according to a White House statement.

Martoche, a former U.S. attorney from Buffalo, N.Y., is expected to serve several months until a permanent director is named.

While at the Treasury, Martoche has been responsible for the department's Secret Service and customs operations and has headed the department's drug intervention efforts.

''I will seek to provide stability and leadership to the agency during the transition,'' Martoche said.

Wall resigned amid pressure stemming from a House Banking Committee investigation of the failure of Lincoln Savings and Loan Association. The Irvine, Calif., thrift was seized by regulators last April and is expected to be the nation's most expensive thrift failure at $2.5 billion.

Rep. Henry Gonzales, D-Texas, the committee's chairman, said he was encouraged that the Bush administration has finally moved to replace Wall.

Gonzalez, a harsh critic of Wall, has in recent months turned his criticism toward the White House for its slow pace in replacing the resigned chairman, who has continued to head the OTS.

''Leaving a resigned and discredited OTS director in office in a lame-duck status for three months has been extremely poor public policy that has

struck at the agency's morale,'' Gonzalez said.

Martoche appointed Jonathan Fiechter, the deputy director of OTS supervision policy, as the agency's principal director.

(MARCH 6) UPI - Chrysler Corporation and a child's car-seat maker may face criminal charges in the death of a two-year-old boy last month. A coroner's jury in Washington County, Pennsylvania, is recommending criminal charges against the nation's Number Three Carmaker. Noah George died last month after being thrown from a Dodge Caravan driven by his mother. Officials say the boy was in an Explorer child restraint seat, attached to the back seat of the van by a seatbelt when the vehicle spun out of control on an icy highway.

A family searching for cans in the Apalachicola National Forest near Tallahassee, Florida, found more than tin during a Sunday outing. The family spied a windshield at about ground level and began digging... finding a brand new Nissan 300 Z-X with the keys still in the ignition. Officials say the stolen car is in fine shape and will be returned to a Kentucky dealership.

#90065u1612 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Negotiators may be able to speedily complete work on a new long-term grain agreement between the United States and the Soviet Union, a top U.S. trade official said Tuesday.

The superpowers opened negotiations on the pact last December in Moscow. The second round of talks is scheduled for the week of March 19 in Vienna.

''We were pretty close then (December). I think we could wrap it up pretty quickly if the Soviets are willing,'' deputy trade ambassador Julius Katz told reporters.

The current agreement, which expires at the end of this year, obligates the Soviet Union to buy 9 million metric tons of U.S. grain each year, including 4 million tons apiece of corn and wheat.

U.S. officials want the new pact to commit the Soviets to a higher level of purchases and to cover more commodities. Soviet officials have sought more flexibility.

The superpowers have relied on grain pacts to regulate the grain trade since the 1970s, when huge Soviet purchases caught the United States

offguard and emptied U.S. granaries.

The Kremlin bought a record 21.7 million tons of U.S. corn and wheat last year, making it the No. 1 customer for U.S. grain.

#90065u1613 03/06/1990 ~United Press International

PHOENIX (MARCH 6) UPI - John P. Zanotti, president and publisher of the Cincinnati Enquirer, has been named publisher, chief executive and executive vice president of Phoenix Newspapers Inc., it was announced Tuesday.

At 41, Zanotti will be the youngest publisher of Arizona's two largest newspapers, The Arizona Republic and The Phoenix Gazette.

Phoenix Newspapers Inc. also publishes the Arizona Business Gazette.

Zanotti replaces Pat Murphy, who resigned Aug. 8. Murphy headed only the editorial side of the company, which was split from the business side after the resignation of Darrow Tully in 1986.

''We are restoring what we had before - one publisher, one decision maker '' said Bill Shover, director of public affairs for Phoenix Newspapers, noting that Zanotti also was named to the business positions.

Frank Russell, president of Central Newspapers Inc., the parent of Phoenix Newspapers, said Zanotti was chosen after a nationwide search.

''John Zanotti is a person with a proven track record as a publisher of a major metropolitan newspaper and he is uniquely qualified to lead these newspapers in the 1990s,'' Russell said.

Zanotti said, ''What interested me about the job is the reputation of the newspapers and the kind of dynamic market that Phoenix is - now and in the future. It means the opportunity to work for a first-class newspaper company.''

Zanotti, a native of Southern California, earned his bachelor's degree from the University of Southern California and a law degree from Arizona State University.

After graduation from ASU, he worked for four years with the Los Angeles law firm of O'Melveny and Myers, then joined Harte-Hanks Communications Inc. as general counsel.

He joined the Gannett Co. Inc. in 1984 and became president and publisher of the Cincinnati Enquirer a year later.

#90065u1614 03/06/1990 ~United Press International

LONDON (MARCH 6) UPI - Six police officers were injured in a clash with demonstrators opposed to a new tax system, and an 89-year-old man went to Buckingham Palace to return a war honor in a protest against the levies, authorities said Tuesday.

In another blow to Prime Minister Margaret Thatcher, who is lagging 19 points behind the Labor Party in opinion surveys, a survey showed most Britons will pay nearly a third more under the new levies.

The so-called poll tax replaces property rates, which Thatcher deemed unfair because she said only landlords paid the costs of the community. Local councils will now set a flat amount that must be paid by every Briton. Critics say large families cannot afford the new tax system and that owners of vast estates will pay only a nominal amount.

Opposition has been fierce especially in Scotland and Northern Ireland, where the tax had already been imposed. Protests have been spreading throughout England and Wales as authorities prepare to implement the scheme in April.

Police said about 350 demonstrators gathered outside the chambers of the eastern London council of Haringey late Monday, carrying banners and shouting slogans against officials who have levied the nation's highest poll tax of 570 pounds, or about $970.

They said some 150 activists staged a sit-down strike on the main street and blocked traffic.

Police reported a group then tried to force its way into the council building, sparking scuffles that left six officers injured and 13 people arrested.

Elsewhere, police said they arrested five people in the southern Somerset town of Shepton Mallet, where about 50 protesters hurled stones and damaged property.

In a more poignant anti-tax protest, Richard McMillan, 89, went to Buckingham Palace and handed back his Order of the British Empire honor awarded for his work as a correspondent during World War II.

''This is the hardest decision I've made in my life,'' said the former reporter for British United Press. ''I am a royalist and I have done my best for king and country, but my only means of protest is to return this honor.''

MaMillan, who was wounded twice in the war, said he and his wife would have to pay about 900 pounds, about $1,530, in new taxes, even though they did not get garbage collection or drainage facilities at their cottage in central Berkshire.

''I have written to the queen to tell her how much I regret this and that there is no personal feelings against her,'' McMillan said.

The British Broadcasting Corp. reported a survey it conducted showed the average household would now pay 674 pounds, or about $1,145, a more than 30 percent increase over the 507 pound average paid in rates.

-30- 2943

#90065u1638 03/06/1990 ~United Press International

JERUSALEM (MARCH 6) UPI - Labor Party leaders, who have threatened to leave the government if the peace process reaches a dead end, Tuesday demanded the Inner Cabinet approve a U.S. compromise on opening talks with Palestinians.

Cabinet ministers from the Labor Party meeting in Tel Aviv said there was no reason to postpone a decision when the 12-member Inner Cabinet meets Wednesday.

''I see an immediate need for the Inner Cabinet to meet and reach a decision,'' said the senior Labor leader, Defense Minister Yitzhak Rabin. ''Then we will see who wants peace and who doesn't in the state of Israel.''

Labor's demand once again placed the burden of decision on Prime Minister Yitzhak Shamir's rightist Likud Party, which has been deeply divided by the peace process and internal political rivalries.

The Labor meeting in Tel Aviv unanimously approved the call for a Cabinet decision and rejected Likud demands to provide additional assurances before the peace process could advance.

''Our position is not to enter into inter-party arrangements. There is no need,'' Labor Party chairman Shimon Peres said. ''There is our bottom line and that is all. What do we have to wait for?''

Shamir said the proposal put forward by Secretary of State James Baker would be discussed at the Inner Cabinet meeting, Army Radio reported.

Under heavy pressure from the United States and Labor, Likud ministers early Tuesday gave qualified approval for talks with a Palestinian delegation and asked Labor for assurances that the Palestine Liberation

Organization and East Jerusalem Arabs would be excluded from the peace process.

Peres charged the Likud had sidestepped the main issue in the Baker proposal: The formation of an acceptable Palestinian delegation.

Baker proposed that Palestinian deportees and West Bank Arabs with an office or second residence in East Jerusalem could participate and that delegates be chosen by name rather than category.

''When we are going to meet with a Palestinian delegation, I see no need to do this under an ultimatum,'' said Foreign Minister Moshe Arens, No. 2 Likud leader. ''We need to sit and to give it the time it needs in order to ensure that we arrive at an agreement and that the agreement is a good one.''

At the heart of the disagreement between the two major Israeli political parties is what role East Jerusalem Arabs should play in the peace process.

The Labor ministers at their meeting Tuesday reaffirmed that Israel would not talk to the PLO and that the status of Jerusalem would not be negotiated. The Labor Party accepts the participation of East Jerusalem Arabs.

On the other hand, Likud ministers do not want East Jerusalem Arabs to participate in the peace process because they fear their presence will start a discussion on Israeli sovereignty over the city, which was divided between Jordan and Israel from 1948 to 1967.

Remarks in recent days by President Bush and the State Department spokesman that East Jerusalem is considered occupied territory have unleashed a storm of criticism against the United States and inflamed the discussion of the peace process.

The United States has said it was waiting for an answer from Israel for the peace process to proceed.

Upon Israeli approval, the next step in the peace process would be a three-way meeting of Israeli and Egyptian foreign ministers with Baker to discuss the start of an Israeli-Palestinian dialogue.

If the Palestinians agree to participate, the talks would focus on elections in the West Bank and Gaza Strip to select representatives to negotiations on limited autonomy for the territories.

A Kuwaiti newspaper, meanwhile, reported that Israel and the United States had asked the PLO to make concessions before U.S.-sponsored dialogue could begin.

Quoting well-informed Arab sources in Paris and Washington, the daily al Qabas front-paged a report claiming the list was made of 13 major concessions, which included a call on the PLO to drop from its delegates to the proposed talks any member opposed by Israel.

Israel, Egypt and the United States wanted to retain the sole right to amend the formation of the Palestinian delegation, the newspaper said.

Al Qabas said the concessions were in sharp contrast with the PLO's principles and would probably be rejected by the organization.

#90065u1656 03/06/1990 ~United Press International

(MARCH 6) UPI - TODAY'S PEOPLE:

CLEESE GETS AN ELMER: John Cleese, star of ''A Fish Called Wanda,'' was presented an award called Elmer by the Harvard Lampoon. The Sunday night ceremonies were limited to the Harvard community at Cleese's request but they were quite festive. The former Monty Python member was given the 5-foot-high trophy at the school's Sanders Theater and then paraded to Lampoon Castle, the humor magazine's offices, aboard a 25-foot-long inflatable banana as he threw autographed rubber chickens to the crowd. The award for achievement in humor was named in honor of Elmer Green, the Lampoon caretaker for 40 years who once said he wanted to be dipped in bronze when he died. He passed away in 1977 without bronzing. Past recipients of the Elmer include Jay Leno, Robin Williams, Bill Cosby, John Candy and Pee-wee Herman.

MADELINE'S HEADACHE: What started out as a minor fender-bender for the daughter of Gov. Mario Cuomo has blossomed into a big headache. It began last week when Madeline Cuomo, 25, was involved in a car wreck in Albany and a police officer failed to ticket her for driving with an expired license. Now the driver of the other car, Karen Bellamy, 28, says she is facing an undeserved increase in her insurance rates because the police report says she backed into Cuomo's car. Bellamy contends that Cuomo actually rear-ended her. ''I don't want this to be a smear campaign,'' Bellamy said. ''But I want everything cleared up.'' Bellamy also questioned Cuomo's attitude. She says the governor's daughter told her to hurry as they traded insurance information ''because I don't have time for this.'' ''So I screamed at her, 'What do you mean you don't have time for this? You just hit me,''' Bellamy said.

CUSTODY BATTLE ROYALE: All the principals in the Morgan-Foretich custody battle are in New Zealand now. Dr. Elizabeth Morgan, who spent two years in jail to keep her daughter, Hilary, away from her ex-husband, arrived in Auckland Tuesday and managed to dodge the horde of reporters covering the

story. Hilary's father, Dr. Eric Foretich, arrived in New Zealand last week but both parents have agreed to stay away from the girl until the matter can get to court. Morgan claims Foretich, 47, an oral surgeon from Falls Church, Va., sexually abused Hilary and the girl had been living on the run with Morgan's parents until she was discovered last month in Christchurch.

CLASSICAL GLASNOST: Soviet Ambassador Yuri Dubinin was pleased to announce a ''new development in American-Soviet relations'' Monday night with music by Gershwin and Prokofiev. The Soviet Embassy was host to a recital by this year's American-Soviet Youth Orchestra, which begins its 1990 world tour July 21 in Moscow. ''This is another event in our cultural sphere,'' Dubinin told guests, including Bruce Gelb, director of the U.S. Information Agency, former ambassador Arthur Hartman and Sens. Richard Lugar, R-Ind., and Nancy Kassebaum, R-Kan. ''We believe the cooperation of our governments will create a new plank of cultural excitement. Music knows no borders.'' The 100-member orchestra is directed this year by Leonard Slatkin, director of the St. Louis Symphony, and Alexander Lazarev of the Moscow Conservatory. First lady Barbara Bush and Raisa Gorbachev, wife of Soviet leader Mikhail Gorbachev, are this year's honorary chairwomen of the orchestra.

WASHINGTON (MARCH 6) UPI - Chairman Claiborne Pell, D-R.I., of the Senate Foreign Relations Committee said Tuesday West Germany has provided ''necessary assurances'' in support of the Polish border, and he dropped a resolution linking the question to U.S. recognition of a united Germany.

Pell had a resolution before the committee that would have tied U.S. acceptance of a treaty or other agreements in recognition of a united Germany with its assurances that the border with Poland is ''legal, permanent, and unalterable.''

Chancellor Helmut Kohl of West Germany, Pell said, had failed ''to state unambiguously'' that a united Germany would recognize the permanence of the Polish border, an issue that formally started the allied war against Nazi Germany.

But Kohl's government issued a statement Tuesday saying both the East and the West German parliaments should adopt a declaration stating the inviolability of Polish borders.

''I believe international pressure, including the pressure generated by prospective action on my resolution, contributed to Chancellor Kohl's decision to provide the necessary assurances on the Polish-German border '' Pell said.

Pell dropped action on the resolution, which would have expressed the sentiment of the Senate but would not have had the effect of law.

WASHINGTON (MARCH 6) UPI - Deputy Defense Secretary Donald Atwood challenged congressional auditors Tuesday for claiming there is an unnecessary $34 billion surplus in parts and material, saying buying reforms will change the mind-set at the Pentagon.

Atwood, the No. 2 man at the Pentagon, said that just $9 billion of the Pentagon's $103 billion inventory of parts, uniforms, weapons and the like is excess, not the $34 billion figure cited by the General Accounting Office.

And he argued that a variety of administrative changes now being put into place, including a better accounting system, should help streamline the Pentagon's management and save money.

Sen. William Roth, R-Del., a member of the Senate Governmental Affairs Committee that quizzed the GAO, Atwood and others about excess inventories noted that there is a high turnover in senior positions at the Pentagon and there have been dozens of studies and ''nothing ever happens.''

''We have these hearings every two years and lambast you,'' Roth said.

''We've broken some serious barriers down, almost like the Berlin wall,'' Atwood said. ''If the Warsaw Pact can achieve democracy, if they can knock down the Berlin Wall ... I don't see why we can't (change) at the Defense Department too.''

Atwood conceded that in the past the ''culture'' of the Pentagon rewarded supply personnel who made sure no item was ever out of stock. In addition to ensuring that combat units always could get what they need, Atwood said the surpluses grew out of fears by supply personnel of being reprimanded if items were not on the shelves when requisitions arrived.

He noted that changes ordered by a Defense Management Review have ''made a lot of progress'' in the past six months and some are aimed at the problems of oversupply.

John Betti, undersecretary of defense for acquisition, told committee Chairman John Glenn, D-Ohio, there was nothing new or revolutionary within the proposals of the management review, but that there is a ''cultural change'' within the department.

''I think it's here. If we can get this thing moving forward enough, it'll go of its own weight,'' he said.

Atwood also defended the Air Force from a GAO audit critical of its bookkeeping, and Pentagon Comptroller Sean O'Keefe told the panel the Pentagon is trying to get a single accounting system organized for all services.

While the GAO said at least $34 million of the goods held in Pentagon warehouses are excess, Atwood said $9 billion is classified as potential excess.

Glenn noted once case in which military personnel, rather than being told they had overbought on an item by $600 million, changed the written requirement for stocks of the item. Glenn described that practice as ''flat dishonesty (that) should be dealt with very harshly.''

''We cannot tolerate that,'' said Atwood, adding, ''It's not forgivable at all for anyone to change the requirement to make up for the fact they may have overbought.''

#90065u1745 03/06/1990 ~United Press International

MONTEVIDEO, URUGUAY (MARCH 6) UPI - President Luis Alberto Lacalle sent a tough economic plan to parliament Tuesday, calling for increased taxes and sharp hikes in prices for gas and public utilities.

The proposals came five days after Lacalle took office and were aimed at reducing a soaring deficit, cutting inflation and "improving the general situation of the country," Economic Minister Enrique Braga said. Braga said in a speech Monday night that the plan, described as "fiscal shock" by political analysts, will stave off hyperinflation.

The economic plan sent to the senate included a one percent hike in sales taxes to 22 percent, and an increase of 3.5 percent in social security payments for workers and businessmen. Other measures included a 100 percent hike in property taxes, new taxes on unproductive land and a government duty on real estate transactions.

Land buyers will be required to pay a one percent tax on the total value of the purchase while sellers will be forced to dole out three percent of the total sale. The plan also called for raising gasoline prices from $2.82 a gallon to $3.04 a gallon as of Tuesday. "These initiatives were neccesary," Braga said, warning that the economic situation in the country "is serious."

The fledgling Lacalle government inherited an economy in crisis, with inflation over 89 percent in 1989, a deficit that consumed eight percent of the gross domestic product of $7.9 billion and an "overburdened and inefficient" state bureaucracy, a government spokesman said.

Though it met wide criticism, the economic program is likely to be ratified in Parliament after Lacalle created a coalition government with the Colorado Party, the chief opposition group, by incorporating four Colorados in his cabinet, legislative sources said.

Rural businessmen, who had been one of the pillars of Lacalle's electoral victory in November, greeted the plan with strong criticism. Political opposition leaders also blasted the proposal. "We didn't expect this,"

said Humberto Da Fonseca, presidente of the Rural Federation, and added that farmers felt "cheated by the new government."

A representive of the center-right Colorado Party, Daniel Garcia Pintos, said he thought the measures meant "a merciless adjusment for the sectors with the least recources." The communist tabloid La Hora called the program "savage."

#90065u1767 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - New York Mayor David Dinkins threatened Tuesday to sue the Commerce Department, saying if the government undercounts urban residents, it is as bad as counting slaves as three-fifths of a person.

Dinkins and the mayors of other big cities fear that if minorities, homeless people, illegal aliens, people doubled up illegally in public housing and others are not counted in the 1990 census, then cities will lose their fair share of federal aid and congressional representation.

In July, the Commerce Department agreed to settle a lawsuit brought by New York City, Los Angeles, Chicago, Houston, Dade County, Fla., and groups representing cities, mayors and minorities.

The suit charged that every census since 1940 has undercounted minorities. In a settlement, the Commerce Department agreed to consider new methods to correct miscounts.

Dinkins and the mayors of Houston and Kansas City, Mo., complained at a news conference about the Commerce Department's proposed guidelines to determine whether to adjust 1990 census figures for any undercount. The final guidelines are to be issued on March 10. The census count begins April 1.

''By issuing these draft guidelines, the Commerce Department has sent a signal to the Census Bureau that it wants a political census, not an honest one,'' Dinkins said, adding that the guidelines indicate a decision not to adjust. ''And if you refuse (to change the guidelines), we're going to go back to court to order new guidelines that are not stacked against the cities.''

Dinkins said one of the proposed guidelines states that no adjustment will be made if a 1990 undercount is no worse than in 1980. The 1980 undercount Dinkins said, missed about 450,000 New Yorkers, costing the nation's most populous city at least $500 million in federal funds.

''This, to me, is as bad as the early days of our country when the census said we will count African-Americans - slaves - as three-fifths of a

person. There's not much difference,'' Dinkins said.

The Census Bureau did not have an immediate comment.

Kansas City Mayor Richard Berkeley said it is crucial for people not to fear the census. He emphasized that the information will remain confidential. He said recent Immigration and Naturalization Service activities to catch illegal aliens in schoolyards and churches ''could have a chilling effect'' on the 1990 count.

Rep. Thomas Sawyer, D-Ohio, who is chairman of a House subcommittee on the census, said he has received assurances from the INS commissioner that the agency will not conduct raids during the census count.

#90065u1770 03/06/1990 ~United Press International

BRUSSELS, BELGIUM (MARCH 6) UPI - Cars made in the United States or Eastern Europe by "transplant" Japanese factories will not be considered in upcoming trade talks between the European Community and Japan, a top EC official said Tuesday.

Vehicles manufactured by Japanese companies in the 12-nation EC, however, will be part of the talks on "voluntary" controls that would cover Japanese car exports into the Community after 1992, said Frans Andriessen, the EC's external affairs commissioner.

"The question is rather simple," he told a news conference. "We don't expect a substantial increase in (cars from) transplants from third countries to the European Community."

Andriessen said he did not expect large numbers of American-made Japanese cars to be marketed in the EC, despite Honda Motor Co.'s recent decision to sell U.S.-built Accord station wagons in Europe.

Moreover, cars built at Japanese plants planned for the non-EC nations of Eastern Europe would be sold predominantly in those countries to meet "substantial" pent-up demand, he said.

Andriessen will be in Japan March 23 and 24 to begin "exploratory talks" on limiting Japanese car exports into the EC for a transitional period after the Community's "internal market" takes effect at the end of 1992.

He said transplant cars made in the EC, principally Great Britain, would be "taken into account" by the Community, but he declined to specify whether every Japanese car made in the Community would be classified as a Japanese "export." "There are many kinds of calculations," he said. "This is a possible one but not necessarily mine."

Japanese transplants proved a divisive issue Monday in a meeting of EC foreign ministers, especially between the French and British representatives. The French, joined by Italy and Spain, seek protection against Japanese imports for the EC car industry long after 1992. Britain, where Japan's Nissan Motor Co. builds its Bluebird line, is lined up with West Germany and Denmark in urging a quick end to import restrictions.

Edith Cresson, France's minister for European affairs, charged the Japanese sought to "conquer market share and then kill" Europe's car industry. She also accused the British of being "more Japanese than the Japanese."

But Andriessen sought to downplay the rift, describing such statements as sloganeering in the "home stretch" before formal negotiations with Japan start. He denied there had been a "retrenching" of positions and said he soon expected "further consensus." The EC Commission vice president, who is responsible for all trade treaties, said he sought "rapid action" toward negotiations with the Japanese.

#90065u1775 03/06/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MARCH 6) UPI - South Africa's defense minister approved plans in 1985 to establish covert operations against the African National Congress abroad, but a subsequent secret unit linked to death squads received no permission to act within the country, an inquiry into political assassinations heard Tuesday.

Testimony before the Harms Commission also revealed a chain of approval for projects by the secret Civil Co-operation Bureau within the South African Defense Force. Under the chain of command, any proposed operations with political or strategic implications would be sent to the defense minister for final approval, said Maj. Gen. Jan Klopper, chief of staff operations.

Police investigators have linked the CCB to the slayings of two prominent white human rights lawyers last year in South Africa and Namibia. Before the one-man inquiry began its hearings Monday, reports of high-level military complicity in the CCB sparked calls for the resignation of Defense Minister Magnus Malan.

Malan said late Monday he had not been aware of the CCB until late November and informed President Frederik de Klerk of its existence and allegations against the unit in January. But last week, Malan told Parliament the CCB was formed in 1987 as an ''integral part'' of South Africa's special forces for intelligence gathering and infiltration ''in the interests of the country.''

De Klerk ordered Justice Louis Harms in January to investigate a series of unsolved alleged political slayings. The hearings, expected to take months began Monday in Pretoria. For its first two days, the commission and a squad of legal teams representing interested parties have concentrated on the CCB.

The commission will change course Wednesday and hear evidence from African National Congress member Almond Nofomela, whose initial allegations concerning hit squad operations led to his stay of execution for an unrelated murder. Nofomela has alleged that police used former police members to eliminate anti-apartheid activists.

During testimony Tuesday, Maj. Gen. Joep Joubert, deputy chief of staff for military intelligence, told the commission Malan and the minister of justice approved in 1985 a plan to establish a covert organization to disrupt the ANC in foreign countries. The decision followed orders by a former defense minister to act against the ANC and its military wing.

The covert organization developing out of the orders led to special forces that eventually took on the name Civil Co-operation Bureau by 1986, Joubert said.

An investigation indicated that the scope of CCB's operations were to be limited to foreign offensives and the unit could not receive permission for internal operations, Klopper told the commission.

During the first session Monday, Harms heard testimony that an internal military investigation found CCB involvement in a series of incidents in South Africa, including two bombings and a plan to harass Anglican Archbishop Desmond Tutu by planting a baboon fetus outside his home.

In Cape Town Tuesday, Tutu urged de Klerk to fire Malan and disband the CCB immediately, saying, ''Every time Magnus Malan opens his mouth he just gets himself deeper into the mire.''

''Now we know that when you see soldiers wandering around in the bush, they are not looking for terrorists,'' said the Nobel Peace Prize winner. ''They are looking for pregnant baboons.''

Klopper told the commission the aim of the CCB was to collect information ''with regard to enemies of the state as well as to perform certain activities against such enemies in foreign countries where security forces did not have access.

Quoting a deputy chief of staff for military intelligence, Klopper told Harms, ''The ANC, the SACP (South African Communist Party) and the PAC (Pan-Africanist Congress) had to be disrupted continually with external offensives.''

In a related development, police confirmed Tuesday that a second man was arrested last week in connection with investigations into the CCB and was being held under the Internal Security Act's Section 29 that allows for indefinite detention for interrogation.

On Monday, authorities confirmed the arrest of CCB chief Joe Verster, who has been held since Friday also under Section 29.

#90065u1801 03/06/1990 ~United Press International

BONN, WEST GERMANY (MARCH 6) UPI - Chancellor Helmut Kohl, under fire from his coalition partners, backed down Tuesday from controversial statements linking recognition of the Polish border with Poland's renunciation of reparations from World War II.

Senior members of the ruling coalition, including Kohl and Foreign Minister Hans-Dietrich Genscher, issued a joint statement after several hours of closed-door negotiations, saying both the East and the West German Parliaments should adopt a declaration stating the inviolability of Polish borders.

''Mistakes were made by all involved, including myself,'' Kohl told reporters after the meeting.

Last week, Kohl sought to link the border issue to Poland's renunciation of claims for war reparations and a guarantee of rights of ethnic Germans in Poland, and has been widely criticized for the controversial position.

The coalition partners said in a draft wording for the statement that, ''The Polish people must know that their right to live in secure borders will not be questioned through territorial claims by us Germans now or in the future.''

The move means West Germany would officially relinquish any claim to its former territories east of the Oder and Neisse rivers, which were ceded to Poland after Germany lost the war in 1945.

The statement said that after German unity, the new German government would have to sign a treaty with Poland stating its confirmation of the borders.

In what officials said was an unrelated paragraph, the statement said they assumed Poland would respect a 1953 agreement signed in Moscow in which Poland renounced any further war reparations from Germany.

The coalition partners said they assumed Poland would also respect

promises to respect the rights of ethnic Germans living in Poland.

Kohl's earlier remarks had drawn sharp international criticism and a triggered a row between Kohl, chairman of the Christian Democratic Union, and and Genscher's Free Democratic Party, the junior partners in the Christian Democrat-led coalition government.

In Washington, Claiborne Pell, D-R.I., chairman of the Senate Foreign Relations Committee, said West Germany has provided ''necessary assurances'' in support of the Polish border, and he dropped a resolution linking the question to U.S. recognition of a united Germany.

Pell had a resolution before the committee that would have tied U.S. acceptance of a treaty or other agreements in recognition of a united Germany with its assurances that the border with Poland is ''legal, permanent, and unalterable.''

The condemnation of Kohl's remarks by his coalition partners led to speculation of a major crisis within the coalition, but the row appears to have been settled with the adoption of the joint statement.

Observers believe Kohl, who faces tough national elections at the end of the year, will still have to face right-wingers in his party, who recently challenged him to regain territories which Germany lost after the war.

Earlier in the week, Christian Democrat politician Herbert Czaja questioned the right of the German parliaments to make formal statements on the Polish border.

''We would rather forego (the government) coalition than a part of the German homeland,'' said Czaja, who heads the Expelee's League, an organization that claims to represent the interests of millions of Germans who were expelled from territories transferred to Poland, Czechoslovakia and Hungary after World War II.

Without the League's 30 deputies in Parliament, Kohl's coalition would not have an absolute majority.

#90065u1810 03/06/1990 ~United Press International
BY JOHN OTIS - UPI

MANAGUA, NICARAGUA (MARCH 6) UPI - Despite the Bush administration's delight with the Sandinistas' election loss, doubt has surfaced among official election observers about whether Washington will provide enough aid to President-elect Violeta Chamorro to rescue the country's crippled economy.

And while the U.S. hand in Nicaraguan affairs would grow gradually, they say American influence will be limited because the national mood is more independent following 10 years of the Sandinista revolutionary government.

''Nicaraguans don't want to be a puppet or a client state of anyone,'' said Jennifer McCoy, who works with former U.S. President Jimmy Carter's election observer group.

Chamorro, a staunch U.S. ally, pledged during her campaign to ease Nicaragua's tense relationship with the U.S. government and to secure American aid.

Chamorro outpolled President Daniel Ortega by a 55 to 41 percent margin in the Feb. 25 election and is to be sworn in for a six-year term April 25.

But with the Sandinista defeat, many U.S. politicans may decide that the ''crisis'' in Nicaragua has passed and will turn their attention elsewhere said Donald Reasoner of Hemisphere Initiatives, a Boston-based organization that observed the election.

''The U.S. will pump some money in, but I don't think it will be enough to help the country stay afloat,'' he said.

Reasoner said there is political value in supporting Chamorro but that the United States has little interest in Nicaragua's agricultural-based economy and its foreign aid is limited due to commitments elsewhere, including Panama and the emerging democracies in Eastern Europe.

During the Sandinista reign, U.S. aid dried up. The Reagan administration imposed an economic embargo on Nicaragua in 1985 and pressured international lending agencies to deny loans and credits to Nicaragua.

The economy, based on coffee, cotton and sugar exports, contracted. Hyper-inflation, topping 33,000 percent annually in 1988, and 33 percent unemployment have plagued the country. The foreign debt soared to $6.7 billion, the highest in Central America.

A diplomatic source said that in addition to the U.S. aid package, officials from the U.S. Agency for International Development planned to come to Nicaragua soon. He said that Nicaragua also is turning to Japan, Western Europe and the Soviet Union for foreign aid.

Fancisco Mayorga, Chamorro's top economic advisor, recently went to Washington seeking $300 million in emergency aid and between $500 million and $600 million annually for the next several years.

U.S. aid to Nicaragua this year will probably be less than the $1 billion

package approved for Panama following the U.S. invasion, Reasoner said.

But he said Nicaragua has a greater need for help because Panama's service economy, which includes the Panama Canal and an extensive international banking community, is much healthier.

McCoy, the member of Carter's team, said that despite the stunning defeat of the Sandinistas, American influence in Nicaragua will be limited.

The Sandinistas were highly critical of the close U.S. ties to former dictator Anastasio Somoza - relations which finally soured under the Carter administration - and have maintained their strong nationalism throughout a decade.

Somoza was toppled during the 1979 revolution that bought the Sandinistas to power.

''The overthrow of Somoza was also an attempt to assert more independence '' McCoy said.

''Under Somoza, the United States could do what it wanted,'' said Zacarias Hernandez, a leading member of the National Opposition Union, which backed Chamorro in the election. ''We cannot have that relationship today.''

-30- 3965

#90065u1819 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Senate Finance Committee Democrats challenged President Bush on Tuesday to present Congress with new revenue options since a study found that his proposals would raise $4.5 billion less than he said.

During a committee hearing, Chairman Lloyd Bentsen, D-Texas, of the Finance Committee urged Kenneth Gideon, the assistant Treasury secretary for tax policy, to ''take a stand ... on what we ought to do'' to raise the $13.9 billion Bush proposed in his fiscal 1991 budget, released Jan. 29.

The Congressional Budget Office, in a report released Monday, said Bush's fiscal 1991 revenue proposals would raise only $9.4 billion, meaning Congress would have to find another $4.5 billion to meet the shortfall.

That report prompted Finance Committee Democrats to push the administration to offer new revenue sources, either by raising taxes or by finding money elsewhere without breaking Bush's ''no new taxes'' campaign pledge.

''Is the administration prepared to give us other options ... or are you

perhaps ready to accept a small revenue component (increase)?'' Bentsen asked Gideon.

''At this point in time, I'm here to defend our budget proposals,'' Gideon said, offering no revenue alternatives.

He said the CBO did not count in its revenue calculations any of the $2.5 billion the Bush administration said it would raise from Internal Revenue Service management reforms.

Bentsen and Sen. Daniel Moynihan, D-N.Y., both questioned whether Bush's revenue proposals were serious.

''The whole (revenue) package here is to avoid (tough) decisions,'' Moynihan told Gideon. ''You don't want to deal with the deficit. It serves the (political) purposes of the people downtown'' at the White House.

Bentsen also said he was ''confused'' by Bush's no new taxes pledge since the president has proposed raising the airline passenger excise tax to 10 percent from 8 percent and increasing airline fuel taxes.

Gideon said the increases were ''user fees,'' not tax increases violating Bush's pledge.

Bentsen asked Gideon whether a gasoline tax increase also would be a user fee under Bush's definition, but Gideon said it would be a tax increase Bush would oppose.

''That's a tax but if you do it on airlines or passengers, that's a user fee,'' Bentsen said. ''That's interesting.''

Gideon also said that an administration study calculated that Bush's proposed capital gains tax cut would increase the tax burden on the wealthy, not reduce it, as Democratic opponents and most other studies have claimed.

''Taxpayers with incomes of $200,000 or more will pay almost $1 billion in additional capital gains taxes,'' Gideon said.

He said the study of the capital gains cut plan by the Treasury Department's Office of Tax Analysis found it would raise $12.5 billion over five years.

But a separate study by Congress's Joint Committee on Taxation found that the capital gains tax cut on profits from the sale of assets such as stock and real estate would lose $11.4 billion over the same period.

''Like others, I am both concerned and surprised by the $23.9 billion gap

between the OTA and JCT estimates,'' Gideon said.

#90065u1831 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The U.S. securities industry reamins sound despite the legions of unemployed stock brokers and weakened investment banks on Wall Street these days, a panel of financial executives said Tuesday.

"Despite the turmoil, despite the tough times, I am convinced that our industry is basically sound and that we'll weather the present storm to see better days," Philip Purcell, chairman of Dean Witter Financial Services Group told the Senate Banking subcommittee on securities.

"We are currently at a low point in what has always been a cyclical business," agreed Robert Downey, a partner of Goldman, Sachs & Co. and chairman of the Securities Industry Association. "The securities industry has long been known as an industry of risk-takers, but that term is more apt today than ever," Downey said.

The subcommittee called the hearing to examine the condition of the securites industry, which has been rocked by last month's collapse of market crash of October, 1987, the securities industry has battled to regain investor confidence. The collapse of Drexel and the retrenchment and consolidation of several Wall Street brokerages have further tarnished the industry.

John Gutfreund, chairman of Salomon Inc., said the profitability of the securities industry has declined by 15 percent last year from its 1988 level, which was half the level of profitability of 1986.

Return on equity has tumbled and activity has slowed in the most profitable buinesses of securities firms - retail brokerage and merger and acquisition. "One goal of my testimony today is to ring an alarm bell about the state of the U.S. financial services industry," he said.

But Gutfreund and others testifying before the panel stressed the cyclical nature of the securities industry and called for industry reform to increase competition while insuring stability and reducing risk to taxpayers.

"I do think the markets have served the public well and I don't cry for the people in the industry," Gutfreund said. "They have had some awfully sunny days."

Downey said the SIA is developing a proposal to create a new nonfederally insured entity, an investment banking financing company that could be

created by both banking and securities companies.

This type of company could be involved in wholesale credit and depository activities and also could interact with affiliates engaged in the securities industry.

The Glass-Steagall Act currently prohibits commercial banks from engaging in the securities business. The banking industry, citing the need to remain competitive with foreign banks, has long sought to have the law changed. "This set of requirements builds in too much inefficiency," Gutfreund said.

Purcell, of Dean Witter, said the key to ensuring the soundness of the securities market is maintaining the confidence of investors. To do that, he proposed giving the Securities and Exchange Commission regulatory authority over all equity-related derivative products, such as stock index futures. He also called for a move to prevent large tax-exempt investors such as pension funds, from using their tax-exempt status for "excessive" short-term profits.

#90065u1843 03/06/1990 ~United Press International

DAYTON, OH (MARCH 6) UPI - A key witness to the racial killing of a black teenager in Brooklyn who surfaced in Ohio after more than two months in hiding was awaiting extradition to New York, authorities said Tuesday.

John Vento, 21, surrendered Monday evening to the FBI in Dayton, hours after his disappearance forced a Brooklyn judge to delay the trial of four of the seven young white men accused in the slaying, officials said.

Gerald DiChiara, Vento's attorney, said the young man, who was being held on federal charges of unlawful flight, would waive extradition to New York.

A formal hearing has been scheduled for Thursday morning before U.S. Magistrate Michael Merz in Ohio, said a spokeswoman, Marie Waitzman.

Vento was among a bat-wielding gang of white youths who confronted Yusuf Hawkins and two friends, also black, in the predominantly white neighborhood of Bensonhurst on Aug. 23, 1989. The attack ended in the fatal shooting of Hawkins, 16.

Seven young men have been indicted in the case, but charges never were brought against Vento because he agreed to become a witness for the prosecution.

Sometime around Christmas, however, Vento fled his Brooklyn home, apparently to avoid testifying against his friends. His disappearance was revealed only last week.

On Monday, DiChiara said he did not know why Vento had turned himself in or whether the young man still planned to testify as a government witness.

The lawyer said he planned to meet with prosecutors at the office of Brooklyn District Attorney Charles Hynes to discuss the case.

Hynes, noting that the agreement with Vento was made by his predecessor, Elizabeth Holtzman, now city comptroller, was eager to talk to the young man about the case.

''This will be the first opportunity we've had to speak to Vento,'' Hynes said, adding that he would honor Holtzman's arrangement if the young man still agreed to cooperate with prosecutors.

Word of Vento's surrender came hours after state Supreme Court Justice Thaddeus Owens of Brooklyn grudgingly granted a prosecution request to postpone the trial until Apr. 2 following a contentious hearing.

Owens had initially refused to delay the trial, blasting Hynes for telling the news media his office was ready with a ''solid case'' even as prosecutors sought a postponement.

''You can't have it both ways,'' the judge chided the prosecutors. ''You can't chase with the hounds and run with the hare.''

LONDON (MARCH 6) UPI - Civil aviation authorities Tuesday unveiled plans to regulate the working hours of air traffic controllers following a yearlong study on how fatigue affects those who guide planes through Britain's skies.

Officials said the recommendations made by a seven-member committee will probably be endorsed by the Civil Aviation Commission.

London's Heathrow and Gatwick airports are among the world's busiest, with planes arriving every two minutes at peak times. Officials said about 60 near-collisions occur each year and that in one close shave in 1988 two airliners flying above London missed each other by 50 feet.

The 96-page report included proposals that no air traffic controller should work more than two hours without a 30-minute break or beyond a 10-hour shift, and that work should not exceed 50 hours every six days or 200 hours a month.

Officials said the inquiry had discovered some excesses, such as officers who worked 72 hours a week or went for more than two months without a day off, but that most controllers worked well within the planned limits.

One official said the study was ordered because there was ''some disquiet'' that Britain's 1,800 controllers may be stricken with fatigue because of increases in air traffic.

''It is not that they are overworked, or that aircraft are in danger, but (the committee) thought it would be prudent that there be some regulatory protection in the future,'' the official said.

Working hours of pilots are already regulated by the commission. Officials said there was a shortage of air traffic controllers because of increased traffic and a ''retirement bulge,'' and reported they were on a recruitment drive.

MOSCOW (MARCH 6) UPI - Eduard Shevardnadze will visit Africa this month in the first trip by a Soviet foreign minister to the continent and may meet Secretary of State James Baker in Namibia, the government announced Tuesday.

The much-traveled Shevardnadze will visit five African countries - Zambia, Zimbabwe, Mozambique, Angola and Namibia, Foreign Ministry spokesman Gennady Gerasimov said at his daily press briefing. He said Shevardnadze would leave in mid-March but did not give the exact date.

''It is a rather long trip,'' Gerasimov said. ''It is the first by a Soviet foreign minister to Africa.''

Unlike Andrei Gromyko whom he replaced as foreign minister in 1986, Shevardnadze has conducted a wide ranging foreign policy that is not centered exclusively on relations with the United States and Europe.

The visit to Africa further represents Mikhail Gorbachev's new political thinking for which Shevardnadze has been the advance man in his travels to Asia, South America, Europe, Canada and the United States.

In another radical twist from Gromyko's foreign policy, Shevardnadze's foreign policy has toned down ideology in foreign relations.

Yet Mozambique and Angola, which he will visit, were led to independence by Marxist guerrillas financed by the Kremlin when Gromyko ran foreign policy.

The new policies of cooperation will be highlighted in Shevardnadze's visit to Namibia on March 21 to mark the birth of the new state, which the Soviet Union helped foster in complex negotiations that involved South Africa, Angola and Cuba.

''Namibia's independence is a major milestone on the road towards the final decolonization of Africa,'' Tass said.

Gerasimov said Shevardnadze may meet Baker during the visit to Namibia, the former German colony of South West Africa that had been ruled by South Africa since World War I.

Before his surprise appointment as foreign minister in 1986, Shevardnadze had been head of the secret police in his native Georgia and then the communist leader of that southern republic in the Caucasus.

Always reputed to be one of the smartest men in the Soviet leadership whose speeches were worth reading, Shevardnadze has won praise from the many diplomats he has met despite his previous lack of foreign policy experience.

Under Shevardnadze, relations with China have been repaired, and bridges have been built toward renewed relations with Israel and the inauguration of diplomatic relations with South Korea, on whose industrial expertise the Kremlin wants to draw.

Only a breakthrough with Japan has eluded Shevardnadze's Foreign Ministry. Japan has insisted on the return of the Kurile islands seized by the Soviet Union at the end of World War II as the price for better relations.

#90065u1873 03/06/1990 ~United Press International

BRIDGEPORT, CT (MARCH 6) UPI - The family of a woman who died allegedly from an illness related to the food supplement L-tryptophan is suing a Japanese manufacturer of the drug, an attorney said Tuesday.

The suit filed in U.S. District Court claims Jean Berizzi, 69, of Greenwich died Jan. 21 as a direct result of an illness brought on by taking L-tryptophan, made by Showa Denko K.K. of Japan, said attorney Dominick C. Esposito.

The drug is distributed and sold in the United States by the company's subsidiaries, Show Denko America Inc. and Solgar Co. Inc. of New York, said Esposito, who filed the suit Monday.

No hearing has been scheduled yet in the case, court officials said.

The drug, a food supplement sold over the counter in health food stores and pharmacies, was taken for relief of insomnia, anxiety and pre-menstrual syndrome.

The federal Food and Drug Administration issued a nationwide recall of L-tryptophan in November 1989 and blocked imports of the substance Dec. 5, 1989, following reports the amino acid was linked to a rare blood disease called eosinophilia-myalgia syndrome, or EMS.

The potentially fatal disease was characterized by severe muscle and joint pain, swelling of the arms and legs, skin rash and fever.

''One of the very, very disturbing things about all this is I'm sure a lot of people are sitting there at home with half-full bottles of this stuff '' Esposito said.

''This was a voluntary recall and I don't think there has been all that much media attention,'' the attorney added.

Despite more than 1,300 cases of illness nationwide thought to be related to L-tryptophan, health officials have been unable to find a direct link between the amino acid and the health problems, said Chuck Fallis, a spokesman for the federal Centers for Disease Controls in Atlanta.

''We haven't been able to trace the problems to a single source,'' Fallis said.

As of last Friday, there were 1,353 cases of illness and 16 deaths nationwide among people known to have taken L-tryptophan, Fallis said.

''All these patients were taking L-tryptophan and that's about all we know '' Fallis said.

According to the lawsuit, Jen Berizzi suffered a high white blood cell count and other symptoms before her death during three periods of hospitalization. Between hospital stays, she required continuous nursing care, Esposito said.

Esposito said he was considering seeking class action status for the lawsuit.

''I'm hearing about more cases every day and I know there are other suits in Baltimore and Oregon,'' Esposito said.

#90065u1878 03/06/1990 ~United Press International

(MARCH 6) UPI - Shots were heard at the Kabul airport in Afghanistan's capital today, amid reports of a coup attempt and a bombing raid on the presidential palace. A Soviet Foreign Ministry spokesman says there were clashes today in Kabul, but he describes the situation as ''NOT clear.''

West German government leaders agreed to respect Poland's borders. A statement says that after German unification the new German government will sign a treaty with Poland. The move means West Germany will relinquish any claim to its former border territories, which were ceded to Poland after Germany lost the war in 1945.

East German leader Hans Modrow is calling for his nation's entire ''round table'' Cabinet to join him in Moscow for talks designed to speed up the process of uniting the two Germanys. There was NO immediate response from Soviet or East Berlin officials to Modrow's plan. The news agency Novosti says talks will center on whether a united Germany should be part of NATO.

South Africa's chief of staff says a unit linked to political killings in South Africa was set up to operate outside the country. The testimony before a one-man inquiry in Pretoria came within hours of Defense Minister Magnus Malan issuing a statement saying he first heard about the unit in late November.

In a related development, South African police confirm that a second man was arrested last week in connection with the secret unit. The probe involves a series of alleged political murders that involve 71 unsolved killings, including a prominent white human rights lawyer.

Philippine Senator Juan Ponce Enrile was freed temporarily today while the Philippine Supreme Court debates the validity of charges that he plotted to overthrow the government. The high court issued Enrile provisional liberty after his lawyers argued that the charge of rebellion combined with murder was ''non-existent.''

#90065u1888 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Jury selection continued Tuesday in the trial of John Poindexter, the top White House aide accused of trying to thwart a congressional investigation of the Reagan administration's Iran-Contra scandal.

During the morning session, 11 potential jurors were questioned and U.S. District Judge Harold Greene found six of them qualified to serve. Four more were found qualified later in the day.

By the time Greene announced a brief mid-afternoon recess, a total of 31 people had been qualified as potential jurors for the felony charges lodged by special prosecutor Lawrence Walsh against Poindexter, who was President Reagan's national security adviser and is the highest-ranking official indicted in the scandal.

Greene announced at the start of Tuesday's session that when 45 qualified jurors were found, he would allow the defense and prosecution to begin making ''peremptory challenges'' - dismissing potential jurors without giving a reason.

That process will lead to a panel of 18 people - 12 jurors and six

alternates - to hear the testimony, which may begin before week's end.

Poindexter, a retired rear admiral, wore a navy blue pinstripe suit Tuesday, matched with a blue patterned tie and a white shirt. He held his trademark pipe in his hand because smoking is not allowed in the courtroom.

The defendant's wife, Linda, an Episcopal priest, did not attend the second day of jury selection in the case. She was present Monday.

Poindexter, 53, who stepped down as Reagan's top national security aide in November 1986 when the scandal was exposed, faces five charges, including accusations he obstructed congressional inquiries and made false statements to Congress.

The scandal, which marred Reagan's second term, involved the secret sale of weapons to Iran in an effort to win freedom for U.S. hostages in Lebanon and the diversion of money from the weapons sales to aid the Contra rebels in Nicaragua. Congress had banned such military assistance at the time.

Potential jurors found qualified by the judge Tuesday included:

-A secretary who worked for Jesse Jackson's presidential campaign but noted, ''I was very sensitive to Mrs. Reagan when she had the (breast cancer) surgery. I sent them a 'get well' card.''

-A National Guard employee who served in the Army for 11 years and described the Iran-Contra scandal this way: ''I know it had a lot to do with arms, the money and not telling the truth.''

-A personnel aide for the District of Columbia government who said she could weigh the evidence despite slight exposure to news reports about the Iran-Contra affair. Speaking about Reagan - who recorded a videotape for use as evidence at the trial - she said: ''He was saying he wasn't aware of what's going on. I believe that the president should know what's going on.''

Five potential jurors were dismissed on the spot Tuesday. They included:

-A retired CIA research analyst who said she would have no problem being impartial and added, ''The CIA has made mistakes.'' She ran into trouble by saying the diversion of money to the Contras ''was done in a secret way which was perhaps illegal.''

-A retired Air Force food service employee who knew little about the scandal but, ''I didn't think it was right - in fact I knew it wasn't.''

-An executive of an office management consortium who had extensive

background information about the Iran-Contra affair, recalled portions of Poindexter's congressional testimony in the summer of 1987 - given under a grant of immunity - and referred to the scandal as ''Irangate.''

#90065u1890 03/06/1990 ~United Press International
(MARCH 6) UPI - Senators Edward Kennedy of Massachusetts and Orrin Hatch of Utah are proposing legislation to provide 500-Million dollars for victims of AIDS. The plan calls for half the money to go to the 13 cities hardest hit by AIDS with the rest distributed among the states to develop programs to care for AIDS victims.

The Air Force today retired its secret Blackbird spy plane after a record-shattering flight from the West Coast to the East Coast. The S-R-71 reconnaissance plane... the nation's fastest operational airplane... shot through the dawn sky from California's Edwards Air Force at supersonic speeds to land in Washington, D-C, in slightly more than one hour and eight minutes.

Perrier is redistributing its product to stores around the world, with the trademark green mineral water bottles expected to be available in the United States by the end of next month. The French company ordered a world-wide recall about three weeks ago due to chemical impurities blamed on dirty filters.

Snow fell on parts of the Northeast and blanketed roads in Great Salt Lake Utah. Utah police say Interstate Highway 80 was snow-packed and slick after a storm overnight dumped snow on the state's mountains and valleys. Nine inches fell in Little Cottonwood Canyon, east of Salt Lake. Snow made a slippery morning commute in Connecticut and caused some schools to close.

Actor Gary Merrill is dead at 74. Merrill, whose career spanned 42 movies over 40 years, died of lung cancer at his home in Maine yesterday. Merrill is known for supporting roles in such film classics as ''Twelve O'Clock High'' and ''All about Eve,'' as well as his stormy, 10-year marriage to Bette Davis.

#90065u1909 03/06/1990 ~United Press International

LOS ANGELES (MARCH 6) UPI - Prosecutors Tuesday refiled eight of 12 molestation charges against former McMartin Pre-School teacher Raymond Buckey, saying only three of the five remaining alleged victims are willing to testify at his retrial.

As they promised last week, prosecutors chose also not to refile a conspiracy charge against Buckey, the lone remaining defendant in the case.

Buckey, 31, pleaded innocent Tuesday to the refiled charges before Superior Court Judge Stanley Weisberg.

By dismissing four molestation charges and the conspiracy count against Buckey, prosecutors reduced even further what was once the largest alleged sex abuse case in U.S. history.

Buckey's attorney, Danny Davis, objected to the dismissal of one of the molestation counts involving the child who prompted the original case in late 1983 when his mother claimed he had been molested by Buckey.

Davis said that by dismissing that charge, prosecutors were trying to create a ''smokescreen'' to fool jurors at the pending retrial about the underlying weakness of their case. Davis has long maintained that the mother was mentally unbalanced and she invented the molestations in her mind.

In refiling the charges, prosecutors added several new allegations. They alleged that in molesting the children, Buckey violated his special position of trust as a teacher, and that he sodomized and raped one of the children.

Davis, however, objected to filing new allegations at this late date in the case, and Weisberg dismissed them.

Davis also filed a motion seeking to have the District Attorney's Office

removed from the case on grounds that District Attorney Ira Reiner decided to retry Buckey for political advantage in his race for state attorney general.

''I think we need a new prosecutor,'' Davis told reporters. ''Do you think there's a conflict of interest for Ira Reiner, someone who is running for attorney general, to proclaim nationally that my client is guilty? He has condemned my client without a single conviction.''

Davis asked that the Attorney General's Office review the remaining charges and make an ''independent, neutral'' evaulation of the case to determine if it should be tried again.

A hearing was scheduled for late Tuesday on Davis's motions to reinstate the one count and remove Reiner's office from handling the case.

Deputy District Attorneys Joseph Martinez and Pam Ferrero said that only three of the five remaining alleged child victims were willing to testify at Buckey's retrial. Those three children represent eight molestation counts against him. The two children who refuse to testify at the retrial represent the four other molestation counts.

Jury selection in the retrial is tentatively scheduled to begin Friday.

Buckey and his mother, Peggy McMartin Buckey, 63, were acquitted Jan. 18 of 52 molestation charges. But jurors deadlocked on one count of conspiracy and 12 other molestation charges against Ray Buckey.

Following two weeks of public outcry over the acquittals, Reiner decided to retry Buckey on at least some of the charges.

The verdicts climaxed a nearly three-year $13 million trial, the longest, costliest criminal trial in U.S. history.

The charges at the first trial stemmed from the alleged molestation of 12 pupils at the now-closed Virginia McMartin Pre-School in suburban Manhattan Beach. Buckey will be retried on charges he molested three of the youngsters.

(MARCH 6) UPI - A top Greyhound executive and the head of the union for striking employees talked by telephone Tuesday but failed to agree on resuming contract negotiations on the fifth day of a walkout against the nation's largest intercity bus line.

James La Sala, international president of Amalgamated Transit Union in Washington, called Greyhound executive Fred Currey in Dallas at 1:35 p.m. EST to follow-up on a telegram he sent over the weekend that ''urgently'' asked for bargaining to resume, union spokesman Nick Nichols said.

Nichols said while nothing was resolved in the 10-minute conversation, La Sala and Currey planned to speak again later Tuesday.

Nichols said without an agreement to meet, ''issues as to site and timing have obviously not been resolved.''

La Sala's telegram sent Saturday to Currey was the first overture about talks since the strike by many of the 9,000 union workers began Friday. La Sala and another union official said they ''urgently request a meeting with you as soon as possible to see if we cannot resolve this contract.''

There was no contact between the sides Monday.

In Dallas, about 100 striking Greyhound employees staged a rally at the downtown bus terminal Monday night, accusing company officials of refusing to return to the bargaining table.

Meanwhile, judges in at least six cities, fearing more picket-line violence, have ordered striking Greyhound employees to rein in their demonstrations against the company, which has continued to operate about one-third of its routes with replacement drivers and union members who crossed picket lines.

The strike and Greyhound's effort to replace its work force has provoked violence at bus terminals across the nation, including the death of one picketer, and judges have stepped in to limit the size and tactics of the protests.

In New Jersey, a Burlington County Superior Court judge Tuesday prohibited mass picketing at entrances to the Mount Laurel, N.J., driver recruitment sites at the Monticello Inn in Bell Mawr and the maintenance garage in Camden, Greyhound spokeswoman Elizabeth Hale said. Only three pickets were permitted at each entrance, but others could be placed outside the entrances as long as they did not interfere with operations or intimidate customers or workers.

In Los Angeles, Superior Court Judge David Yaffe issued a restraining order Monday to prevent strikers from entering Greyhound driveways and parking lots or blocking entrances and exits. The order, which applies in Los Angeles, San Diego, Calexico and El Centro, also forbids strikers to intimidate or threaten strikebreakers.

In Sacramento, Calif., Superior Court Judge James Long, citing picket line violence, limited pickets outside the local Greyhound terminal, but the order applied only to Sacramento, not statewide as the company had requested.

In Portland, Ore., Multnomah County Circuit Judge Robert Redding said he granted the company's request for an order ''enjoining the local union from impeding the buses in and out of the Greyhound station and engaging in any acts of vandalism or mischief against the property.''

Judges in Jacksonville, Fla. and Philadelphia have also issued orders designed to quell violence on the picket lines.

La Sala, meanwhile, urged the company to release safety records and drug and alcohol test results for a replacement driver whose bus killed a picket on Saturday in Redding, Calif. Robert Waterhouse, 59, was killed when he was pinned between a concrete wall and a bus driven by Theodore Graham.

While prosecutors were studying possible criminal charges against Graham, Greyhound officials said they believed the death was accidental.

The Sacramento Bee reported Tuesday that Graham had accumulated five traffic tickets in the past five years, including citations for speeding, driving without a license, running a traffic light and driving defective equipment.

La Sala said many union members throughout the country wore black arm bands Monday in honor of Waterhouse, and he called on the union's 160,000 members to observe five minutes of silence at 1 p.m. PST Wednesday when a memorial service begins.

There were no new reports Tuesday of serious clashes between pickets and replacement drivers after three days of scuffles and vandalism across the country.

Besides 6,300 drivers, the union represents 1,475 maintenance workers and 1,660 office workers in telephone information centers in Omaha, Neb., and Charlotte, N.C., and the accounting center in West Des Moines, Iowa.

The last strike against Greyhound was in 1983 and lasted 48 days. The bus company was sold by Greyhound Corp. in 1987 to a group of Dallas-based investors headed by Currey.

MANAGUA, NICARAGUA (MARCH 6) UPI - President Daniel Ortega said Tuesday his government will repeal a controversial media law and allow private ownership of television stations before he hands over power to President-elect Violeta Chamorro April 25.

''I am sending to the National Assembly a law decree to repeal the Communication Media Law,'' Ortega said in a speech to a meeting of the Inter-American Press Association, which has often criticized press restrictions in Nicaragua. ''That is, we will no longer have a media law in Nicaragua.

''The repeal of this law automatically makes room for private television channels to exist in Nicaragua,'' Ortega said to applause from more than 100 Western Hemisphere editors and publishers attending the IAPA meeting in a Managua convention hall.

Opposition politicians and journalists in Nicaragua and the IAPA, the watchdog organization of press freedom in the Americas, have long demanded the repeal or reform of the media law, which mandates a state television monopoly and places in the hands of the Interior Ministry broad powers to

control and punish news media.

IAPA President Edward Seaton, a Manhattan, Kan., publisher, praised Ortega's promise to repeal the law, saying ''this will mean enourmous advances for freedom of the press in Nicaragua.''

But at least one Nicaraguan journalist suggested Ortega's announcement was a last-minute effort by the outgoing Sandinistas to obtain a television channel - and therefore a powerful voice - for the day they pass from government to opposition.

''He is waving a flag he has buried the past 10 years,'' said Cristiana Chamorro, editor of the opposition newspaper La Prensa owned by her mother the future president.

''The Sandinistas are trying to make sure they have a television ststaion after April 25,'' the day Ortega is scheduled to hand over the government to Violeta Chamorro, said Cristiana Chamorro.

Ortega's speech was one of the most moderate he has made since losing Nicaragua's presidential elections Feb. 25 in an upset victory by Chamorro that surprised most Nicaraguan and foreign observers.

''After April 25, I will be in the opposition, making a constructive opposition and not a destructive opposition,'' Ortega said.

Complaining that the current opposition ''never saw anything positive'' in his government, Ortega said, ''I will not act the same way towards them as the opposition acted towards me.

''I will firmly defend press freedom,'' he said. ''Freedom of the press is guaranteed in Nicaragua.''

WASHINGTON (MARCH 6) UPI - President Bush said Tuesday he will nominate Jo Anne Barnhart for the new job of assistant secretary for family support at the Department of Health and Human Services, and two men for federal judgeships in Maine and Virginia.

In brief announcements, the White House said Barnhart's position at the health agency would be new. Since 1986, she has served as Republican staff director for the Senate Governmental Affairs Committee and before that she was campaign manager for Sen. William Roth, R-Del., and held other health-related positions in the government.

Bush also announced that he would nominate D. Brock Hornby to be U.S.

district judge in Maine, succeeding Conrad Cyr. Since 1988, Hornby has served on the Maine Supreme Judicial Court.

For the Western District of Virginia, the president said he would nominate Samuel Grayson Wilson to succeed Glen Williams. Since 1981, Wilson has been a private attorney in Roanoke, Va., and previously served as U.S. magistrate for the same district.

All the nominees must be confirmed by the Senate.

WASHINGTON (MARCH 6) UPI - Time Warner Inc. raised the curtain Tuesday on plans to build a pair of multi-screen theaters in Moscow and Leningrad, and their Soviet partners promised no censorship and plenty of popcorn for Russian movie fans.

The high-tech gleaming palaces of marble and steel will be built at a total cost of $28 million, not including land, and will feature American-style concession stands and gift shops selling everything from Bugs Bunny memorabilia to Batman dolls. Admission will be in rubles.

"Hurray for Hollywood and Leningrad and Moscow too!" Time Warner President N.J. Nicholas, said at a lavish reception at the Soviet Embassy hosted by Yuri Dubinin, the Soviet ambassador to the United States.

Dubinin, referring to American moviegoers' passion for popcorn, candy, and pop, added: "There was one intriguing detail. There will be a lot of restaurants around those theaters."

Time Warner, the media giant born of the merger of Time Inc. and Warner Communications Inc., parent of Warner Bros Inc. studios, will keep 60 percent of the profits and reinvest the money in future ventures in the Soviet Union. Its Russian partner in the joint venture, Sovexportfilm, will garner 40 percent of the take.

The giant theaters, to be completed by late 1991, will show both American and Soviet films as well as films from other countries, with Time-Warner and Sovexportfilm deciding jointly on which movies to present. "This not only furthers trade ... but gives an opportunity to trade ideas," Commerce Secretary Robert Mosbacher told the embassy gathering.

When asked if Soviet viewers would be exposed to such films as "The Hunt for Red October," the current hit movie about a renegade Russian submarine, Sovexportfilm general director Oleg Rudnov, said: "It is not possible anymore to suppress the Soviet viewer. "There is no censorship anymore," Rudnov added.

The Moscow theater, to be located downtown on Novokirovsky Prospekt, will have ten screens, seat 4,000 people and be within walking distance of major rail and subway lines. The Leningrad theater, to be located on Prosveshteniya Prospekt, in the suburb of Ozerki, will feature nine screens and seat 3,400.

The two theaters will also be equipped with the latest in projection equipment and stereo sound systems, and be managed by a Soviet staff trained at Time Warner theaters in Great Britain. Soviet and European work crews will do the construction work.

Although the American capitalists and their Soviet counterparts traded toasts at the embassy reception, Rudnov said there have been plenty of arguments about theater design and other details. But Rudnov added, "It's very nice to argue with friends ... let us argue more."

#90065u1957 03/06/1990 ~United Press International

GUATEMALA CITY, GUATEMALA (MARCH 6) UPI - President Vinicio Cerezo said Tuesday Washington's decision to call back U.S. Ambassador Thomas F. Stroock for consultations did not imply a rupture in diplomatic relations.

''Relations have not been broken, (Stroock) was simply called back to his country,'' Cerezo told reporters.

Cerezo, however, advised the U.S. government to tread lightly when dealing with the internal affairs of Guatemala.

''The United States has no right to intervene in the affairs of other countries. Instead of providing guidance, it appears that they are handing out orders,'' Cerezo said in reference to mounting tension between Stroock and the Guatemalan government that resulted in the U.S. ambassador's departure for Washington Monday.

Stroock hit a raw nerve last week when he warned the Cerezo administration that failure on the part of authorities to solve kidnappings and assassinations would undermine relations between the United States and Guatemala.

''I would hardly be sincere if I did not tell you that the human rights situation in Guatemala is something that has caused serious concern for the Bush administration ... the assassinations and kidnappings of political leaders, union leaders, peasant farmers and laborers deeply worry us,'' Stroock said in a speech delivered at the Rotary Club.

''The failure of the government to protect its citizens and capture and

punish human rights violators, constitutes a factor that, if continued, would inevitably damage the relations between our countries,'' Stroock said.

In a veiled threat, Cerezo last Friday said Stroock, who assumed his ambassadorial post Oct. 23, 1989, should clarify whether his statements reflected the Bush administration's stand on the issue or whether his comments were merely personal. Cerezo warned that before making his personal commentaries public, he should first step down from his position as ambassador.

''It is an ingratitude to accuse this government of human rights violations when in a certain form the U.S. government was complicit in not announcing large-scale (human rights violations) committed by military governments in other times,'' Cerezo said.

Asked how investigations were proceeding in the assassination of Salvadoran leftist leader Hector Oquelli Colindres and Guatemalan political activist Gilda Flores, Cerezo said, ''They are investigating the case. The United States has sent members of the FBI and not even they have been able to resolve the case.''

Concerning drug trafficking in Guatemala, which acts as a land bridge for the smuggling of cocaine frol Oolombia to the United States, Cerezo said, ''We cannot deny that it exists, but the government has made efforts to control what even the United States has not been able to resolve.''

#90065u1986 03/06/1990 ~United Press International

PALO ALTO, CA (MARCH 6) UPI - Immigration officials Tuesday were investigating the use of low-cost Chinese software programmers at Hewlett-Packard Co. after a report indicated the practice may be illegal. For more than two years, Hewlett-Packard has brought Chinese programmers to the Silicon Valley to test software for its line of computers.

The company described the process as a legitimate training effort. But the San Jose Mercury News reported the programmers actually complete software projects while in the United States, prompting the U.S. Immigration and Naturalization Service to investigate, said Philip Waters, deputy director of the INS office in San Francisco.

Federal immigration law generally prohibits U.S. companies from using foreign workers for jobs that U.S. citizens are able and available to perform. If workers are in the country for training, any productive labor must be "incidental" to the training, Waters said.

Hewlett-Packard said it was reviewing the Chinese program in light of the

INS investigation. "Certainly we did think (the program) was correct," spokeswoman Marlene Somsak said. "If it is not correct, we will ask the sending organization to change the way it acquires visas for these people."

Under the Chinese program, Hewlett-Packard contracts with the Shanghai Computer Software Laboratory for software engineers, who are provided an apartment and a daily stipend while in the United States.

The engineers are paid by the Chinese laboratory and are not H-P employees. Since the program began, about 30 citizens of China have visited the United States for Hewlett-Packard.

Some Hewlett-Packard employees are unhappy with the practice, the Mercury News reported. "They're just using these people as cheap labor," one unidentified worker told the newspaper.

Foreign workers performing American jobs is nothing new. Many companies, particularly in the high-technology industry, have moved thousands of jobs overseas to take advantage of lower labor costs. But white-collar jobs have been largely immune from the trend.

Hewlett-Packard said Chinese universities have developed a strong reputation in software engineering and are anxious for ties with the West that will help them acquire foreign currency.

#90065u1993 03/06/1990 ~United Press International

NEW YORK (MARCH 6) UPI - The New York Rangers traded for scoring help Tuesday when they acquired right wing Mike Gartner from Minnesota for forward Ulf Dahlen, a fourth-round 1990 draft pick and future considerations.

The deal was announced just before the 3 p.m. EST NHL trading deadline.

Although they lead the Patrick Division by six points, the Rangers' 226 goals are fewest in the division and 19th among 21 NHL teams.

Gartner, 30, has scored over 30 goals in each of his 11 NHL seasons and has 34 goals and 36 assists this season. He is in the option year of his contract and becomes a free agent after the season.

Dahlen, a 23-year-old right wing, has 18 goals and 27 assists this season. He scored 29 goals as a rookie in 1987-88 and 24 last season. He was a first-round pick in the 1985 draft. The pick the Rangers gave up for Gartner was acquired from Los Angeles earlier this season.

Gartner has played in five All-Star Games, including the Jan. 21 game this year. He has missed less than two games per season, and scored 50 goals with 52 assists for Washington in 1985-86. Gartner was the Capitals' first-round draft pick in 1979 and played 9 1/2 seasons with Washington until he was dealt to the North Stars at the 1989 trading deadline with Larry Murphy for Dino Ciccarelli and Bob Rouse.

#90065u1996 03/06/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (MARCH 6) UPI - Military officers responsible for ousting President-for-life Lennox Sebe in the nominally independent homeland of Ciskei declared a state of emergency Tuesday as violence subsided in the region.

South African Foreign Minister Roelof ''Pik'' Botha told South Africa's Parliament of the decision during debate on developments in Ciskei, which accepted independence from Pretoria in 1981 under the government's controversial homelands policy.

In the aftermath of a bloodless coup led Sunday by Brig. O. Josh Gqozo, doctors reported that as many as 20 people had died dead and 300 were wounded in 48 hours of rampages.

In its first proclamation released Tuesday, but dated Sunday, Gqozo's four-member Council of State abolished the office of president and vested executive, legislative and judicial powers under the control of the council.

Botha told South Africa's Parliament the state of emergency was declared in an effort to quell the unrest and violence in Ciskei, the South African Broadcasting Corp. reported.

With Gqozo's permission, more South African troops were sent into the homeland to stabilize the situation in the capital of Bisho, protect strategic points and ensure that violence did not spill over into South Africa, Botha said.

South African troops were first deployed Monday into the troubled Ciskei to secure strategic installations and South African-owned establishments.

Pretoria has pledged not to crush the popular rebellion led by Gqozo, who said he moved against Sebe Sunday because of widespread corruption and violence ''ordered and sanctioned'' by the 64-year-old leader.

Gqozo urged calm and an end to the looting and arson that erupted in the 48 hours after he took control while Sebe was out of the homeland he has ruled for nine years.

Hardest hit during the spree of violence was the industrial township of Mdantsane, 10 miles from the South African port of East London. Dozens of businesses and other establishments were set ablaze and their goods stolen.

Maj. Peter Hauser, a former Austrian army officer and member of the Council of State, confirmed that at least three people were killed by Ciskeian forces during the violence.

In an interview with South African television, Botha said the South African government could not be held responsible for the decision to stage the coup.

''If the Ciskei is ever to be included again in the Republic of South Africa - and I do not know if it will, it is a complex issue - their voters will eventually also participate within the broader South African political arena,'' Botha said.

''So to imply at this stage that they are not mature or that they make the wrong decisions, I think with all respect, it always has racist

connotations to proceed from that point because in white states coups also occur,'' he said.

South Africa is the only country to recognize Ciskei and three other homelands as independent nations. The controversial homelands policy has stripped millions of blacks of South African citizenship since 1976 in a bid to keep blacks as migrant workers in South African cities and rural gold and coal mines.

''We would like to move toward democracy and leave the options open to the people,'' Hauser said when asked about the future status of Ciskei. ''I don't think we can at this stage say whether Ciskei will be part of South Africa or not. We will certainly negotiate.''

Since the Feb. 11 release of black nationalist Nelson Mandela, protests and violence have been on the upsurge in the homelands along with calls for re-incorporation into South Africa. Police in Ciskei launched a crackdown last month on anti-Sebe protests and as many as eight people were killed on Feb. 11 during celebrations for Mandela's release.

#90065u2042 03/06/1990 ~United Press International

OTTAWA (MARCH 6) UPI - Eight Canadian flour milling companies charged recently with bid rigging and conspiracy may have cheated Third World countries out of precious famine aid, a government official said Tuesday.

Andrew McGillivary, a spokesman for the Bureau of Competition Policy, said the eight companies were charged with conspiring to lessen competition and rigging prices over a 12-year period on about $500 million worth of wheat flour sold to the federal government for export to Third World countries. The firms represent about half the milling companies in Canada.

''If people rigged their bids, then conceivably less flour would wind up in these Third World countries,'' McGillivary said in an interview.

The just-disclosed charges were filed in Ontario Provincial Court last week, McGillivary said. Among companies charged were Maple Leaf Mills Ltd. Robin Hood Multifoods Inc. and Parrish & Heimbecker Ltd., all of Toronto; Ogilvie Flour Mills Ltd. of Montreal; Dover Industries Ltd. of Burlington, Ontario; SooLine Mills Ltd. of Winnipeg; B.P. Kent Flour Mills Ltd. of Virden, Manitoba, and Rogers Foods Ltd. of Armstrong, British Columbia.

According to McGillivary, the Canadian government invites tenders for contracts for flour, which is used by the Canadian International Development Agency in its world food program. The charges covered some 531 contracts between Oct. 15, 1975 and Aug. 5, 1987.

The wheat was shipped to China, the Congo, Yemen, Liberia, Guinea, the Philippines and countries in Central America, Africa, Asia and the Caribbean.

McGillivary declined to say what the bid rigging cost the federal government and its aid program. He said the companies took turns submitting bids at agreed-upon prices.

''Bid rigging is a very serious offense,'' he said. ''The Bureau of Competition Policy doesn't take it lightly.''

In Canada, corporations charged with bid rigging are liable to fines set by the court. Conspiracy charges carry a maximum fine of $10 million.

McGillivary said such charges are rare in Canada. The last case of bid rigging was in June 1988 and related to four firms selling business forms to the governments of Saskatchewan and Nova Scotia. The companies were fined a total of $2 million.

McGillivary said the Bureau of Competition Policy began its investigation into the flour contracts in September 1987.

#90065u2046 03/06/1990 ~United Press International

MANAGUA, NICARAGUA (MARCH 6) UPI - The Sandinista government and the Contra rebels accused each other Tuesday of violating a cease-fire while the U.S. Embassy denied a report that the Bush administration wants to build a military base in Nicaragua.

One Contra rebel was killed and two Sandinista troops were injured in Contra attacks over the weekend in the mountainous northern Nicaraguan

regions of Pantasma and Quilali, 120 miles north of Managua, according to the Defense Ministry.

''(The Contras) think the hour has arrived to pass the bill to the campesinos who have resisted the Contras in the mountains of Nicaragua,'' President Daniel Ortega said Tuesday, in a speech to the Inter-American Press Association in Managua.

Meanwhile, Contra leader Cristobal Sobalbarro, known as ''Commander Ruben '' accused the Sandinistas of bombing rebel troops in the Quilali area. He added the Contras are under orders not to initiate military actions.

''The Sandinistas in their Soviet-made helicopters, are bombing us in Quilali and Jalapa, breaking their own cease-fire,'' said Sobalbarro, a member of the Contra high command, in a telephone interview from Tegucigalpa, Honduras.

Col. Manuel Salvatierra, the Sandinista Popular Army military chief for Region VI, said in an interview Tuesday in the official Sandinista newspaper Barriacada that between 300 and 350 Contra rebels had gathered in the Wiwili and Rio Blanco areas, about 90 miles north of Managua.

Salvatierra said the army has taken ''extraordinary measures'' to guarentee the safety of local residents but would not provide further details.

Following his Feb. 25 election loss to Violeta Chamorro, President Daniel Ortega called a unilateral cease-fire in the 8-year-old war with the Contras, who operate from base camps on the Honduran border.

Chamorro has called for the Contras to disband immediately and sent a three-member team to Tegucigalpa, Honduras, Tuesday to meet with Contra leaders and discuss their demobilizaion.

The Contras have said they will not demobilize until Chamorro is sworn in on April 25 and the Sandinistas leave power. They have also called on Defense Minister Humberto Ortega and Interior Minister Tomas Borge to vacate their posts.

Also Tuesday, a U.S. Embassy spokesman denied a report on the state-run Voice of Nicaragua radio station that the Bush administration wants to build a military base in Nicaragua as a condition to granting aid to Nicaragua.

''There is no truth to (the report) at all. It is ridiculous,'' said the spokesman.

The Voice of Nicaragua said, ''The United States will propose to the new

administration and to Chamorro that they permit a military base in Nicaragua starting in June 1990.''

The radio station, which attributed the information to a source close to the U.S. Embassy, said the proposal was linked to the incoming government's request for $300 million in emergency aid from the United States.

Agustin Jarquin, a Chamorro aide and a leader of the National Opposition Union, the coalition that backed her in the election, also denied the report.

''This is totally absurd and is part of the (The Voice of Nicaragua's) campaign of spreading disinformation to the Nicaraguan people,'' he said.

#90065u2053 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Rep. Henry Gonzalez, D-Texas, chairman of the House Banking Committee, Tuesday accused Charles Keating of conducting a "well-orchestrated" public relations campaign to "dupe" the public about the failure of Lincoln Savings and Loan Association.

Angered by the failure of Keating's son, Charles Keating III, to appear before his committee, Gonzalez said he would subpoena the younger Keating to testify before the panel, which is investigating the failed Irvine, Calif., thrift.

Lincoln was owned by Phoenix-based American Continental Corp., of which the elder Keating was chairman. His son served as the thrift's chairman and held other executive positions with American Continental.

Gonzalez said the elder Keating has waged a "well-orchestrated campaign to dupe the American public about the shenanigans at Lincoln." "We see the Keatings on selected television programs. We read stories peddled by high-priced lawyers and public relations firms," Gonzalez said.

"Charles Keating III's absence is a sad, sad commentary on a family that has cost the American taxpayers at least $2.5 billion, wiped out hundreds of elderly bondholders and wrecked a major financial corporation," Gonzalez said.

Last December, the committee subpoenaed the elder Keating, who cited his Fifth Amendment right against self-incrimination and refused to testify. One month later, Keating appeared in U.S. District Court in Washington and answered questions for more than eight hours.

Keating's courtroom appearance came during pretrial motions by the

government to dismiss a suit Keating filed seeking to regain control of Lincoln. The hearing is continuing.

Keating has since appeared on television news programs to get out his side of the story - that Lincoln was seized by federal regulators who had a personal vendetta against Keating because of his strong opposition to changes in thrift investment regulations. Regulators say the thrift was being operated in an unsafe and unsound manner.

Tuesday's hearing focused on American Continental's Arizona real estate deals financed by Lincoln. Federal regulators repeated their contention that the deals were "sham transactions" designed to shift money out of Lincoln to its parent company. One witness, Ernest Garcia, an Arizona real estate developer, cited the Fifth Amendment and refused to testify.

WASHINGTON (MARCH 6) UPI - White House press secretary Marlin Fitzwater said Tuesday the administration is investigating a report that American soldiers returning home from the U.S. invasion of Panama may be smuggling drugs.

''The president would like to know what the facts are,'' Fitzwater said in response to the report Monday by CBS News. ''We're very concerned about it and the Pentagon is investigating.''

The Pentagon said an investigation into drug trafficking in Panama is under way, but said no American soldiers have been taken into custoy or charged with a crime.

''Whether they (U.S. soldiers) are targets of an investigation, I just can't say,'' Pentagon spokesman Pete Williams said.

He referred all inquiries to the Drug Enforcement Administration, the lead agency in the investigation.

However, repeated calls to the DEA were not returned.

CBS reported that U.S. soldiers returning home from Panama after the Dec. 20 invasion may be smuggling narcotics, and that that might be linked to Friday's bombing of a Panamanian nightclub in which an American soldier died.

Quoting anonymous senior U.S. military commanders, the network said one American serviceman has confessed to recruiting soldiers to work as ''mules'' or couriers to carry cocaine to the United States on military flights.

And the nightclub bombing, which also injured 32 other people, may have been drug-related because it followed the breakup of a major cocaine smuggling ring involving Colombian narcotics traffickers and U.S. servicemen, CBS News said.

Williams said of the nightclub bombing: ''We don't know who was responsible.'' And because of that, he added, ''I can't rule out a connection.''

He said there is an investigation into the bombing, and a separate multi-agency investigation into drug smuggling in Panama ''that has been going on for some time.''

CBS quoted anonymous U.S. officials as saying the American servicemen were motivated by money from traffickers, as much as $10,000 for a shipment of drugs in a duffel bag.

About 13,000 soldiers have been withdrawn from Panama after the invasion, which deposed Manuel Noriega as dictator. Noriega is awaiting trial in Miami on drug-trafficking, conspiracy and racketeering charges stemming from his activities while de facto ruler of Panama.

CBS reported that senior officers close to the nightclub bombing investigation said they are looking into every possible motive, including the Colombian drug connection.

#90065u2062 03/06/1990 ~United Press International

ROME (MARCH 6) UPI - Yelena Bonner, widow of Soviet dissident physicist Andrei Sakharov, sharply criticized Soviet leader Mikhail Gorbachev Tuesday, saying the Soviet people had lost confidence in his policies.

She particularly slammed the Soviet army intervention in the ethnic strife in Azerbaijan and said she feared, as a result of the massacres there, Gorbachev might go down in history ''not as the author of perestroika, but as the author of a genocide.''

Bonner, whose late husband was awarded the Nobel Peace Prize in 1975, spoke at a news conference at the headquarters of the Italian Socialist Party, which invited her to Italy.

She said under Gorbachev's Perestroika policy the economic situation has worsened and ''decisions are arriving with such delay that the people have lost confidence in it.''

''The loss of confidence has reached a maximum,'' she said. ''I say it with regret and sadness: Gorbachev enjoys no popularity and the blame is

not that of the left or right, but only his.''

Conceding that Gorbachev had scored some success in international policy, Bonner said his internal policy was ''that of somebody who never wants to take a decision.''

''I think he must have very bad advisers on internal political affairs,'' she said.

Bonner said the victims of the Red Army intervention to suppress the riots in the Azerbaijan enclave of Nagorni-Karabakh and elsewhere were probably greater that in the Chinese massacre of civilian protesters in Beijing's Tiananmen Square.

''In the Armenian villages of Karabakh the Soviet soldiers, saying they could not guarantee security for the people, are taking them to Armenia where they do not have work or anything to do,'' she said, ''It is a deportation organized by the army.

''The people have come to realize that Gorbachev has no intention of solving the problem by political and parliamentary means,'' she said.

''With a new constitution maybe this tragedy would not have happened,'' she said. ''Nobody is discussing the project for a new constitution proposed by Sakharov, while the old constitution is being changed every month and nobody knows why Gorbachev changes it and for what purpose.''

Bonner said ''all democratic persons'' are in favor of a presidential regime, ''but the president must be elected by the whole country, by universal suffrage.''

She said Western economic aid to the Soviet government could be merely a way of ''prolonging the agony of communism.''

She said Gorbachev had no role in toppling the communist regimes of Eastern Europe, but it was simply that ''socialism has arrived at its natural end.''

#90065u2064 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Republican National Chairman Lee Atwater, rushed to the hospital Monday after fainting, was found Tuesday to have a non-malignant tumor in his head, doctors said.

A statement from Dr. Edward R. Laws, chairman of the neurosurgery department at George Washington University Medical Center, said no surgery was planned, but the 39-year-old GOP chairman would have follow-up

treatments. Such treatments usually involve radiation.

''Lee Atwater completed tests this morning which revealed a small non-malignant growth in the right side of his head,'' Laws said in the statement released by the Republican National Committee.

''No surgery is planned and we expect no difficulty with follow-up treatments. Atwater will be released by the end of the week and may resume a reasonable work schedule and normal activities next week.''

A party aide said the growth presumably was in Atwater's brain.

An American Medical Association medical guide says an abnormal growth in the brain is a serious matter, whether the growth is benign or cancerous, because it can compress healthy brain tissue.

A GOP spokesman said when the controverial Atwater was told of the growth, he quipped, ''It proves to my legion of critics that I do have something in my head.''

Earlier, a White House aide, who asked not to be identified, characterized the situation as ''serious'' and White House spokesman Marlin Fitzwater had noted, ''We're all concerned.''

President Bush spoke with Atwater by telephone Monday after he was taken to the hospital.

Atwater, who engineered much of Bush's 1988 campaign, fainted while speaking at a fund-raising breakfast for Sen. Phil Gramm, R-Texas, and was rushed to the George Washington University hospital, six blocks from the White House.

After a battery of tests conducted Monday proved inconclusive, Atwater Tuesday underwent a biopsy, in which doctors remove a piece of tissue and conduct a microscopic examination to establish a diagnosis and possible treatment. Most commonly, biopsies are performed to determine if a tumor is cancerous.

Atwater, who was elected GOP national chairman in January 1989, is a hard-nosed politician often criticized by Democrats for what they term dirty tactics.

Born in Atlanta, Atwater grew up in South Carolina and began his political career as an aide to Sen. Strom Thurmond, R-S.C., before going on to become a successful political consultant.

In addition to politics, Atwater also has appeared frequently as a blues guitarist.

#90065u2077 03/06/1990 ~United Press International
NEW YORK (MARCH 6) UPI - Deputy Secretary of Commerce Thomas Murrin urged U.S. corporations Tuesday to improve products and technology to remain "at the head of the pack" on international markets.

"Global competitiveness, including world-class manufacturing, must be a top-priority objective for U.S. industry," Murrin told a meeting of senior executives and economic analysts.

The two-day meeting is jointly sponsored by two non-profit research organizations, the Conference Board, headquartered in New York, and the Washington-based Industrial Research Institute.

The workshop, with "Winning in the global technology game" as its theme, discussed the position of U.S. corporations faced with mounting competition on world markets from foreign, mainly Japanese, companies.

The United States suffered a $109 billion merchandise trade deficit in 1989, most of which reflected growing competition by Japanese products both at home and abroad.

"The title of this conference ... implies that our nation, or any nation is winning in the technology game," Murrin said. "This is hardly a game, and considering the growing numbers of tough competitors, no nation should assume that they are winning." "We should - and we must - strive to be at the head of the pack," he added.

Murrin cited Japan, South Korea, and West European countries as the main competitors to U.S. corporations and products and warned that it would be "short-sighted to ignore the potential of the Chinese and the Soviets."

Howell Hammond, director for health sciences research laboratories at

Eastman Kodak Co., based in Rochester, N.Y., told the meeting that Japanese companies have the competitive advantage on international markets because they target products according to customers' needs. "The Japanese product planning starts with the customer," Hammond said.

He credited Japanese corporations for setting realistic growth goals and for their ability to export targeted products. "Japan exported 88 percent of its 16 million 35 millimeter cameras, 94 percent of its 200 million watches, 83 percent of its 27 million video recorders, 63 percent of its eight million microwave ovens," Hammon said.

"In 1987, Japan produced 24.1 percent of the world's automobiles and exported 4.5 million units, while the U.S. accounted for 21.7 percent of production and exported only 633,000 units," Hammon added. Analysts at the meeting agreed that research and technology will remain the key factors to develop new products with a high potential for exports.

Murrin stressed that the United States will remain a technology leader and a leading exporter only if significant funds are devoted to research and if corporations move away from a short-sighted, short-term investment policy. "Industry needs lower-cost and more patient sources of capital," he said.

"The international competition now requires the ability to quickly market full systems and create large systems out of which our high-tech services flow," he said. "These are precisely the areas in which ... the Japanese have organized their firms into formidable alliances," he said.

Murrin stressed that foreign investments in the United States, mainly Japanese acquisitions in the technology sector, were raising growing concerns among Americans.

"Polls were showing that more Americans believe that Japan's economic prowess - rather than Soviet military power - is the prime threat to the future of our country," Murrin said.

"Recent events only solidify that view. Other countries, and not just Japan, clearly are out to dominate in global technology competition," he added.

Murrin added that such concerns were also voiced at government level. "We must be especially mindful that our scientific and technological base - the "seed corn" of our economic and military future - can become a major asset of our foreign competitors," he said. "There are cracks in the nation's technology infrastructure that, if not attended to, will weaken our economic and military security," Murrin added.

(MARCH 6) UPI - A reported coup attempt in Afghanistan. Afghan officials say the country's defense minister staged an unsuccessful coup attempt against President Najibullah today. The Soviet news agency Tass says in a report from Kabul that fighting was continuing around the Afghan Defense Ministry as well as at Kabul airport. The Soviet report also says there was a bombing raid on the presidential palace.

A state of emergency is in effect in South Africa's nominally independent homeland of Ciskei. Foreign Minister Pik Botha told Parliament today that the declaration was made by Ciskei's four-member ruling military council. Violence reportedly has subsided in the region, where doctors say as many as 20 died and 300 were wounded in the aftermath of a bloodless coup this weekend.

West German Chancellor Helmut Kohl is backing off from a controversy that threatened to bring a crisis to his coalition government. Kohl's ruling coalition today said the East and West German Parliaments should adopt a declaration stating the inviolability of Polish borders. Kohl has been under fire for his linking recognition of Poland's border with Warsaw's renunciation of reparations from the second world war.

Iran's news agency says the Tehran Times reports that Syrian leader Hafez Assad will visit Iran soon. The paper did NOT reveal the purpose of Assad's trip, but the Islamic News Agency says the two nations have ''common enemies'' so they must keep in close contact. Also today, a leading newspaper in Lebanon says ranking pro-Iranian fundamentalist figures in Beirut do NOT expect an imminent release of hostages held by Iran's religious allies in Lebanon.

#90065u2135 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The U.S. Postal Service's Board of Governors announced Tuesday its approval of a postal rate increase that would raise the price of a first-class stamp from 25 to 30 cents.

The plan still needs final approval from the independent Postal Rate Commission to become the 15th rate change since the 2-cent stamp became compulsory in 1885 and the first since March 1988, when the price of a

first-class stamp jumped from 22 to 25 cents.

If approved by the commission, the increase, which includes all classes of mail, would represent an overall increase of 19 percent - the largest in Postal Service history.

The commission has 10 months to reach a decision, and the Postal Service expects the new rates to take effect in February 1991.

At a news conference Tuesday, Postmaster General Anthony Frank described the proposed rate increase as ''watershed'' because of its magnitude and emphasis on automation.

Frank said while he felt the 19 percent increase is ''too much, too soon '' it is necessary because the Postal Service is required to break even each year.

''We are self-financed ... we do not use taxes and we haven't since 1982 '' Frank said. ''The amount we file for is basically the amount our costs went up over the last interval. Our costs went up 19 percent and we filed for 19 percent.''

Frank added that a long-term plan to improve postal service and cut costs has already produced results.

''We intend to improve service, (and) cut our costs below the rate of inflation,'' Frank said. ''We operated at twice the rate of inflation in 1988. We are operating at 1 percent below the rate of inflation in 1990. That ... is rapid progress.''

Critics of the proposed increase ranged from consumer advocate Ralph Nader to the U.S. Chamber of Commerce, which called the rate hike ''unreasonable and unjustified.''

''Postal Service costs have been out of control for too long and business can no longer bear the burden,'' said Tracey Schreft, a Chamber of Commerce associate manger.

The New York State Consumer Protection Board said it will ''strongly oppose'' the increase, while Nader called for the formation of a national organization of residential postal users to become more involved in the postal decision-making process.

''The signs are clear and unmistakable,'' Nader said at a news conference earlier Tuesday. ''The Postal Service badly needs the organized support of its greatest customers. I hope that Postmaster General Frank will come to realize that before he completes his tour of duty.''

But the rate increase received advance support from the National Association of Letter Carriers.

''For 25 cents - or even 30 cents - you can walk down to the corner, drop a letter in a metal mailbox, and within a few days it arrives at the home of a friend, relative or business associate hundreds or even thousands of miles away,'' union President Vincent Sombrotto said Monday. ''Tell me what other service you can get in this country, or any other country for 30 cents.''

The Postal Service, which was reorganized along the lines of a private corporation in 1980, reported a $404 million surplus for the first quarter of fiscal 1990, but higher operating costs are pushing it toward a loss that is expected to be between $1.4 and $1.6 billion.

Assistant Postmaster General Deborah Bowker said the proposed rates will include several new amenities for mailers, including discounts for those who apply bar codes to first-class and third class letters.

Volume discounts will be offered for Express Mail, as will new flat rates for 3-, 4- and 5-pound express and priority mail, Bowker said.

There also will be a single 75 cent rate for all money orders, and insurance coverage on COD and insured mail will be raised from $500 to $600, Bowker said.

WASHINGTON (MARCH 6) UPI - The Securities and Exchange Commission said Tuesday it will form a panel to advise the government and the financial industry on emerging securities markets in the Soviet Union and Eastern Europe.

The commission has held meetings with officials from the Soviet Union, Hungary, and Poland to discuss banking, the development of securities markets and financial regulation.

The SEC said that it anticipates additional requests for such meetings and that the new panel will offer advice on such topics as establishing capital, protecting against market manipulation and preventing investor fraud.

"There is no more fitting manner for the United States ... to aid in the process of economic development in Eastern Europe and in the Soviet Union than by assisting in the creation of free capital markets," SEC Chairman Richard Breeden said.

Breeden said "the SEC's expertise in this area hopefully can assist in a successful transition to efficient private capital markets with necessary oversight and supervision."

The SEC said appointees to the new panel will be announced at a later date. They will represent government and the financial industry. Their first meeting could be held as early as April.

"Creation of active securities markets can contribute to economic development in these countries in a number of important respects," the SEC said. "In particular, such markets will facilitate both foreign capital investment and utilization of domestic savings for productive investment purposes.

"Establishment of securities markets will also make it possible for investors in the United States to help provide funds for the development of private enterprise in these countries through U.S. mutual funds targeted to investments in specific countries or the entire region," the SEC said.

#90065u2147 03/06/1990 ~United Press International

(MARCH 6) UPI - The New York Times says a fund for runaway teens at New York's Covenant House was used to make loans for various shelter officials including the sister of the founder. The trust fund was valued at nearly one-Million dollars. The paper says the financial dealings occurred without the knowledge of most Covenant House governing board officials. Covenant House Founder, the Reverend Bruce Ritter, resigned last week after months of allegations about sexual misconduct.

House Democratic leader Richard Gephardt unveiled a plan for wide-ranging economic assistance to support the move toward reform in the Soviet Union. The Missouri Democrat made the proposal during a speech in which he criticized President Bush for what Gephardt called a ''lack of vision'' in responding to changes in the Soviet bloc. Gephardt called for the Bush administration to waive trade restrictions and relax restrictions on high-tech exports to Moscow.

#90065u2151 03/06/1990 ~United Press International
WASHINGTON (MARCH 6) UPI - President Bush nearly took a swing at the baseball lockout Tuesday, but the former first baseman, whose son is a part-owner of the Texas Rangers, held up. His chief spokesman fielded the question instead.

White House press secretary Marlin Fitzwater said Bush ''doesn't have any plans to intervene'' in the contract deadlock between owners and players, but ''he's concerned about the fans and the game of baseball.''

Speaking at his daily briefing with reporters, Fitzwater said Bush ''would like to see the issue resolved.''

Earlier, Bush, at a picture-taking session in the Oval Office with Italian Prime Minister Giulio Andreotti, smiled when asked by a reporter if he believed anything should be done about the lockout.

Bush, who generally doesn't answer questions at ''photo-ops,'' turned to Andreotti and said, ''She got very close to something I might answer. Very close there. I was tempted.''

Bush's son, George W. Bush, is a managing partner of the Texas Rangers. The president, who played first base on Yale's baseball team nearly a half-century ago, keeps his leather glove tucked in a desk drawer.

BOISE, ID (MARCH 6) UPI - The state House of Representatives Tuesday approved amendments strengthening a measure that would make abortions illegal in Idaho as a means of birth control.

The bill, similar to one being considered by state legislatures in Minnesota and Maryland, would make all abortions illegal in Idaho except in cases of rape, incest, profound fetal physical or mental disability, or threats to the life or the health of the mother.

The National Right to Life Committee, which helped draft the bill, says it hopes the measure will become the test case that could overturn the Supreme Court's 1973 decision in Roe vs. Wade, which legalized abortion nationwide.

The bill's sponson, Rep. L. Ed Brown, R-Pocatello, said he is ''cautiously optimistic'' the House will pass and send the bill to the Senate when it votes on it later this week or early next week.

One amendment to Brown's bill would make all abortions illegal in Idaho after fetal viability, except when the life of the mother is endangered.

Fetal viability is generally reached after the 20th to 23rd week of pregnancy when a fetus could live outside the womb.

The amendments were made in consultation with legal and constitutional scholars and will make the bill better able to withstand certain legal challenges, Brown said.

''We have honestly pushed this thing as far as it can go as a test of the constitutionality of the law,'' Brown said. ''There is no question this law, if passed, will be challenged by somebody, which probably, ultimately will take it to the Supreme Court.''

Supporters believe it would halt up to 93 percent of abortions in Idaho, but opponents argue it is broadly unconstitutional.

''I think it's ridiculous,'' said Jack Van Valkenburgh, with the Idaho branch of the American Civil Liberties Union. ''HB625 is not going to be upheld by the Supreme Court.''

''I too believe this is unconstitutional,'' said Rep. Ruby Stone, R-Boise. ''It sounds like we're in Romania, it doesn't sound like we're in America.''

#90065u2243 03/06/1990 ~United Press International

LANSING, MI (MARCH 6) UPI - General Motors Corp. said Tuesday it plans to add a second vehicle to its Reatta Craft Centre in Lansing, Mich., as part of the automaker's quest to have all U.S. assembly plants in full use by 1992.

The addition of a second product line would mean adding another shift at the Craft Centre, which now employs over 600 workers on one shift to assemble Buick Reatta two-seat coupes and convertibles at the pace of 42 cars a day.

Jim Rucker, manager of the plant since last April, declined to say which vehicle GM will add to the Craft Centre, although he said a final decision will be made this year. Industry sources say it would have to be another specialty market vehicle that sells at volumes of about 10,000 units a year.

The vehicle would also have to fit in with the rather novel production practices at the plant, which uses a work station concept where cars move from one work bay to the next via automatically guided vehicles instead of along an assembly line.

"There has been talk about adding another product to make the plant stronger financially," said Jerry Maurer, vice president of United Auto Workers local 1618 at the plant. "We sure are all anxious about it."

The Craft Centre, which opened in late 1987 on the site of an old axle and forging operation that closed in 1982, is now operating at only 37.5 percent of capacity because of slower-than-anticipated Reatta sales.

Maurer said most workers idled by the 1982 closing have found jobs at other plants, meaning a second shift would come from workers now idled in GM's jobs bank.

Rucker, who has been busy working on plans to add a second product, conceded the Craft Centre must raise production levels substantially in order to be profitable.

"We have the capacity to build 56 cars a day on one shift, or 112 cars a day using two shifts," Rucker said during a tour of the facility, which performs stamping, welding, painting and final assembly operations. Buick dealers sold 7,905 Reattas during 1989, up from 4,514 units in 1988, the car's first year on the market.

A recent tour of the Craft Centre by Buick dealers, some of whom have complained about the Reatta's high price, helped them understand how the Reatta is built and why it is priced in that range, Rucker said.

Reatta sales are expected to total about 9,000 units this year - although Rucker said about 2,000 of those will fill a fleet order placed by National Car Rental Co. for its Emerald Isle renter program.

MONTEVIDEO, URUGUAY (MARCH 6) UPI - President Luis Alberto Lacalle sent a tough economic plan to Parliament Tuesday, calling for increased taxes and sharp hikes in prices for gas and public utilities.

The proposals came five days after Lacalle took office and were aimed at reducing a soaring deficit, cutting inflation and ''improving the general situation of the country,'' Economic Minister Enrique Braga said.

Braga said in a speech Monday night that the plan, described as ''fiscal shock'' by political analysts, will stave off hyperinflation.

The economic plan sent to the Senate included a 1 percent hike in sales taxes to 22 percent, and an increase of 3.5 percent in social security payments for workers and businessmen.

Other measures included a 100 percent hike in property taxes, new taxes on non-productive land and a government duty on real estate transactions.

Land buyers will be required to pay a 1 percent tax on the total value of the purchase while sellers will be forced to dole out 3 percent of the total sale.

The plan also called for raising gasoline prices from $2.82 a gallon to $3.04 a gallon as of Tuesday.

''These initiatives were neccesary,'' Braga said, warning that the economic situation in the country ''is serious.''

The fledgling Lacalle government inherited an economy in crisis, with inflation more than 89 percent in 1989, a deficit that consumed 8 percent of the gross domestic product of $7.9 billion and an ''overburdened and inefficient'' state bureaucracy, a government spokesman said.

Though it met wide criticism, the economic program is likely to be ratified in Parliament. Lacalle created a governing coalition with the Colorado Party, the chief opposition group, by incorporating four Colorados in his Cabinet.

WASHINGTON (MARCH 6) UPI - Defense Secretary Dick Cheney is going to release details and costs of the highly classified F-117A stealth fighter, which was used to drop bombs on Panama during the Dec. 20 invasion, the Pentagon said Tuesday.

The radar-evading fighter - the older cousin of the B-2 stealth bomber -

has been flying since 1981, but the Pentagon did not even acknowledge its existence until two years ago when it released one fuzzy photograph of the craft.

There are about 60 of the fighters, which resemble an awkward-looking black bat with a protruding cockpit for the lone pilot. They are based at Tonopah test range in the Nevada desert.

Unlike the B-2, no detailed photographs or details of the costs or capabilities of the stealth fighter have been released.

Two F-117s, purported to be highly accurate, dropped 2,000-pound bombs to stun elite Panamanian troops in their barracks without causing unnecessary damage during the Dec. 20 invasion, Pentagon officials said.

Army Lt. Gen. Carl Stiner, operational commander of the U.S. invasion, disclosed recently he also had four additional stealth fighters in the air over Panama, ready to bomb remote hideouts used by the Panamanian leader, Gen. Manuel Antonio Noriega. They were not needed, however.

Pentagon spokesman Pete Williams said Cheney, acting on repeated news media requests, signed Monday a letter of notification to Congress that he intends to publicly release information and photographs of the supersecret F-117A in 14 to 20 days.

Williams had not fixed date for the release, but said the information will include ''costs, capabilities and a history of the program.''

The fighters, paid for under the secret or ''black'' part of the Pentagon budget, first became operational in October 1983. But they flew only at night to avoid detection by Soviet spy satellites.

Three of the twin-engine planes have crashed since then, killing two of the pilots.

The aircraft is designed to carry ''smart weapons'' that can be guided into targets by laser beams or television cameras. The shape of the craft minimizes the reflection of radar beams and the plane's skin absorbs radar beams searching the skies.

#90065u2278 03/06/1990 ~United Press International
EAST BERLIN (MARCH 6) UPI - Huge crowds of East Germans turned up Tuesday to cheer and jeer senior West German politicians, including Chancellor Helmut Kohl, who participated in electioneering in advance of March 18 elections.

An estimated 25,000 people chanting ''Helmut, Helmut'' and ''Long Live Freedom'' thronged the main square of the East German city of Magdeburg, where Kohl addressed a meeting of the East German conservative Alliance for Germany - backed by his Christian Democratic Union.

''There will be no Fourth Reich,'' Kohl said, in an apparent reference to international fears of the large power a reunited Germany would hold.

Many in the crowd waved West German flags, but a few jeered and threw eggs toward Kohl.

In Karl Marx Stadt about 150,000 turned up to listen to former West German Chancellor Willi Brandt, the honorary chairman of the opposition Social Democratic Party and the architect of the ''Ostpolitik'' of East-West rapprochement.

''It is worth it to stay here and to help out in the new beginning,'' he said, in reference to the daily exodus of about 2,000 East Germans seeking political stability and better wages in West Germany.

Kohl and Brandt were among several senior West German politicians who have toured East Germany to support parties close to their own political bases in the past few weeks, before the March 18 elections, the first free vote in East Germany's 40 year history.

The party political scene in East Germany largely reflects that in West Germany, with conservatives and social-democrats in close competition for a majority, with a liberal bloc in the middle, that could enter a coalition with either of the main groups.

#90065u2288 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The number of foreign corporations headquartered in the Washington area grew by 80 percent in the past decade with 129 such companies now based here and accounting for 16,000 jobs, according to a study released Monday.

The survey found that foreign businesses invested more than $150 million last year alone in Northern Virginia, suburban Maryland and the District of Columbia.

In all, businesses from 15 foreign countries are headquartered in the region, with 66 percent from Britain, France and West Germany.

For an overwhelming number of businesses, the reason for setting up headquarters in Washington was the proximity to the federal government,

the study said.

Easy access to Washington Dulles International, Washington National and Baltimore-Washington International airports also was a significant reason.

The international accounting and consulting firm of KPMG Peat Marwick conducted the study, and released it in cooperation with the Greater Washington Board of Trade.

The study, conducted last summer, found that 219 foreign-owned companies were doing business in the Washington area, with 129 of them headquartered here.

About 80 percent of those 129 companies moved their headquarters to the Washington area within the last 10 years, the study found.

The survey found 62 companies headquartered in Northern Virginia, 52 in suburban Maryland and 15 in the District of Columbia, accounting overall for about 16,000 jobs.

The area surveyed was seven Maryland counties, six Northern Virginia jurisdictions and the district.

NEW YORK (MARCH 6) UPI - The Federal Reserve Bank continued to grapple with a rising dollar Tuesday through intervention in the New York trading session on behalf of Japan's yen, but the U.S. currency easily rebounded.

Currency traders said there was little sign that action by the Fed and other world central banks had dulled the market's appetite for dollars, now favored over the feeble yen and once-dominant West German mark.

Concerted central bank action since last week backed the dollar down after it threatened to leave the 1.70-mark and 150-yen barriers behind, but there was still upward pressure on the dollar, traders said.

"I think there's a sentiment of bullishness that's been in the market for two weeks in spite of the central banks," said Carol Callanan, vice president in charge of corporate trading for Credit Lyonnais.

"In the very near term prospects are slightly better for the dollar to come up against all the other currencies," said John McCarthy, chief dealer for the Amsterdam Rotterdam Bank.

In late New York currency trading the dollar was quoted at 1.7028 German marks, up from 1.6956 marks Monday. The U.S. unit was changing hands at 149.75 Japanese yen, ahead from 148.91 the day before.

Weakening the mark are misgivings by international investors about German economic and political reunification, amplified by evidence the reform process throughout the former East Bloc will be difficult.

Even more problematic is Japan. Its central bank is under pressure to raise its key lending rate to brace the yen and cool inflation, but this is opposed by the Finance Ministry. The Bank of Japan itself reportedly fears raising the rate now could worsen financial market volatility.

The Bank of Japan has held off for so long now, traders said, that whatever it does may be too little too late. "Unless they raise it a full (percentage) point, the market's going to have discounted it," Callanan said, meaning that current rates already accounted for an increase.

"I'm not sure they'll do it officially for a while," McCarthy said, but

added that a sharp yen dive could force the bank's hand, despite world central bank assistance in restraining the surging dollar.

In New York the British pound rose to $1.6470 from $1.6447. Other dollar rates: 1.4995 Swiss francs, up from 1.4951; 5.7560 French francs, up from 5.7250; and 1,257.25 Italian lire, up from 1,251.

In European trading the dollar ended lower against the main currencies. In Frankfurt it declined to 1.6993 German marks against 1.7030 Monday, and also fell in Zurich, to 1.4970 Swiss francs against 1.5005.

The dollar closed lower in Paris, Brussels and Milan at 5.7345 French francs against 5.7410, 35.30 Belgian francs against 35.31, and 1,252.95 Italian lire compared with 1,253.30 the day before. In London, the pound moved up to $1.6490 against $1.6390.

In Tokyo earlier the dollar plunged against the yen amid heavy intervention by the Bank of Japan, closing at 149.50 yen against 149.95. It was estimated that Japan's central bank sold dollars for $500 billion.

Republic National Bank in New York closed cash gold at $404.30 an ounce, up from $404.25 Monday. The New York Commodity Exchange settled gold at $403.60 an ounce, down from $404.10. In Zurich gold closed higher at $406 an ounce against $404. London gold rose to $404.75 an ounce from $403.25.

Republic closed cash silver at $5.13 an ounce, up from $5.125. Comex spot silver was unchanged at $5.116 an ounce. Zurich silver was unchanged at $5.15 an ounce. London silver rose to $5.15 an ounce from $5.13.

(MARCH 6) UPI - Italy's prime minister is in Washington where he expressed concern about a U-S-backed plan for the reunification of Germany. Prime Minister Guilio Andreotti told reporters that all 16 members of NATO... NOT just the United States, Britian, France and the Soviet Union.... must have input into the plan to reunify Germany. U-S and Italian officials say Andreotti's talks with President Bush will center on changes in Eastern Europe.

Soviet officials say Mikhail Gorbachev is NOT going along with the idea of a united Germany being a member of NATO. Soviet Foreign Ministry spokesman Gennady Gerasimov says the Soviet leader dismissed the concept during two days of meetings with East German Premier Hans Modrow. An East German spokesman backed Gerasimov, saying- quote- ''the inclusion of one Germany in NATO would be a continuation of the Cold War in a new era.''

House Speaker Thomas Foley says he supports a plan by Congressman Richard Gephardt that calls for the United States to launch economic assistance to support reform in the Sovet Union. Gephardt- a Missouri Democrat- offered a proposal that includes waiving trade restrictions and relaxing limits on high-tech exports to Moscow. Foley indicates that Congress as a whole may be more receptive to the idea of aid for the Soviet Union than in the past.

The world may be relieved to know that the Bulletin of Atomic Scientists moved the hands on its Doomsday Clock back four minutes. It now stands at

10 minutes to midnight. Bulletin editor Len Ackland says in Chicago that recent changes in Eastern Europe have diminished the risk of global nuclear war. The Doomsday Clock first appeared on the Bulletin's cover in 1947 and has become a symbol of how close the world is to Armageddon.

#90065u2344 03/06/1990 ~United Press International

NEW YORK (MARCH 6) UPI - The stock market closed broadly and sharply higher Tuesday in light trading as a rebound in the bond market sparked late waves of computerized program buying.

The Dow Jones industrial average, which fell 10.81 Monday, jumped 27.25 to close at 2676.80.

Broader market gauges fared even better than the blue-chip indicator. The New York Stock Exchange composite index climbed 2.02 to 186.17 and Standard & Poor's 500-stock index rose 4.19 to 337.93. The price of an average share rose 38 cents.

Advances pounded declines 1,028-458 among the 1,990 issues crossing the NYSE tape. Big Board volume was 143,640,000 shares, compared with the 140,110,000 shares traded Monday.

Analysts said a late rally in the bond market on the heels of Monday's sharp declines spurred the computerized buying, used to profit on price differences between stocks and stock-index futures. In late trading, Treasury bonds were up about 5/8 point after tumbling 1 1/8 points Monday.

"Lots of people hopped on board," said Jerry Hinkle, a trader with Sanford C. Bernstein and Co., "and maybe a lot will wonder what they bought tomorrow morning, but the tape looks good," he said.

With Tuesday's close, the Dow industrials find themselves just shy of 2680 "which has been a formidable technical resistance level. We still need to get through that," he said.

As for what triggered the bond rally, Hinkle said he felt it was just a bounce back after the slump Monday rather than in anticipation of any bullish news in the February employment report Friday.

"We expect the employment data Friday to be quite strong, which would normally produce the opposite effect in the bond market," he said. Signs of economic strength are usually not viewed favorably by bond traders, since a strong economy will not make the Federal Reserve feel it is necessary to lower interest rates.

Analysts said anticipation of the job data, the first government report on

the economy last month, kept many investors on the sidelines. They also said bargain hunting in consumer issues, which have recently lagged other industrial issues, bolstered the market. They noted renewed buying interest in issues such as Philip Morris, Coca-Cola, Merck, and Johnson & Johnson.

On the trading floor, American Express was the most active issue, off 1/4 to 27 1/4. Philip Morris followed, up 1 3/8 to 38 3/4. National Medical Enterprises was third, off 1/8 to 29 7/8.

Other consumer issues which gained included Coca-Cola, up 1 1/4 to 71 1/2; Merck, up 1 3/8 to 70 1/2; and Johnson & Johnson, up 1 1/8 to 55 1/4.

Among the other blue chips, Texaco added 1 to 60 after several analysts' recommendations and led other oil issues higher, Woolworth was up one to 61 3/4, AT&T rose 3/4 to 40 5/8, and IBM gained 3/4 to 105 3/4 after announcing price increases on many products.

Elsewhere in the oil sector, Mobil added 1 1/8 to 62 5/8, Exxon rose 7/8 to 47 1/8, and Chevron gained 7/8 to 68 1/2.

In other trading, First Fidelity Bancorp climbed 1 5/8 to 23 7/8 after announcing Monday it would reduce its work force by 1,400 employees in an effort to trim operating expenses.

Pinnacle West Capital, Arizona's largest corporation, surged 2 1/8 to 13 7/8 after its board Monday rejected a revised $1.7 billion acquisition offer from PacifiCorp, of Portland, Ore.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 175,552,700 shares, compared with 168,644,810 shares traded in the previous session.

Prices closed sharply higher in active trading on the American Stock Exchange. The Amex Market Value index added 2.17 to 358.81. Advances led declines 348-220 among the 817 issues traded. The price of an average share gained eight cents. Composite volume totaled 18,739,100 shares, compared with 14,095,120 shares traded Monday. Hillhaven led the Amex issues, up 1/8 to 1 1/4.

The National Association of Securities Dealers composite index rose 2.18 to 432.33.

WASHINGTON (MARCH 6) UPI - Military personnel experts pleaded with Congress Tuesday not to let huge troop cuts take place later this year, and House Democrats appeared restive about a decision on the issue by key House leaders.

The personnel chiefs of the four branches of service told the military personnel subcommittee of the House Armed Services Committee that the refusal of Chairman Les Aspin, D-Wis., to let them transfer money to personnel accounts from other funds could return the armed forces to the days of the late 1970s when there was a ''hollow force.''

The Pentagon estimates that in addition to various money-saving devices that will have to be used, somewhere between 45,000 and 60,000 servicemen have to be forced out of the military before the end of the year from a volunteer force of about 2.1 million. The military already is attempting to reduce its size by about 54,000 troops in 1990, and for 1991 plans an additional reduction of 38,000.

Last August, when budget-balancing cuts were ordered government-wide, the Pentagon decided not to exercise its option to seek an exemption for personnel accounts and cut more heavily into weapons programs. Now they have asked four congressional committees, including Aspin's, for

permission to ''reprogram'' some $777 million from other accounts into the personnel accounts.

Aspin has refused to permit the transfer, and Democrats on his committee plan to meet Wednesday to discuss the action, one that has been endorsed by House Speaker Thomas Foley. If put to a vote of the full committee, it would take just six Democratic defections added to the panel's 22 Republicans to override Aspin's action.

House Republican leader Robert Michel of Illinois raised the issue Tuesday on the House floor, saying Aspin's action ''has implications that go beyond the jurisdiction of his committee.''

Speaking of the thousands of servicemen who would get pink slips, Michel asked, ''Is this really what we want? I don't think so. I certainly hope not. ... Let's at least get a vote in this House on these requests.''

At the subcommittee hearing, Vice Adm. Jeremy Boorda, the Navy's deputy chief for personnel, cautioned: ''There are better ways to make the military smaller. Those ways can be executed in a way that can be humane, fair and will lead to a good Navy in the future.

''This way,'' he added, ''will result in one simple fact: you will have a Navy that by the end of August looks exectly like the one you had in 1979.''

Boorda said the cuts expected at the Navy would drive up the average work week on ships at sea from 81 hours to 91 hours.

Lt. Gen. Allen Ono, the Army's personnel chief, said it would be wrenching if the military was not allowed to transfer money into personnel accounts.

Without the $232 million his service needs, Ono said, routine summer moves will have to be suspended for 18,000 soldiers, whose children will have to start school in one place and transfer later in the year. Promotions will be stalled for 24,000 servicemen at a loss in income of $25 million, and 14,000 will have to be turned out of the Army three months before the end of the fiscal year.

Lt. Gen. Thomas Hickey, the Air Force personnel chief, said the cuts in his service would be ''impossibly viscious. It is doubtful we could maintain even the fascade of a viable force.''

NEW YORK (MARCH 6) UPI - Authorities Tuesday arrested three more suspects in the slaying of a state trooper during an undercover drug buy that erupted into a bloody gunbattle in which two other officers were wounded.

Two suspects wounded in the Monday afternoon shootout already have been

charged with murder in the killing of trooper Joseph Aversa, 31, a member of the drug task force cut down in a hail of bullets Monday in the Jacob Riis housing project. The two also were charged with attempted murder and attempted robbery in the wounding of two undercover city detectives.

The three new suspects were arrested about 3 a.m. in Queens by members of the New York Drug Enforcement Task Force, said Mary Cooper, a spokeswoman for the federal Drug Enforcement Administration.

The names of the men were not being released and Cooper declined to say exactly how they were linked to the killing of Aversa. Cooper said authorities were not looking for any other suspects linked to the shootings.

The two detectives were shot in the legs during the fight, which flared after two suspects, David Hernandez, 20, and Oswaldo Santana, 27, allegedly tried to rob one of the task force members of $40,000 in cash he was using to buy 4.4 pounds of cocaine.

The two detectives, whom police have not identified because of their undercover work, were listed in stable condition at Bellevue Hospital, said Sgt. Diane Kubler, a police spokeswoman.

Hernandez was shot in the stomach and the arm and was listed in stable condition at Bellevue, police said. Santana was also admitted to Bellevue with a wound in the foot.

Federal officials were also considering filing their own charges against Hernandez and Santana because Aversa was a member of a federal task force, Cooper said.

''That's a possibility. They're talking over a lot of things,'' Cooper said.

Congress has passed a death penalty law for those convicted of killing law enforcement officers while engaged in a pattern of racketeering, such as a major drug trafficking operation.

New York state does not have a death penalty law.

The members of the task force apparently were set up for the robbery, authorities said.

''They were attempting to rob the undercover officer,'' Police Commissioner Lee Brown said. He said the drug buy was the culmination of a two-week investigation by the task force, but added that it was unclear whether the suspects knew they were dealing with police.

Aversa, a resident of Sparrow Bush, N.Y., in Orange County, was part of a back-up team of officers. He was shot in the left eye outside the red-brick projects when he rushed to aid one of the undercover detectives, police said.

Aversa joined the state police in March 1984 and had worked on the task force since last October. He was married but had no children.

State Police said Aversa's funeral had been scheduled tentatively for 11 a.m. on Friday in Port Jervis.

#90065u2401 03/06/1990 ~United Press International

HARTFORD, CT (MARCH 6) UPI - Six peace activists were sent to jail Tuesday for breaking into a Navy facility last fall and hammering and pouring blood on the hull of a Trident submarine, officials said.

''This will stop nobody, least of all the defendants,'' said John Bach, a spokesman for the activists, who call themselves the Thames River Plowshares, following the sentencings in U.S. District Court.

Judge Allan H. Nevas sentenced five of the activists to two months in jail on conspiracy convictions and ordered them to pay minor assessments, a court official said.

Sister Anne Montgomery, a Roman Catholic nun, was sentenced to four months in jail because of prior convictions resulting from similar protests, a court clerk said.

Each of the six protesters had faced a possible six months in jail and $125,000 fines for conspiracy to enter a Naval reservation for an unlawful purpose.

Jackie Allen, 28, of Hartford, Allen was sentenced to two months in jail for each of three counts: conspiracy, trespassing at a Navy installation and damage to government property. She also was fined $35, court officials said. The jail terms will run concurrently.

The others sentenced to two months in jail were Art Laffin, 35, of Hartford, Kathy Boylan, 46, of Northport, N.Y., Elmer Maas, 54, of New York City and Jim Reale, 31, of Baltimore.

''Today's sentencing points up to the fact that the federal judiciary is not going to rule on the morality in the immoral weapons systems,'' Bach said.

The group admitted it carried out a Labor Day weekend ''raid'' on the USS Pennsylvania, with members swimming and canoing up the Thames River on Sept. 4, 1989, into the U.S. Naval Underwater Systems Center in New London.

Seven activists hammered and poured their own blood on the hull of the Pennsylvania, a ballistic missile firing Trident submarine awaiting commissioning, the group said.

The protesters claimed they were heeding the Bible's call to ''hammer swords into plowshares,'' and maintained they were innocent despite their convictions Dec. 19, 1989, in federal court in Hartford.

#90065u2407 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - New York Mayor David Dinkins delivered a letter Tuesday to Soviet Ambassador Yuri Dubinin urging speedy permission for Carmela and Vladimir Raiz and other so-called Soviet Jewish refuseniks to emigrate.

Carmela, 42, and her son, Moshe, 12, have been in the United States since December on a four-month tourist visa, meeting with Dinkins, President Bush, Housing Secretary Jack Kemp and as many other influential people as

possible to press their case for freedom.

Vladimir, 47, an unemployed molecular biologist, has been refused permission to emigrate to Israel since 1972. The state claims he has ''access to state secrets,'' but Carmela, a violinist with the Lithuanian Symphony Orchestra in Vilnius, said that has not been the case since 1965.

Vladimir also incurred the wrath of the KGB when he refused to testify at the 1977 trial of Natan Sharansky, who has since been permitted to emigrate to Israel.

As recently as May, the state wrote Valdimir it had ''no objection to your leaving for permanent residency abroad,'' but no visa has been issued.

Dinkins said at a news conference outside the Soviet Embassy he is hopeful Soviet leader Mikhail Gorbachev's reforms will translate into freedom for the Raizes.

''I make a personal appeal to you to review the status of Carmela and Vladimir Raiz and ensure them speedy permission to emigrate,'' Dinkins said in his letter to Dubinin, who visited the mayor soon after his January inauguration.

''I also ask that the Soviet Union ... resolve the other cases of refuseniks who have been denied emigration because of supposed one-time access to state secrets or permission denied to them by recalcitrant relatives,'' he said.

Dinkins also noted the recent rise in anti-Semitism in the Soviet Union and asked that ''authorities take all necessary measures to ensure the safety of the Jewish community.''

After he delivered the letter, Dinkins met briefly with David Chikvaidze, an aide to Dubinin, who told Dinkins he would pass the letter on to Moscow.

Carmela, who speaks near-fluent English, said she always ''has a hope'' that things will be different for her family.

''But I am 18 years in refusenik. It was the case under Brezhnev, Andropov and now under Gorbachev,'' she said. ''I am not fighting Gorbachev. But there are other people, still from Brezhnev's time (in the government).''

Her dream is for her son to celebrate his Bar Mitzvah this July in Jerusalem and even gave Dinkins an printed invitation.

''Carmela, without your freedom, ours is incomplete,'' Dinkins said. ''Permit me to repeat here a common prayer, but with one slight change: 'This year in Jerusalem.'''

The prayer states, ''Next year in Jerusalem.''

#90065u2459 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Senate GOP leader Robert Dole and other Republicans announced Tuesday they will seek passage of a constitutional amendment to outlaw burning of the U.S. flag after federal courts overturned a law that forbids the act.

''This shouldn't take long,'' Dole said. ''We've heard all the arguments, let's vote.''

Passage of an amendment requires two-thirds approval in the Senate and House and ratification in three-quarters of the 50 state legislatures.

Dole told reporters he will push for a vote soon after the Supreme Court rules within the next few months on two recent lower court cases. In both cases federal judges ruled that the Flag Protection Act, which outlaweddesecration of the flag in October, is unconstitutional.

In the latest ruling on Monday, U.S. District Judge June Green followed precedent when she said the law violates the first amendment guarantee of free expression.

''The score is now flag burners two, the American people zero,'' Dole said.

Lawmakers expect the Supreme Court to maintain its position that flag burning is a legal form of free speech in subsequent consideration of the issue.

''We need to go ahead on a constitutional amendment as soon as the Supreme Court acts on the matter,'' said Sen. Strom Thurmond, R-S.C.

Dole's call to amend the Constitution renews a battle that has been waged since the Supreme Court's landmark June decision on a flag burning case in Texas.

President Bush immediately called for an amendment, but Dole's efforts failed in a 51-48 Senate vote in October. The vote fell 15 short of the two-thirds necessary to pass a constitutional amendment.

Instead, Congress passed the Flag Protection Act, which outlawed physical desecration of the flag.

The measure became law without Bush's signature on Oct. 28, but days later demonstrators challenged the new statute by burning flags on the steps of the Capitol and in Seattle. The protesters were arrested, but both arrests have now been ruled unconstitutional.

''I voted for the statute,'' Thurmond said, ''but I made the statement then that I had deep concerns about it.''

Dole said the statute, which directly contradicted the Supreme Court's ruling, was destined to fail.

''The way to protect our flag is not a hocus-pocus statute,'' Dole said. ''The way to protect our flag is with an affirmative step - a constitutional amendment.''

While Dole presses to bring a vote to the Senate floor, Rep. Chuck Douglas R-N.H, said he will circulate a petition next week to force a vote in the House.

#90065u2475 03/06/1990 ~United Press International

(MARCH 6) UPI - Oil prices dropped Wednesday as the market renewed its downward trend despite two explosions on board a barge loaded with 4.4 million gallons of heating oil at Citgo Petroleum Corp.'s Linden, N.J., terminal.

Unleaded gasoline for April delivery fell 1.51 cents to 57.79 cents a gallon on the New York Mercantile Exchange, while April delivery home heating oil declined 0.77 cent to 57.22 cents a gallon.

On the New York Harbor cash market, unleaded gasoline dropped 1.61 cents to 55.95 cents a gallon, with heating oil declining 0.55 cent to 59.70 cents a gallon.

The benchmark West Texas Intermediate crude for April delivery slipped 28 cents to end the day on the Merc at $21.30 a barrel. Estimated trading volume was a below-par 70,835 contracts.

WTI fell 27 cents on the U.S. Gulf Coast cash market to $21.28 a barrel.

Overall, ''the products led the market down,'' said Bob Jonke of Cargill Investor Services.

''Other than the explosion, it was kind of dull,'' said Bill Hinton of Stotler & Co. in New York.

Both gasoline and heating oil rose 0.25 cents after news of the explosion, Hinton said.

Initial reports of the explosions, which occurred about an hour before the Merc's 3:10 p.m. EST closing, were confused as to what the barge was carrying.

The first of the two explosions occurred shortly before 2:00 p.m. EST about 100 to 200 feet off the Citgo terminal in the Arthur Kill waterway separating New Jersey from Staten Island, said spokesman Kent Young at Citgo's Tulsa, Okla., headquarters.

Young said the 4.4 million gallons of heating oil was owned by Cargill Inc.'s Northeast Petroleum and was bound for Boston.

Spokesman Greg Lauser at Cargill's headquarters in Minneapolis said the heating oil was worth an estimated $2.6 million.

The downward bias of the oil market had been fed by continued increases over the past seven weeks in gasoline inventories.

Both Hinton and Jonke said traders were looking for the weekly survey of the American Petroleum Institute to show gasoline inventories rose an additional 2 million barrels or more last week.

Released after the Merc closing, API reported gasoline stocks last week rose 1 million barrels, bringing the increase over eight weeks to more than 33 million barrels.

Crude stocks gained 4 million barrels and heating oil and other distillates declined 2.5 million barrels, API reported.

On the European spot market, Britain's widely traded North Sea Brent fell 12 cents to $19.15 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - lost 2 cents to $16.28 a barrel.

WASHINGTON (MARCH 6) UPI - Two bills introduced in the House Tuesday would give District of Columbia residents voting representation in Congress by making them Maryland voters.

One bill would let Maryland annex the city, and the other would allow the city to remain autonomous while its residents vote for Maryland's two senators. District residents currently are represented in Congress by a non-voting delagate.

The measures, introduced by two Republicans, came in response to an aggressive but uphill effort by leaders in the predominantly Democratic city to make it the nation's 51st state, which would give it a congressional delegation expected to be heavily Democratic.

In 1978, a proposed constitutional amendment passed by Congress would have given the district two senators and one congressman, although it did not deal specifically with the statehood issue. It required the ratification of three-fourths of the states, but got only 16 before expiring in 1985.

The bill introduced Tuesday by Rep. Stan Parris, R-Va., would allow district residents to vote for Maryland's two senators and be candidates for the jobs, and temporarily would give the city's delegate in the House full voting rights.

At the next House reapportionment, expected in 1991, the district would be incorporated into Maryland for the purposes of House representation and the D.C. delegate position would be dissolved, said Parris spokesman Mark Strand.

Under the bill, based on a law that died in 1801, Maryland would not annex the 60 square-mile District of Columbia, which has about 630,000

residents. But Rep. Ralph Regula, R-Ohio, introduced a separate bill that would cede most of the land occupied by the district to the state of Maryland, land which Maryland held until 1790. A small federal enclave would remain where federal buildings and land would stay under congressional control.

Maryland Gov. William Donald Schaefer suggested there should be a study on the implications of annexing the district ''if the federal government wants to do it.''

Rep. Helen Delich Bentley, R-Md., read a statement on the floor of the House calling voting representation a ''fundamental right'' of district residents, but denouncing Parris's bill.

Most of the other members of the Maryland congressional delegation also opposed the bills, as did the D.C. Statehood Party.

Parris's bill would reduce by two the number of members of the electoral college - the 538-member body that actually elects the nation's president.

If Parris's bill became law, the city would lose its three electoral votes and Maryland would gain one, with city residents voting as part of the Maryland populous.

#90065u2488 03/06/1990 ~United Press International

CRESTED BUTTE, CO (MARCH 6) UPI - An explosion leveled a two-story brick bank shortly after it opened Tuesday, killing three people and injuring 12 others, officials said. Federal agents were investigating whether the building had been bombed.

The explosion in the Crested Butte State Bank occurred about 9 a.m. when 15 people, most of them bank employees, were inside, said Bob Gillen, spokesman for the small town's emergency response team. Town Marshall Rich Largo said the blast lifted the roof off the walls, then the whole building collapsed.

''There's nothing left but the bank vault sitting in the rubble,'' said Michelle English-Batchelor, a passerby. ''It just isn't there. It was a big building. Now it's just an empty space.''

Incredibly, six of the people inside the bank required only first-aid. ''It's a miracle that anyone got out alive,'' said John Norton, a resident.

By late afternoon investigators had found no physical evidence of what caused the explosion.

There were no natural or propane gas lines to the building, which had been heated by electricity, but the town of 1,000 residents sits over abandoned coal mines containing pockets of volatile methane gas, Gillen said.

Residents also said there had been bomb threats made in recent days to other businesses in the town in mountainous west-central Colorado, and a team from the U.S. Bureau of Alcohol, Tobacco and Firearms was sent to investigate. Gov. Roy Romer also offered the help of the Colorado Bureau of Investigation.

Joe Savino, 23, a teller at the bank who was in the building at the time of the explosion and suffered only minor burns, said, ''It definitely was not a gas explosion. I know there had been some bomb threats over the weekend at other places (businesses in Crested Butte).

''The first thing that came into my mind was that it was a bomb,'' Savino said.

Gillen and Savino both said they had no idea why anyone would want to bomb the bank. ''Everyone in town this size usually knows everything that's going on,'' Gillen said.

Six of the people inside the bank required only first-aid, and six more were taken by ambulance 28 miles to Gunnison Valley Hospital in Gunnison, where three, including Savino, were admitted. The other three, all seriously injured, were flown 90 miles west to St. Mary Hospital in Grand Junction.

A snowstorm prevented Flight for Life helicopters from landing at Crested Butte to pick up the injured.

Savino said he ''was standing in the center of the bank and I felt a gigantic explosion, and then the floor just sunk beneath me. Everything just fell in. I was covered up and could barely move.''

Several hundred townspeople quickly responded to the emergency, using backhoes and hand tools to try to dig through the debris to the survivors. Among those pulled from the rubble were three people killed in the blast, Gillen said.

The force of the explosion was so great that it blew debris into another building 50 yards away. Bill Folger, who works in the nearby Alpineer sporting goods store, said the force of the explosion shook his store.

''We definitely felt it, heard it,'' he said. ''It felt like a very intense sonic boom - no, more than that. It shook our building. Part of the bank window is imbedded in the side of our building. It broke out windows on top of our building.''

The possibility of a methane gas explosion was raised because the bank was situated near an area of town known as ''The Bench,'' where there are known underground deposits of methane gas left over from old coal mines. Gillen said he knew of no methane gas explosions in town in modern times.

Ron Walters, head of the ATF's San Francisco bureau, said a 10-man team was to fly to Gunnison on Wednesday on a C-130 cargo plane. The agents then were to drive to Crested Butte with a specially equipped explosives-investigation truck, he said.

OAKVILLE, Ontario (MARCH 7) UPI - Ford Motor of Canada Ltd. said Tuesday it will shut down the Windsor casting plant for the week of March 12, idling 750 hourly workers. The plant produces cast iron engine parts.

Ford also said it cancelled plans to close a glass plant in Niagara Falls, Ont. A total of 150 employees would have been placed on temporary layoff for the weeks of March 5 and March 12.

Ford said Monday February car sales fell 10.8 percent and truck sales dropped 19.8 percent compared with the same month last year.

Udo Kaul, vice-president of general sales, said ''February sales reflect market uncertainty about the (recent Canadian) federal budget and (high) interest rates.''

In results for all of 1989 disclosed last week, Ford's share of the Canadian market fell 5.1 percent from 1988 to 337,751 units.

WASHINGTON (MARCH 6) UPI - Farm organizations and the insurance industry asked Congress Tuesday to try to salvage the federally subsidized crop insurance program, rather than killing it as the White House has proposed.

The administration wants to drop the costly insurance program and replace it with a permanent disaster program in the Agriculture Department. The insurance program has cost the government $500 million a year but suffers from low enrollment rates.

Farmers have complained about high premiums and inadequate coverage.

At a Senate Agriculture subcommittee hearing, officials from the General Accounting Office, a congressional agency, repeated their assessment that crop insurance ''would be a more equitable and efficient way to provide disaster assistance'' than a disaster program.

Jonathan Kislak, deputy agriculture undersecretary, said the administration believes it would cost too much to fix the program. Agriculture Secretary Clayton Yeutter, however, has offered to work with Congress if it wants to explore a new insurance system.

Since 1980, when the program was created, the government has paid out $1.58 in claims for every $1 the program collected - including the government subsidy on premiums.

Critics said the disaster program proposed by the administration would be an ineffective replacement because aid would be available only if there were widespread losses, plus severe losses on a farmer's land.

''We firmly believe some type of a crop insurance program is preferable to a permanent disaster program,'' said Kansas farmer Doyle Rahjes, speaking for the American Farm Bureau, the nation's largest farm organization.

The National Farmers Union and the American Agriculture Movement also called for continuation of crop insurance, as did two insurance industry

groups, who said crop insurance was the best deal for the farmer.

''All producers who participate in federal farm programs should be provided automatically, and at no cost, basic minimum crop insurance coverage of at least 50 percent of their actual proven average yield,'' said AAM national director David Senter.

The Farmers Union said insurance ''does not need to be mandatory or free as long as it makes good business sense.'' It said higher coverage rates should be offered.

Leaders of the congressional commission that recently assessed the state of the crop insurance program said Congress should act now to extend the program for one more year as a way of assuring farmers that crop protection will be available. They also urged Congress to look at the commission's plan for a new insurance system.

A number of congressmen also have said they prefer crop insurance.

PRAGUE, CZECHOSLOVAKIA (MARCH 6) UPI - The pro-democracy coalition Civic Forum, whose Velvet Revolution led to the ouster of the hard-line Communist regime, outlined its election platform Tuesday that called for economic sacrifices.

''Our three main points are political democracy, a market economy and a willingness to sacrifice,'' the platform document said.

The program warned that Czechoslovakia, which is scheduled to hold parliamentary elections June 8, is facing tought times following more than 40-years of centrally planned economic system.

''We found the easiest way forward is not to promise anything except hard work and difficulties,'' senior Civic Forum leader Jan Urban said in presenting the platform.

''We are in the absurd position of demanding difficult economic steps which could harm our own electoral chances,'' he said.

But Urban said Forum recognizes that ''our citizens must be informed frankly and even cruelly about the true state of the nation.''

Forum is running as an umbrella organization of eight parties ranging across the political spectrum. Ivan Gabal, another senior Forum leader, emphasized it was doing so in a conciliatory spirit.

''We hope these elections won't be a plebiscite against the Communist Party, unless the Communists want it to be so,'' Gabal said.

The platform document said the Communist Party-led government, which was replaced peacefully late last year following demonstrations, ''bears full responsibility'' for the nation's problems.

Comparing Czechoslvakia to a house, Civic Forum said of the 1948 Communist takeover, ''Our house got a new owner who disinherited the previous owners and promised the tenants paradise on Earth.'' But, said Forum, ''The house turned into a prison for both the prisoners and the jailers.''

Civic Forum said its primary goal for the country is ''to return to Europe.'' To do this, the platform said, ''we must invest more and consume less.''

#90065u2563 03/06/1990 ~United Press International

NEW YORK (MARCH 7) UPI - The nation's gasoline supplies, hit hard when the December freeze damaged major refineries, climbed last week for the eighth week in a row, the American Petroleum Institute reported Tuesday.

For the week ended March 2, the weekly API survey found gasoline supplies increased to 246.4 million barrels from 245.4 million barrels in the prior week and finally moved even with year-ago levels of 246.4 million barrels.

The rise brings the increase over the eight-week period to more than 33 million barrels.

Stocks of unleaded gasoline, which accounts for 90 percent of the domestic market, also increased to 187.0 million barrels from 185.6 million barrels a week earlier and remained significantly higher than year-ago levels of 165.9 million barrels.

Gasoline production rose to 7.1 million barrels daily, from 6.8 million barrels-a-day in the previous week and higher than year-ago output of 6.6 million barrels daily.

Gasoline imports plummeted to 241,000 barrels daily from 333,000 barrels daily in the previous week and were well below year-ago imports of 423,000 barrels daily.

U.S. refineries operated at 86.4 percent of capacity last week, compared with 87.3 percent a week earlier and 80.3 percent a year ago.

Refinery utilization normally slips this time of year as refiners move into the maintenance turnaround from heating oil to gasoline production.

Imports of all refined products eased off to 1.6 million barrels daily from 2.6 million barrels daily in the preceding week, which was the same level level as a year ago.

Crude oil imports gained to 6.0 million barrels-a-day from 5.7 million barrels-a-day in the previous week but less than year-ago imports of 6.3 million barrels a day.

Crude oil inventories rose to 343.9 million barrels from 340.0 million barrels in the prior week and remained above year-ago levels of 333.9 million barrels.

Inventories of distillate - used for home-heating oil and diesel fuel - fell seasonally to 114.4 million barrels from 116.9 million barrels a week earlier but remained higher than year-ago levels of 106.9 million barrels.

Distillate production stayed steady at 2.7 million barrels daily, the same level in the prior week and a year ago.

Distillate imports fell to 227,000 barrels a day from 397,000 barrels-a-day in the previous week but were much lower than year-ago imports of 452,000 barrels a day.

#90065u2569 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - Declaring the nation's dropout problem ''both chronic and severe,'' President Bush signed legislation Tuesday to double the funding to local school districts that devise new ways to keep kids in school.

In a statement announcing his action, Bush said the bill will extend an existing Department of Education program aimed at stemming the problem by inspiring innovative strategies to reduce dropout rates and encourage students to return to school.

''We all know that the dropout problem afflicting our educational system is both chronic and severe,'' Bush said in signing the legislation. ''But this alarming situation can be turned around.''

And though noting that the problem ''is primarily a state and local responsibility,'' he said the legislation also recognizes ''that the federal government has an important role to play.''

The legislation appropriates $50 million for each of fiscal years 1990 and 1991.

The program, which has distributed 89 grants in 32 states, received a total of $45.6 million for fiscal years 1988 and 1989.

(MARCH 6) UPI - Italian Prime Minister Giulio Andreotti opened his three-day state visit to the United States today by expressing concern about the U-S-backed proposal to reunify Germany. Andreotti says all NATO countries should take part in the re-unification talks. President Bush said he looks forward to discussions with Andreotti.

West German Chancellor Helmut Kohl has surrendered his controversial demand that the Polish government renounce claims to war reparations in exchange for Germany promising to leave the border where it stands now. After several hours of closed-door meetings with his coalition partners... Kohl has declared that Germany will respect the current border.

Soviet President Gorbachev will NOT accept a united Germany as a member of NATO. East German Prime Minister Hans Modrow finished two days of talks with Gorbachev in Moscow today. A Soviet spokesman says NATO membership is out of the question for a unified Germany. He also dismisses Polish requests to join unification talks.

There are unconfirmed reports of fatalities in an explosion today that ripped through a bank in Crested Butte, Colorado. Authorities say at least one dozen people were injured in the blast, which blew pieces of debris into another building more than a lot away. Workers are digging victims out of the rubble.

The price of a first-class stamp is headed toward its 15th hike since the two-cent stamp was introduced in 1885. The U-S Postal Service's Board of Governors approved the proposed increase today. It would raise the price of the stamp from 25 to 30 cents. The plan still needs final approval from an independent commission.

#90065u2611 03/06/1990 ~United Press International

KUWAIT (MARCH 6) UPI - Fire fighters Tuesday extinguished a blaze that raged for 13 days aboard a U.S.-flagged Kuwaiti oil tanker in the southern Persian Gulf, the carrier's owner said.

Chesapeake Shipping Inc., owner of the oil tanker Surf City, said the fire was put out while the tanker was anchored 100 miles off the Gulf emirate of Fujairah.

The tanker, with a cargo of light oil, caught fire after an explosion

ripped through one of its tanks as the ship was heading out of the Strait of Hormuz past Iran's Abu Moussa island on its way for the Netherlands.

Two U.S. crew members were killed.

#90065u2626 03/06/1990 ~United Press International

ISLAMABAD, PAKISTAN (MARCH 6) UPI - Rebels led by the Afghan defense minister tried to overthrow Afghanistan's Soviet-backed regime Tuesday, but their coup attempt failed after fierce fighting in which the presidential palace was bombed in the capital city of Kabul, the government and news reports said.

President Najibullah appeared on television late Tuesday to announce that loyal Afghan forces crushed the rebellion. He said he had ordered all units to find Defense Minister Shah Nawaz Tanai and deliver him ''dead or alive'' to the general headquarters, the official Soviet news agency Tass reported.

''Thanks to the prompt and resolute rebuff from the army units deployed in the capital, the coup attempt by Tanai's supporters was liquidated, and Tanai himself had to flee,'' Tass quoted Najibullah as saying.

Earlier Tuesday, reports from Moscow and the United Nations headquarters in New York said fighting had raged around Kabul. Moscow reports said the fighting broke out at the airport, around the Defense Ministry and that the presidential palace had been was bombed. There were an unknown number of casualties.

''Defense Minister Shah Nawaz Tanai and a handful of war-mongering and extremist elements and power-hungry persons resorted to armed action against the interests of the people and the country,'' said a communique from the Afghan defense council led by Najibullah.

The council, in a statement broadcast on official Kabul Radio, said the ''heinous designs have been foiled by the armed forces deployed in Kabul City and that the situation is under control by the government.''

The Afghan government statement, monitored in Islamabad, said Tanai acted ''in collaboration'' with Gulbuddin Hekmatyar, leader of a Pakistan-based, Moslem fundamentalist guerrilla group fighting to topple Najibullah.

A later communique broadcast by the radio said Tanai had ''fled to an unknown place.'' At one point, officials called for his return ''dead or alive.''

The statement said ''all the soldiers and militiamen who unknowingly

joined the coup attempt should surrender to their nearest army garrison. They will be forgiven.''

The communique also announced authorities had imposed a dusk-to-dawn curfew in Kabul.

An official source in Islamabad also reported street battles and widescale movement of divisions throughout the city, as well as 37 aerial sorties, during the early hours of the attempted coup.

The official Soviet news agency Tass reported that the rebellion was ''strongly rebuffed by government forces.'' It said ''a number of civilians were killed when the mutineers staged an air raid and fired shells and rockets in the center of the city midday.''

#90065u2639 03/06/1990 ~United Press International

WHITE PLAINS, N.Y. (MARCH 7) UPI - International Business Machines Corp. said Tuesday it raised prices in the United States on various hardware products, printers and services and software products but set price reductions of up to 20 percent for memory for Enterprise Systems/3090, IBM's largest processor.

Increases of 3 percent for many hardware products, 4 percent to 5 percent for selected printers and 10 percent for services and many software products do not affect product prices or price changes announced after last Nov. 30, IBM said.

Also excluded are systems and application software for the System/370, Personal System/2 processors, Operating System/2 systems software, OfficeVision software products, memory options for the IBM 3990, Application System/400, and PS/2 systems, the IBM LaserPrinter, maintenance agreement changes and National Service Division hourly rates, IBM said.

Price changes on one-time charges for hardware and software products and new rates for hourly support services take effect immediately. Price changes on monthly charges for these products will take effect July 1.

IBM also announced the TokenWay 3174 Establishment Controller Model 90R, a new platform for connecting a local area network with a host computer. The product will sell for $5,250 and will be available May 25, the company said.

#90065u2659 03/06/1990 ~United Press International

SOUTH SAN FRANCISCO, Calif. (MARCH 7) UPI - Biotechnology giant Genentech Inc. is bracing for potentially bad news this week from the first large study comparing its expensive heart attack drug TPA with streptokinase, a much cheaper alternative.

The first results of an Italian study of the two drugs will be presented Thursday morning, and because of the way the study was done, analysts say it may show little or no advantage for TPA.

''There is reason to believe the results may not be as positive as we would like,'' Genentech spokeswoman Susan Rogers said.

TPA, often touted as the biotechnology industry's first blockbuster drug, is a genetically engineered protein that stops heart attacks by dissolving the blood clots that cause them.

Sold by Genentech under the name Activase, a single dose costs $2,200. By contrast, a dose of streptokinase, an older drug that attacks blood clots in a similar manner, costs $200 or less.

Earlier studies have compared the two drugs but not on the same scale as the Italian GISSI-2 study.

However, because the Italian test does not evaluate TPA's performance when used with another anti-coagualant drug, heparin, that is usually administered at the same time in the United States, it may not give the whole picture, Rogers said.

Preliminary results will be presented at an Italian Congress of Cardiology meeting Thursday, and further results will be presented at a meeting of the American College of Cardiologists March 17 in New Orleans.

For Genentech, the stakes are high. Activase sales last year climbed 30 percent to $196.4 million, accounting for nearly half the company's revenue.

''If streptokinase were to come out of this looking very good compared to TPA,you could see a substantial shift way from TPA,'' said Dr. James Mailhot, co-director of clinical cardiology for Mt. Zion Hospital in San Francisco.

About 12,000 Italian heart attack participated in the two-year trial, and another 8,000 patients from throughout Europe were included in portions of the study.

Earlier, smaller studies have indicated that TPA works faster than streptokinase to remove blood clots but that streptokinase does a better job of preventing the clots from re-forming because it stays in the bloodstream longer.

U.S. doctors typically administer heparin at the same time as TPA to prevent clots from re-forming. But many patients in the Italian study were not treated with heparin at all or were treated with it hours after TPA.

The difference may decrease the Italian study's relevance to the U.S. market.

''It's going to create some problems in interpretation,'' Mailhot said.

He said his experience suggests TPA is ''well worth'' the added cost over streptokinase, but others in the medical community still have doubts that could be solidified by a poor showing in the study.

-30- 3073
#90065u2678 03/06/1990 ~United Press International
(MARCH 6) UPI - When the New York Rangers fell from first place in the Patrick Division at midseason, rookie General Manager Neil Smith was branded as gun-shy at the trading table.

With his second acquisition of a bonafide scorer at the NHL trading deadline, Smith proved even if he was slow to pull the trigger, he has nothing against players who aren't.

The Rangers Tuesday received speedy sniper Mike Gartner from the Minnesota North Stars, a move that provides a right winger to complement playmaking center Bernie Nicholls, Smith's All-Star break aquisition.

Rangers Coach Roger Neilson said Gartner would play on the same line as Nicholls, whose move from Los Angeles has been a major factor in the Rangers' return to the division lead, and rookie Troy Mallette.

''We've got a chance to solve our speed problem,'' Neilson said.

The trade of Gartner, for the younger but less prolific right winger Ulf Dahlen, a fourth-round 1990 draft choice and future considerations, was the most dramatic of a busy but not extraordinary final day of trading.

Vancouver was particularly active, sending tough forward Rich Sutter and veteran defenseman Harold Snepsts to St. Louis and receiving rookie defenseman Jyrki Lumme from Montreal and blueline prospect Jack Capuano from the New York Islanders. The Canucks, barely in the playoff picture, made the moves for the future, reaping minor leaguers and draft picks.

Of particular significance to the postseason race was the Pittsburgh Penguins' acquisition of goaltender Alain Chevrier from Chicago. Penguins goaltender Tom Barrasso - Pittsburgh's key acquistion last season - left the team for the season to be with his 2-year-old daughter undergoing cancer treatment.

With inconsistent youngsters in net, the Penguins have suffered more noticeably on the ice from his absence than they have without scoring star Mario Lemieux. Even as Lemieux receives treatment for a back injury that has forced the two-time NHL scoring leader from at least the regular season, the Penguins' production continues to lead the league, but the team has been losing high-scoring shootouts with defensive and goaltending lapses.

The Penguins also received minor-league center Brian Wilks from Edmonton.

In the unsettled Patrick Division, the Rangers are trying to shake off the

Penguins and led by six points at the trade deadline. With not one playoff berth clinched in the division, every other member also made last-minute moves.

New Jersey's moves were aimed at the future. The Devils traded defenseman Reijo Ruotsalainen to Edmonton for minor-league defenseman Jeff Sharples and sent tough defenseman Jom Korn to Calgary for a fifth-round 1990 draft pick. The Islanders, in addition to getting minor-league forward Jeff Rohlicek in the Vancouver deal, claimed forward Dave Pasin off waivers from Los Angeles.

One day earlier in the Patrick, Philadelphia added muscle by getting Kevin Maguire from Buffalo, and Washington received playoff savvy goaltender Mike Liut from Hartford.

In the Norris Division, favored Chicago was able to send Pittsburgh Chevrier because of major deals Monday. The Blackhawks had sent three prospects to Quebec to get goaltender Greg Millen and scorer Michel Goulet.

''We feel that this adds depth to our organization,'' Blackhawks Coach Mike Keenan said. ''In the position of goaltender, we feel Greg Millen brings us some depth, some experience, especially in our division.''

The Blackhawks acquired Chevrier late last season and advanced to the Stanley Cup semifinals. However, he has failed to return to playoff form.

The Blues, Chicago's main rival for the division lead, didn't stand still. The Vancouver deal not only means Sutter will play for his brother, Blues Coach Brian Sutter, but brings toughness to the lineup.

HARTFORD, CT. (MARCH 6) UPI - United Technologies Corp. and Phoenix Mutual Life Insurance Co. announced Tuesday that a developer of landmark attractions in Boston and New York City will handle the development of United Technologies' new world headquarters.

UTC and Phoenix Mutual Life, partners in the project, chose the Rouse Co. of Columbia, Md., from a field of about 20 companies.

Rouse, which developed Faneuil Hall Marketplace in Boston, South Street Seaport in New York and Harborplace in Baltimore, also will become a partner in the United Technologies project.

''The Rouse Co. has an excellent track record, one that we think will bring a great deal of expertise to the project,'' said Philip R. McLoughlin, executive vice president of investments at Phoenix Mutual Life.

Terms of the agreement with Rouse were being finalized and were not released, officials said.

United Technologies has not released an official figure on the cost of the building, but the Hartford Downtown Council has estimated it would cost about $200 million.

The company will occupy about one-third of the approximately 900,000-square-foot building, while the partnership will own and lease the remaining space in the new building, officials said.

''We're proceeding on schedule for the new UTC headquarters building,'' said said Franklyn A. Caine, United Technologies' senior vice president of human resources and organization. Groundbreaking is planned for early 1991 and occupancy for 1993.

The Rouse Co. operates 116 office buildings totaling 9.5 million square feet throughout the country.

#90065u2730 03/06/1990 ~United Press International

MOSCOW (MARCH 6) UPI - President Mikhail Gorbachev said Tuesday after a meeting with East German Premier Hans Modrow that he rejects the idea of a unified Germany being a member of NATO.

''We cannot agree to this. It is absolutely ruled out,'' Gorbachev told the official Soviet news agency Tass and German reporters when they asked him whether a united Germany could remain a member of the North Atlantic Treaty Organization.

Modrow, who flew home after his two-day trip to the Soviet Union, met both Gorbachev and Premier Nikolai Ryzhkov for talks on German reunification. Foreign Ministry spokesman Gennady Gerasimov said that Gorbachev unequivocally ''dismissed the idea of a united Germany remaining in NATO.''

Gorbachev told reporters from Tass, West German television and the East German ABN agency that undue haste was unacceptable in the German unity question. ''It is inadmissible to act hastily - 'all of a rush,' so to say '' Gorbachev said. ''This is unsuitable for big politics.

''So a stage-by-stage approach is indispensable, and I think the people of the German Democratic Republic are interested in it,'' the president said. ''They want to know what will happen to them, what their destiny will be and what will happen to them, what their destiny will be and that of the generations that have lived in the republic.''

East German spokesman Wolfgang Maier, who also briefed the press, said a new united German state could not be a part of the North Atlantic Treaty Organization.

''The two sides agreed that the inclusion of one Germany in NATO is unacceptable because it would be a threat to European security,'' Maier said. ''The inclusion of one Germany in NATO would be a continuation of the Cold War in a new era.''

Gorbachev has accepted the idea of a united Germany but he has said the four Allied powers and two Germanys must decide on security concerns such as participation in military blocs.

East Germany currently is a member of the Soviet-led Warsaw Pact while West Germany is in NATO.

The Soviet side has proposed that the so-called four-plus-two talks - involving the Soviet Union, Britain, France and the United States plus the two Germanys - should deal with issues other than internal problems caused by creating a single Germany.

Modrow, who flew into Moscow Monday, immediately agreed on the four-plus-two talks on unity for the Germanys divided since the end of World War II.

In Brussels, West German Foreign Minister Hans-Dietrich Genscher confirmed Monday that the officials of the four World War II allies will start talks next week with representatives from the two Germanys.

Gerasimov said he did not know the date for such talks. A firm site has also not been agreed on.

But in answer to a question, Gerasimov ruled out Polish participation in the two-plus-four talks. He said although he understood Poland's concerns over a united Germany because of its heavy losses in World War II, only the ''six,'' will be participating.

Soviet Foreign Minister Eduard Shevardnadze told Soviet journalists Monday that a Warsaw Pact meeting scheduled before the March 18 East German elections will be held after the balloting, the Tass news agency said.

The East German elections could indicate how fast East Germany may move toward unity with West Germany.

''The unification is proceeding fast, but a number of socio-economic problems has arisen, causing concern to the West German population,'' Shevardnadze said Monday.

He was alluding to both the steady exodus of East Germans to West Germany, creating housing difficulties for Bonn, and the looming bankruptcy of the East German state.

#90065u2731 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - The Consumer Product Safety Commission, citing a suffocation risk, issued an ''urgent warning'' Tuesday against putting infants to sleep on small pillows or cushions filled with plastic foam beads.

The CPSC said it knew of 10 deaths involving infants who were placed on cushions filled with polystyrene beads and then fell asleep. All of the victims were 3 months old or younger and were found lying on their stomachs.

The deaths occurred between December 1987 and last month, with seven since last June. The commission said, ''It is unusual for so many deaths associated with a relatively new product to occur over such a short period.''

The cushions, which resemble pillows or small bean bags, are about 2 feet long and 1 foot wide. They usually are made of quilted fabric and loosely filled plastic foam beads or pellets.

At least 10 companies make and sell the products, the CPSC said.

The commission, which said its investigation is continuing, urged parents and others never to leave infants - especially under 6 months of age - unattended on the cushions, and never to permit them to sleep on the products.

The CPSC said it began its investigation after receiving reports that infants were found dead on the cushions. Some of the deaths were reported as sudden infant death syndrome, the commission said, noting that an autopsy would not distinguish between some types of suffocation and SIDS.

#90065u2770 03/06/1990 ~United Press International

WASHINGTON (MARCH 6) UPI - A massive factory in Rabta, Libya has resumed limited production of poison gas, ABC News reported Tuesday.

Quoting U.S. intelligence sources, the network said the facility, called Pharma-150, resumed production late last year after months of technical problems.

Analysts say the Libyans are making two kinds of chemical agents - one that blisters and burns the skin and lungs, and much smaller quantities of a second agent that attacks the central nervous system.

ABC said the Rabta plant has not yet gone into full-scale operation, but quoted analysts as estimating that Libya already has stockpiled about 30 tons of the blister agent.

Sources told ABC that some of the poison has been loaded by hand into cannisters that could be dropped from aircraft as chemical bombs. The process was described as slow and dangerous, with just five or six bombs being filled a day.

The United States focused worldwide attention on the Rabta plant in late 1988 after CIA Director William Webster said Libya was building the plant, calling it ''the largest chemical plant I know of for chemical weapons.''

Libyan leader Moammar Gadhafi, who later allowed reporters a limited tour of the plant, has insisted it manufactures pharmaceuticals.

U.S. intelligence sources told ABC that Gadhafi has pushed during the past year to bring the plant into full production. He has continued to buy the chemicals needed to make the poison gas, storing some in huge tanks near Tripoli, ABC said.

#90065u2826 03/06/1990 ~United Press International

CHARLESTON, WV (MARCH 6) UPI - The West Virginia Education Assocation Tuesday called for the state's first teachers strike after a proposal to give educators a 5 percent pay hike was withdrawn by Gov. Gaston Caperton.

''All indications are teachers will be going out Wednesday,'' said WVEA spokeswoman Jackie Goodwin, adding that some may wait until Thursday.

The WVEA represents 16,000 of the state's 21,653 teachers. The West Virginia Federation of Teachers, which represents 3,000 educators, said it will honor the picket lines. The rest of the state's teachers are not unionized.

State Superintendent of Schools Henry Marockie said a teachers strike would violate state law under a ruling upheld by the U.S. Supreme Court in 1970.

''If teachers choose to strike, we have concluded there is nothing in public law that enables public employees to strike in West Virginia,'' Marockie said. ''A strike also would violate contracts teachers have with county boards of education.''

The base pay for teachers in West Virginia is set by the state legislature. Their contracts run the length of a school year and until this year have been routinely renewed by agreement between the teachers and their county school boards.

Caperton withdrew the proposed pay hike, saying the WVEA's decision not to cancel a strike call pending legislative action on the measure was unacceptable.

The governor and legislative leaders announced the contract proposal hike late Monday night in an attempt to avert a strike and satisfy teacher demands for higher pay and secure health insurance benefits. Teachers currently earn an average of $21,904 annually.

''It (the contract offer) was made contingent upon the unequivocal removal of the threat of work stoppages and classroom disruptions and their enthusiastic support of our proposal,'' Caperton said during a Tuesday news conference.

''This assurance was not forthcoming from the WVEA,'' Caperton said. ''We are not going to do anything under the threat of a strike.''

In announcing the deal was off, Caperton said even if the WVEA changed its stance, the administration would not reopen the talks.

WVEA teachers in Mingo, Logan, Wyoming, Raleigh, Monongalia, Greenbrier and Boone already have voted to strike. Teachers in the remaining 48 counties were expected to vote late Tuesday on whether to strike, establish informational pickets or conduct work slowdowns.

''That's absurd the governor says we didn't keep our end of the bargain,'' WVEA President Kayetta Meadows said. ''I don't think we ever agreed if we got nothing we would do nothing.''

State officials said county boards must notify teachers that they have to return to work. If they refuse, the boards have the options of either suspending, reprimanding or firing the teachers.

The 1970 Supreme Court ruling involved a Department of highways strike in 1969, in which former Gov. Arch Moore fired the workers.

In the ruling, the high court said, ''A strike by public employees for any purpose is illegal under the common law and no statutatory declaration of the illegality is necessary.''

#90065u2901 03/06/1990 ~United Press International

SAN FRANCISCO (MARCH 6) UPI - San Jose federal Judge Robert Aguilar, under intense questioning by prosecutors, admitted Tuesday at his corruption trial that he ''bragged'' and ''exaggerated'' on FBI wiretaps but again denied wrongdoing.

Aguilar's defense rested at the close of the court session. Final arguments are set for Wednesday followed by jury deliberations.

Government prosecutors raised inconsistencies between Aguilar's statements on wiretaps, incriminating statements by other witnesses and his own testimony on the witness stand.

But Aguilar insisted that other witnesses, including a fellow federal judge who has testified at the trial, were wrong, mistaken or innaccurate.

Aguilar told Justice Department attorney William Keefer he agreed to answer FBI questions about his alleged involvement in illegal activities in 1988 because ''I thought they wanted to trick me.

''I decided to answer their questions very narrowly and truthfully ... but I was not going to give them any cannon fodder against me.''

The cavernous federal courtroom has drawn a packed house for both days of Aguilar's testimony with more than 80 observers inside and sometimes a line outside the door.

Aguilar, 58, is the first U.S. District Court judge ever charged with racketeering.

He was indicted June 13, 1989, on eight counts of racketeering, conspiracy obstruction of justice, disclosure of wiretap information and lying to the FBI.

Aguilar is accused of attempting to influence two judges in the handling of two criminal cases and aiding his former secretary to remain a fugitive in Mexico to avoid a jail term for income tax evasion.

Indicted along with Aguilar were Rudy Tham, 66, a convicted Teamsters Union embezzler, and Abe Chapman, 83, a self-proclaimed mob assassin of the 1930s and convicted drug dealer of that era.

Aguilar faces 55 years in prison and $2 million in fines if convicted. He also could face congressional impeachment and removal from office.

Aguilar explained his disclosure to Tham's attorney, Edward Solomon, that he had passed on word of a possible FBI wiretap on Chapman's telephone by stating: ''I was bragging. I just wanted him to feel good.''

Solomon had feigned concern at being the potential target of an FBI probe, but he was at that time cooperating with the FBI in an investigation of Aguilar.

Aguilar suggested U.S. District Judge Robert Peckham ''was mistaken'' when Peckham testified he warned Aguilar to keep away from Chapman because Chapman's name was on an FBI wiretap appliction.

Aguilar insisted Peckham did not tell him that Chapman was a wiretap target but only that his name came up as someone who may be intercepted on tapes.

Keefer asked if Peckham went on to describe Chapman as still engaged in criminal activities.

''No,'' Aguilar insisted.

Under Keefer's grilling, Aguilar insisted he never knew his former secretary, Vera Hoff, was a fugitive in Mexico when he visited her twice in 1981 and 1982 or when he agreed to buy her San Jose, Calif. home in November 1979.

Keefer continued to press Aguilar, pointing out that the judge knew as late as May 1979 that Hoff's appeal was pending and six months later, in November, had agreed to buy her hme.

Hoff was facing a two-year prison term with a requirement to serve at least six months before parole consideration.

Aguilar explained his alleged attempt to influence U.S. District Judge Sam Conti in the $20 million bank fraud case of Fresno businessman and ex-casino owner Ronald Cloud as an attempt to tell Conti he would be a character witness in Cloud's trial.

Aguilar testified Conti cut off the discussion before he could explain.

Keefer said neither Cloud's son, Steve, nor company manager Richard Reilly mentioned asking Aguilar to serve as a character witness.

''I can't explain that ... maybe they both forgot,'' Aguilar said.

The government maintains Aguilar provided extensive legal advice for Cloud and then asked that his written notes to Cloud be shredded.

Aguilar also said he simply ''forgot'' about a $12,000 loan from Cloud in 1983 and failed to report it on his judicial disclosure statements in 1984 or 1985.

He ultimately reported it in April 1987, on his 1986 disclosure statement.

Keefer accused Aguilar of revealing it only when he was afraid it would become public in a financial report made to Judge Conti during Cloud's sentencing in June, 1987.

Keefer also suggested Aguilar wrote a letter to the court explaining the loan in 1988 because he thought he was the target of a criminal investigation.

Aguilar emphatically denied the suggestion.

#90065u2922 03/06/1990 ~United Press International

LOS ANGELES (MARCH 7) UPI - UnionFed Financial Corp., parent of a medium-sized Southern California thrift, moved Tuesday to reassure investors following declines in the price of the holding company's stock.

UnionFed stock has fallen to as low as $10.125 a share recently after trading for as much as $24.125 a share last year. It closed up 12.5 cents Tuesday to $11.50 a share on the New York Stock Exchange.

The company said the decline in the price stemmed largely from a recent sell recommendation from an analyst and said that the analyst ''overreacted'' to the potential negative impact from three loans the financial institution holds.

One of the three real estate loans, each for $20 million, is being repaid at a slower than normal rate.

The company's 26-branch Union Federal Savings Bank has met the federal capital requirements for thrifts that went into effect last Dec. 7.

#90065u2953 03/06/1990 ~United Press International

(MARCH 6) UPI - Afghanistan's government crushes a coup attempt... A deadly bomb explosion rocks a Colorado bank... The U-S Postal Service announces a rate hike... And jury selection continues in John Poindexter's trial... These top stories and more, next, from U-P-I.

It's hard to tell how severe the fighting is in Afghanistan.

The Soviet-backed government says it has crushed a coup attempt by the defense minister and a rebel leader.

But reports in Moscow and from the United Nations indicate that fighting rages on with the presidential palace being bombed. And all overseas Telex and telephone communications with the capital of Kabul have been cut.

Official Afghan radio says the defense minister has fled and is wantdd ''dead or alive.'' The defense minister heads a faction of the ruling Soviet-supported government at odds with President Najibullah's faction.

The leader of a Pakistan-based rebel group says the rebellion is still going strong with fighting in the streets of Kabul.

The government radio broadcasts are asking soldiers who joined in the coup to surrender to government forces and be forgiven.

West German Chancellor Helmut Kohl has changed his mind about the German border with Poland.

Under fire from partners in his governing coalition, Kohl has dropped his demands that Poland renounce claims to reparations from World War Two in exchange for Germany promising to respect the post-war border.

Kohl may now face a challenge from right-wingers in his coalition who say Germany should NOT give up claims to the land that many Germans were expelled from when it was given to Poland after the war. Without the 30 deputies in the so-called ''Expelees League,'' Kohl's coalition would NOT have an absolute majority.

After several hours of meetings with coalition partners opposed to Kohl's original stance, Kohl said- in his words- ''Mistakes were made by all involved, including myself.''

The coalition now says that after German unity, the new German government would have to sign a treaty with Poland stating its confirmation of the borders.

-30- 2279

#90065u3027 03/06/1990 ~United Press International

(MARCH 6) UPI - A second day of weeding out potential jurors to hear John Poindexter's Iran-Contra trial in Washington, D-C.

During this morning's session, 11 potential jurors were questioned and U-S District Judge Harold Greene found six qualified to serve. Four more were found qualified later in the day.

One potential juror told the judge that he knew the Iran-Contra affair had- in his words- ''a lot to do with arms, the money and NOT telling the truth.''

By mid-afternoon, 31 people were qualified as potential jurors for the five felony charges lodged against the former national security adviser.

If the process continues at a steady pace, it's possible a panel will be ready to begin hearing testimony in the case before the week ends.

Poindexter stepped down as former President Reagan's top national security aide in 1986 when the Iran-Contra scandal was exposed. He faces charges that include lying to Congress and obstructing congressional inquiries.

Republican National Committee Chairman Lee Atwater has undergone a biopsy on tissue removed from his brain. Atwater was rushed to the hospital yesterday when he fainted at a G-O-P fund-raiser.

Party officials say they are hopeful about Atwater's prognosis. But one administration official... who asked NOT to be identified... characterized the situation as ''serious.'' Doctors do NOT yet know if the tissue is malignant.

In a biopsy, doctors remove a piece of tissue most commonly to determine if it is cancerous.

White House spokesman Marlin Fitzwater says President Bush spoke by telephone with Atwater yesterday. But Fitzwater says he ''could NOT characterize'' the party chief's condition.

Atwater is known for successfully managing Bush's presidential campaign, and for playing amateur blues guitar.

-30- 1979

#90065u3075 03/06/1990 ~United Press International

(MARCH 6) UPI - Boston Mayor Raymond Flynn says ''there's a war going on'' in the nation's cities... and the fight is NOT just against drugs.

Flynn joined other mayors in holding news conferences today in praising legislation proposed in the Senate. The bi-partisan bill would provide 600-Million dollars to help states and hard-hit cities deal with AIDS.

The sponsors of the bill say it would provide ''disaster relief'' for 13 city health care systems crumbling under the weight of the epidemic. It also would provide funds to small towns and rural areas where AIDS is on the increase.

The bill is being sponsored by Massachusetts Democrat Edward Kennedy and Utah Republican Orrin Hatch, who say the Bush administration is taking AIDS very seriously. But Hatch says that if the nation does NOT face the

problem now- in his words- ''it's going to cost us a lot more money in the future.''

The U-S Postal Service Board of Governors approved a rate increase today that would raise the price of a first-class stamp from 25 to 30 cents.

The plan still needs final approval from the independent Postal Rate Commission, which has 10 months to reach a decision.

If approved, the 15th postal rate change would represent the largest increase in Postal Service History.

The Postal Service is hoping the new rate structure will take effect in February 1991.

Assistant Postmaster General Deborah Bowker says she doesn't think Americans will mind paying more, describing service as ''good, consistent and reliable.''

But the Office of Consumer Advocate of the Postal Rate Commission says the rate increases show the need for citizen involvement in postal decisions. In the words of director Stephen Gold- ''The Postal Service must be held accountable to both citizens and Congress.''

(MARCH 7) UPI - SPORTS TRANSACTIONS

BASEBALL

Boston - Agreed on 1-year contracts with pitchers John Dopson, Mike Rochford and Rob Woodward.

Cleveland - Renewed contracts of catcher Sandy Alomar Jr., second baseman Jerry Browne and infielder Denny Gonzalez; agreed to terms with outfielder Joey Belle.

Minnesota - Re-signed pitcher Allan Anderson.

Philadelphia - Agreed on 1-year contracts with first baseman Ricky Jordan and pitchers Pat Combs and Dennis Cook.

Texas - Agreed on 1-year contracts with pitchers Drew Hall and Gary Mielke and infielder Jeff Kunkel.

COLLEGE

Colorado State - Named Mike DeBord offensive line coach

Vanderbilt - Named Paul Hoolahan athletic director.

FOOTBALL

Minnesota - Named Maxie Baughan linebacker coach.

Cleveland - Signed center Mike Baab as a Plan B free agent.

HORSE RACING

Harness Tracks of America - Elected John Cashman Jr. president.

HOCKEY

Hartford - Acquired the rights to defenseman Cam Brauer from Edmonton for left wing Marc LaForge.

Minnesota - Traded right wing Mike Gartner to NY Rangers for right wing Ulf Dahlen, a fourth-round 1990 draft choice and future considerations; assigned goaltender Jarmo Myllys to Kalamazoo of International Hockey League.

Montreal - Traded defenseman Jyrki Lumme to Vancouver for a second-round 1991 draft pick.

NHL - Suspended Washington defenseman Scott Stevens and Chicago defenseman Dave Manson for three games.

New Jersey - Aquired forward Peter Stastny from Quebec for defenseman Craig Wolanin and future considerations; traded defenseman Reijo Ruotsalainen to Edmonton for defenseman Jeff Sharples, who was assigned to Utica of the American Hockey League; traded defenseman Jim Korn to Calgary for fifth-round 1990 draft pick.

NY Islanders - Traded minor-league defenseman Jack Capuano to Vancouver for minor-league forward Jeff Rohlicek; claimed forward Dave Pasin off waivers from Los Angeles.

Pittsburgh - Acquired goaltender Alain Chevrier from Chicago for future considerations; acquired minor league center Brian Wilks from Edmonton for future considerations.

St. Louis - Acquired right wing Rich Sutter, defenseman Harold Snepts and a second-round 1990 draft pick from Vancouver for minor-league defenseman Adrien Plavsic, a first-round 1990 draft pick and second-round 1991 pick.

#90065u3517 03/06/1990 ~United Press International

(MARCH 6) UPI - The Pentagon says it found ''NO evidence'' of a leak by U-S officials or the news media that compromised the American invasion of Panama. Today's word from the Pentagon contradicts speculation by the commander of the invasion, who told reporters that a security breach added to U-S combat deaths and injuries. 23 American soldiers died in the invasion, as well as 300 Panamanian troops and 202 Panamanian citizens.

The number-two man at the Defense Department told a Senate panel that the Pentagon is trying to change its ways. In the past, Deputy Defense

Secretary Donald Atwood says, supply managers were rewarded for over-stocking so supplies would never run out. But Atwood says they're tightening belts now. He also said a congressional auditors' estimate of 34-BILLION dollars in spare parts is high. He says the Pentagon has just nine-BILLION in over-stocks.

Doctors in Washington say Republican National Chairman Lee Atwater has a NON-malignant tumor in his head. The 39-year-old Atwater was rushed to the hospital yesterday after fainting while giving a speech. Doctors at George Washington University Medical Center say NO surgery is planned but the G-O-P chairman will have follow-up treatments. Doctors add Atwater will be released from the hospital by the end of the week.

Nicaraguan President Daniel Ortega accuses the Contras of violating a cease-fire. The Contras say it's the Sandinistas that have violated the cease-fire. One Contra was killed and two Sandinistas injured in attacks this weekend. Also, a U-S Embassy spokesman dismisses as ''ridiculous'' a charge that a U-S military base will be built in Nicaragua.

#90065u3841 03/06/1990 ~United Press International

(MARCH 6) UPI - A key witness is awaiting extradition from Dayton, Ohio, to testify in the racial killing of a black teen-ager in Brooklyn last August. 21-year-old John Vento agreed to testify for the government in the case of bat-wielding white youths who attacked a black teen-ager. Vento apparently went into hiding two months ago to avoid testifying against his friends.

The Justice Department has agreed NOT to seek deportation of a 76-year-old man accused of collaborating with the Nazis during World War Two. Valdis Didrichsons admits concealing his wartime past and agreed to relinquish

his U-S citizenship. But officials decided against deportation because of Didrichson's extremely poor health. Didrichsons, now living in Washington state, allegedly was a member of a security squad responsible for the mass executions of unarmed Jews during the Nazi occupation of Latvia.

The Federal Aviation Administration has issued a new set of rules for older Boeing 727's, 737's and 747's in response to the 1988 Aloha Airlines accident that killed a flight attendent. 18 feet tore off the top of the fuselage during an inter-island flight in Hawaii, but the pilots managed to land the plane. The new rules will require regular inspections and routine replacement of certain aging airplane parts.

White House spokesman Marlin Fitzwater says the Bush admninistration is investigating a report that American soldiers returning home from the U-S invasion of Panama were smuggling drugs. The Pentagon also says it's investigating the report... but refers questions to the Drug Enforcement Agency, which refuses comment. No soldiers have been arrested or charged.

#90065u4032 03/06/1990 ~United Press International

(MARCH 6) UPI - An explosion ripped the Crested Butte State Bank in west-central Colorado today, shortly after the facility opened for the day. The blast leveled the building and left three people dead and 12 more injured. Federal agents have found NO physical evidence of what caused the explosion. But residents say there were ''bomb threats over the weekend'' at other places in Crested Butte and investigators are looking into the possibility of a bombing.

Firefighters have extinguished the blaze on an oil barge in the Arthur Kill waterway that separates New Jersey from New York. The barge carrying four-and-a-half-Million gallons of heating oil. It was wracked by two explosions and burst into flames today shortly after it left a Linden terminal of Citgo Petroleum Corporation bound for Boston. NO one was seriously injured, but some heating oil has spilled into the waterway.

A total of 35 potential jurors have been judged qualified to hear the Iran-Contra trial of John Poindexter in two days of jury selection proceedings. 45 are needed before lawyers begin winnowing the final number down to 12 regular jurors and six alternates. The presiding judge now believes opening statements can begin Thursday. Poindexter is the highest-ranking Reagan administration official indicted in the scandal.

In Anchorage, Alaska... the final prosecution witnesses in the trial of Joseph Hazelwood testified today that the Exxon Valdez skipper drank enough vodka to impair his judgment before sailing off to the nation's largest oil spill. Prosecutors say Hazelwood recklessly rocked the grounded oil tanker back and forth on a reef at the risk of capsizing it.

#90065u4088 03/06/1990 ~United Press International
(MARCH 6) UPI - Military officials report Salvadoran rebels today shot down a U-S-made Huey helicopter. The attack came as leftists rejected demands by President Cristiani to lay down their weapons as a pre-condition to resuming suspended peace talks. A rebel leader says the government's call to stop hostilities is an obstacle to ending the 10-year-old civil war. Today's attack killed the chopper's gunner and injured seven other people on board.

G-O-P officials say the small tumor discovered in the brain of Republican National Committee Chairman Lee Atwater is benign. The 39-year-old Atwater was hospitalized yesterday after fainting at a fund-raiser in Washington, D-C. Atwater joked after today's biopsy that the tumor proved he really did have something in his head. Doctors say NO surgery is planned, although Atwater will undergo follow-up treatments. He's expected to be back at work soon.

The U-S Postal Service's Board of Governors today proposed increasing the price of a first-class stamp from 25 to 30 cents, effective February 1991. The last hike came in March 1988, when the cost of a first-class stamp jumped from 22 to 25 cents. If the plan wins its needed final approval from the independent Postal Rate Commission, the increase all classes of mail will represent an overall leap of 19 percent- the largest in Postal Service history.

-30- 1523
#90065u4301 03/06/1990 ~United Press International
(MARCH 6) UPI - A postal rate hike gets preliminary approval... more oil is spilled into a New York-New Jersey waterway... an explosion levels a Colorado bank... details of these and other top news of the day next, from United Press International.

The U-S Postal Service Board of Governors today approved of a rate increase of a first-class stamp from 25 to 30 cents.

The plan still needs final approval from the independent Postal Rate Commission, which has 10 months to to reach a decision.

The proposed hike includes all classes of mail and will represent an overall jump of 19 percent... the largest increase in history. It the plan wins approval, the new rates would take effect in February 1991. The last increase came in March 1988 when the cost of a first-class stamp jumped from 22 to 25 cents.

Critics range from consumer advocate Ralph Nader to the U-S Chamber of Commerce, which calls the rate hike ''unreasonable and unjustified.''

Postmaster General Anthony Frank admitted at a new conference today the 19 percent increase is ''too much, too soon.''

But Frank also says the hike is necessary because the Postal Service- re-organized along the lines of a private corporation in 1980- is required to break even each year.

A barge carrying four-and-a-half-Million gallons of heating oil went up in flames after two explosions this afternoon in the Arthur Kill Waterway that separates New Jersey from New York.

The Coast Guard says some of the two-and-a-half-Million dollars worth of heating oil spilled into the waterway.

Firefighter extinguished the blaze and sprayed the barge with water to try to cool it down so inspectors could board. The two crew members are accounted for. One is hospitalized in good condition.

The barge had just loaded up with oil at a Citgo Petroleum Corporation terminal and were heading for Boston.

The Coast Guard has closed the entire waterway and booms have been placed around the barge to contain its cargo.

Officials do NOT know how much of the heating oil spilled and how much dissipated in the explosions. It was the area's third oil spill since January.

#90065u4311 03/06/1990 ~United Press International

(MARCH 6) UPI - An explosion leveled a two-story brick bank shortly after it opened in Crested Butte, Colorado, this morning. Three people were killed and 12 injured.

Federal agents are investigating what caused the explosion... but they've found NO physical evidence of the cause yet.

There are NO natural or propane gas lines to the building. The town of one-thousand residents sits over abandoned coal mines containing pockets of volatile methane gas. But residents say there's been bomb threats against other businesses in the town and a team from the U-S Bureau of Alcohol, Tobacco and Firearms was sent to investigate.

Town Marshall Rich Largo says the blast lifted the roof off the walls...

then the whole building collapsed. One resident says there's nothing left but the bank vault sitting in the rubble.

Incredibly, six of the people inside the bank required only first-aid. Six others are hospitalized. A snowstorm prevented helicopters from landing at Crested Butte to pick up the injured.

A broadcast report says American soldiers returning home from Panama after the December 20th invasion may be smuggling narcotics.

The report also says the smuggling might be linked to Friday's bombing of a Panamanian nightclub, which killed an American soldier.

Quoting anonymous senior U-S military commanders, the report says one American serviceman has confessed to recruiting soldiers to work as ''mules'' or couriers. The soldiers allegedly carry cocaine to the United States on military flights.

The report says the Americans were motivated by money from traffickers, as much as 10-thousand dollars for a shipment of drugs in a duffel bag.

White House spokesman Marlin Fitzwater says the president is concerned and- quote- ''would like to know what the facts are.'' Fitzwater says the Pentagon is investigating.

A Pentagon spokesman referred all inquiries to the Drug Enforcement Administration, the lead agency in the probe. A D-E-A spokesman declined comment

#90065u4327 03/06/1990 ~United Press International

(MARCH 6) UPI - Following his loss to Violeta Chamorro last month, out-going Nicaraguan President Ortega called a unilateral cease-fire in the eight-year-old war with the Contras.

But today, the Sandinista government and Contras accused each other of violating the cease-fire. The Nicaraguan Defense Ministry says one rebel was killed and two Sandinista troops were injured in Contra attacks last weekend in mountains 120 miles from Managua.

And while Chamorro has called for the rebels to disband immediately, a high-ranking Sandinista military officer charges between 300 and 350 rebels are gathered about 90 miles north of the capital city.

The Contras say they will NOT demobilize until Chamorro is sworn in on April 25th and the Sandinistas leave power.

Afghan President Najibullah appeared on national television and announced that loyal troops had crushed a coup attempt by the country's defense minister.

The Soviet news agency Tass says Najibullah reportedly ordered all units to find Defense Minister Shah Nawaz Tanai and deliver him ''dead or alive'' to the general headquarters.

The Soviet-supported government and news reports from Moscow said fighting broke out at the airport in Kabul... around the Defense Ministry... and around the presidential palace... which was bombed.

There's NO word yet on how many people died in the fighting.

A communique from the government says authorities have imposed a dusk-to-dawn curfew in Kabul.

Tass says the rebellion was ''strongly rebuffed by government forces'' and that the sound of artillery fire was dying down as night fell.

#90065u4467 03/06/1990 ~United Press International

(MARCH 6) UPI - Postmaster General Anthony Frank says he feels the 19-percent postal rate increase approved by the Board of Governors is ''too much, too soon.'' But he says it's needed because the Postal Service is required to break even each year and costs have gone up 19 percent since the last rate hike in March 1988.

The rate increase still must be approved by the independent Postal Rate Commission before it could go into effect. If it does, the price of a first-class stamp would rise from 25 to 30 cents.

Federal agents combed the rubble of what was once a two-story brick bank building in Crested Butte, Colorado... trying to determine what caused today's explosion that killed three people. Residents say other businesses had received bomb threats in recent days.

Coast Guard officials in New Jersey say they'll know how much heating oil spilled into the Arthur Kill waterway from a burning barge after the vessel cools enough to allow boarding. The barge was hit by two explosions shortly after leaving the Citgo terminal.

Firefighters have doused a blaze that raged for 13 days aboard a U-S-flagged Kuwaiti oil tanker in the southern Persian Gulf. The oil tanker Surf City caught fire following an explosion. Two U-S crewmembers were killed.

A broadcast report says a massive chemical weapons factory in Libya has resumed limited production of poison gas after months of technical problems. The report quotes U-S intelligence sources. A State Department spokesman would NOT confirm details of the report.

-30- 1706

#90065u4477 03/06/1990 ~United Press International

(MARCH 6) UPI - Representatives of Nicaraguan President-elect Chamorro held what they called a ''positive'' round of demobilization talks with Contra officials in Honduras today. But the rebels are still demanding the Sandinista army be dismantled before the Contras disband.

Chamorro traveled to Costa Rica today to present President Arias with a plan for the demilitarization of Central America through the co-operation of all governments in the region.

On Capitol Hill today...

Senators Edward Kennedy, a Massachusetts Democrat, and Orrin Hatch, a Utah Republican, joined forces to propose legislation providing 600-Million dollars to help states and 13 hard-hit cities care for people with AIDS.

Democratic leader Richard Gephardt took to the House floor to propose the United States launch a wide-ranging economic assistance program to support the move toward democracy in the Soviet Union and Eastern Europe.

NO direct comment from the White House on the Missouri congressman's speech. But Senate Republican leader Bob Dole says he's ''a little disappointed'' by Gephardt's proposal and says it goes ''pretty far, even for a Democrat.''

Senate G-O-P leader Robert Dole and other Republicans say they'll seek passage of a constitutional amendment to outlaw burning of the U-S flag. Yesterday, a second federal court declared a law forbidding the act unconstitutional.

New York police have arrested three more suspects in the slaying of a

state trooper during an undercover drug buy that erupted into a bloody gunbattle. Two suspects wounded in yesterday's shootout already are charged with murder.

-30- 1798

#90065u4645 03/06/1990 ~United Press International

(MARCH 6) UPI - Investigators in Crested Butte, Colorado, are searching for evidence of a bomb or some other explosive cause in the rubble of a bank that blew up this morning. Three people were killed and 12 others injured when an explosion blew the roof off the Crested Butte State Bank shortly after it opened. Residents of the small town say other local businesses had received bomb threats recently.

A news report says Libyan leader Moammar Gadhafi is pushing a massive Libyan chemical weapons plant up to full capacity to produce poison gas. The report quotes analysts saying the facility has manufactured 30 tons of an agent that burns and blisters the skin and lungs, and smaller quantities of a chemical that attacks the central nervous system. A State Department spokesman would NOT confirm the report... but said U-S officials remain ''concerned'' about the plant.

Soviet President Gorbachev met with East German Premier Modrow today and later told reporters he rejects the idea of a unified Germany joining NATO. Gorbachev says he accepts the idea of a united Germany, but says the four Allied powers and two Germanys must decide on security concerns such as participation in military blocs. East Germany currently is part of the Soviet-led Warsaw Pact. West Germany is in NATO.

Israel's Labor Party once again is placing the burden on Prime Minister Shamir's rightist Likud Party. Labor Party leaders are demanding the Inner Cabinet approve a U-S peace plan compromise on opening talks with the Palestinians when it meets tomorrow. If it doesn't, Labor has threatened to leave the fragile coalition government.

#90065u4661 03/06/1990 ~United Press International

(MARCH 6) UPI - An official at the Buehler Planetarium in Davie, Florida, say a blazing meteor streaked across the night skies of southern Florida tonight... appearing almost directly overhead before racing eastward. Ralph Battaline says the fireball was ''about 100 times brighter than the brightest star'' in the sky. He says the display lasted about five or six seconds before the object burned up in the earth's atmosphere.

The Idaho House of Representatives today approved amendments strengthening a measure that would make abortion an illegal means of birth control in the state. Anti-abortion activists hope the bill will become the test case

that could overturn the 1973 Supreme Court decision legalizing abortion nationwide.

The West Virginia Education Association has called the state's first teachers' strike tomorrow. The announcement was made after Governor Gaston Caperton withdrew his five-percent pay hike offer. State officials say public employees have NO right to strike in West Virginia... but teachers around the state are voting tonight on whether to walk off the job.

The Consumer Product Safety Commission has issued an ''urgent warning'' NOT to leave babies on small pillows or cushions filled with plastic foam beads. The commission says it has reports of 10 deaths of infants who were left on the cushions and suffocated. All of the victims were three months old or younger and were found lying on their stomachs. The commission says it's unusual for so many deaths to be associated with a relatively new product.

#90066b0003 03/07/1990 ~Business Wire

SEDONA, AZ (MARCH 7) BUSINESS WIRE - RMED International (NASDAQ:RMED) has secured private funding to build a diaper machine to manufacture the world's first totally flushable diaper.

The diaper machine is now being assembled and production of TenderSoft flushable diapers is expected to begin by May 15, 1990. RMED has a patent pending on this new flushable diaper.

TenderSoft diapers will be smaller and lighter than conventional diapers while being just as effective. Its unique size and shape will give a more comfortable fit.

The outer plastic layer of the diaper will be replaced by a new breathable mineral-based, part plastic material which is soft and silky to the touch. This new material replaces 60 percent of the plastic with a naturally occurring inorganic mineral thus significantly reducing the amount of fossil fuels required to produce the plastic used in disposable diapers.

The diaper itself uses approximately 40 percent less diaper material than conventional disposable diapers which will translate into smaller more convenient packages for the consumer as well as using considerably less retailer shelf space.

Prototypes of this new flushable diaper are presently being tested in hospitals and by consumers.

Edward Reiss, president of RMED International Inc. is coordinating the

development and introduction of the TenderSoft flushable diapers out of the Sedona office.

SAN FRANCISCO (MARCH 7) BUSINESS WIRE - The Gap Inc. reported net sales for the 53-week fiscal year ended Feb. 3, 1990, increased 27 percent to $1.587 billion from $1.252 billion for the 52-week fiscal period last year.

Comparable store sales growth on a 52-week basis was 15 percent. Net income for the year rose 32 percent to $97.6 million from $74.2 million one year ago. Earnings per share for the year were up 35 percent to $2.77 per share. The company incurred a one-time charge of 18 cents per share in the fourth quarter for costs associated with the previously announced closing of its Hemisphere stores.

Had this year's results excluded the special charge, earnings would have been $104.1 million, or $2.95 per share for the fiscal year ended Feb. 3, 1990.

Donald G. Fisher, chairman and chief executive officer, said, ''Our outstanding sales and earnings growth in 1989 reflects our strategic position as a retailer with strong consumer identification as a unique resource for style, quality and value in casual apparel.''

Sales for the 14-week fourth quarter increased 29 percent to $545 million from sales of $424 million in the 13-week fourth quarter last year. Comparable store sales growth on a 13-week basis was 14 percent. Net income for the fourth quarter increased 6 percent to $34.2 million from $32.2 million, while earnings per share increased 8 percent to 97 cents per share.

Had this quarter's results excluded the Hemisphere charge, earnings would have increased 26 percent to $40.7 million, or $1.15 per share.

The Gap Inc. operated 960 stores as of Feb. 3 (741 Gap, 111 Banana Republic and 108 GapKids and 9 Hemisphere).

BEVERLY HILLS, CA (MARCH 7) BUSINESS WIRE - McDonnell Douglas Helicopter Co. has awarded Litton's Guidance & Control Systems division, Woodland Hills, Calif., a multimillion dollar contract to develop a lightweight laser gyro inertial navigation unit for the U.S. Army's Longbow Apache helicopter program.

"This selection is very significant for Litton because it was made in an intensely competitive environment," said Larry Frame, division president. "This is the first major military application for a highly capable navigation system based on our new small gyro."

The system, named LN-100, is Litton's next-generation product being developed for tactical aircraft requiring a navigational accuracy within one nautical mile for each hour of flight.

The LN-100 is the first full-scale development of a military inertial navigator that will weigh under 20 pounds, about half the weight of currently operational systems. The unit will contain Litton's latest small laser gyro and advanced electronic packaging technology.

Under the $6 million contract, Litton will deliver ten developmental LN-100 units over the next two years for dual installation in four Longbow Apache helicopters. The Army's initial operational test and evaluation program is slated to run through 1993.

The Longbow Apache is an enhanced version of the AH-64 Apache attack helicopter built for the U.S. Army by McDonnell Douglas Helicopter Co. in Mesa, Ariz. The first Longbow Apache is scheduled to fly late next year. The Army's current plan is to upgrade 227 Apaches, with a long-term potential for more than 800.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

OAKLAND, CA (MARCH 7) BUSINESS WIRE - What are a flamboyant attorney and the world super middleweight boxing champ doing in the company of a Hungarian-born glamour queen?

The trio are the latest spokespersons to join Dreyer's Grand Light's ''Unbelievable But True'' ad campaign. (The product is marketed as Edy's Grand Light in the Midwest and Mid-Atlantic regions).

Melvin Belli, Sugar Ray Leonard and (you guessed it) -- Zsa Zsa Gabor, will each be featured as an ''Unbelievable Spokesperson For An Unbelievable Product'' in a series of commercials promoting the company's ''light'' ice cream.

The ad campaign was spear-headed three years ago with a controversial commercial featuring Watergate figure John Ehrlichman. Each year the campaign is comprised of ads in which people having somewhat incredulous reputations ask viewers to take their word on how ''unbelievably'' good the product is.

''This year's spokespersons are the strongest cast yet in terms of celebrity status and public recognition,'' stated Dreyer's/Edy's vice

president of marketing Steven Schickler.

Former spokespersons include Melvin Dummar, Gaylord Perry and the late Billy Martin.

''We think the new ads will be very effective as well as a lot of fun to watch,'' he adds.

Dreyer's has also signed three other ''well-known figures'' as spokespersons for its newest product, Frozen Yogurt Inspirations. Olympic Gold Medalist Florence Griffith Joyner, internationally renowned jockey Willie Shoemaker and Yulia Sukhanova, who was recently awarded the title of Miss Russia in the first beauty pageant ever held in the Soviet Union, will each be featured in commercials.

All six advertisements for Dreyer's/Edy's products will be filmed next week in San Francisco and will begin airing in April.

FALLBROOK, CA (MARCH 7) BUSINESS WIRE - On Wednesday the common stock of Global Resources Inc. began trading in the NASDAQ market, Perry Massie, chief executive officer announced.

Global Resources Inc., whose trading symbol is GLRS, is involved in acquiring mineral properties in order to develop the mineral and recreational potential thereon. In the approximately five years of its existence, Global has made steady progress in achieving its organizational purpose with over 2,000 acres of mineral property from Alaska to California.

Massie said that Global Resources' entry into the NASDAQ market provides brokers and others with immediate access to the best bid and asked prices and other information about the company's shares throughout the United States and the free world. Trading data are also distributed widely through wire services for selective dissemination by newspapers and radio and television stations.

As of Sept. 30, 1989, the company is reporting $2,008,035 in assets and $1,424,214 in stockholders' equity with 11,984,832 shares outstanding, and the opening bid price for the shares was 31 cents per share. Year-end audited financials are expected by the end of March.

In addition to increased market visibility, NASDAQ gives Global the

advantage of multiple market makers that compete to offer the best bid and asked prices, as opposed to a single specialist on the floor of a stock exchange.

On Feb. 12, the Securities and Exchange Commission declared effective a unit offering for $2.5 million. Each unit offered consists of one share of convertible exchangeable preferred stock (non-voting), ten class C warrants and ten class D warrants. The preferred stock will pay a yearly dividend of ten percent in cash or common stock.

The offering was also recently cleared in California. The principal office of Global is located at 521 E. Alvarado St., Fallbrook, Calif., 92028. Copies of the prospectus can be obtained from Global Resources Inc., Box 3040, Fallbrook, Calif., 92028, or from the underwriter, Castle Securities Corp., 75 W. Merrick Road, Freeport, NY, 11520, (800) 543-2292.

SAN RAFAEL, CA (MARCH 7) BUSINESS WIRE - WordStar International Inc. Wednesday announced its commitment to support Intellifont, the AGFA Compugraphic font scaling technology, in WordStar 6.0, the newest and most advanced member of the WordStar word processing product line.

WordStar International Inc. has been working closely with AGFA Compugraphic to bring Intellifont technology to WordStar users.

To support Intellifont scaling capabilities, WordStar International is now including a coupon for Type Director 2.0, the latest version of the AGFA Compugraphic end-user font management and typeface scaling program, in its retail and upgrade versions of WordStar 6.0.

Intellifont scales typeface outlines into required font sizes at very high speeds while preserving letterform design. The Type Director font management package, which incorporates the Intellifont scaling technology, is designed for users of IBM PCs and compatibles who output to Hewlett-Packard LaserJet printers, Epson and IBM Proprinters and compatibles.

In addition, Type Director version 2.0 fully supports the new HP LaserJet III printer. With Type Director, WordStar 6.0 users can create PCL printer fonts from four to 200 point, in quarter-point increments, and access the AGFA Compugraphic library of 141 Intellifont Scalable Typefaces.

WordStar users may choose from two different Type Director packages. The first includes Type Director 2.0 and eight typefaces (CG Times and Univers

in roman, italic, bold and bold italic). The second package includes Type Director 2.0, four weights of the CG Omega typeface family and the decorative Brush, Dom Casual, Park Avenue and Uncial typefaces.

WordStar International Inc., headquartered in San Rafael, is a leading developer of business productivity software products. The WordStar word processing products are among the largest selling microcomputer software programs in the world. With 14 different language versions and an installed base of more than 3.5 million users, WordStar maximizes productivity for those that type by touch.

AGFA Compugraphic is a division of Agfa Corp., the imaging company of Bayer USA. AGFA Compugraphic is one of the world's leading suppliers of electronic and photographic pre-press systems, type and font products, phototypesetting materials, computer graphics output systems, and reprographic and processing equipment.

Through its other divisions Agfa Corp. manufactures and markets medical diagnostic imaging systems (AGFA Matrix Division) and magnetic tape, motion picture film, and consumer and professional photographic products (AGFA Photo Division). Agfa Corp., which is headquartered in Ridgefield Park, N.J., employs more than 5,000 people and has sales of approximately $1 billion.

Agfa Corp. is part of Bayer USA Inc., the U.S. management holding company of Bayer AG, West Germany. Bayer USA is a diversified group of companies with businesses in chemicals (Mobay Corp.), healthcare (Miles Inc.), and imaging (Agfa Corp.). Together, the Bayer USA companies employ more than 26,000 people and have sales exceeding $5 billion, or about 20 percent of Bayer's worldwide sales.

#90066b0086 03/07/1990 ~Business Wire

BELLEVUE, WA (MARCH 7) BUSINESS WIRE - Esterline Corp. (NYSE) at its annual meeting here today reported first quarter net earnings of $1.8 million, or $.28 per share, on sales of $101.5 million.

Comparable earnings in last year's first quarter were $1.7 million, or $.19 per share; net earnings for the same period -- including a $254,000, or $.03 per share, tax benefit from an operating loss carryforward -- were $1.9 million, or $.22 per share. First quarter 1989 sales were $72.1

million.

First quarter sales and net earnings reflect the first full-quarter contribution of the six former Criton Technologies' companies acquired in late September 1989. In addition, the 1990 earnings per share calculation reflects a reduction in the average number of shares outstanding from 8.5 million last year to 6.6 million this year -- a result of the repurchase of 1.9 million shares from The Dyson-Kissner-Moran Corp. at the time of the Criton acquisition.

At the meeting shareholders approved an amendment to the company's Certificate of Incorporation allowing for a classified board of directors. Class I directors elected at this meeting will serve for one year, Class II for two years, and Class III for three years. Thereafter, all terms will be for three years.

Elected to one-year terms today were Hurlbut, Lee L. Davenport, Ph.D., retired vice president and chief scientist at GTE Corp., and Donald Nigro, retired vice president of manufacturing for United Technologies Co. Directors elected for two years were Robert S. Ames, retired executive vice president of aerospace at Textron Inc.; John F. Clearman, president and chief executive officer, NC Machinery Co.; and Edward H. Cooley, chairman and chief executive officer, Precision Castparts Corp. Three-year directors elected were E. John Finn, chairman and partner, Dorr-Oliver Inc.; Robert F. Goldhammer, partner, Rohammer Corp.; and Carroll M. Martenson, chairman of the board, Esterline Corp.

Also receiving shareholder approval was an amendment to the company's 1987 stock option plan authorizing issuance of options to acquire an additional 250,000 shares of company stock to provide a sufficient pool of shares available for incentives to selected officers and other key employees of the company and its subsidiaries.

Esterline is a leading manufacturer of automation equipment for the production of printed circuit boards and metal fabrication, instrumentation for quality control, power measurement and process control and engineered products for the commercial aircraft, aerospace and defense industries.

SANTA CLARA, CA (MARCH 7) BUSINESS WIRE - Intel Corp. announced Wednesday it has accelerated the expiration of its 1995 warrants (INTCW).

The company said that any warrant not exercised will expire at 5 p.m. EST on April 24.

Under the terms of the Warrant Agreement Intel may accelerate the expiration of the warrants if the stock price closes at $38.67 for any 20 trading days within a period of 30 trading days.

Each warrant entitles the holder to purchase 1.5 shares of Intel Corp. capital stock for the price of $40 per Warrant exercised. The terms of the warrants were adjusted to account for Intel's September 1987 stock split. Intel said that there are currently 5.9 million warrants outstanding and it expects to raise approximately $230 million.

Intel manufactures microcomputer components, modules and systems.

LOS ANGELES (MARCH 7) BUSINESS WIRE - The Kushner-Locke Co. Inc. (NASDAQ: KLOC) disclosed Wednesday it has signed a joint venture agreement with Radio Vision International Inc. which calls for Kushner-Locke to participate in revenues generated from six major Radio Vision current music television specials, it was announced by co-chairmen Peter Locke and Donald Kushner.

The six specials include: "Ringo Starr and His All-Star Band," The Who's performance of "Tommy,""Eurythmics Live from Rome,""Fine Young Cannibals-The Concert," "The Prince's Trust Rock Gala 1989," and the "Jerry Lee Lewis and Friends" special. All six productions are currently in release internationally.

The joint venture also grants Kushner-Locke the first right to participate in the production and financing of future Radio Vision television specials. The two companies had been in previous discussions on various co-ventures and a possible merger but decided that the joint venture arrangement was the most mutually advantageous method of working together. Radio Vision will continue to distribute Kushner-Locke product outside the United States and Canada.

The Kushner-Locke Co. is a television production and distribution company providing programming for pay cable services, first-run syndication and for the major television networks. The company also distributes its own and third-party programming in foreign markets.

Recent Kushner-Locke productions include: "Aladdin's Lamp," for the Disney Channel; the Tennessee Williams classic "Sweet Bird of Youth" starring Elizabeth Taylor and Mark Harmon, which recently aired on NBC-TV; the hit CBS movie, "Liberace: The Man Behind the Music," and the top-rated NBC-TV movie, "Your Mother Wears Combat Boots," starring Barbara Eden. The company's comedy series "1st & TEN" has commenced filming for its sixth season on Home Box Office (HBO).

SALT LAKE CITY (MARCH 7) BUSINESS WIRE - Plexus Resources Corp. Wednesday announced that it will not proceed with its proposed Canadian public offering for which a preliminary prospectus was filed during the fourth quarter of 1989.

The company intends also to withdraw a companion registration with the Securities and Exchange Commission in the United States. The withdrawal of the preliminary prospectus follows the recent announcement that Plexus has entered into a private placement agreement with TOTAL Energold Corp. whereby Plexus will issue and TOTAL will purchase 6 million shares of common stock and warrants to purchase up to an additional 2,150,000 shares of common stock at an exercise price of $3 (Cdn) per share. Total consideration, exclusive of proceeds from the exercise of warrants, aggregates $18 million (Cdn).

In withdrawing its prospectus, Plexus reiterated its view as to the significance of the proposed private placement transaction to its long-term growth and to the prospect of becoming associated with TOTAL, a Vancouver-based mining and energy company which is 65 percent owned by TOTAL Companie Francaise des Petroles of Paris.

''This financing marks an important step in the ongoing development of the company,'' stated Arthur H. Ditto, Plexus' president.

Completion of the proposed private placement is subject to due diligence and approvals of Plexus' shareholders, TOTAL's board of directors and regulatory authorities.

Plexus Resources Corp. is an expanding diversified natural resources company with extensive base and precious metal interests and oil and gas production. Plexus' shares are listed on the Toronto Stock Exchange (PXS) and trade in the United States on NASDAQ (PLUSF).

SCOTTSDALE, AZ (MARCH 7) BUSINESS WIRE - George Warnock, president of Coronado Resources Inc. (VSE: CRD) Wednesday announced that Coronado has entered into a letter of intent with Charles Cobb IV to acquire all of his common stock in Cobb Resources Corp. (NASDAQ:COBB) (1,403,759 shares representing approximately 21 percent of the outstanding shares).

The transaction will involve the purchase of 692,308 shares by Coronado, the receipt of options to acquire an additional 300,000 shares exercisable within six months and 411,451 shares exercisable within one year.

At June 30, 1989, Cobb Resources had proved reserves of 2.364 million barrels of oil and 3.877 billion cubic feet of gas. Revenues in fiscal 1989 from oil and gas operations were $1,960,000. Cobb reported earnings of two cents per share for the quarter ended Dec. 31, 1989.

The transaction is subject to the execution of a definitive agreement and the approval of Coronado's board of directors.

SANTA BARBARA, CA (MARCH 7) BUSINESS WIRE - Digital Sound Corp. (NASDAQ/NMS: DGSD) closed its initial public offering Tuesday, March 6.

The company sold 4.7 million shares of common stock in the offering on Feb. 27 at an initial public offering price of $8.50. Of the total shares offered, 3,071,798 shares were sold by the company and 1,628,202 shares were sold by certain shareholders. The underwriters exercised their over-allotment option to purchase an additional 705,000 shares from the company. Goldman, Sachs & Co. and Montgomery Secrurities co-managed the offering.

The principal purposes of this offering are to increase the company's working capital and equity base, to provide a public market for its common stock and to enhance its future access to public capital markets.

Digital Sound Corp., with headquarters in Santa Barbara, designs, manufactures, and markets general purpose platforms that can operate multiple voice processing applications simultaneously. The voice processing applications currently supported include not only fully integrated voice messaging, but also interactive voice response, text-to-speech synthesis and speaker dependent speech recognition.

The company's products are used by telephone companies and other medium-sized to large organizations.

ATLANTA (MARCH 7) BUSINESS WIRE - EPI Products, well known for the sales of Epilady, EpiSmile and other innovative personal care items, will receive the 1989 ACE Top 100 Award at the Seventh Annual Awards Dinner held in the Atlanta Hilton and Towers, Friday (March 9).

''EPI Products (run by Loren and Arlene Krok and Sharon Krok Feuer), is the only woman-operated company to place in the top 10 entrepreneurs of the year,'' said Max Haynes, executive director of the Association of Collegiate Entrepreneurs (ACE).

The ACE Top 100 Awards will honor America's most successful entrepreneurs of 1989 who are age 30 and under. Loren Krok will be on hand for the award presentation. In her acceptance speech, Krok will adress the issues of ''Women in Business'' and ''The Cross-Over Decade -- Into the 90s and Beyond.'' EPI Products placed second in the Top 100, only behind Dell Computer Corp.

ACE is a non-profit, educational organization, formed in 1983 to help

young people, students and young entrepreneurs, aged 30 and under, to network together and learn from one another. By bringing together young entrepreneurs and hopefuls from around the country, ACE is helping people realize their long-term goals.

Ted Turner, Turner Broadcasting, will lead a closed-door discussion with recipients of the ACE Top 100 Award during the Ace International Convention. Turner will also be the guest speaker at the annual luncheon. Entrepreneur magazine's publisher Clare Thain with Ian McMillan, will also host a discussion with the top young entrepreneurs.

EPI Products is proud to be a part of the ACE Top 100 and thanks the Association of Collegiate Entrepreneurs for this honor.

#90066b0137 03/07/1990 ~Business Wire

REDONDO BEACH, CA (MARCH 7) BUSINESS WIRE - TRW Space & Technology Group announced Wednesday that it has formed a contractor team consisting of SPAR Aerospace Ltd. and Ocean Systems Engineering to compete for the National Aeronautics and Space Administration's contract for definition studies and preliminary design leading to a Satellite Servicer System flight demonstration.

The Satellite Servicer System (SSS) flight demonstation is a NASA Johnson Space Center program that will show the ability to maintain satellites in locations not readily accessible to humans (such as polar and high-inclination orbits), to permit hazardous servicing, to reduce Space System Transportation System extravehicular activity dependency and to improve cost efficiencies.

The system will be used in a three-phase, on-orbit flight demonstration launched from the Space Shuttle orbiter. The demonstration will exercise autonomous rendezvous and docking, orbital replacement unit exchange and fluid transfer capabilities, and will use existing technologies including the Orbital Maneuvering Vehicle and elements of the Flight Telerobotic Servicer, to minimize costs and reduce technical risks.

''We at TRW think that satellite servicing is a concept that deserves close scrutiny because of the promise if offers in prolonging the useful life of satellites. Putting a servicing system carrying electronic spares, fuel or other expendables in orbit is a cost-effective option to building and launching an entire replacement satellite,'' said R. Gordon Williams, vice president and general manager of the TRW Federal Systems Division.

''TRW has teamed with SPAR and Ocean Systems Engineering because we believe that their capabilities and expertise complement ours and will enable us to give this study the thorough response it deserves,'' said Williams. ''We look forward to a successful partnership to develop an affordable SSS flight demonstration proposal that satisfies program requirements and assures an evolving autonomous servicing capability.''

TRW Space & Technology Group, based in Redondo Beach, has built more than 175 communications, defense and scientific spacecraft, developed over 200 advanced space instruments and integrated some 550 experiments into their host spacecraft.

SAN FRANCISCO (MARCH 7) BUSINESS WIRE - TIS Mortgage Investment Co. (NYSE:TIS) Wednesday reported net income for the year ended Dec. 31, 1989 of $8,003,000, or 99 cents per share.

This compares to net income of $2,688,000, or 34 cents per share for the short year August 26, 1988 through Dec. 31, 1988. Total revenue for the year ended Dec. 31, 1989 was $73,268,000 as compared to total revenue for the short year ended Dec. 31, 1988 of $16,485,000.

Net income for the quarter ended Dec. 31, 1989 was $2,281,000, or 28 cents per share, compared to net income for the quarter ended Dec. 31, 1988 of $1,921,000, or 24 cents per share. Total revenue for the quarter ended Dec. 31, 1989 was $20,986,000 as compared to $12,139,000 for the quarter ended Dec. 31, 1988.

The company also declared a dividend today of 32 cents per share for the quarter ending March 31, 1990, payable April 13, 1990, to stockholders of record as of March 30, 1990.

As a real estate investment trust, TIS Mortgage Investment Co.'s dividends are based on taxable income calculated under the Internal Revenue Code and not on book income which is computed in accordance with generally accepted accounting principles.

The company declared and paid quarterly dividends of 30 cents per share for each of the first three quarters of 1989, and 32 cents per share for the fourth quarter of 1989. Taxable income in 1989 exceeded the amount of dividends declared and paid.

TIS Mortgage Investment Co. is a San Francisco-based REIT which invests in various mortgage assets, including residual interests in Collateralized Mortgage Obligation (CMO) Bonds. The company commenced operations on August 26, 1988.

#90066b0151 03/07/1990 ~Business Wire

EMERYVILLE, CA (MARCH 7) BUSINESS WIRE - Farallon Computing Inc. Wednesday announced the availability of its Remote/WakeUp cable.

The Remote/WakeUp cable, when used with Farallon's Timbuktu/Remote software and a Hayes-compatible modem, allows users to turn on a Macintosh II remotely with a phone call, then access, operate and retrieve files from their desktop.

The Remote/WakeUp cable is now shipping as part of Farallon's Timbuktu/Remote Access Pack. All registered owners of the Timbuktu/Remote Access Pack have been shipped the Remote/WakeUp cable free of charge. Users who already own modems can purchase the Remote/WakeUp cable separately.

The Remote/WakeUp cable looks exactly like an ordinary modem cable, except for an extra connection that fits into the ADB (Apple Desktop Bus) port. On Macintosh Plus, SE and SE/30 computers, which lack soft power up, the WakeUp cable functions as a hardware flow-control cable.

Hardware flow control allows users to take advantage of advanced data compression features found in high-performance modems, such as Farallon's Remote/V.32 modem.

Farallon's Timbuktu/Remote Access Pack contains all the hardware and software necessary for creating a virtual office: Timbuktu/Remote screen sharing and file transfer software; a high performance, 9600 bps full-duplex Remote/V.32 modem; and a Macintosh-to-modem Remote/WakeUp cable.

In addition to screen sharing and file transfer, Timbuktu/Remote features a ''chat window'' for exchanging text messages. Timbuktu/Remote works over a variety of connections, including dial-up lines, ISDN links, digital PBX data lines or serial connections.

The Timbuktu/Remote Access Pack, complete with Remote/WakeUp cable, sells for $1,295. The Remote/WakeUp cable, sold separately, retails for $49.95. Both are available at Farallon resellers. In the United Sates, Farallon products are distributed by Ingram/MicroD, Softsel and MicroAmerica.

Farallon Computing is the world's leading provider of twisted-pair local-area networks, with more than one million PhoneNET System nodes installed in Fortune 500 companies, universities and government agencies. The company produces personal communications products and technologies primarily for use by Macintosh computers.

Farallon products embrace a variety of communications media, including ISDN, analog and digital voice, data, fax and video. The company has 161 employees and is headquartered in Emeryville, with research facilities there and in Lawrence, Kan.

Farallon sells its products world-wide through retail distribution and makes its technologies available through OEMs and relationships with other major vendors.

DALLAS (MARCH 7) BUSINESS WIRE - Southwest Airlines has done it again. The Dallas-based carrier has for an unprecedented fourth time captured the top spot in the three Department of Transportation (DOT) airline performance categories.

The airline, which recently achieved major airline status with revenues over the $1 billion mark, had the best records among the nation's largest airlines in ontime performance, Customer service and baggage handling.

According to the DOT's March Air Travel Consumer Report, some 82.5 percent of Southwest's more than 30,000 flights for the month of January arrived on time; there were only .58 Customer complaints per 100,000 passengers; and only 4.26 baggage complaints per 1,000 passengers carried.

''Once again, the Southwest spirit prevails,'' said Donald G. Valentine, vice president-sales and marketing for Southwest. ''Our employees systemwide have achieved the coveted 'triple crown' for the fourth time -- a recognition no other airline has earned even once. This proves again what we've known all along: that it's possible to have the lowest fares and still provide the best Customer service.''

Southwest Airlines first captured the DOT triple crown in the March 1988 report and took top honors again in the November 1989 report and a third time in the February 1990 report.

SAN FRANCISCO (MARCH 7) BUSINESS WIRE - McKesson Corp. (NYSE:MCK) and PCS Inc. (NASDAQ:PCSI) announced Wednesday that they have entered into a definitive merger agreement providing for the acquisition by McKesson of all the publicly-held shares of PCS common stock at a price of $20 per share in cash.

McKesson currently owns approximately 86 percent of PCS's outstanding shares. Under the terms of the agreement, McKesson will make a cash tender offer for any and all outstanding PCS shares at a price of $20 per share. Any PCS shares not purchased in the tender offer will be acquired by McKesson in a subsequent merger transaction at the same $20 per share cash

price.

The approval of the merger agreement and the tender offer by PCS was based on a number of factors, including the recommendation of a special committee of the PCS board formed to consider McKesson's proposal to acquire PCS's publicly-held shares and the opinion of The First Boston Corporation, the financial advisor to the special committee, that the per share consideration to be received by the public stockholders of PCS in the tender offer and the merger is fair from a financial point of view.

On Dec. 22, 1989 McKesson originally proposed to acquire all of the outstanding shares of PCS for $15 a share in cash. McKesson said that in consideration of its agreement to proceed with the acquisition under the terms set forth above, its counsel and counsel for the plaintiff in a stockholder lawsuit have reached an agreement-in-principle providing for the settlement of the outstanding stockholder lawsuit relating to McKesson's ownership of PCS and its proposal to acquire PCS's publicly-held shares. The settlement of the lawsuit is subject to judicial approval, which will be sought promptly.

McKesson said that the tender offer will commence shortly and will be made only by an offer to purchase and other offering documents, copies of which will be filed with the Securities and Exchange Commission and mailed to PCS's stockholders.

McKesson is the nation's largest distributor of nondurable consumer goods, principally pharmaceuticals and health and beauty aids, to pharmacies and hospitals. PCS is the nation's largest provider of third-party prescription claims services.

RICHLAND, WA (MARCH 7) BUSINESS WIRE - The reactor at the Fast Flux Test Facility was automatically shut down about 9 a.m. Wednesday when an operator selected the wrong switch during the performance of a monthly test procedure.

The instrumentation is part of the protective equipment which ensures safe reactor operation. The reactor's automatic shutdown systems worked as designed in response to the incorrect switch position. FFTF technical specifications require regular testing, such as the procedure being performed at the time of the shutdown, said Dave Lucoff, manager of FFTF Operations. There was no damage or effect on the public.

Restart activities are currently under way to complete the operating cycle

which began in early January. Westinghouse Hanford Co. operates the advanced test reactor for the Department of Energy.

The current operating cycle is scheduled to end in early April. FFTF testing programs include a series of advanced fuels and materials experiments. Test results are not expected to be affected by the temporary shutdown.

#90066b0221 03/07/1990 ~Business Wire

VANCOUVER, British Columbia (MARCH 7) BUSINESS WIRE - Gallery Gold Mines Ltd. (ASE:GYG) announced that final arrangements have been made to start production on a large-tonnage, low-grade, low-cost gold mine this summer on the site of the Bonanza Section along Lightning Creek, B.C. (the Hannandor Property).

Gallery's Hannandor Property is uniquely situated at the confluence of Lightning and Moustique creeks. Gallery, as operator, has negotiated a two-year extension of its option on the Hannandor Property and, in addition, an agreement has been signed to acquire and option the Channex Property, thereby expanding Gallery's total mining property to 16 claims.

The Channex Property is immediately north of the Hannandor Property divided only by the Quesnel-Barkerville Highway. Gallery intends to conduct geophysical surveys and test operations on the Channex Property during the forthcoming year.

Gallery has recently completed two private placements resulting in the issuance of 1.4 million common shares, raising an aggregate of $210,000.

Jan Schutze, an economic geologist, feels that this property is unique in that all material is minable at a potential profit. Even previously considered overburden becomes profitable ore when processed with large-tonnage, low-grade mining methods.

Ore grades of the immediately targeted reserves conservatively average $5/yard (finess: 90.3 gold, 8.7 percent silver) and grades of up to $35/yard have been found by Gallery directly above bedrock. With an anticipated 10,000 yards per day, this project has the potential to become the largest of its kind ever undertaken in the Cariboo Mining District.

The introduction of large-tonnage, low-grade mining to the Cariboo is in line with the latest worldwide trends in gold mining. Small plants on the property have extracted in the recent past approximately 2,000 ounces of gold from 60,000 tons of ore ($25/yard at current prices).

Jan Schutze, the chief executive officer of Gallery, will supervise the operations, anticipated to average $5.00/yard at a cost of $1.50 to $2.50 per yard.

Lightning Creek is in the site of the historic Cariboo Gold Road and was recognized as one of the richest alluvial gold creeks at that time, with 18 miles of unmined, possible reserves of $250 million per mile (8-10 million ounces of gold).

Gallery announced the recent appointment of Kim Hart as a director of the company. Hart is involved primarily in arranging the financing for Gallery projects. He brings considerable experience in both marketing and promotion.

Gallery anticipates additional announcements in the near future.

NEW YORK (MARCH 7) BUSINESS WIRE - PolyGram NV (NYSE:PLG), one of the world's three largest recorded music companies - and the world's largest record group outside the United States - Wednesday announced its best ever financial results and its fifth year of sustained growth.

Announcing PolyGram's results for the year ended Dec. 31, 1989, president David G. Fine, revealed that the group had achieved record sales, record income from operations, record net income and record earnings per share.

Sales in 1989 rose 20 percent to Netherlands Guilders (NLG) 4,105 million, compared with NLG 3,426 million in 1988. Income from operations in 1989 increased 35 percent to NLG 457 million from NLG 339 million in 1988.

Net income was NLG 333 million in 1989 compared with NLG 262 million in 1988. Earnings per share were NLG 2.08 in 1989 compared with NLG 1.64 in 1988.

The results include six months' figures from Island Records, which was acquired with effect from July 1, 1989.

Said Fine, ''1989 was an excellent year for PolyGram; it was the fifth successive year in which we have produced record results from operations - five years of sustained growth.''

Fine said the year was also the beginning of a new era for PolyGram in

which it made major acquisitions in popular music and music publishing, and completed an initial public offering of 35 million shares of common stock in December 1989.

Fine explained that PolyGram's significantly higher popular music revenues in 1989 were largely due to excellent sales from a wide range of artists, as opposed to a few acts selling multi-million quantities. Additionally there were very strong sales from a number of local performers in their own national markets.

NEW YORK (MARCH 7) BUSINESS WIRE - Management Technologies Inc., which develops and markets international banking software, has completed its acquisition of Trade Services Consultants Inc. which owns the Trade Services System (TSS) business formerly operated by Warrington Financial Systems Inc. in Cambridge, Mass.

For Management Technologies, the addition of a Letter of Credit and Collections system complements MTI's existing product lines of integrated international banking and payments software and expands its client roster.

''This will increase our potential for sales,'' said MTI Chairman Barrington J. Fludgate. ''We will be visiting ManTec clients to explain our new Letter of Credit system and we will certainly talk with the Trade Services clients about our ManTec and ManTecII banking lines. In addition offering a full line of international banking products should enhance MTI's appeal to regional and superregional U.S. banks.''

The Trade Services systems are operating at banks in the United States and Canada including Chemical Bank, Canadian Imperial Bank, Boatmen's, Fidelity Bank and Pittsburgh National Bank. MTI's systems are being used in the United States, Canada, Europe and Australasia.

MTI plans to convert the Letter of Credit and Collection systems to IBM's

DB2. MTI has already developed its wholesale DDA system on DB2 and plans to move its entire international banking product line to the IBM relational database. In addition, MTI markets ManTecII, a front-end dealing and back-office settlement system running on Stratus or IBM System/88 fault-tolerant minicomputers.

Scicon has purchased a total of 246,579 shares of MTI stock at $4.05 per share for a total of $1 million.

Management Technologies trades on NASDAQ under the symbols MTCI for common stock and MTCIW for warrants.

ROSELAND, N.J. (MARCH 7) BUSINESS WIRE - Automatic Data Processing, Inc. announced the sale of 81 percent of its wholly-owned Brazilian subsidiary to SISON Participacoes e Empreendimentos Ltda., a Brazilian company, for an undisclosed purchase price.

The Brazilian subsidiary, which accounts for approximately two percent of ADP's revenues, provides payroll and accounting services through data processing centers in Sao Paulo, Campinas and Rio de Janeiro. This transaction will not have a material affect on ADP's earnings.

ADP, with over $1.5 billion in revenues and 200,000 clients, is the largest independent computing services firm in the United States.

LOS ANGELES (MARCH 7) BUSINESS WIRE - MGM/UA Communications Co. (NYSE:MGM) and Pathe Communications Corp. (NYSE:PCC) announced Wednesday that they have entered into a definitive agreement under which Pathe will offer to acquire 100 percent of the outstanding shares of MGM/UA.

Under the terms of the transaction, Pathe will, within five days, commence a tender offer to acquire all of MGM/UA's outstanding shares of common stock and preferred stock for $20.00 cash per share.

MGM/UA's principal shareholder, Tracinda Corp., has agreed to tender to Pathe all of its shares of common and preferred stock at the tender price.

The transaction is expected to close by June 23, 1990.

In support of the transaction, Pathe has agreed to place $200 million into an escrow account by depositing four equal installments of $50 million each on March 9, 1990, April 9, 1990, May 9, 1990 and June 9, 1990.

In addition to the deposit, Pathe has granted to MGM/UA certain distribution rights and a security interest in up to $75 million of the net distribution proceeds of certain motion pictures as additional security for Pathe's performance.

Pathe has advised MGM/UA that it presently intends to operate the two companies separately. Barbakow plans to remain in his current position.

Pathe Communications Corp. (which takes its name from Pathe Cinema, S.A. (France), a company founded more than 100 years ago) is an international entertainment company which is engaged in motion picture production, distribution and exhibition.

In addition to its film production operation and its library of over 500 major motion pictures and 2,000 newsreels, Pathe controls over 1,000 theater screens in five countries; film production facilities in Italy and a film processing laboratory in France.

MGM/UA Communications Co. is engaged in motion picture, home video and pay television production and distribution; television production, licensing and syndication; and character and logo licensing and merchandising.

The company owns the 1,000 title UA library and distributes the Turner/MGM library of 2,950 motion pictures in worldwide home video and foreign pay television markets.

The transaction between MGM/UA and Pathe has been approved by the respective boards of MGM/UA and Pathe. The offer requires certain filings with government agencies and is subject to customary conditions.

CALABASAS, CA (MARCH 7) BUSINESS WIRE - Tekelec has signed an agreement with British Telecom to provide $500,000 worth of Chameleon 20-I systems during the next twelve months.

The Chameleons will be used to test DASSII (Digital Assignment Signaling and Switching II), an ISDN-like service deployed in the United Kingdom.

''British Telecom chose the Chameleon after an extensive evaluation of test products. The 20-I scored highest on its advanced technical capabilities and ease of use,'' stated Mark Tyson, Tekelec's vice president of marketing and sales.

This agreement reflects Tekelec's commitment to supporting international communications standards. ''Tekelec is 100 percent committed to ISDN standards worldwide as well as established national standards such as DASSII in the United Kingdom,'' stated Peter N. Vicars, Tekelec president and chief executive officer. ''Tekelec's presence overseas is very strong. More than 50 percent of our sales last year resulted from international business,'' he added.

British Telecom is initially using the Chamelion 20-I systems to test multi-line IDA (Integrated Digital Access) applications. Later the systems will be used to commission and maintain all subsequent British Telecom ISDN services. The Chameleon 20-I's will also be used as a key educational tool at British Telecom Engineer Training Establishments.

Tekelec has subsidiaries in the United Kingdom and Japan plus a worldwide distribution network providing complete digital test equipment service and support to over 20 countries. The Chameleon systems support many established international standards including CCITT standards for ISDN X.25 and SS 7.

Recognized as a leading test equipment manufacturer, Tekelec's product line encompasses testing of data protocols (ISDN,X.25), transmission services and equipment, signaling (SS 7), and emerging intelligent network applications.

Its products are actively marketed worldwide with subsidiaries in Japan and the United Kingdom. California Business Magazine recently rated Tekelec 12 in its survey of the 100 most successful companies in California due to its overwhelming growth in the last five years.

For more information, contact Tekelec, 26580 W. Agoura Road, Calabasas, California 91302. Phone: 818/880-7900 Ext. 7975. Fax: 818/880-6993.

SEAL BEACH, CA (MARCH 7) BUSINESS WIRE - TouchStone Software Corp., a leading supplier of PC utility software, Wednesday announced a major distribution agreement with Softsel Computer Products Inc.

Softsel is one of the largest worldwide computer products distributors with 13 distribution centers and 23 sales offices throughout the United States, Canada, Europe and Australia. The agreement calls for Softsel to distribute TouchStone's PC diagnostic software, CheckIt, thorugh all of its channels.

According to C. Shannon Jenkins, TouchStone president and chief executive officer, CheckIt has experienced rapid growth with sales of more than 30,000 copies in 1989.

CheckIt is the first PC diagnostic program to be offered by Softsel or other major retailers like Egghead Discount Software and it appears on the best-seller lists at several other distributors.

CheckIt's rapid sales growth and enthusiastic product acceptance lead to this expansion of TouchStone's distribution channel. ''We view our agreement with Softsel as a major step forward in TouchStone's growth,'' Jenkins said. ''Softsel will not only put us in touch with many more domestic resellers, but provides momentum toward our international market expansion as well.''

Allan Schroeder, Softsel's director of new products, comments, ''CheckIt complements our broad utility product offerings affirming that Softsel is committed to being the easiest distributor with which to do business.'' Schroeder added, ''By offering TouchStone's CheckIt technical support and diagnostic software, we will surely make life easier for our value-added customers.''

Checkit will now be included in Softsel's reseller programs and services. One such program is Softsel's Frequent Buyer program, the industry's most generous purchase incentive.

This popular incentive program allows resellers to earn points for merchandise, travel, etc. Softeach, the Computer Products Training Forum, is another Softsel program through which resellers and vendors are brought together for a weekend of training on the industry's top hardware and software products.

Resellers can attend training sessions in various cities across the nation and TouchStone will be one of the more than 50 vendors to participate in Spring Softeach '90 which runs through April.

Jenkins urges any reseller interested in learning about the CheckIt success story to attend. For information on exact locations and dates

contact Cathy Quattrocchi, Softsel's public relations coordinator at 213/615-3080, extension 230.

#90066b0630 03/07/1990 ~Business Wire

VENTURA, CA (MARCH 7) BUSINESS WIRE - Benton Oil and Gas Co. (NASDAQ:BNTN) Wednesday announced that as of the close of business on March 5, 1990, approximately 788,420 of its 811,000 outstanding common stock purchase warrants had been exercised following the company's call of the warrants for redemption.

Benton further announced that it had extended the period in which the warrants could be exercised to March 26, unless the period is again extended.

David Pratt, Benton's chief financial officer, stated that the extension was implemented to give warrantholders additional time to comply with the exercise requirements.

''Because Benton's stock price has continued to indicate that it is in the best interest of warrantholders to exercise their warrants, we believe that some warrantholders may have had insufficient time to exercise after receiving notice of the call for redemption. We want to give all of our warrantholders a reasonable opportunity to exercise their warrants,'' Pratt stated.

The net proceeds to Benton from the exercise of the warrants exercised to date will be approximately $5,650,000 to $5,850,000 depending on the number of warrants on which a solicitation fee is payable. ''We are very gratified at the response shown by the market and are glad to have the additional capital available for use in our operations,'' said Alex Benton the company's president.

Because of the small number of warrants remaining outstanding and the imminence of the redemption date, as extended, the warrants will no longer be quoted on NASDAQ after March 26. The warrants may be delisted before that date if substantially all the remaining warrants are exercised before March 26.

Benton Oil and Gas, based in Ventura, California, is an independent exploration and development company with operations in California, Colorado, Oklahoma, Texas and Louisiana. Benton's common stock is traded OTC.

BELMONT, CA (MARCH 7) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, today announced the appointment of Dr. Yury Parad as managing director of Oracle Eastern Europe. Parad will be based in Moscow, and will be responsible for Oracle activities in Bulgaria, Czechoslovakia, Hungary, Poland, Romania and the U.S.S.R.

In a separate announcement, Oracle released details of its initial customer sites in Eastern Europe and the designation of its first Eastern European distributors.

Parad, an Oracle employee since 1986, emigrated to the United States from the Soviet Union in 1980. He holds a Ph.D. in Computer Science from the Institute of Technology in Kiev, his native city. Acting as a technical manager of consulting in Oracle's Chicago office, Parad was tapped for the top post in Eastern Europe when recent events allowed the expansion of Oracle into the new markets. Oracle Provides Key Technologies

Political and economic commentators agree that the rapid modernization of Eastern Europe's economies is crucial for the success of the new experiments in democracy in those countries. Oracle provides technologies that can play a major role in the overhaul of the moribund economies in Eastern Europe, according to Parad.

The availability of Oracle's product line and its full-support network in Eastern Europe will ease the task of western firms in opening plants and distribution facilities there.

Oracle Corporation, headquartered in Belmont, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

#90066b0647 03/07/1990 ~Business Wire
SAN JOSE, CA (MARCH 7) BUSINESS WIRE - Businessland Inc. Wednesday announced that it has accepted the resignation of Enzo N. Torresi from its

board of directors.

Torresi is the co-founder of Businessland and has served the company as a director since 1982. He left the company's active employment in December 1988 to become president and chief executive officer of NetFRAME Systems Inc., a developer of high-throughput network servers for office automation.

Torresi resigned because it would be inappropriate for him to be on the Businessland board while the reseller is authorized to sell, service and support products manufactured by Compaq Computer Corp. Both NetFRAME and Compaq offer competitive server products.

''My loyalty to the company remains strong and I know our close ties will continue in the 90s,'' said Torresi. ''Businessland remains the primary channel of distribution for NetFRAME's family of servers and advanced networking products. I am confident Businessland is very well positioned for continued growth in the 1990s.''

David A. Norman, Businessland's chairman, president and chief executive officer, stated: ''It is with a great deal of reluctance that we accept Enzo's resignation from our board of directors. He has been a great friend to Businessland since its inception and made valuable contributions to our growth and strategic direction.''

Founded in 1962, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, two in West Germany and five in Canada. It reported sales of $1.2 billion in fiscal 1989.

BELMONT, CA (MARCH 7) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database software and services, today announced its first Eastern European customer sites, located in Hungary, Czechoslovakia and Poland. Oracle simultaneously announced the designation of its first Eastern European distributors, A.T.S., in Poland and SZKI in Hungary.

Both SZKI and UAK Institute anticipate signing Value-Added Reseller (VAR)

agreements with Oracle, which would enable them to sell their systems software within their mother countries initially, and later in Western Europe to generate hard currency for their local economies.

Parad, a Soviet emigre to the U.S., will return to the U.S.S.R. later this month as a visiting American. He will be based in Moscow, where he will build Oracle's Eastern European organization. About Oracle

Oracle Corporation, headquartered in Belmont, Calif., is the largest supplier of DBMS software and the third largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial, manufacturing and government applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 90 countries around the world. Oracle is a publicly-held corporation whose shares are traded on NASDAQ/NMS with ticker symbol ORCL.

For further information about Oracle, call Oracle corporate headquarters at 800-345-DBMS (345-3267), or write to Oracle Corporation at 20 Davis Drive, Belmont, CA 94002.

#90066b0650 03/07/1990 ~Business Wire

BELMONT, CA (MARCH 7) BUSINESS WIRE - Oracle Corporation, the world's largest supplier of database management software and heterogenous network software, today announced SQL Net LU6.2, a suite of products that extends the ORACLE relational database management system's (RDBMS) support of IBM's SNA networks to non-IBM operating systems and computers. Oracle's extension of SQL Net to non-IBM platforms makes Oracle the only RDBMS that supports distributed applications and distributed data tables across different computers in an SNA environment.

The new versions of SQL Net LU6.2 support such operating systems as MS-DOS DEC VAX/VMS, AOS/VS from Data General, plus several UNIX implementations, including AT&T, Motorola and Sun. They join versions of SQL Net LU6.2 previously released for IBM's MVS, VM and RT AIX operating systems.

Oracle's SQL Net is network software that transparently supports both client/server and distributed databases on heterogenous networks. It supports the IBM LU6.2 protocol through an advanced program-to-program communication (APPC) interface. Thus SQL Net LU6.2 supports a variety of underlying network topologies, including token ring, SDLC, and IEEE 802.3 (Ethernet) networks.

LU6.2 is IBM's strategic protocol for its System Network Architecture design. SNA defines network protocols and other components across hardware platforms, and is widely supported by software and network vendors.

Oracle's SQL Net LU6.2 also works with IBM's APPC software for MS-DOS, MVS RT AIX, and VM, as well as with LU6.2 products from other vendors including Systems Strategies Inc. of New York, a NYNEX company that sells portable SNA software on dozens of platforms. Systems Strategies offers a special version of its ezBRIDGE Peer-to-Peer (LU6.2/PU2.1) software called ezBRIDGE for Oracle, which can use SDLC, token-ring and X.25 transports and is available under VMS and a variety of UNIX platforms.
Network Transparency

Oracle's SQL Net software insulates users and applications from dealing with network protocols or topologies. It allows users to add, move, or replace network components, databases, and database servers without reconfiguring or modifying their application programs. In addition to LU6.2, SQL Net also supports other industry-standard transport protocols and interfaces such as TCP/IP, DECnet, NetBIOS, SPX/IPX, Named Pipes, VINES, and 3270 datastreams. Availability and Pricing

SQL Net LU6.2 for MS-DOS and UNIX for AT&T, NCR and Sun will be released in March 1990. Versions for UNIX implementations on Apollo, Data General and Motorola as well as VAX/VMS and DG AOS/VS platforms will be released over the next six months. Availability for OS/2 has not yet been determined. Pricing is identical to SQL Net pricing for other protocols in those environments. About Oracle

Oracle Corporation, headquartered in Belmont, Calif., is the largest supplier of DBMS software and the third-largest software and services company in the world.

Oracle develops and markets an integrated line of software products for database management, applications development, decision support and office automation, as well as families of financial, manufacturing and government

applications packages. All Oracle products are available on PCs, minicomputers and mainframes, and ORACLE is the first and only database to run on supercomputers.

The company offers its products, along with related consulting, education and support services, in 90 countries around the world. Oracle is a publicly held company whose shares are traded on NASDAQ/NMS with the ticker symbol ORCL.

#90066b0653 03/07/1990 ~Business Wire

SALT LAKE CITY (MARCH 7) BUSINESS WIRE - Mining Services International Inc. (NASDAQ:MSIX) Wednesday reported a 40 percent increase in revenues and an 87 percent increase in net income for the year ended Dec. 31, 1989.

Net income for the year, which includes tax credits, reached $236,000 or 5 cents per share, on revenues of $14.5 million compared to net income of $126,000, or 3 cents per share, on revenues of $10.4 million in 1988.

The company's financial condition continued to strengthen in 1989. The company's previously announced sodium cyanide plant boosted total assets 171 percent to an all-time high of $13.9 million, compared to $5.1 million in 1988.

Shareholders' equity rose 8 percent to $3.4 million, or 74 cents per share compared to $3.1 million, or 65 cents per share in 1988. Cash flow remains strong at $1.2 million.

''We're pleased with the company's strong performance in the highly competitive environment we faced during 1989,'' said Lex Udy, president and chief executive officer of Mining Services.

''We attribute the rise in revenues primarily to an increased demand for explosives from the company's existing accounts as well as to the signing of new accounts.''

''We expect this growth trend to continue into the 1990s,'' added Udy. ''In fact, the sodium cyanide plant we are building is scheduled to be on line in May. With already having more than 50 percent of plant capacity under contract, we should see a positive impact on 1990 revenues and net income.''

Mining Services International Inc. is a leading developer of explosives

technology and a supplier of high-quality explosives to the mining industry. The company markets its products in five of the major mining countries worldwide. The company will also be involved in the production of liquid sodium cyanide with its newly constructed plant outside Winnemucca, Nev.

WESTBORO, MA (MARCH 7) BUSINESS WIRE - In a move to strengthen its international management and go after new opportunities, Data General Corp. Wednesday announced new positions for Herbert J. Richman, Angelo Guagadno and Anthony C. Nicoletti.

The moves were as meetings were being held here with Soviet and Austrian business officials regarding a joint venture recently established by them with Data General to market the company's computers in the Soviet Union.

Richman, executive vice president and vice chairman of the board, has been named head of international sales and service. International revenues for the company in fiscal 1989 were $672.4 million, marking the first time they have been greater than domestic revenues. They have almost doubled in the past five years.

Guadagno, vice president of U.S. sales and service, has expanded his responsibilities to include Canada and Latin America.

Nicoletti, vice president of sales support and planning, has been named vice chairman of the board of directors of Nippon-Data General, the company's Japanese subsidiary, and vice president responsible for Japan.

Data General is one of the U.S. computer companies that design, develop and manufacture computers in Japan for the Japanese market, which has been growing rapidly in the past few years.

Richman and Guadagno will report to Data General President and Chief Executive Officer Ronald L. Skates. Nicoletti, who will be based in Tokyo, will report to Richman.

The company also announced that Lindsay Yelland has been appointed vice president and general manager, Asia Pacific Sales and Service. Yelland, who will be based in Singapore, will report to Richman.

Richman, a founder of Data General, has been executive vice president since 1981 and has directed the company's sales efforts since its founding in 1968. He was elected vice chairman of the board of directors in 1989. In his new position Richman will be responsible for sales and service activities in Europe, Australia, New Zealand and Asia, including Japan.

Guadagno joined Data General one year ago as vice president, North American Sales Division. Prior to joining Data General, he had served as vice president, North American Sales Operations at Apollo Computer. Before that he held a number of sales and management positions during a 16-year career with Digital Equipment Corp.

Nicoletti has been with Data General since 1977, serving in a number of sales and field engineering management positions. He was named vice president in 1982 and has been serving as vice president, sales support and planning for the past two years.

Yelland has 25 years experience in computer sales and service positions in the Pacific area. He was formerly vice president, Asia Pacific, for Apollo Computer Inc. and director of operations for Prime Computer Australia.

Data General Corp. is a leading supplier of general purpose computer and communications systems worldwide. In fiscal 1989, 51 percent of the company's $1.31 billion revenues were derived from International sales.

CAMBRIDGE, MA (MARCH 7) BUSINESS WIRE - Beyond Inc., a developer of next-generation application software for personal computer users, Wednesday announced that it has received a substantial first round of venture capital financing.

Matrix Partners of Boston and Merrill, Pickard, Anderson & Byre of Palo Alto, Calif., are the primary investors in the three million dollar round of financing.

The company is developing powerful new applications for the rapidly growing base of users of electronic mail systems. Its initial products draw, in part, on research conducted over the past decade at MIT. Beyond has licensed the underlying technology in MIT projects known as "Information Lens" and "Object Lens."

Beyond was founded in 1988 by Charles Digate, formerly senior vice president at Lotus Development Corp. The company is headquartered in Cambridge, Mass.

STAMFORD, CT (MARCH 7) BUSINESS WIRE - General Housewares Corp. (NYSE:GHW) announced Wednesday that its board of directors has accepted a proposal from a private company to acquire the Colonial Candle operations of its Giftware Group.

Colonial Candle, based in Hyannis, Mass., is a domestic manufacturer and marketer of candles and candle accessories.

While subject to the preparation of definitive documentation and the satisfaction of certain conditions, it is expected that the transaction will be completed on or about April 30, 1990.

In accordance with the board's decision in late 1989, General Housewares is also in the process of disposing of the balance of the group's operations, namely, its kitchen textile coordinate business. When completed, it is anticipated that the proceeds will approximate the group's total year-end book value of $15 million.

General Housewares Corp. is a leading manufacturer and marketer of

cookware and cutlery.

ROCHESTER, NY (MARCH 7) BUSINESS WIRE - Paychex Inc. (NASDAQ: PAYX) Wednesday said it will report an increase in revenue of approximately 20 percent but an earnings decline in its fiscal third quarter ended Feb. 28, 1990, compared to the same period last year. The company expects profit margins to resume higher levels in the fourth quarter.

Tom Golisano, chief executive officer, said the profit decline is primarily attributable to over $600,000 in nonrecurring calendar year-end processing costs associated with the installation of a new payroll software system throughout the company's nationwide network of payroll processing centers.

The company further reported that while new client growth during the third quarter was below expectations, its two new products, TaxPay, and Personnel Services enjoyed strong market acceptance.

TaxPay, an automatic tax payment option, is now being utilized by over 3,000 clients in 31 of the company's 74 operating centers, with clients signing on at the rate of over 250 a week.

Personnel Services, designed to help small companies deal with administrative and other personnel issues, is being offered in 36 offices and has attracted over 2,000 clients since its introduction last year. "Our current plans call for both products to be available nationwide by the end of this calendar year," Golisano said,

He concluded, "While the third quarter results to be issued in about two weeks will be lower than expected, we anticipate improved profitability in the fourth quarter and the following fiscal year."

Paychex is primarily engaged in the preparation of payroll checks, internal accounting records, and all federal, state, and local payroll tax returns for businesses with one to 200 employees.

SHAWNEE, OK (MARCH 7) BUSINESS WIRE - Barton Industries Inc. announced at this time that earnings for its fiscal year ending Sept. 30, 1990, are estimated to be approximately $5 million on estimated revenues of approximately $32 million, compared with a $2.9 million loss on revenues of $9.2 million for Barton's 1989 fiscal year.

Simultaneously, Barton announced the introduction of an updated version of Barton's pump-off control units, initially introduced during 1989.

C.W. Earl Johnson, chairman and chief executive officer of Barton, explained that, "Barton's pump-off control units enable the oil and gas production industry to implement total reservoir management techniques utilizing state-of-the-art computer technology.

"The benefits to be derived by Barton's customers include increased production coupled with reduced maintenance and operating expenses, resulting in lower overall lifting costs per unit of production.

"This system is the answer and solution to the energy needs in the marketplace and will revolutionize the automation and management of current and future energy fields."

According to Johnson, "The innovative technology represented by the Pump-Off Plus is another step in Barton's recent transformation from solely a valve manufacturing concern to a company which is able to provide a full range of products and services to the oil and gas production industry, in addition to being able to provide various products and services to other industries."

Barton's forecasted fiscal 1990 earnings and revenues are based upon estimated levels of sales of all of Barton's products and services, which sales levels have been enhanced by virtue of Barton's recent diversification program.

According to Johnson, "Through our diversification efforts, Barton is, today, an industry leader in the field of oil and gas production automation which, together with Barton's service centers throughout the country, has enhanced its overall level of sales, including sales of Barton's traditional valve products."

STAMFORD, CT (MARCH 7) BUSINESS WIRE - Lone Star Industries Inc. Wednesday announced that a labor dispute at its Oglesby, Ill., cement manufacturing plant has forced the shutdown of manufacturing for an indefinite period.

The plant is being picketed by Local 150 of the International Union of Operating Engineers and Local 176 of the International Brotherhood of Electrical Workers. The dispute arose when the company retained non-union contractors to perform work in connection with a plant improvement and expansion project.

Local 150 is currently seeking to organize the company's hourly workforce, which bargaining unit is already represented by a Local Lodge of the Cement, Lime, Gypsum and Allied Workers Division of the International Brotherhood of Boilermakers, Iron Ship Builders, Blacksmiths, Forgers and Helpers.

Lone Star Industries and its affiliates are leading producers of cement and a major source of ready mix concrete, sand and gravel, crushed stone, and other construction materials.

NEW YORK (MARCH 7) BUSINESS WIRE - Wertheim Schroder & Co. Inc., the New York-based investment bank, announced Wednesday that Bryan J. Walsh has joined the firm as managing director, member of the executive committee and director of Global Fixed Income and related products.

Walsh comes to Wertheim from Morgan Stanley, where he was a managing director.

The announcement was made by James A. Harmon, chairman and chief executive officer of Wertheim Schroder.

At Wertheim, Walsh will head up the firm's global, multi-currency fixed income trading business. Previously, he was director of Morgan Stanley's structured products group and served as treasurer of the Morgan Stanley Group.

Prior to Morgan Stanley, Walsh was senior vice president of Irving Trust Co.'s international fixed income and foreign exchange busineses. He began his career at Irving after serving in Vietnam as an Air Force

Captain.

Walsh received his bachelor of science degree in mathematics from Manhattan College and studied finance and information systems at New York University's Graduate School of Business Administration. He and his wife Teresa, and their two children reside in Plandome, N.Y.

Wertheim Schroder & Co. Inc., the international investment banking, asset management and securities firm, was founded in 1927. In 1986, the firm broadened its global capabilities and positioned itself for major, world-wide growth by forming a partnership with Schroders plc in which the managing directors of Wertheim Schroder and Schroders plc each own 50 percent of the voting equity of the privately held firm.

TAMPA, FL (MARCH 7) BUSINESS WIRE - Silk Greenhouse Inc. announced Wednesday that Richard ''Rob'' W. Roberson has joined its board of directors.

An experienced retailing executive, Rob Roberson, 43, is currently president of Eckerd Vision Group and senior vice president of the Jack Eckerd Corp. He previously served as its treasurer and controller since 1979. Prior to joining the Eckerd Corp., Roberson was with the accounting firm Peat Marwick Main & Co. in New York and Tampa for eight years.

Jere Bradwell, chairman and president of Silk Greenhouse said, ''As a seasoned retailer, Rob will provide a valuable and unique perspective and we are very fortunate to have him on board. His experience in managing a fast growing retailer is especially important to us.'' With Roberson's election, there are seven directors on the company's board.

Roberson is a Certified Public Accountant and a graduate of the University of South Florida. He is a member of the board of directors of Barnett Bank of Pinellas County in Florida. He lives in Palm Harbor, Fla. and has two daughters.

Silk Greenhouse Inc. owns and operates 87 warehouse-style stores that sell artificial trees, flowers and plants, paper and party products, Christmas

trim-a-tree and floral craft supplies in 22 states.

FORT WORTH, TX (MARCH 7) BUSINESS WIRE - Normandy Oil and Gas Co. Inc. announced Wednesday that it had reduced its outstanding common stock from 5,204,985 shares to 4,624,585 shares, a reduction of 11 percent.

Roy T. Rimmer Jr., president of Normandy, said the company retired 580,400 shares as a result of the recision of its purchase, in 1987, of 23,640,000 shares of Sunbelt Exploration Inc. in exchange for 630,400 shares of Normandy stock.

The recision was pursuant to a Chapter 11 Bankruptcy Plan of Reorganization of Sunbelt Exploration.

''We have completed the dissolution of this prior acquisition to Normandy's best interest. Certain minimal write-downs of the acquisition have been previously taken, and the remaining write-off of $169,070 will be realized in the current quarter,'' Rimmer noted.

''This substantial reduction in our outstanding shares, about 11 percent, offers shareholders the potential benefit of increased earnings per share. As an example, the additional annualized revenues of about $1,000,000 projected from the completion of the Liberty and Chambers Counties Frio Sand oil wells, which significantly expanded the productive areas of our leases, gives solid possibility for improved profitability and could be translated into even higher earnings per share, since they would be spread over fewer outstanding shares,'' Rimmer stated.

Normandy, a Fort Worth based oil and gas company, operates primarily in Colorado and Texas, and has recently expanded into natural gas gathering and processing operations in Oklahoma and Utah.

KANSAS CITY, MO (MARCH 7) BUSINESS WIRE - Sherman, Goelz and Associates Inc. (OTC) announced that, effective Jan. 31, the company sold substantially all of its assets to S.G.B. Communications Inc., a Missouri corporation.

The purchaser assumed fixed and current assets including the business and accounts of Sherman, Goelz & Associates, a marketing company based in Kansas City, Mo., and assumed certain liabilities and obligations in excess of assets of approximately $95,000.

In addition, the purchaser agreed to pay aditional consideration in the form of royalties and bonuses for three years.

As a result, the company has eliminated its negative net worth and liabilities, leaving it with the potential for future royalties. Arnie Sherman and Peter Goelz have tendered their resignations as officers and directors of Sherman, Goelz and Associates Inc. in order to pursue employment with S.G.B. Communications Inc.

The remaining directors are considering reverse acquisition candidates.

CLEVELAND (MARCH 7) BUSINESS WIRE - First Union Real Estate Investments (NYSE:FUR) announced Wednesday that its board of trustees approved a shareholder rights plan.

The plan is designed to give the board leverage in negotiating on behalf of all shareholders to determine the terms of any proposed takeover.

The rights will be issued in the form of a dividend and will attach to all First Union shares outstanding on March 30, 1990, and any subsequent shares issued while the plan is in effect. The Trust said that the plan supplements various protective measures previously approved by shareholders which are in its Declaration of Trust. The plan is not intended to and will not deter non-coercive takeover proposals that are in the best interest of First Union's shareholders. The board's action was not taken in response to any known effort to acquire control of the Trust. Details of the rights plan will be provided in a letter to be mailed to shareholders next week.

The Trust also announced the first quarter dividend of $.375 per share ($1.50 annual rate) to be paid April 30, 1990. The dividend will be payable to shareholders of record on March 30, 1990. This dividend is the 114th consecutive regular quarterly dividend without a downturn since the Trust's inception in 1961.

First Union Real Estate Investments is a self-administered equity real estate investment trust specializing in the ownership of regional enclosed shopping malls, downtown office buildings and multi-family complexes

located throughout the United States. The Trust's shares are traded on the New York Stock Exchange, providing shareholders the opportunity to participate in real estate ownership while maintaining investment liquidity.

BOSTON (MARCH 7) BUSINESS WIRE - The Pioneer Group, Inc. (NASDAQ:PIOG), advisor to the Pioneer Mutual Funds and other accounts, reported that its 90%-owned gold-mining subsidiary, Teberebie Goldfields, Ltd. (''TGL''), has received an independent certification of additional gold reserves on TGL's mining concession in Tarkwa, Ghana.

The certification, which follows geological testing in 1989, estimates that proven gold reserves are now 1,600,000 oz. and probable reserves are now 700,000 oz. Proven gold reserves had previously been estimated at 900,000 oz.

Pioneer Group also reported that its venture capital subsidiary, Pioneer Capital Corporation (''PCC''), expects income in the first quarter of 1990 as a result of the recent public offering of the common stock of a portfolio company. Since venture capital assets are valued on a quarterly basis, the portfolio securities will next be revalued as of March 31 and any related income for the quarter will be based primarily on the closing price of the security on March 30.

If that closing price is unchanged from March 6, Pioneer Group's first quarter earnings would include approximately 24 cents per share from the resulting revaluation of this holding. Of course, there may be increases or decreases in the valuations of PCC's other venture capital holdings which would supplement or reduce the benefit of this particular event.

HENDERSON, NC (MARCH 7) BUSINESS WIRE - The Iams Co., a leading U.S. manufacturer of premium dog and cat foods, will begin construction this month of a $30 million pet food manufacturing plant in Henderson, with completion set for fall 1991, company, state, and local officials said Wednesday.

Company representatives and local and state business and government leaders, including Governor James Martin, gathered at 11:30 a.m. today for groundbreaking ceremonies at the plant's 80-acre site in the Henderson-Vance County Industrial Park. Iams will be the park's first and largest tenant.

The new 200,000-square-foot, state-of-the-art plant will employ some 70 people, about 90 percent of them from the immediate area, according to Iams chairman and CEO Clay Mathile.

The plant is slated to manufacture product for North American and worldwide markets. The export business fits well with North Carolina's efforts to become a key trading partner in the international marketplace, state officials said.

The project will have an estimated $10 million impact on the local and state economy during the construction phase, and an estimated $10 million annual impact on the local and state economy after the plant becomes operational, Mathile said.

The economic impact is an estimate of new dollars that will circulate in the area economy from new wages, tax revenues, utility payments, payments to area merchants and suppliers, and other expenditures resulting from the new plant.

The Henderson facility will be the company's third manufacturing plant; it has two others in Ohio and Nebraska. Iams chose the Henderson location because it is a ''perfect industrial site'' and because of company officials' respect for the Henderson community and its leadership, Mathile said.

Also, the company was attracted to North Carolina not only for its location for product distribution but also for its progressive economic development policies. ''A major reason The Iams Co. is locating here is our attraction to the kind of leadership we see in North Carolina,'' Mathile said.

The 44-year-old Iams Co. has its home office in Dayton, Ohio. The company employs more than 400 people. Annual sales of its high-nutrition dog and cat foods have grown from $10 million to more than $100 million since 1982.

Iams premium dog and cat foods are sold exclusively in specialty outlets such as pet stores, pet supply stores, feed stores, and veterinary clinics in all 50 states, Canada, and many countries abroad.

#90066b0780 03/07/1990 ~Business Wire

NEW YORK (MARCH 7) BUSINESS WIRE - The following is a summary of a presentation Wednesday at the New York Society of Security Analysts by Charles K. Vaughan, chairman, president and chief executive officer and James F. Purser, executive vice president and chief financial officer of Atmos Energy Corp.

Charles K. Vaughan, chairman of Atmos Energy Corp. said Wednesday that Atmos has positioned itself as a growth utility that seeks to diversify the risks inherent in the natural gas distribution business. Through an emphasis on building its customer base, entering new geographic areas through acquisitions and increasing market size and market share, Atmos has grown more than 66 percent since 1985.

In an address before the New York Society of Security Analysts, Vaughan noted that the company had made two non-dilutive acquisitions since 1986. They have resulted in greater diversity in weather patterns, service area economies, and regulation - the three most significant risks associated with the company's business. He added that, although the competition for gas distribution properties has driven prices upward, Atmos will continue to evaluate acquisition candidates throughout the continental United States.

He said the company will continue its aggressive marketing posture in all three states, where the three operating divisions have combined to achieve an overall 90 percent market penetration in new construction. Atmos was named recipient of the Top Achievement Award for residential marketing for

1989 by the American Gas Association.

James Purser, executive vice president and chief financial officer of Atmos, described the company's financial position as ''solid and able to withstand the occasional warm winters we experience.'' He also told the group that Atmos' supply situation put it in an enviable position to share in the industry's bullish future.

Vaughan closed the presentation saying the company will continue to closely monitor both its revenues and expenses. Atmos has earned a reputation as a low cost provider of natural gas service.

On the revenue side, Vaughan said he hoped the Kentucky Public Service Commission would act on the company's pending $8.9 million rate increase request so that new rates would be effective for the fiscal 1991 winter heating season.

He summarized by recounting the company's 80 percent growth in gross profits since 1986, continued sales volume improvement, and customer growth rate. Vaughan stated that Atmos has a strong balance sheet with a better than 6 percent yield and that he felt the company is positioned well to continue its track record into the 1990's.

Atmos Energy Corp. provides natural gas distribution service to more than one-half million customers in Kentucky, Louisiana and Texas through its operating companies - Western Kentucky Gas Company, Trans Louisiana Gas Company, and Energas Company.

DALLAS (MARCH 7) BUSINESS WIRE - Frozen yogurt is reaching new heights due to a joint venture between two Texas-based companies.

Coach passengers aboard select American Airlines flights are being treated to the frozen yogurt of I Can't Believe It's Yogurt.

''Because our passengers are becoming more health conscious and expect more premium products, the additon of frozen yogurt to our menu makes sense,'' said Jeff Katz, managing director of Food and Beverage. ''So far we've received excellent response.''

Currently offered on select dinner and light-lunch flights originating from a number of locations - such as Dallas/Fort Worth, New York, Los Angeles, Chicago and Washington D.C. - the 3.5 ounce hard-packed frozen yogurt is available in vanilla with a chocolate ribbon and chocolate with

a marshmallow ribbon.

''We are thrilled with the American Airlines opportunity,'' said Julie Brice, chief executive of I Can't Believe It's Yogurt. We pride ourselves on being leaders in the frozen yogurt industry and now we are offering our customers something special in the air.''

I Can't Believe It's Yogurt, with over 300 locations in the United States and Europe, is recognized as a pioneer in the frozen yogurt industry. Founded in 1977 - long before most of the current players were involved in the frozen yogurt market - brother/sister entrepreneurs Bill and Julie Brice pooled $10,000 in college tuition savings to purchase two struggling frozen yogurt stores in Dallas.

They refined the existing product formula and developed an award-winning franchise system. Their success transformed frozen yogurt from a fad to an established dessert category that spawned dozens of imitators and competitors.

American Airlines, the largest airline in the Western world, with 500 jet aircraft, offers 2,300 flights each day to 162 destinations throughout the United States and abroad. Last year American Airlines carried 74 million passengers.

MATTITUCK, NY (MARCH 7) BUSINESS WIRE - North Fork Bancorp Inc. announced that its common stock has commenced trading on the New York Stock Exchange under the symbol NFB. The stock formerly traded on the NASDAQ National Market System under the symbol NFBC.

"Listing on the world's premier exchange represents a major milestone in North Fork's history," said John Adam Kanas, president and chief executive officer. "As a listed company, our shareholders should benefit from increased trading liquidity and broader visibility in the investment community and the press."

As previously announced, North Fork Bancorp's net income was $20.9 million in 1989 compared with $14.7 million in 1988. Earnings per share rose to $2.25, up 5.6 percent from the $2.13 earned in the prior year.

Dividends declared in 1989 were 81 cents per share, a 24.6 percent increase from 1988. At Dec. 31, 1989, total assets were $1.79 billion versus $1.61 billion a year earlier. Common shares outstanding were 9,030,375 at Dec. 31, 1989.

North Fork Bancorp Inc. is the holding company for North Fork Bank & Trust Co. and Southold Savings Bank. The company provides commercial and savings bank services through a network of 33 offices in Nassau and Suffolk Counties on Long Island.

DALLAS (MARCH 7) BUSINESS WIRE - Greyhound Lines announces the following statement by P. Anthony Lannie, executive vice president of Greyhound Lines Inc., and the company's chief labor negotiator, March 7, 1990:

No new talks with the Amalgamated Council of Greyhound Local Unions are scheduled because we have not received a request for talks that would be fruitful at this time, given the present attitude of the Council.

The Company and the Council negotiated for four months, ending with five days of intensive negotiations. The final sessions were co-chaired by two representatives of the AFL-CIO and a Federal mediator.

Toward the end of those talks, Edward M. Strait, Council president, and Jim Hayes, ATU international vice president, gave us a list of demands we had to meet to get a contract. The Company met those demands. For example, we agreed we would not subcontract out any line-haul service of our drivers in exchange for a new entry wage rate for drivers hired after May 1, 1990. Also, we agreed to withdraw our incentive pay plans and use the money to increase base wages.

Mr. Strait, Mr. Hayes, the Federal mediator and the two representatives of the AFL-CIO all thought we had negotiated a fair settlement Thursday evening at the eleventh hour. However, Mr. Strait was unable to sell the agreement to the full Council. In fact, they did not even debate it.

On Friday evening, March 2, about 18 hours after the strike began, Mr. Strait asked for a private, off-the-record meeting with me. He had no agenda, and no new proposals to make. Instead, he engaged in a rambling conversation that was nothing more than a rehash of issues discussed at the negotiating table and a repeated demand that the Company raise its wage offer for drivers.

I concluded this way: ''Ed, we have been talking and negotiating for four months about these issues, and you still, even tonight, do not recognize that the Company has offered every single red cent that it can afford to pay.''

He said he would check with Council members about the possibility of making new proposals and get back to me. Instead, he put out a press release stating that the Union had asked the Company to resume negotiations, and that the Company had refused.

The telephone call on Tuesday, March 6, from James LaSala, international president of the Amalgamated Transit Union, to Fred G. Currey, chairman and chief executive officer of Greyhound Lines Inc., followed the same pattern.

Mr. LaSala seemed to be totally unaware of negotiations in the five days prior to the beginning of the strike. His comments indicated he did not know that the company had made substantial concessions across the board. He argued against our earlier postions, either because he was unaware of our final offer, or because he chose to ignore it. At one point, Fred Currey asked: ''Didn't Jim Hayes report back to you on our final offer?''

This strike is plainly irrational and irresponsible. It is not a strike about what the Company can or cannot afford to pay in 1990. It is a strike about 1987 and 1983 and the fact that many of the old-line Greyhound drivers want to get back to where they were in the old regulated bus industry. In short, this is a grudge strike by the pre-1983 Greyhound bus drivers.

We must face the fact that our industry has been deregulated, and we must face the Company's economic facts of life. We have offered all that we can afford to pay.

We want a contract with the ATU, and we want to settle the strike. However there is no point in going back to the negotiating table simply to continue the rhetoric of the 1970's and 1980's.

We are ready to return to the bargaining table when the Union tells us it is ready to talk about the realities of the 1990's.

LA BELLE, FL (MARCH 7) BUSINESS WIRE - Alico Inc. announced Wednesday

that Mr. Ben Hill Griffin III was elected as chairman of Alico Inc. to succeed the former Chairman, Mr. Ben Hill Griffin Jr.

Griffin Jr. passed away on March 1. Griffin III has been a member of Alico's board since 1973 and has been vice chairman since 1979. He also served as president during the past two years and as chief executive officer during the most recent year.

Griffin III stated that he looked forward to working with the board and staff in his new capacity. ''It will be my intention to maintain the same carefully considered operating style which characterized my father's tenure as chairman.

''Specific projects which have been in the planning stage during the past year, such as further expansion of our citrus and sugarcane acreage, will be started when conditions are believed appropriate,'' he added.

Griffin III also noted that the company will continue to investigate other agribusiness operations which may be prudent investments for the company.

DALLAS (MARCH 7) BUSINESS WIRE - Uranium Resources Inc. announced Wednesday that it has completed a public offering in the United States of 1,150,000 units, each consisting of three shares of common stock and one common stock purchase warrant.

The units were sold at a price of $4.25 U.S. per unit. The offering resulted in total net proceeds to the company of approximately $4.1 million.

The proceeds from the offering will be used for plant construction and wellfield development at the company's Rosita project in South Texas and for other corporate purposes, including permitting and property development in New Mexico. Boettcher & Co. Inc. was the underwriter of the offering.

The company also announced that it had agreed with the underwriter to separate the units as of the closing, and the shares and warrants began trading separately on NASDAQ.

Uranium Resources Inc. produces uranium in South Texas using low cost in situ solution mining techniques. The Dallas-based company's common shares trade on The Toronto Stock Exchange under the symbol URI and on NASDAQ

under the symbol URIX. The units trade on NASDAQ under the sumbol URIXU and the warrants trade on NASDAQ under the symbol URIXW.

LUND, SWEDEN (MARCH 7) BUSINESS WIRE - The Gambro Group (NASDAQ:GAMBY), the renal and intensive care products company, Wednesday reported that for the year ended Dec. 31, 1989, operating income rose 26 percent to SEK 418.8 million (US $65.1 million) (a) compared with SEK 332.7 million ($54.51 million) in 1988.

1989 earnings per share, based on the full-tax method, increased to SEK 8.68 ($1.35), up 43 percent compared with SEK 6.09 ($0.95) in the preceding year.

Sales in 1989 totaled SEK 3,103.0 million ($482.6 million) compared with SEK 2,853.4 million ($467.0 million) in the prior year, an increase of nine percent.

According to the company, operating margins improved 1.8 percentage points to 13.5 percent. This was due mainly to ongoing cost-reduction measures in production and a shift in the product mix toward higher-value market segments. At the same time, expenditures for research and development rose 12 percent to SEK 170 million ($26.4 million).

Pre-tax income was up 21 percent to SEK 328.2 million ($51.0 million).

Net interest expenses rose SEK 20.3 million, ($3.16 million) primarily as a result of generally higher interest rate levels.

The trend of earnings in Europe continued to be highly favorable, partially due to a consequence of the continued successful integration of Hospal which was acquired in 1987. Gambro Japan posted a considerable improvement in earnings compared with 1988 on the heels of the introduction of several new products.

According to the company, the negative earnings trend in the United States has now begun to turn around. Cost levels were reduced significantly during the year, while the pricing trend has stabilized.

Gambro's financial position continues to be strong. At December 31, 1989 cash and cash equivalents amounted to SEK 1,145.9 million or $178.2 million (1988: SEK 864.8 million), including SEK 809.4 million ($126 million) in granted but unutilized lines of credit. The equity/assets ratio at Dec. 31, 1989 was 40 percent vs. 37 percent, in the prior year.

The president and board of directors propose that the dividend for 1989 be increased to SEK 2.40 per share (37 cents), a rise of 33 percent. This corresponds to a total dividend of SEK 54.9 million or $8.54 million (1988: SEK 41.2 million).

May 22, 1990 was proposed as the record date for closing the share register and determining entitlement to the dividend. If so approved, the dividend should be distributed on May 30, 1990.

Other dates, which will be provided shortly, apply for holders of Gambro ADRs (American Depositary Receipts).

The Annual General Meeting will be held on Thursday, May 17, 1990 at 5 p.m. in the Sparta Auditorium, Tunavagen 39, Lund.

NEWTON, MA (MARCH 7) BUSINESS WIRE - Stardent Computer Inc., Wednesday announced several top management appointments in conjunction with the completion of its merger-related transition and definition of its corporate strategy.

According to John William Poduska Sr., Stardent's president and chief executive officer, the new appointments structure the organization to best achieve its long-term strategy, take advantage of the particular strengths of each of the members of the management team, and further leverage the momentum gained since the formation of Stardent Computer last fall.

Matthew H. Sanders III has been elected co-chairman of the Stardent board of directors. He now shares this role with Allen H. Michels, who has held the position since the October 1989 merger. Sanders was previously Stardent's executive vice president and chief operating officer.

In commenting on his new role, Sanders stated, ''As co-chairman of the Board I can focus on the longer term issues of financing, partnerships, and business relationships to which I bring the most value at Stardent. At the same time, moving out of the day-to-day operational responsibilities will allow me some time to pursue several outside business interests.''

Sanders turns over these operational responsibilities to Ian R.G. Edmonds, who has been promoted to executive vice president and chief operating officer of Stardent, reporting to Poduska. Formerly Stardent's corporate vice president of marketing, Edmonds will now have overall management responsibility for all functional organizations.

Reporting to Edmonds are corporate vice presidents of research and development, finance, administration, manufacturing, and a newly-created post combining sales, marketing and services.

Heading this new organization is Wallace E. Smith who has been promoted to senior corporate vice president of sales, marketing and service. Smith, formerly Stardent's corporate vice president of sales and service, now assumes the additional responsibilities of product marketing, market development, and marketing communications. All of Edmonds former direct reports now report to Smith.

Further, Graham Morland, formerly Stardent's corporate vice president of quality, assumes the additional responsibility for Stardent's customer service operations, reporting to Smith. Kirk McQuay, Stardent's vice president of customer service now reports to Morland.

Les Crudele has been promoted to corporate vice president of research and development to oversee these bi-coastal development operations. Formerly Stardent's vice president of hardware development, Crudele replaces Paul Jones, who has recently left the company.

#90066b0831 03/07/1990 ~Business Wire

CHERRY HILL, NJ (MARCH 7) BUSINESS WIRE - Subaru of America Inc. (NASDAQ: SBRU), the exclusive U.S. importer and distributor of Subaru vehicles and replacement parts, Wednesday announced financial results for its first quarter ended Jan. 31.

For the three months ended Jan. 31, Subaru earned a net profit of $10 million, or 19 cents per share, compared with a net loss of $12.3 million, or 25 cents per share, for the first quarter of 1989. Net sales for the first quarter were $346 million compared with $432 million in the first quarter of 1989 due to a 20 percent decline in non-fleet unit sales.

First quarter results were improved because sales of the 1990 Legacy sedans and wagon models contributed higher profit margins than previous models, and marketing expenses, including advertising and sales incentives were reduced as part of a company plan to control costs.

As part of an overall strategy to reduce vehicle inventories, the first quarter results were also favorably impacted by a $7.6 million pre-tax gain on the sale of vehicle inventory which had been valued at historically lower costs in accordance with the LIFO method of inventory valuation.

Based on the company's expectation of year-end inventory levels, the effect of reducing LIFO valued inventory will be recognized in similar amounts through the remaining quarters of the fiscal year.

The Legacy, introduced last April as the company's first entry into the compact segment, continues to build on its growing reputation as a world class endurance qutomobile. Perhaps in its stiffest test to date, two four-wheel drive Legacy station wagons finished first and second in the exciting and grueling 6,275-mile Alcan Endurance Rally.

Traversing remote roads in British Columbia and Alaska, with icy temperatures as low as minus 53 degrees Fahrenheit, Legacy's performance gave another example of the Subaru heritage of durability, reliability and superior traction. A year earlier, three months before its U.S. introduction, Legacy established 36 new records for endurance and speed at the Arizona Test Center in 19 days of continuous driving.

On Jan. 16, Fuji Heavy Industries Ltd., which currently owns 49.5 percent of the company's shares, announced that it had delivered an unsolicited proposal to the company to acquire all of the shares that it does not own at $6 per share through a cash merger. The special committee of the board of directors that has been appointed to make a recommendation concerning

an appropriate response to the Fuji proposal, is continuing to study the proposal with the assistance of Lazard Freres & Co., its financial advisor.

Subaru of America markets its products through a regional distribution network, serving approximately 750 dealers nationwide. Subaru of America is traded on the national over-the-counter market.

JACKSONVILLE, FL (MARCH 7) BUSINESS WIRE - Norman J. Harrison, chairman of the board and chief executive officer of American Federal Savings Bank of Duval County, Wednesday announced that the board of directors has elected two new directors of the company.

Roger L. Sutton (47), president and chief operating officer of American Federal since November 1989 is one of the new directors. Sutton has been employed by American Federal since 1975, serving in all areas of the company.

In addition, Sutton is the president of American Federal's subsidiary for land development, AmFed Service Corp.

J. Malcolm Jones Jr. (36), a Jacksonville resident, has also been elected as a new director. Jones has been involved in the financial institution business since 1975 and is currently involved in the investment business.

Most recently, Jones was a senior vice president in the Capital Markets Division of Florida National Bank. Jones' responsibilities included the management of a $2.5 billion investment portfolio, bank hedging, foreign exchange trading and bank funding. Jones is also the chairman of the board of the Greenwood School and serves on the Administrative Board for the Southside United Methodist Church.

NEW YORK (MARCH 7) BUSINESS WIRE - Judge Thomas D. Lambros of the United States District Court, Northern District of Ohio, Eastern Division, in a hearing concluded in Cleveland this week, (Monday, March 5), has set May 1 as a firm trial date in Granada Investments' suit against DWG Corp. (ASE:

DWG).

The Judge has indicated that if a settlement agreement isn't reached by 10 a.m. April 5, 1990, he will seriously consider appointing a team of investigative auditors.

The Judge said the auditors could have access to DWG's books, records, financial and management employees, as well as the power to review the corporate governance of DWG. The Judge also stated that he might review Granada's financial position. DWG's principal stockholder, Chairman and Chief Executive Officer is Victor I. Posner.

The Judge stated in a previous order that the appointment of the team of investigative auditors was appropriate "in order to assist in protecting the interests of the shareholders, as well as to potentially serve as expert witnesses at a trial." Judge Lambros said the May 1 trial date was firm, indicating that there was no plan for a postponement of the trial.

In the suit filed last year, Granada Investments charged the DWG board of directors and Victor I. Posner, with breach of fiduciary duty for refusing to consider Granada's March, 1989 merger offer of $22 per share cash for DWG and for misusing tens of millions of dollars from DWG in the past four years for Posner's sole benefit. Granada also charged that DWG has failed to call an annual meeting of shareholders since December, 1986.

DWG Corp. manufactures apparel textiles, distributes liquefied petroleum gas, produces Royal Crown soft drinks, owns the Arby's fast-food chain, and processes and distributes citrus products. Granada Investments Inc. is an investor group led by New York attorney Andrew N. Heine.

NASHUA, NH (MARCH 7) BUSINESS WIRE - Nashua Corp. (NYSE:NSH) Wednesday reported results from its continuing operations and the results from its discontinued international office systems business.

As previously reported, Nashua reached an agreement to sell this business to Gestetner Holdings plc.

Nashua previously reported net income of $20.1 million, or $2.11 per share for the year ended Dec. 31, 1989, compared with $32.5 million, or $3.38 per share, for the year ended Dec. 31, 1988. Income from continuing operations for 1989 was $17.6 million, or $1.84 per share, compared with income from continuing operations of $19.8 million, or $2.06 per share,

for 1988.

Income from discontinued operations was $2.5 million, or 27 cents per share, in 1989 and $12.7 million, or $1.32 per share, in 1988. Sales from continuing operations were $549 million in both 1989 and 1988.

Net current assets of discontinued operations were $84 million and net noncurrent assets of discontinued operations were $38 million at Dec. 31, 1989, reflecting the agreement to sell the international office systems business.

Nashua Corp. is a multinational company providing a diverse mix of products and services which include coated paper products, computer products, office supplies and photofinishing services.

LYNN, MA (MARCH 7) BUSINESS WIRE - AMR Eagle's first Saab 340B aircraft, powered by GE Aircraft Engines' CT7-9 turboprop, was unveiled at Nashville International Airport.

In May 1989, AMR Eagle Inc., the regional airline partner of American Airlines, selected the CT7-9 to power 50 firm and 50 option Saab 340B regional aircraft.

Nashville Eagle is the first AMR Eagle carrier to fly the 340B and AMR Eagle plans to begin Saab 340B service out of Nashville on Mar. 15, 1990.

American Eagle currently flies to 142 cities, including the seven American Airlines hubs in Dallas/Fort Worth, Chicago, Nashville, Raleigh/Durham, Miami, San Jose and San Juan, and the three major gateway cities of New York, Los Angeles and San Francisco.

''The CT7-9-powered Saab 340B is one of the finest regional aircraft in the world,'' said Bruce Gordon, general manager of GE's Small Commercial Engine Department. ''American Airlines and GE Aircraft Engines have a long standing business relationship and this latest order involving the CT7 expands on this relationship. We are very please with AMR Eagle's large commitment to the CT7 and the Saab 340B that it powers.''

GE's CT7-9, a 1,870 shaft horsepower engine, provides regional turboprop aircraft with imporved takeoff, climb and cruise performance along with the benefits of the lowest fuel flow of any engine in its class. It is the newest member of the CT7 turboprop family, and entered service in September 1989 on Crossair's Saab 340B regional airliner.

The CT7-9 also powers the CASA/IPTN CN-235 which is in use as both a regional airliner and a military utility aircraft. The CT7 turboprop has accumulated two million flight hours and powers 195 aircraft in 16 countries.

GROUP LED BY CHARLOTTE KRAMER OWNS 701,677 SHARES (9.10%) OF SCHAFER VALUE TR INC (TICKER: SAT) OF NEW YORK, NY.

ANNOUNCEMENT:

On Feb. 28, 1990 Kramer delivered a letter to Schafer informing it that they intend to present three proposals at Schafer's annual meeting scheduled for April 30, 1990.

The proposals are to recommend that Schafer's board approve and submit to shareholders within 60 days a plan whereby Schafer would be liquidated, to remove all of Schafer's directors who are not otherwise standing for reelection, to oppose those directors who are standing for reelection, to elect a new slate of directors, and to terminate Schafer's investment advisory agreement with Schafer Capital Management Inc.

Kramers' nominees for board membership are Mark R. Kramer, Stuart E. Madnick, George B. Raymond, Jack W. Rizika and Floyd R. Tuler.

LATEST TRANSACTION:

On Jan. 31, 1990 Schafer distributed 73,396 common shares to the group pursuant to a distribution of $1.11 per share and payable in shares of common stock as announced by Schafer's board of directors on Dec. 22, 1989.

WASHINGTON (MARCH 7) COMTEX - The 8-K report filed at the SEC shows on Feb. 23, 1990, Murgold Resources Inc. officially announced the completion of a hole 15, 11,189 foot program at the Chester Township Gold Property, 37% owned by Murgold.

Drilling centered on a gold zone that originated in a neighboring property and extended into the Chester property. Best intersections showed returns of 15.5 feet averaging 0.221 ounce gold per ton and 12.3 feet averaging 0.312 ounce gold per ton in two seperate holes. An additonal seven holes were dug on 100 foot sections on the eastward extension of the zone, but they consistently resulted in poor yields at vertical depths of between 600 and 800 feet.

Other multiple shear zones of gold-bearing quartz veins are hosted by the

Chester property. Current estimates of the property, not including the new zone, report geological reserves of 507,365 tons averaging 0.238 ounce gold per ton.

The executive office of Murgold Resources is located at 18 Floor, 100 Front Street West, toronto, Ontario, M5J 1E3, Canada.

#90066c0077 03/07/1990 ~Comtex
WASHINGTON (MARCH 7) COMTEX - A leading software entrepeneur warned today that many software companies are finding it easier to sue their rivals than compete with them and urged that any changes in current copyright laws should be narrowed to exclude protection of ideas.

Mitchell Kapor, chairman and chief executive officer of ON Technology Inc. and a developer of Lotus Development Corp.'s Lotus 1-2-3 software, told a House Judiciary subcommittee that software is a medium for ideas. "We should not extend copyright protection to ideas, but confine it narrowly, essentially to literal expression," he said.

The subcommittee was attempting to find the proper balance to congressional oversight of computers and intellectual property but the hearing raised more questions than answers.

The proper questions and answers are critical because the U.S. software industry currently dominates the world software market with a 70 percent market share and accounts for about $60 billion per year in domestic sales and services.

"Basic questions about the detailed implementation of intellectual property protection for software -- what to protect? how much? for how long? against what? from whom? -- are difficult to answer," said James Curlin, communications manager of the Office of Technology Assessment (OTA).

Curlin added the economic implications of under-protecting or over-protecting software extend far beyond the software industry alone.

"Appropriate legal protections can speed the pace of technological advancement in software and its dissemination throughout the economy; inappropriate laws and regulations can shift the focus from technological advancement to the court system," Curlin said.

The OTA did not present specific options for government action but warned the subcommittee that policies based solely on experiences to date may be undermined by technological change.

"In determining what policy is needed for the future, it is important to recognize that those policies working today may not be good models for

those that will work tomorrow," Curlin said.

Industry officials have asserted that the protection of computer programs under the present legal system is essential if the U.S. is to maintain the competitive edge that it enjoys in the world software market. They maintain that, if the copyright law were changed to diminish protection for computer programs, it would expose their software assets to misappropriation both here and abroad.

The administration concurs and is seeking to expand the legal protection of computer programs under principles international copyright law.

"Establishing such enforceable standards for intellectual property protection and methods for their enforcement in the General Agreement on Tariffs and Trade (GATT) is a major objective of the United States and other developed countries in the Uruguay round of negotiations," said Jeffrey Samuels, acting commissioner of patents and trademarks for the U.S. Department of Commerce. "One of the United States' key elements is to expressly include full copyright protection for computer programs as a part of the copyright standard."

Concerns about adequate protection of intellectual property rights in computer programs have led to the introduction of bills to accord an exclusive software rental right.

Software producers favor such legislation. They claim that significant disparity between retail and rental price on computer programs increases the incentive to quickly and easily copy the program, depriving the software manufacturer of considerable revenue.

The copyright arm of the Library of Congress supports passage of the Computer Software Rental Amendments Act of 1989.

"We see in the relationship between the sale and rental markets for computer programs a significant similarity to the area of sound recordings " said Ralph Oman, register of copyrights for the Library of Congress. "In both cases, under present technology, rentals almost always displace sales with damage to the legitimate market for sales of copies of works.

Oman added that if rental legislation is passed, the Library of Congress favors some type of exemption for nonprofit libraries and certain educational institutions similar to that applicable to record rental.

SEC - AMENDMENT NUMBER: 2

GROUP LED BY CENTAUR PARTNERS OF BETHESDA, MD OWNS 3,595,000 SHARES (16.50%) OF NATIONAL INTERGROUP INC (TICKER: NII) OF PITTSBURGH, PA.

ANNOUNCEMENT:

Centaur Partners IV, which includes New York investor Abbey J. Butler and Melvyn Estrin of Bethesda, Md., has begun a consent solicitation of shareholders of National Intergroup Inc. aimed at gaining control.

As part of the consent solicitation, Centaur will ask National Intergroup shareholders to vote to expand National's board of directors to 15 from 12 members, and to halve the 90-day notice the company requires for identification of nominees for director.

National Intergroup currently has a staggered board of directors.

This year, three directors will come up for reelection and two are retiring, so five will be elected.

If the board is expanded by three members, eight new directors, a majority, will be named.

Centaur said it will nominate eight directors for control of the board.

Khartoum (MARCH 7) - Sudan Wednesday warned against the consequences of a possible cut in international aid to meet the growing demands of refugees in the Sudan.

Sudanese Commissioner for Refugees Abdul Rahman Sir al-Khatim, reacting to a proposal by the United Nations to cut Sudan's refugees budget by 40 percent, said Khartoum might reconsider its long-standing open-door policy towards refugees.

Al-Khatim was quoted by the official al-Sudan al-Hadieth daily as saying that ''while the assistance by the international community is decreasing, we are witnessing a new influx of refugess from Ethiopia as a result of the fighting around the port of Masawa''.

The war around Masawa, between the Ethiopian government forces and the rebels of the Eritrea People's Liberation Front (Eplf), had forced 11,800 refugees into the Sudan last week alone.

The commissioner reiterated his government's commitment to allow food to be transported inside Ethiopia to stop the influx.

Al-Khatim ''appealed to the international community to exercise pressure on

Ethiopia'' to respond to Sudan's request.

Sudan, one of the world's poorest nations, hosts about two million refugees, mainly from Ethiopia, Uganda, Chad and Zaire.

BELGRADE (MARCH 7) - The Yugoslav government is preparing fiscal reforms which would include the introduction of a profit tax, income tax and value added tax, the Tanjug news agency said Wednesday.

The reforms would be carried out in three stages, with the aim from this year to reduce the number of different taxes and harmonise fiscal policy nationwide, Tanjug said.

But the republics would retain the right to introduce their own taxes.

The government believes that reforms to modernise the tax system will help attract foreign capital and demonstrate Belgrade's desire to become integrated into Europe.

BRUSSELS (MARCH 7) - The European Commission, declaring that the European Economic Community's steel industry had emerged from crisis, on Wednesday said steel makers no longer needed any state aid.

The EEC's executive said a decade of tight control, including quotas that had protected prices, had slashed excess capacity and restored profitability.

"The Commission believes that the time has come to integrate steel-making in an open and competitive market," a spokesman said.

The announcement signalled the latest step in a strategy by the Commission to free the steel industry from public support that cost tens of billions of dollars in the 1980's, analysts said.

In a statement, the 17-member panel painted a rosy picture of the effort to clean up the industry since 1980, and said its outlook was good for the next five years.

From 1980 to 1988, the Commission said, production capacity plunged from 194.5 million tonnes per year to 165 million, thanks to 40 billion European Currency Units (ECUs) (48.4 billion dollars) of subsidies to sideline unwanted plant and slim payrolls by 39 per cent, to 409,000 persons.

Looking to the medium-term, the Commission said there were "no major risks" of a return to the excess capacity that bedevilled the 1970's and caused governments to leapfrog over each other in their aid to national champions.

Output will be stable, or increase slightly, from the 1988 figures of 137 million tonnes, while internal consumption is likely to be 110.7 million tonnes in 1992, rising to 114.7 million in 1995, the Commission said in a statement.

LONDON (MARCH 7) - British auto components, defence, and industrial services group GKN said Wednesday its pre-tax profit rose 17.3 percent last year over the 1988 level to 214.8 million pounds (352.2 million dollars).

Turnover for the year was 2.69 billion pounds (4.41 billion dollars), up from 2.37 billion (3.87 billion dollars) in 1988.

The final dividend was 12.5 pence, making 20 pence for the year against 17 pence in 1988, and earnings per share were 50 pence against 44 pence.

TURKU, Finland (MARCH 7) - Foreign ministers of the five Nordic countries Wednesday pledged closer ties with the Baltic states where democratic reforms are taking hold amid moves towards independence from the Soviet Union.

A communique issued after a two-day meeting in western Finland said the Nordic countries wanted to expand ties with the three Baltic republics "in particular concerning cultural relations, economic cooperation and environmental problems".

The ministers expressed satisfaction that Estonia, Latvia and Lithunia, "as a consequence of political reforms in the Soviet Union, are building representative democracies, developing their national cultures and are entering into relations with foreign countries, particularly neighbouring states".

Hailing the "historic changes" in Central and Eastern Europe, the five emphasized the importance of supporting the reform process politically as well as economically.

Turning to regional issues, the five ministers decided to retain sanctions against South Africa despite the recent "positive developments" there with the release of black nationalist leader Nelson Mandela.

"The Nordic ministers consider that there is still a need to uphold international pressure against the South Africa authorities in order to contribute to the complete dismantling of the system of apartheid.

"For this reason the Nordic countries do not regard it opportune to lift their economic sanctions against South Africa", the ministers said.

The ministers taking part in the meeting were Sten Andersson of Sweden, Kjell Magne Bondevik of Norway, Uffe Elleman-Jensen of Denmark, Jon Baldvin Hannibalsson of Iceland and Pertti Paasio of Finland.

WASHINGTON (MARCH 7) - Billionaire Donald Trump will offer his $115 million yacht, the Trump Princess, for sale in Hong Kong this month, a Trump Organization official in New York said Wednesday.

The plan to sell the 282-foot-yacht - complete with disco, elevators, gold faucets, and 235 telephones - was announced last month. The boat formerly belonged to Saudi entrepreneur Adnan Kashoggi.

The Trump Princess, currently in Singapore, will arrive in Hong Kong March 19, the company official said. If no buyers surface there, the yacht will be "stopping at each port," including ports in Taiwan and Japan, the official said. The official said the sale would be handled by Nigel Burgess Ltd. of Britain.

PARIS (MARCH 7) - An appeal court here came out in favour Wednesday of a West German request to extradite three alleged members of the Irish Republican Army, suspected of waging a bombing campaign against British soldiers.

A final decision on whether to extradite the Irish trio - Patrick Murray, 45, Donagh O'Kane, 29 and Pauline Drumm, 23 - is to be taken by the French government, as the court was acting only in an advisory capacity.

But the court, presided by Judge Jean-Pierre Henne, added that if "re-extradition to a third state is envisaged by the requesting authorities, this extradition cannot proceed without the French authorities' approval".

The court's recommendation would give France a right to veto any future West German decision to extradite the three to Britain.

Yves Chauvy, the French government lawyer who sought the court's approval, said the verdict was the first practical application in France of a European anti-terrorism convention signed in 1977, and ratified by Paris last year.

West Germany's extradition move is based on an arrest warrant issued by the federal court in Karlsruhe last September 13.

The warrant accused the trio of "murder, attempted murder, destruction using explosives, attempted destruction by explosives, breach of legislation on weapons of war and associating with criminals".

The case had initially come to trial here January 17.

The trio, along with four other suspected IRA members, are alleged to have planted five bombs, made from 30 kilos (66 pounds) of the powerful Semtex explosive, at a British base in West Germany during the night of June 18-19.

#90066d0490 03/07/1990 ~French/German News Agency

PARIS (MARCH 7) - The state-owned French insurance company AGF, through its subsidiary AGF International, acquired a 100-per cent share in Canadian Surety, a subsidiary of the Can West group, AGF announced here Wednesday.

The Toronto-based insurance company posted a 1989 turnover of 130 million Canadian dollars (109 million dollars) in damages insurances, or one per cent of the Canadian market share.

AGF paid about half of its premiums to acquire Canadian Surety, Jean Daniel Le Franc, AGF manager in charge of international politics, said in an interview with the Paris economics newspaper La Tribune.

For 13 years the company has held an 88.4-per cent share in the Insurance Group of Canada West (IGCW) whose turnover totalled 21 million Canadian dollars (17.6 million dollars) last year.

AGF is planning to raise the part of its foreign turnover from 28 per cent

now to 40 per cent in 1993. Britain, Ireland and Canada have so far been AGF's main targets on the foreign acquisition sector.

In February AGF acquired Insurance Corporation of Ireland (ICI) bringing its share in the Irish insurance market to 13 per cent, with a participation in Church and General and Irish Life.

AGF also controls two per cent of the British damages market and three per cent of the auto market through City of Westminster and National Employer Mutual's (NEM) IARD branch which it acquired in December.

Mr. Le Franc said AGF investments abroad had totalled 1.8 billion francs (315 million dollars) including 900 million francs (158 million dollars) for the control of ICI.

ANKARA (MARCH 7) - Turkish-Cypriot authorities Wednesday arrested a young Greek-Cypriot, the Turkish-Cypriot news agency TAK reported, amid mounting protests by Greek-Cypriot students in the divided city of Nicosia.

The youth, identified as Dimitriu Loga, was arrested as he tried to cross the U.N.-patrolled buffer zone in Nicosia and to "attack" the Turkish-Cypriot flag, the agency said.

The incident came amid daily protests near the buffer zone by hundreds of Greek-Cypriot students demanding the release of two other colleagues arrested recently in the Turkish-speaking northern sector of Nicosia.

A student was detained in February for having sprayed walls in the Turkish-speaking sector with political slogans, while another was seized earlier this month as he tried to haul down the Turkish flag.

A Turkish-Cypriot court is expected to pass sentence Thursday on the first student, 20-year-old Nicos Nicolaou.

The Greek-Cypriot protests follow the collapse last week of U.N.-sponsored talks to end the 15-year-old division of Cyprus into Greek- and Turkish-speaking sections.

Cypriot President George Vassiliou and Turkish-Cypriot leader Rauf Denktash met in New York last week with U.N. Secretary General Javier Perez de Cuellar but made no progress toward reuniting their eastern Mediterranean island.

Cyprus has been rigidly divided since 1974 when mainland Turkish troops seized the northern third of the country.

The invasion followed a coup against the government in Nicosia by right-wing Greek-Cypriot extremists, masterminded by the U.S.-backed military junta then ruling Greece.

Northern Cyprus proclaimed its independence in 1983 but its sovereign status is recognized only by Turkey.

BONN (MARCH 7) - West Germany's trade surplus rose 8.5 percent in January over the same month last year to 12.8 billion Deutsche marks (7.6 billion dollars), the federal statistics office said Wednesday. The surplus in January 1989 was 11.8 billion Deutsche marks, and in December stood at ten billion Deutsche marks (5.9 billion U.S.).

Exports rose 11 percent in January to 50.4 billion Deutsche marks (29.6 billion dollars), while imports were up 12 percent to 38.6 billion Deutsche marks (22.7 billion dollars). "The slowdown in exports seem in the second half of 1989 seems to be over," said Hans-Juergen Meltzer, an economist with the Deutsche Bank in Frankfurt.

Juergen Pfister, chief economist at the Commerzbank, said that export growth was likely to continue throughout the year, but at below the January level. "A growth of eight or nine percent in real terms is more likely," he said.

The current account balance showed a 10.8 billion Deutsche mark surplus in January, down 4.5 percent on the 11.3 billion Deutsche marks in January last year.

GENEVA (MARCH 7) - Japanese car manufacturers, under fire from their European competitors, made a strong appeal for opening European markets to their products at the Geneva International Motor Show Wednesday.

Yoshikazu Kawana, the president of Nissan Europe, told journalists that if the Europeans kept out Japanese car manufacturers, "they miss the opportunity to enhance productivity and competition".

He argued that competition "spurs us and others to improve productivity and quality", and "if they close their markets, they will not be able to offer competitive cars to the consumer".

Kawana said Nissan now represented three percent of the European private

car market, with 160,000 to 170,000 vehicles produced in the Nissan factories in the United Kingdon and Spain and another 400,000 imported models.

He said the company wants to raise its sales to five percent of the market by the mid 1990's, while at the same time increasing the number of vehicles produced in the European factories to 50 percent in line with the firm's policy of "localizing" production.

The European Economic Community talks is currently considering the issue of regulating the access of Japanese cars to EEC markets. Kawana said Nissan had not held any special talks with the Japanese government on this subject, but hoped "that common sense will prevail".

"We don't mind a transitional period - the shorter the better - but we do not accept that our cars made in the UK and Spain be included in Japanese car quotas," he said. "It would be unfair to include the cars built in the United States," he added.

The president of Honda Europe, Osamu Iida, said Honda now had one percent of the European market but hoped to increase this to 250,000 to 300,000 vehicles per year by the middle of the decade. "Fundamentally, we are against protective measures", he said. "The trend of the market is to grow. This opens opportunities for everybody."

TEHERAN (MARCH 7) - The Soviet Union and Iran have agreed to cooperate in the construction of two nuclear plants in Iran, the official Iranian media reported Wednesday.

They will conduct joint research on the peaceful uses of nuclear power, Teheran Radio said, as part of a protocol signed here Tuesday by Iran's Finance Minister Mohsen Nourbakhsh and Soviet Railways Minister Nikolai Konarev.

Konarev told reporters before leaving Iran at the end of the 12th meeting of the joint Iranian-Soviet commission that his discussions had been "very fruitful."

He described the Soviet Union's offer to build a nuclear plant in Iran as a "new basis" for mutual cooperation. The location of the proposed new plant was not reported.

The Soviet envoy also said his country was willing to negotiate with Teheran on the completion of the semi-finished nuclear power station at the southern port city of Bushehr, according to the IRNA news agency.

Under the terms of the protocol, Iran will export natural gas to the Soviet Union, with the terms of the agreement to be finalized at Soviet-Iranian talks starting March 20.

"Three billion cubic meters of gas will be exported to the Soviet Union annually, the price of which will be set on the basis of going prices on the world market," the Iranian finance minister said.

Nourbakhsh, quoted by IRNA, said both countries had agreed to take part in development projects. The joint commission also agreed in its four days of talks to boost cooperation in energy, fisheries, transportation, heavy industries, mines, ironworks, and the environment, according to the Soviet official.

HAMBURG, WEST GERMANY (MARCH 7) - East Germany's first private bank will open its doors in April, the West German newspaper Die Zeit said in its Thursday-dated edition.

The bank, to be called Deutsche Kreditbank, will take over the subsidiaries of the country's central bank, the Staatsbank, and open a further 200 branches, Die Zeit said.

It will be headed by Edgar Most, currently vice-president of the Staatsbank, and most of its 9,000 employees have been recruited from the Staatsbank's ranks. Shareholders are all East German enterprises, including the Interhotel hotel chain, the retail, hotel, and restaurant group HO, and chemical companies.

#90066d0770 03/07/1990 ~French/German News Agency
FRANKFURT, WEST GERMANY (MARCH 7) - The West German national railway company Bundesbahn said Wednesday it was raising the country's first ever public loan at a variable rate, totalling 1.86 billion Deutsche marks (1.1 billion dollars).

It is also the first ever West German public loan offered to bidding on the market, a system used in several countries, notably the United States.

Previously all public loans have been handled by a consortium of banks which fixes the conditions of the loan with the state institution concerned.

The consortium has been criticised because only a limited number of banks

have the right to be involved, and because prevailing market rates are not always reflected in the conditions it sets.

The Bundesbahn said that the 10-year loan would be at a variable rate to be revised every three months, at "0.2 percent below LIBOR," the London interbank offered rate.

#90066d1120 03/07/1990 ~French/German News Agency

LONDON (MARCH 7) - British Gas said Wednesday it was launching a 1.1 billion Canadian dollar (924 million U.S.) takeover bid for Canadian gas distributor Consumers' Gas.

The Canadian group G W Utilities, which controls 82 per cent of Consumers Gas, had accepted the offer, British Gas said.

The deal is subject to the approval of the Canadian authorities. Either side can pull out if authorization is not received and the takeover does not go ahead on December 31.

British Gas is offering 34 Canadian dollars a share plus interest at an annual rate of 13.2 per cent between August 20 and the payment date.

British Gas, privatized by the government in 1986, has 17 million clients, 80,000 employees and recorded a turnover of 7.5 billion pounds (12.5 billion dollars) in the year ended in March 1989.

The group buys, distributes and sells natural gas in Britain and extracts hydrocarbons in Britain's North Sea and 16 other countries.

Consumers' Gas distributes natural gas to more than a million clients in southern and central Ontario, western Quebec and the north of New York state.

British Gas chairman Robert Evans said that Consumers' Gas would continue to be managed from its current headquarters in Toronto.

WASHINGTON (MARCH 7) - The U.S. government Wednesday welcomed West German Chancellor Helmut Kohl's backing down in the Polish border issue.

White House spokesman Marlin Fitzwater told reporters, ''The U.S. welcomes Chancellor Kohl's initative as a positive and important step.''

He stressed the position of the U.S. government under President George Bush

which has explicitly accepted Poland's existing border.

After a crisis meeting of the ruling coalition in Bonn, Kohl agreed Tuesday not to link guarantees for Poland's existing borders with the issues of war reparations and rights for the German minority in Poland.

#90066d1310 03/07/1990 ~French/German News Agency

PORT-AU-PRINCE (MARCH 7) - Most major political parties Wednesday called on Haitians "to rise up to force President General Prosper Avril to relinquish power."

In a statement published here, the parties -- ranging from communists to centrists -- called the Avril Government "a public menace which should not remain in power."

They cited the killing of an 11-year-old girl Monday by soldiers who were breaking up an anti-government demonstration in Petit-Goave, located 68 kilometers (42 miles) southwest of here.

The 11 parties who signed the statement have expressed doubt about Lieutenant General Avril's commitment to holding free elections. Monday they proposed replacing the general with a seniuor judge as president of a provisional government in charge of organizing the elections.

Monday, six prominent organizations called for an uprising, giving Gen. Avril until Thursday to step down.

In Haiti's second-largest city, Cap-Haitien, students and teachers boycotted classes Wednesday to mourn the girl's killing.

Tuesday, more than 5,000 people in Gonaives, 150 kilometers (95 miles) northwest of here, and about 300 people in Petit-Goave rallied in protest of the killing and demanded Lt. Gen. Avril's resignation.

Security forces refrained from intervening in Tuesday's rally, mainly by students, but two soldiers were injured by rock-throwing demonstrators.

Protesters burned tires throughout the town and shops closed.

Lt. Gen. Avril, who came to power in a September 1988 army coup, declared a 30-day state of emergency in January and expelled opposition leaders after a member of his presidential guard was murdered.

The state of emergency was lifted ahead of schedule and the military leader gave the opposition figures the green light to come home.

Critics charged that the crackdown meant Lt. Gen. Avril planned to renege on his promise for elections this year, but he has said the voting will go ahead as scheduled.

LAGOS (MARCH 7) - The Nigerian military government Wednesday here inaugurated an eight-man committee to monitor the activities and performances of its 21 state governors.

Some state governors have recently sidetracked federal government fiscal and political policies. The committee was formed to identify them and recommend appropriate action to the federal government, an informed source said.

The committee - divided into two teams - would monitor the implementation of the federal government's fiscal and political decisions, the use of loans taken out by the governors, and report any undue state government interference in local administration.

"The performances of the military governors must be monitored to be able to ... identify problem areas in the state administration and proffer solutions and in this way lay a solid foundation for incoming civilian administration", the nation's number two leader, Vice Admiral Augustus Aikhomu, said while inaugurating the committee.

Nigeria is due to see civilian rule restored in October 1992.

The teams, each headed by a soldier and composed of top civil servants, are expected to finish their assignment before the end of this year.

BANGKOK (MARCH 7) - Thai Prime Minister Chatichai Choonhavan left here late Wednesday for a six-day tour of Belgium, Denmark, Italy and Britain, Thai government spokesman Suvit Yodmani said.

Mr. Chatichai, accompanied by his wife Boonruen and a team of advisors, was seen off at the airport by Thai military chief-of-staff General Sunthorn Kongsompong and cabinet ministers.

Mr. Suvit told Agence France-Presse that in Brussels, Mr. Chatichai will brief representatives of the European Economic Community (EEC) and "sound out" their opinions on Cambodia.

Mr. Chatichai arranged informal talks between Prince Norodom Sihanouk and Cambodian Prime Minister Hun Sen here February 22, ahead of inconclusive peace talks in Jakarta the following week.

Mr. Suvit said Thai government leaders -- after hearing the views and opinions of EEC members -- would have to "reconsider" Bangkok's future policy on Cambodia.

He quoted Mr. Chatichai as saying that Thailand should in the future "maintain a low profile" on the Cambodian question, and allow the warring Cambodian factions a "free hand to settle their own disputes."

After Belgium, Mr. Chatichai will visit Denmark and Italy before going to Britain to seek an audience with Thai Crown Prince Maha Vajiralongkorn, who is currently studying in London.

#90066d1520 03/07/1990 ~French/German News Agency
BERLIN (MARCH 7) - Premier Hans Modrow struck out at West German haste towards reunification and "ambiguity" over the Polish frontier at an emotional closing session of East Germany's parliament here Wednesday.

Mr. Modrow, addressing the East Berlin parliament's last session before elections next week, accused West German Chancellor Helmut Kohl of being "evasive and ambiguous" on the Polish border issue.

The chancellor agreed Tuesday for the first time to guarantee the frontier, yielding to his coalition partners and international pressure. Bonn spokesman Hans Klein said Wednesday Mr. Kohl had informed the leaders of the four victorious powers in World War II and Poland of the decision.

The tripartite coalition government in Bonn said in a statement that after the March 18 East German polls, the two German parliaments should recognize the existing border, and that a unified Germany would sign a treaty with Poland.

Mr. Modrow, who drew a tearful ovation from deputies for his speech, called on the East and West German governments to sign a treaty with Poland, prior to German reunification, recognizing its post-1945 western frontier.

He also said that preliminary talks on a treaty should start immediately.

In Bonn, the proposal was rejected by Mr. Klein, who said: "I think the government is doing the right thing by waiting to see who will be the (East German) prime minister after March 18".

Mr. Modrow's communist party is expected to lose its 40-year-old grip on power next week to parties pressing for rapid unification with West Germany.

Forcefully rebutting reports in West German newspapers that the East and West German governments had already concluded agreements on monetary union, Mr. Modrow said: "my government has neither the will nor the authority to agree such union."

Monetary union must "not be decided lightly", he said, and press speculation about an agreement "aims only to upset the citizens of East Germany."

He urged East Germans to "leave their money in savings accounts" and asked "West German authorities to halt all behaviour which is jeopardizing the serious preparation of monetary union."

The premier also took to the offensive over Poland's frontier.

East Germany recognizes the western border of Poland, running along the Oder river and its tributary the Neisse, but no central German authority has existed since the end of World War II, which began with the Nazi invasion of Poland.

"The Oder-Neisse line is not just the frontier of East Germany," Mr. Modrow said, "it must be and remain that of the future federal German state.

"In the name of my government, I have several times spoken clearly on this subject, but the federal chancellor has not."

Mr. Modrow said he endorsed a proposal made on Saturday by 32 U.S. senators, that the governments of East and West Germany negotiate a treaty with Poland which a unified German parliament could later ratify.

"The East German government is ready as of now to negotiate the common agreement with Poland proposed by the American senators," he said. "As far as we are concerned, the agreement could be concluded and initialled without delay."

The Polish issue was again raised Wednesday by Mr. Kohl at a cabinet meeting, where he stressed that Poland's renunciation of war reparations from East Germany was also valid for a reunified Germany.

Mr. Modrow, reporting to a two-day parliamentary session which opened Tuesday, also reviewed talks which he had in Moscow on Tuesday with Soviet President Mikhail Gorbachev.

The premier endorsed the official Soviet view that a unified Germany with

membership of the North Atlantic Treaty Organization would be a threat to European stability.

The four Allied powers -- the Soviet Union, the United States, Britain and France -- plus East and West Germany are due to meet next Wednesday in Bonn to discuss German reunification at talks being dubbed "four plus two".

The full meeting will be held after the East German polls. Press reports here have suggested that preparations for elections are getting behind and the they may be delayed. But the reports were denied by electoral authorities Wednesday.

#90066d1700 03/07/1990 ~French/German News Agency

MAVINGA, ANGOLA (MARCH 7) - The Angolan military command has ordered some 20,000 troops and 400 armored vehicles into the battle for this strategic village in southeast Angola, according to the UNITA rebel chief of staff.

General Arlindo Chenda Pena Ben-Ben told an Agence France-Presse reporter here that he was defending Mavinga with about 12,000 men against an offensive backed by recent-model Soviet T-72 tanks and long-range artillery.

The government in Luanda last month claimed to have taken Mavinga, which is a key to the defense of the rebel headquarters of the National Union for the Total Independence of Angola (UNITA) in Jamba.

Gen. Ben-Ben said the heart of the fighting was in fact about five to seven kilometers (three to five miles) north of the village, a small former colonial administrative outpost before independence in 1975.

There are no civilians left in Mavinga, which lies some 200 kilometers (125 miles) north of Likuwa, the last UNITA stronghold before Jamba, which is close to the border with Namibia.

The UNITA military chief said that though backers in the United States had proved "impressively efficient" in furnishing military aid, the rebels had to rely on cutting off supplies to the largely superior FAPLA (government) forces.

He said government MiG-23s and Sukhoi 22s and 25s were attacking UNITA positions and villages with "phosphorous and chemical weapons".

The claim seemed borne out by the withered leaves on trees beside small craters and the lingering stench in the air, while wounded guerrillas in a hospital 20 kilometers (12 miles) from the front line said chemical weapons had frequently been used against them.

UNITA leader Jonas Savimbi, who has been fighting the Marxist government since independence, on Monday said he was ready for a ceasefire, announcing on rebel radio Voice of the Black Rooster that he would not negotiate "with a knife at my throat".

Five UNITA 'generals' Tuesday issued a statement in Lisbon saying that when Mr. Savimbi had on Monday given the impression that government troops had made gains in their latest offensive, he was speaking "ironically".

Gen. Ben-Ben, who was appointed in mid-January and has had military training in Morocco like many other UNITA officers, claimed that the rebels had "totally wiped out" the government's last supply convoy "around February 22".

UNITA rebels alleged that Soviet 'technical advisors' were directly involved in the fighting, arguing that FAPLA commanders and gunners could not handle the sophisticated equipment on their own.

This reporter was shown a captured M-46 130mm artillery piece, presented to him as "the pride of the Soviets".

The rebels also charged that other foreign soldiers were helping FAPLA, but did not blame the Cubans, who have pulled north of the 13th parallel under an agreement with Pretoria also providing for the March 21 independence of Namibia from South Africa.

Luanda and Havana suspended the phased withdrawal of Cuban troops, due to be completed by mid-1991, after UNITA forces killed four Cuban soldiers north of the parallel in January, but have since resumed the pull-out.

Angolan, Cuban and South African officials met in tripartite commission in Luanda on Tuesday, mainly to discuss Namibian independence. An official Angolan spokesman later stressed that there could be no peace in Namibia with a war so close to its borders.

While Gen. Ben-Ben confidently claimed that the "enemy was surrounded" north of Mavinga, the rebels have taken steps to prepare for the fall of the village, which has been mined.

The airstrip has also been rendered useless. UNITA leaders claimed that FAPLA would have great difficulty supplying its forces by land.

#90066d1790 03/07/1990 ~French/German News Agency

BERLIN (MARCH 7) - Soviet Foreign Minister Eduard Shevardnadze warned East German states Wednesday against seeking individually to become part of

West Germany, as provided for by the West German constitution.

Mr. Shevardnadze, in a newspaper interview reported by the East German news agency ADN, said that such a move would be "an extremely dangerous" and undemocratic way of achieving German reunification.

Article 23 of the West German constitution allows "other parts of Germany" to join the republic, but provides no definition of the resulting entity.

Mr. Shevardnadze said using article 23 would be on a "purely nationalist basis and would not be democratic, balanced and civilised", in the interview to appear in Friday's edition of the Neue Berliner Illustrierte weekly.

"Who can guarantee in these conditions that article 23 will not be used for 'other parts of Germany' which have not been so for a long time and which are neither part of East Germany nor West Germany", Mr. Shevardnadze asked.

"We support the view of the (East German) government of Hans Modrow, providing a phased evolution towards a German federation, but which excludes a simple re-attachment of East Germany to West Germany", he said.

He described such an attachment as "an Anschluss", referring to Nazi Germany's 1938 annexation of neighboring Austria.

Meanwhile, West Germany's ambassador in Moscow handed over a message Wednesday from Chancellor Helmut Kohl for Soviet President Mikhail Gorbachev, Tass news agency reported.

No information was given on the contents of the message, handed over by Ambassador Klaus Blech to Soviet Deputy Foreign Minister Anatoly Adamishin.

RIYADH (MARCH 7) - Soviet Deputy Foreign Minister Vladimir Poliakov arrived here Wednesday to brief Saudi officials on Moscow's stand on the issue of emigration of Soviet Jews to Israel, informed Saudi sources said.

The Soviet envoy was to meet the Saudi foreign minister, Prince Saud al-Faisal, for discussions that would also cover Moscow's policy on Soviet Moslems, the sources said.

Mr. Poliakov was the first senior Soviet official to visit Saudi Arabia since December 1988, when another deputy foreign minister, Yuli Vorontsov, took part in talks with Afghan rebels in the western resort of Taif.

Riyadh and Moscow do not have diplomatic relations.

#90066d2190 03/07/1990 ~French/German News Agency
MANAGUA (MARCH 7) - Cuba and Haiti have virtually crushed freedom of the press while several journalists have been killed in El Salvador, Colombia and Peru, the Inter-American Press Associaion (IAPA) said Wednesday.

The IAPA, a group of journalists from Canada, the United States and Latin America, said that while press freedoms were being eroded in some

countries, newly found press freedom in Chile could be curbed under a proposed law.

The international organization of editors and journalists were to approve a resolution censuring those countries that have clamped down on the press, in particular Haiti, where the press has long suffered repression.

In Haiti, the resolution said, "any signs of a free press have disappeared, along with other rights under the yoke of the once promising regime of Lieutenant General Prosper Avril."

Cuban President Fidel Castro has earned the IAPA's dubious distinction of being named "public enemy Number One" because of the Caribbean island nation's "horrendous persecution of dissident journalists."

Cuban journalists Elizardo Sanchez Santa Cruz and Hiram Cobas Nunez are being held in prison while seriously ill. Mr. Sanchez is being held "under conditions that are so barbarous that it is doubtful he will survive," the IAPA said.

And Cuban journalist Hubert Jerez Marino was sentenced to jail in November 1989 for divulging "false information" to foreign journalists, IAPA said. Twenty-four other human rights activitists were recently jailed for meeting with foreign press correspondents, it added.

The group also expressed deep concern about the situation in El Salvador where three journalists were killed covering the presidential elections in March 1989, another seven were killed while covering the rebel offensive against the military last November.

IAPA said five other journalists by leftist rebels of the Farabundo Marti National Liberation Front after having been kidnapped.

In Colombia, 19 journalists were killed last year, most of them in what were believed to be contract killings by the drug cartels, the association said.

In Peru, journalists have been kidnapped and killed both by leftist guerrillas and unidentified groups.

The IAPA warned that in Venezuela, Guatemala and even under the emerging Chilean democracy, efforts were underway to draft legislation that would drastically restrict press freedoms.

#90066d2260 03/07/1990 ~French/German News Agency

NICOSIA (MARCH 7) - An official Libyan spokesman Wednesday rejected a

U.S. goverment charge that Libya was producing chemical weapons in a works which Tripoli has long insisted is for pharmaceutical products.

The White House earlier in the day voiced deep concern over what it said was Libyan chemical arms production, warning that the United States would make a "vigorous effort" to end such production at the plant at Rabta.

A spokesman for the Libyan foreign ministry quoted by the Libyan news agency JANA said such allegations were aimed at "creating a climate of suspicion that will endanger the favorable achievements of unity among the Arab Maghreb states in particular and the Arab nation in general."

JANA quoted the spokesman as saying that the allegations had been "spread by the U.S. television network ABC". It did not mention a statement about the Rabta plant by the White House Wednesday.

White House spokesman Marlin Fitzwater refused to speculate on what actions the United States might take over the plant, but he did not rule out a possible military operation to halt Libya's alleged chemical arms production there.

Mr. Fitzwater insisted the Rabta plant was "dangerous and becoming more so."

"This points to the necessity for heightening international vigilance of Libyan procurement activities and for vigorous efforts to stop the operation of Rabta," he said.

Tuesday, U.S. officials announced Libya had begun producing gases which could be used as chemical weapons.

Mustard gas, which blisters the skin and lungs, and nerve gas, which kills by disabling the central nervous system, are being produced at the Rabta facility, 100 kilometers (60 miles) south of Tripoli, the officials said.

The plant was also capable of producing canisters to carry the chemicals to selected targets, said the officials, who spoke on condition of anonymity.

The sources said that towards the end of last year, the Libyans achieved what one official called a "certain operational capability" that they had previously lacked.

"They haven't got enough to go into full production, but they can keep producing at this level," one of the officials said. "We remain seriously concerned about the Rabta weapons facility," said State Department spokesman Mark Dillon.

A conference held in Paris in January 1989 publicized Libyan leader Moamer

Kadhafi's alleged chemical weapons program.

This program, which Colonel Kadhafi denies exists, seemed to have been slowed down or suspended last year after U.S. complaints about West German firms and other foreign suppliers to the Rabta plant, according to U.S. sources.

Officials said it was not clear whether Col. Kadhafi was relying on outside sources for help in accelerating the program anew.

PANAMA CITY (MARCH 7) - The United States Wednesday signed a 52-million-dollar urgent economic aid package with Panama, where President Guillermo Endara had moved into the seventh day of a hunger strike to get the funds.

The agreement will immediately disburse 52 million dollars for housing, job creation jobs and technical assistance. It was signed by Mr. Endara and U.S. Ambassador to Panama Dean Hinton.

Mr. Endara, 54, had begun the seventh day of his fast to show his "solidarity" with Panama's poor and to "sensitize" the U.S. Congress to Panama's dire need for President George Bush's promised one billion dollars in aid.

Of the 52 million dollars in Wednesday's package, 25.1 million dollars are considered "urgent economic assistance." The rest is to compensate residents in El Chorrillo, an area heavily damaged in the December 20 U.S. invasion.

Panama is also still suffering from U.S. economic sanctions imposed in March 1988 as part of efforts to oust former strongman Manuel Antonio Noriega, who was finally routed in the invasion and is in a U.S. prison awaiting trial on drug trafficking charges.

The White House has also announced steps to hasten the return of 400 million dollars in frozen assets to Panama.

Congress recently indicated that perhaps only half the one billion dollars promised would be available because of Eastern Europe's competing needs, and there has been no word on when it would be disbursed.

BERLIN (MARCH 7) - Ten Mongolian dissidents went on a hunger strike in

Ulan Bator Wednesday to press demands for a special communist party congress before the end of the month, press reports said here.

ADN press agency said the hunger strikers were members of the coordinating council of the Mongolian Democratic Association movement. It said they gathered on the central Sushe-Bator square.

The strike leader, identified by ADN as Mr. Elbegdorsh, told journalists the protest was aimed at obtaining a "satisfactory answer" from the party's central committee and the presidium of parliament to demands by four opposition groups.

The four movements have said that a special party congress must elect a new central committee. They also called on a future provisional parliament to draw up a new electoral law and a new constitution.

Mongolian officials said earlier the central committee will begin a special plenum Monday in Ulan Bator, a week ahead of schedule, to respond to growing demands for reform.

The date was announced as a deadline set by the opposition for the resignation of some 250 members of the central committee, cabinet and parliament.

The special closed-door meeting is due to last one or two days, said a Mongolian Foreign Ministry official contacted by telephone from Beijing.

Informed sources said that central committee members would take a stand on demands the opposition made Sunday during a new demonstration attended by 10,000 to 15,000 people, the seventh such rally since December.

The communist Mongolian People's Revolutionary Party (MPRP) has been in power for 69 years in a country of two million people, wedged between China and the Soviet Union.

Quoting an official communique by the party's politburo, ADN said parliament will convene on March 21 to discuss whether to bring forward general elections.

JERUSALEM (MARCH 7) - Some 2,000 Israeli settlers from the occupied territories held a demonstration here Wednesday to protest against recent U.S. statements on Jerusalem, a correspondent at the scene said.

"Americans, don't tear out our heart, Jerusalem," read one of the banners borne by the demonstrators.

The protests came after statements from U.S. President George Bush and Secretary of State James Baker linking Israeli-annexed east Jerusalem to the occupied West Bank and Gaza Strip.

Demonstrators called on the Israeli government "not to give up an inch of territory to the Palestinians."

Benny Katzover, an official in charge of the policy of Jewish settlement in the territories, attacked Prime Minister Yitzhak Shamir's plan for Palestinian elections in the territories.

"Beware Shamir. If you rise against your people, if you negotiate with the Palestinians, hundreds of thousands of Jews will rise and besiege your house and your office," he declared in an address to a cheering crowd.

Some 90,000 settlers live in almost 300 communities in the occupied territories, according to official Israeli figures.

FRANKFURT, WEST GERMANY (MARCH 7) - At least 11 people died and several others were harmed in a fire on the premises of a Sino-Korean association here Wednesday, police said.

Five men, five women and a child were killed and at least four of the injured were in a serious condition.

The fire followed an explosion whose cause was unknown.

Witnesses said several people tried to escape the flames by throwing themselves from windows of the building. One of the victims was found dead on the pavement below.

The explosion and fire occurred on the first floor of the building in the cathedral area of Frankfurt, police said.

BEIJING (MARCH 7)) - A nationwide crackdown on smuggling in China last year uncovered 11,900 cases with a record total seizure of 115 million dollars worth of goods, the official China Daily said Wednesday.

More than 670 cases of smuggling were discovered within state enterprises and institutions, the English-language daily said, citing General Customs Administration officials.

A nationwide campaign was launched in August to combat smuggling, aimed mainly at shipments made along the Chinese coast.

A total of 589 people implicated in the cases were brought to justice last year, the newspaper said.

Customs authorities seized 80 kilograms (175 pounds) of heroin, about five times more than 1988, said the officials, who registered a large increase in the amount of narcotics being transitted through China last year.

They said drug traffickers tied their shipments to a rope that is towed by a boat. Maritime smuggling has seen a rapid rise in four of China's southern coastal provinces: Guangdong, Fujian, Hainan and Zhejiang.

Among seized goods were more than 53,000 cartons of foreign cigarettes and 460 vehicles, more than twice as much of both as in 1988, 74,000 color televisions (a six-fold rise), and 24,000 videotape recorders, an increase of five times.

Computers have also become a major item for smugglers, the daily said, without giving figures.

WASHINGTON (MARCH 7) - Fighting unleashed by the Afghan coup attempt Tuesday has spread outside the capital of Kabul to cities including Kandahar, Khost and Jalalabad, a senior State Department official said Wednesday.

John Kelly, assistant secretary of state for Near East and South Asian affairs, said in testimony before a congressional panel that reports reaching Washington were "fragmentary and preliminary."

The reports indicated that fighting continued as night fell in Afghanistan, he said.

He added that the United States could not confirm Afghan press reports of Soviet bombings in support of the government of President Najibullah.

The Afghan News Agency, which is close to an Afghan Moslem rebel faction, had claimed that the Bagram air base where the coup appeared to have originated was bombed by Soviet planes.

The report could not be independently confirmed.

Moscow has consistently denied resistance claims of Soviet military

involvement in Afghanistan since the Soviet military withdrawal in February 1988.

Mr. Kelly, who was giving the first official U.S. reaction to the attempted putsch, said the fighting "belied the claim that Najibullah is in positive control of his regime."

At U.N. headquarters in New York, meanwhile, informed sources said some U.N. personnel in Kabul had been unable to reach the airport because of the fighting.

The U.N. said in a statement it had no immediate plans to evacuate its 53 employees from Afghanistan, most of whom work in the capital.

Under Geneva accords signed in 1988, the U.N. is charged with monitoring the country's border with Pakistan to prevent shipments of arms to the mujahedeen rebels.

LONDON (MARCH 7) - British Labor Party leader Neil Kinnock will meet South African black leader Nelson Mandela in Stockholm next week, the Labor party said on Wednesday.

Mr Kinnock will be the first British political leader to meet with the deputy president of the African National Congress since his release last month after 27 years in South African prisons.

Immediately after he was freed, Prime Minister Margaret Thatcher extended an invitation to Mr Mandela to meet her, but he has so far not responded. The Stockholm talks next Wednesday will also involve Oliver Tambo, president of the ANC, and other prominent ANC figures, Mr Kinnock's office said.

Mr Mandela is to attend a concert in his honor at Wembley Stadium in London on Easter Monday.

MADRAS, INDIA (MARCH 7) - An Indian diplomat met an Indian Tamil leader here Wednesday to discuss a new home for the Tamil chief minister of Sri Lanka's Northeastern province, who could be removed by departing Indian troops, sources here said.

India's high commissioner (ambassador) to Sri Lanka, L.L. Mehrotra, conferred with influential local politician Muthuvel Karunanidhi on

"finding a safe sanctuary" for A. Varadaraja Perumal, the sources said.

The possibility that Indian troops due to leave Sri Lanka by March 31 could take Mr. Perumal with them arose after his Northeast provincial council issued a declaration of independence on March 1.

The troops might also bring away to India the secretary-general of the Eelam People's Revolutionary Liberation Front (EPRLF), K. Padmanabha, the sources said. The Tamil group is headed by Mr. Perumal.

Colombo has said it favors the removal of Mr. Perumal by departing Indian troops, who were deployed in Sri Lanka in under a 1987 agreement between the two countries aimed at ending Tamil separatism on the island.

Mr. Mehrotra told reporters before leaving for New Delhi that after the independence declaration, the Northeastern provincial council had ceased to exist and Mr. Perumal was no longer chief minister.

He said India welcomed the development as it paved the way for free and fair elections in the province, as a means to find a lasting solution to the Sri Lankan ethnic problem.

Mr. Karunanidhi, chief minister of southern India's Tamil Nadu state, has been asked by New Delhi to mediate with Sri Lanka's major Tamil groups to help solve the problem of Sri Lankan Tamil separatism.

He has since held talks with them, but without success.

#90066d2950 03/07/1990 ~French/German News Agency

WASHINGTON (MARCH 7) - A soviet and American delegation will meet in a month's time for further discussions on how to resolve the stalemated civil war in Afghanistan, officials said Wednesday.

John Kelly, assistant secretary of state for Near East and South Asian affairs, revealed the planned meeting in testimony before a House of Representatives subcommittee on Afghanistan.

Kelly gave no details about the parley, but officials said the U.S. delegation would include Kelly, Undersecretary of State Robert Kimmitt, special ambassador to the mujahedin Peter Tomsen, and their aides, and that it would probably be held in Geneva.

Kelly implied that Moscow, which sends up to 300 million dollars in supplies to Kabul each month, is looking for an excuse to end its involvement there and might be amenable to new U.S. proposals.

The attempt Tuesday to overthrow Afghani leader Najibullah and the ongoing fighting there illustrates that the Soviet-imposed regime is unwanted and not in full control, he said.

In early February, Secretary of State James Baker proposed a three-phase Afghanistan peace plan to Soviet Foreign Minister Eduard Shevardnadze, Washington's lastest attempt to resolve the Afghani crisis.

The plan would begin by making the mujahedin government-in-exile (Aig) more representative. In phase two, its leadership would start talks with representatives of the population in regime-controlled areas.

Phase Three of the plan would consist of elections which would replace the Kabul government with a representative one. Officials have described Moscow as ''unenthusiastic'' about the proposal.

Peter Tomsen, U.S. special envoy to the mujahedin, said a more unified and representative mujahedin leadership may convince Moscow to unseat the pro-Soviet regime of Najibullah.

He said scarcities of food and fuel had forced Moscow to boost its assistance to Kabul from three to 4.5 billion dollars a year, at a time when the Soviet economy is under duress.

Representative Stephen Solarz, chairman of the subcommittee on Asia and the Pacific, told Kelly that Congress was inclined to slash U.S. aid to the mujahedin unless more progress is made in ending the 10-year war.

Solarz said the absence of Soviet troops in the country made the mujahedin's struggle less compelling, and U.S. funding was needed elsewhere, such as in Eastern Europe.

If the Pakistan-based Afghani government in exile manages to broaden its representation at a shura to be called in the next four months, he said, U.S. aid should proceed. If it fails, continued U.S. aid in what he termed ''a strategically bankrupt'' U.S. policy should be reconsidered.

RENO, NV (MARCH 7) - Only love, time and a lawsuit stand between a death row inmate and his wife, who want to have a baby.

Lisa Petrocelli, whose husband was sentenced to death in 1982 for fatally shooting a car dealer while on a test drive, sued Nevada Wednesday seeking to force prison officials to allow conjugal visits or artificial insemination.

"All Tracy and I have is love and time," said Mrs. Petrocelli, the wife of Tracy Petrocelli, 38, in a statement. "We are running out of time."

Mr. Petrocelli was also sentenced to life in prison for killing an ex-girlfriend in a restaurant in 1981.

"She just wants to have his baby to carry on his name," said Robert Dulin, one Mrs. Petrocelli's attorneys.

Glen Whorton, a spokesman for the Nevada prison system, said the prison is "not planning on developing any kind of artificial insemination program" and will not allow conjugal visits.

"I would like to visit my husband in private so that we can conceive a child the way God intended," said Mrs. Petrocelli, who married the inmate in December 1988 at the Nevada State Prison.

They met through an inmate at a Las Vegas jail where she worked as a nurse.

Mr. Petrocelli has exhausted his state appeals and is pleading his case in the federal court system, Mr. Dulin said.

MADRID (MARCH 7) - Four prisoners at Alcala-Meco Prison, just east of Madrid, took and then freed six hostages Wednesday evening and returned to their cells, sources said at the Spanish Prison Institutions Agency here.

They had taken their hostages earlier in the evening to protest against their transfer to a prison in southern Spain. The prisoners involved were considered "dangerous", a union source said.

The hostages were four prison staff members and two doctors assigned to the prison. The prisoners returned to their cells just an hour after the incident started.

LISBON (MARCH 7) - Swedish Prime Minister Ingvar Carlsson arrived here Wednesday evening for a two-day visit to Portugal at the invitation of his Portuguese counterpart, Anibal Cavaco Siva.

Observers here said Mr. Carlsson's talks here would center on relations between the European Economic Community (EEC) and the European Free Trade Association (EFTA), with a view to possible creation of a "European economic space" grouping the members of the two blocs.

Other subjects include the situation in countries in Central and Eastern Europe and German unification.

The Swedish premier will meet with Portuguese President Mario Soares, among others. After talks here, he will make a private visit to southern Portugal.

TOKYO (MARCH 7) - Japanese electronics giant Sony Corp. unveiled Wednesday a new compact-size computer that can recognize Japanese handwriting.

"It does not require a keyboard, simply a pen," the company said.

Sony said the new computer, called the PalmTop PTC-500, could recognize more than 3,500 handwritten Japanese characters using fuzzy logic, which allows computers to grasp imprecise and indistinct concepts.

The PalmTop is about the size of a large paperback, measuring 20.5 centimetres (8.2 inches) by 15.8 centimetres (6.3 inches) by 4.5 centimetres (1.8 inches).

It contains a word processor, graphics ability and a storage system and will be sold for 198,000 yen (1,365 dollars) from April.

DHAKA (MARCH 7) - Bangladesh's foreign exchange reserves dropped to 500 million dollars last month compared with 1.1 billion dollars a year ago, the central bank said Wednesday.

The reserves, the equivalent of about two months' imports, fell because the country bought more foreign consumer goods and construction equipment, the bank said.

The BSS news agency Tuesday quoted officials as saying the lower reserves were "a temporary phenomenon."

"There is nothing to be worried about," they said, adding that the situation would improve soon with a fresh inflow of aid money.

Bank officials recalled that reserves in this aid-dependent country fell to 14 million dollars in 1974 during a famine that killed hundreds of people.

Imports in the seven months starting last July stood at 1.42 billion dollars compared with 994.4 million dollars during the corresponding period a year earlier, the bank said.

About 38 million dollars worth of imports, including onions, pulses and oilseeds, were in the pipeline in January. Analysts said imports suddenly shot up in January on rumours of a 100 percent margin requirement for letters of credit which was later set at 50 percent.

Expectations of a further devaluation of Bangladesh's currency could also been a cause of the increased imports, the analysts said.

The taka was devalued five per cent on Monday and the new official rate was set at 33.89 units to the dollar.

The devaluation reportedly came under pressure from the International Monetary Fund (IMF) as the first phase of a 15 percent devaluation planned by the Bangladesh government by June, when the current fiscal year ends.

The IMF had argued that the taka's depreciation was needed to encourage exports and discourage imports, the finance ministry said.

TOKYO (MARCH 7) - Monetary authorities from the Group of Seven leading industrialised capitalist countries met in Japan Wednesday to discuss ways to curtail the dollar's recent surge against the yen, a Japanese newspaper reported.

The Nihon Keizai Shimbun quoted international financial sources as saying that the participants, meeting at an undisclosed Japanese location, were likely to "reconfirm their policy coordination to halt the rising dollar."

The discussions, which follow an earlier meeting of monetary authorities from the world's 10 leading industrial nations south of Tokyo Monday and Tuesday, are expected to continue until late Wednesday, the newspaper said.

It said the meeting was also scheduled to discuss the establishment of the proposed European Bank for Reconstruction and Development whose purpose is to provide finance to rebuild the economies of Eastern Europe.

The earlier meeting, held at the resort town of Ito, grouped finance ministry and central bank officials from 10 members of the Paris-based Organisation for Economic Cooperation and Development (OECD).

Participants reportedly agreed on measures to contain inflation and support the Japanese yen and the West German mark against the soaring dollar.

The OECD group, known as the Working Party No. 3, meets four times a year to exchange views on macro-economic policies. It comprises the Group of Seven -- the United States, Japan, West Germany, France, Britain, Italy and Canada -- plus the Netherlands, Sweden and Switzerland.

WELLINGTON (MARCH 7) - New Zealand's current account deficit for the year to the end of March will more than double earlier projections and come in at four billion New Zealand dollars (2.3 billion dollars U.S), the Reserve Bank said in a report released Wednesday.

The amount, six percent of the gross domestic product, is 2.5 billion dollars (1.4 billion dollars) higher than the amount predicted by the bank three months ago.

The bank report was tabled in parliament Wednesday by the leader of the opposition, Jim Bolger, who obtained it using official information laws.

Mr. Bolger said the bigger deficit meant a substantial devaluation of the New Zealand dollar could be expected in the next few months.

He said that when Labour came to power in 1984 it said that the deficit, which was then 4.7 percent of GDP, meant the currency needed to be devalued.

"It raises the question of what will happen to the New Zealand currency when it is realised that our external deficit now is not 4.7 percent but six per cent," he said.

A private economist, Len Bayliss, called the figures disclosed by Mr. Bolger "absolutely scandalous."

"When you make an error of over two billion dollars in three months ... how can the government have any confidence in its advisors?" he asked.

A week ago, Mr. Bayliss called for a devaluation of the New Zealand dollar and said it should be tied to the Australian currency. There was "no prospect of improving on New Zealand's abysmal growth performance"' without a large and sustained devaluation, he said.

#90066d8260 03/07/1990 ~French/German News Agency
ADELAIDE, Australia (MARCH 7) - Swedish shipbuilder Kockums is increasing its stake in the international consortium building six submarines here for the Royal Australian Navy, the Australian Submarine Corporation Pty. Ltd. (ASC) said Wednesday.

The ASC consortium said that negotiations had been concluded for Kockums Pacific Pty. Ltd. to buy half CBI Constructors Pty. Ltd.'s 20 percent share in the 2.3 billion U.S. dollars project.

The deal gives Kockums 40 percent in ASC. The other half of the CBI holding will be taken up by the Australian Industry Development Corporation Ltd. (AIDC), which will increase its stake in the project to 35 percent.

Australia's Wormald group holds the other 25 percent.

ASC managing director Don Williams said in a statement that CBI Constructors, the Australian subsidiary of Chicago Bridge and Iron, had made a major contribution to the project.

"The transfer in shareholding comes at a time when CBI's input to the project is well advanced," he said without explaining why the company was relinquishing its stake.

ASC won a contract from the Australian Government in 1987 to build six diesel-powered Swedish Type 471 submarines with options for two more.

The keel was laid here last month for the first submarine which is due to be handed over to the Navy in 1995.

The other five are scheduled for delivery over the following four years to successively replace the navy's ageing fleet of British-made Oberon submarines.

ASC said the changes in its ownership, which had been approved by the government, came at a time when all major sub-contracts had been let.

Mr. Williams said that sub-contracts had been let for 95 percent of the Australian content and the project was on schedule within the estimated cost.

"Although CBI has sold its shareholding it has been awarded a substantial contract for hull fabrication work," he said, adding that this would allow the project to capitalise on CBI's vast international experience.

#90066d8460 03/07/1990 ~French/German News Agency
LONDON (MARCH 7) - The British government sold the Rover car company to British Aerospace to save jobs, notably in the context of pressure from EEC authorities for a reduction of capacity to produce cars in the Community, Lord Young of Graffham said on Wednesday.

The sale has attracted controversy, particularly at the level of the European Economic Community, because of aid provided by the British government which has been attacked as representing unfair competition.

Lord Young, who was industry minister at the time, replying in the Financial Times newspaper to reports that the Ford auto company would have paid 600 million pounds, or four times the price of the sale to BAe, to buy Rover, said that he doubted whether a sale to Ford would have been cheaper for the British taxpayer.

This was because of the risk that jobs would be lost, and also that a purchaser would not invest adequately in line with a five-year plan. Lord Young said that 200,000 jobs were at stake, and that in his view, "jobs were more important than the proceeds of a sale".

Governments in the EEC supported moves by EEC officials to cut car production as long as the effects were not felt in their own country.

An attempt to float the company on the stock market failed because the corporate plan, requiring investment of 1.2 billion pounds over five years was not strong enough to attract institutional investors.

The West German Volkswagen auto company expressed interest, but turned away when it learnt that, as a result of previous hostility in parliament to foreign offers for Rover and Land Rover, the government had been obliged to promise that a measure of British control would be retained over Land Rover.

"Besides, the whole future of Rover was tied up with Honda," he said.

-30- 1997
#90066d8540 03/07/1990 ~French/German News Agency
TOKYO (MARCH 7) - Japanese computer giant NEC Corp. and American Telephone and Telegraph Inc. (AT and T) announced an agreement Wednesday to cooperate in the field of semiconductor technology for five years.

The two companies, announcing the agreement at a joint news conference, said the partnership was likely to help reduce trade friction between Washington and Tokyo as it would boost sales of U.S. computer chips in

Japan.

NEC vice president Tomihiro Matsumura said the agreement marked "a new era for cooperation" between companies from the United States and Japan.

"U.S. chips will be given more market access because AT and T has attractive products," Mr. Matsumura told the news conference.

He added that NEC itself planned to boost its purchases of U.S. chips in the near future from the current level of 20 percent of total purchases to 24 per cent.

The United States has long charged that the Japanese market for semiconductors is largely closed to outsiders and has been seeking to boost foreign companies' share of the market to at least 20 percent by July 1991.

The Japanese government says the foreign share of the Japanese chip market rose from 12 percent in the September quarter to 12.9 percent in the three months to December, of which 80 percent came from the United States.

William Warwick, president of AT and T's microelectronics division, told the news conference that the partnership would "mitigate trade friction between our two countries." It would also provide "opportunities to penetrate into semiconductor markets worldwide," he said.

In addition to boosting the use of AT and T semiconductors in NEC products, the partnership involves the mutual transfer of products and technology and cooperation in producing four-bit microcontrollers, the two companies said.

Mr. Warwick said his company was "especially excited" about cooperating in the field of application-specific integrated circuits, known as ASIC products.

#90066d8900 03/07/1990 ~French/German News Agency

HONG KONG (MARCH 7) - An economic slowdown aggravated by the Beijing massacre in June trimmed Hong Kong's economic growth last year to 2.5 percent, less than half the official forecast of six percent, the financial secretary said Wednesday.

Sir Piers Jacobs said the British colony might not be "fiscally comfortable" over the next few years given its commitment to spending on mammoth projects, including a 130 billion dollar (16.6 billion U.S.) new airport and port project to be launched with private-sector participation.

The expenditure was "designed not for cosmetic or confidence building" but was necessary to carry on "Hong Kong's dramatic success story" beyond 1997

when the colony reverts to Chinese sovereignty, Sir Piers said.

Smokers, drinkers and motorists are to help make ends meet, according to the fiscal 1990 budget Sir Piers announced Wednesday which stipulates tax and fee hikes on tobacco, liquor, vehicle registration and driving licenses.

Hong Kong should show gross domestic product (GDP) growth of around three percent this year, mostly thanks to recoveries by trade and tourism, which had been hit by slackening demand on world markets and events in China, he said.

The 1990 GDP forecast was made against an official average annual GDP growth estimate of 5.5 percent between 1989 and 1994.

Inflation should ease off, "but more slowly than we would like," to an annual average of 8.5 percent in 1990 after last year's 10 percent recorded amid an acute labour shortage, he said.

Presenting his budget for the new financial year starting April 1 at the local legislature, Sir Piers reported a surplus in 1989-1990 of 9.3 billion dollars (1.2 billion U.S.), and said he was expecting a reduced surplus of 720 million dollars (92 million U.S.) in 1990-1991.

The estimated smaller surplus would partly depend on tax and fee hikes, which were to be imposed with immediate effect on tobacco and liquor, and vehicle registration and driving licenses.

Total government spending in 1990-1991 was put at 88.2 billion (11.3 billion U.S.), and without the revenue-raising package the fiscal period would end with a deficit of 2.4 billion (308 million U.S.), he added.

#90066d9120 03/07/1990 ~French/German News Agency

BRUSSELS (MARCH 7) - The European Commissioner for North-South relations, Abel Matutes, has proposed setting up a business forum grouping European and Indian industrialists.

The European Economic Community (EEC) wants to implement the proposal, put to Indian Foreign Minister Inder Kumar Gujral on Tuesday, as quickly as possible, informed Community sources said.

The EEC already has similar cooperation set-ups with other countries including Mexico and groups such as the Association of Southeast Asian Nations (ASEAN).

Mr. Gujral also had talks in Brussels with ministers of Ireland, which

currently holds the EEC rotating presidency, its predecessor France, and Italy,
which is to take over the presidency for six months in July.

The talks focussed on developments in Eastern Europe, Southeast Asia, the Middle East and South Africa.

India is the EEC's leading beneficiary of EEC development aid, receiving 1.3 billion dollars between 1976 and 1988, and is the only Asian country with which the EEC maintains regular relations at ministerial level.

Mr. Gujral stressed that regional cooperation was a priority for India, particularly within the South Asian Association for Regional Cooperation (SAARC).

But he expressed some concern over the future of Indian relations with the EEC after the advent of the single European market in 1993 and urged the Community not to forget North-South dialogue to the benefit of Eastern Europe.

The EEC is India's leading trade partner, with a surplus in the EEC's favour of 2.4 billion European Currency Units (ECU's) (2.7 billion dollars) in 1988.

#90066d9360 03/07/1990 ~French/German News Agency
JAKARTA (MARCH 7) - Indonesia recorded a 571.1 million dollar trade surplus in December 1989, Information Minister Harmoko said Wednesday.

Exports came to 2.143 billion dollars while imports totalled 1.572 billion dollars, Mr. Harmoko said after a monthly cabinet meeting on the economy.

Oil and gas, Indonesia's largest single export earners, accounted for 849.5 million dollars, up 59.5 percent on December 1988, he said, while non-oil and gas exports at 1.293 billion dollars had a 6.2 percent increase.

Indonesia's total exports for calendar year 1989 came to 22.147 billion dollars for a rise of 15.2 percent over 1988, he added.

Inflation for February stood at 0.9 percent, bringing the cumulative rate for the first two months of the year to 1.9 percent, Mr. Harmoko said,

putting the rate for the 11 months of fiscal 1989-90 ending March 31 at 5.87 percent.

The inflation rate for February 1989 stood at 1.27 percent, official figures show, with price rises for fiscal 1988-89 reaching 6.55 percent.

MANILA (MARCH 7) - China and the Philippines have pledged to boost bilateral trade and correct an imbalance which has favored Beijing for the past decade, the Philippine foreign affairs department said here Wednesday.

The two countries pledged to increase bilateral trade to between 400 million and 450 million U.S. dollars this year in the trade protocol signed in Beijing earlier this week, the department said in a statement.

Beijing promised to buy from Manila 200,000 to 400,000 tons of phosphatic and compound fertilizers, 60,000 tons of coconut oil, along with fresh bananas, copper concentrates, chrome ore, coffee and cashew nuts.

Manila pledged to buy from Beijing 250,000 tons of crude oil, as well as machinery and equipment, electrical products, coal, cotton, cement and pharmaceutical chemicals.

Bilateral trade reached 253 million dollars in the first 11 months of 1989, the foreign affairs department said here.

TOKYO (MARCH 7) - Japan's index of service industry activities grew 5.3 percent last year, mirroring firm consumer spending and brisk capital investment, the International Trade and Industry Ministry said Wednesday.

But the increase from a year earlier represented a slowdown from 1988 when the index rose 6.5 percent. The index measures activities ranging from real estate, finance and insurance to retailing, wholesaling and advertising.

The ministry said the index fell 2.7 percent in the June quarter after the introduction of a three percent consumption tax in April but recovered in the subsequent two quarters.

The overall increase for the year was led by the finance and insurance sector whose activities expanded 13.5 percent, marking the fifth consecutive increase in the annual figure. The index for rental, advertising and information activities meanwhile grew 4.9 percent, the ministry said.

TOKYO (MARCH 7) - A group of Japanese firms led by Mori Building Co. is planning to build a "fashion city" for retailers on reclaimed land in Tokyo for 270 billion yen (1.8 billion dollars), a Mori spokesman said Wednesday.

The spokesman said the property developer was forming a consortium to promote the redevelopment plan including trading giant C. Itoh and Co., Japan's biggest brewer Kirin Brewery Co. and about 70 clothing retailers.

The proposed development would comprise a commercial zone for both large and small retailers, an amusement center, theaters, restaurants, an athletic club, an art gallery and a music studio. It would have more than 560,000 square metres (6.16 million square feet) in floor space, the spokesman said.

The Tokyo Metropolitan Government is expected to decide on the fate of the reclaimed land on Tokyo Bay by June.

VATICAN CITY (MARCH 7) - Pope John-Paul II will pay pastoral visits to Mexico and the Dutch Caribbean island of Curacao from May 6 to 14, the Vatican announced Wednesday.

The Pope will arrive in Mexico on May 6 and besides the capital will successively visit the cities of Vera Cruz, Aguascalientes, San Juan de los Lagos, Durango, Chihuahua, Monterrey, Tuxtla, Villahermosa, and Zacatacas.

On May 13 he will fly from Mexico City to Willemstad in Curacao, the biggest island in the two groups of islands making up the Netherlands Antilles.

The population of Curacao is 85 percent Catholic.

#90066f1358 03/07/1990 ~United Press International
(MARCH 7) UPI - ALMANAC:

Today is Wednesday, March 14th, the 73rd day of 1990 with 292 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Pisces. They include Thomas Marshall, vice president under Woodrow Wilson, in 1854... railroad engineer Casey Jones in 1864... physicist Albert Einstein in 1879... bandleader Les Brown in 1912 (age 78)... cartoonist Hank Ketcham (''Dennis the Menace'') in 1920 (age 70)... astronaut Frank Borman in 1928 (age 62)... actor Michael Caine and composer Quincy Jones in 1933 (both age 57)... comedian Billy Crystal in 1947 (age 43)... and Prince Albert, heir to the throne of Monaco, in 1958 (age 32).

On this date in history:

In 1812, the U-S government authorized issue of America's first war bonds, to pay for military equipment for use against the British.

In 1964, Dallas nightclub owner Jack Ruby was convicted of murdering Lee Harvey Oswald, the assassin of President John F. Kennedy. Ruby was sentenced to death but the conviction was overturned and he died of cancer while awaiting a new trial.

In 1985, the United States evacuated American officials from Lebanon, leaving only a small diplomatic presence in war-torn Beirut.

In 1989, the Bush administration announced it will ban imports of semiautomatic assault rifles indefinitely.

A thought for the day: Albert Einstein wrote in ''What I Believe''... quoting here... ''The most beautiful thing we can experience is the mysterious. It is the source of all true art and science.''

#90066k0048 03/07/1990 ~Japanese News Agency

TOKYO (MARCH 7) KYODO - JAPANESE ARE EXPECTED TO BEAR MORE TAX AND SOCIAL WELFARE COSTS IN FISCAL 1990 THAN THEY DID THE PREVIOUS YEAR, THE FINANCE MINISTRY SAID IN A REPORT RELEASED WEDNESDAY.

THE REPORT, SUBMITTED TO A LOWER HOUSE BUDGET COMMITTEE, SAID SUCH COSTS, MEASURED BY THE SO-CALLED NATIONAL BURDEN RATE, ARE PROJECTED TO RISE ABOVE 40 PERCENT IN THE NEXT FISCAL YEAR FOR THE FIRST TIME, GOING UP 1.6 PERCENTAGE POINTS FROM THE YEAR BEFORE TO 40.4 PERCENT.

THE NATIONAL BURDEN RATE IS THE RATIO OF TAX AND SOCIAL WELFARE EXPENDITURES TO NATIONAL INCOME.

THE PROJECTED INCREASE IN THE BURDEN RATE IS DUE CHIEFLY TO GROWING TAX REVENUES AS WELL AS TO A HIKE IN GOVERNMENT-MANAGED PENSION PREMIUMS.

TAX REVENUES HAVE BEEN GROWING DRAMATICALLY AMID STRONG ECONOMIC GROWTH. CORPORATE AND INCOME TAXES HAVE LED THE PACK.

THE NATIONAL BURDEN RATE HAS BEEN RISING AT AN ANNUAL PACE OF AROUND 1 PERCENTAGE POINT SINCE FISCAL 1979, WHEN THE RATE TOPPED 30 PERCENT. JAPAN'S RATE, HOWEVER, IS STILL LOWER THAN THAT IN OTHER INDUSTRIAL NATIONS EXCEPT THE UNITED STATES. THERE, THE RATE WAS 36.3 PERCENT IN 1987.

FOR INSTANCE, THE RATE WAS 77 PERCENT IN SWEDEN IN 1987, 62.3 PERCENT IN FRANCE IN 1987, AND 53.3 PERCENT IN BRITAIN IN 1986, REFLECTING WELFARE-ORIENTED SOCIETIES. THE 1988 FIGURE FOR BRITAIN IS NOT AVAILABLE.

THE NATIONAL BURDEN RATE HAS LONG BEEN THE FOCUS OF PUBLIC DEBATE BECAUSE JAPAN IS HEADING FOR AN AGING SOCIETY AND MORE SOCIAL WELFARE SPENDING WILL BE NEEDED FOR THE AGED.

THE AD HOC COMMITTEE ON ADMINISTRATIVE REFORM, A POWERFUL ADVISORY PANEL TO THE PRIME MINISTER, RECOMMENDED IN ITS REPORT IN 1983 THAT THE NATIONAL BURDEN RATE BE KEPT AT LEVELS WELL BELOW 50 PERCENT.

THE AD HOC ADMINISTRATIVE REFORM PROMOTION COUNCIL, A PANEL SET UP TO REPLACE THE DEFUNCT COMMITTEE, IS WORKING ON A REPORT DUE OUT IN APRIL. THE COUNCIL IS REPORTEDLY PLANNING TO PROPOSE THAT THE RATE STAY BELOW 50 PERCENT, EVEN IN 2020, WHEN THE RATIO OF AGED TO JAPAN'S POPULATION IS COMING TO A PEAK.

#90066k0076 03/07/1990 ~Japanese News Agency

ISLAMABAD (MARCH 7) KYODO - AN AFGHAN AIR FORCE AIRCRAFT HAS DEFECTED AND LANDED AT A PAKISTAN AIRBASE, STATE-OWNED RADIO PAKISTAN REPORTED WEDNESDAY.

HOWEVER, GAVE IT NO FURTHER DETAILS ABOUT THE DEFECTOR NOR IDENTIFIED THE BASE WHERE THE PILOT LANDED.

QUOTING RELIABLE SOURCES, RADIO PAKISTAN ALSO SAID THAT KABUL PRESIDENT NAJIBULLAH HAS LEFT THE PRESIDENTIAL PALACE AND HAS TAKEN REFUGE AT AN ABANDONED SOVIET CAMP INSIDE AFGHANISTAN.

THE SAME SOURCES HAD REPORTED INTENSIVE FIGHTING BETWEEN THE REBEL GOVERNMENT TROOPS AND LOYALISTS OF THE AFGHAN PRESIDENT, AND SAID THAT THE 37TH COMMAND BRIGADE HAS ALSO JOINED THE SUPPORTERS OF COUP LEADER GENERAL SHAHNAWAZ TANI.

WHILE WESTERN DIPLOMATIC SOURCES HAD EARLIER REPORTED THAT KABUL RADIO WAS BROADCASTING FROM DIFFERENT FREQUENCIES, INDICATING USE OF A MOBILE TRANSMITTER, RADIO PAKISTAN'S REPORT SAID KABUL RADIO HAD CEASED ALL TRANSMISSIONS.

MEANWHILE, REPORTS FROM PESHAWAR SAID THAT A BIG MILITARY TRANSPORT PLANE HAD LANDED AT THE PARACHINAR AIRBASE IN PAKISTAN'S TRIBAL BELT, TRIGGERING SPECULATION THAT SOME LEADERS OF THE ABORTED COUP, TANI HIMSELF, MIGHT BE ON THE PLANE.

OKLAHOMA CITY (MARCH 7) PR NEWSWIRE - Beard Oil Co. (AMEX: BOC) today announced the appointment of a new vice president.

In June of 1988 Robert A. Gaskill joined Beard Oil as District Exploration Manager of the company's Mid-Continent Division Waterflood Group. Since that time the size and scope of the Group's operations have expanded

significantly, and Beard Oil has now elevated the Group to Division status re-designating it as the Mid-Continent Waterflood Division. Gaskill has been named vice president of the division.

Prior to joining Beard Oil, Gaskill was manager of drilling and production for Crown Central Petroleum Corp. He has been active in the oil and gas exploration business for more than 31 years, including eight years with Murphy Oil Corp. and its affiliates and seven years with Monsanto Co.

Beard Oil is a diversified natural resource development company headquartered in Oklahoma City. Its principal business is oil and gas exploration and production. The company is also involved in carbon dioxide (CO2) and iodine production. Beard Oil's common stock is traded on the American Stock Exchange under the symbol BOC.

ATLANTA (MARCH 7) PR NEWSWIRE - Telecom USA (NYSE: TTT) today announced the formation of a new division, Telecom USA Enterprises, comprised of current company subsidiaries that provide enhanced telecommunications equipment and information services.

Clark E. McLeod, current vice chairman, president and chief operating officer of Telecom USA, will assume operating responsibility for the new division. He will remain vice chairman and president, along with assuming additional strategic planning duties. The headquarters of Telecom USA Enterprises will be in Cedar Rapids, Iowa.

O. Gene Gabbard, chairman and chief executive officer of Telecom USA, will assume operating responsibility for the company's two divisions that provide the nation's fourth-largest long distance telephone service. The Central Division is based in Cedar Rapids, Iowa, and the Southern Division is based in Atlanta.

The new division will include the following existing subsidiaries: ASYNC Corp., the nation's largest telephone voice messaging firm; Telecom Information Resources Co., which provides news, sports, and other voice information services; Telecom USA Direct, the fifth-largest telemarketing company in the U.S.; Telecommunications Services Co., which provides interconnect services in the Midwest; and Telecom USA Publishing Co., which produces telephone directories for more than 25 cities.

McLeod stated: "We believe that Telecom USA has been at the forefront of the long distance telephone industry in developing and providing a wide

array of enhanced and value-added services. This new organization evidences our commmitment to be second to none in offering customers the kind of innovative services that will be increasingly vital in this information age."

Gabbard said: "Telecom USA's excellence in these areas is due largely to Clark McLeod's creative leadership. As head of Telecom USA Enterprises, he will assure continued priority attention to the management needs of these exciting, entrepreneurial ventures."

Telecom USA, headquartered in Atlanta, is publicly traded on the New York Stock Exchange under the symbol "TTT".

NEW YORK (MARCH 7) PR NEWSWIRE - Compaq Computer Corporation (NYSE: CPQ) and Businessland Inc. (NYSE: BLI) today announced that Compaq has authorized Businessland to sell and service Compaq products throughout the U.S. Businessland will continue its authorization to sell and service Compaq products in the U.K.

"This agreement meets our customers' requirements that Businessland carry all the leading PC brand products," said David A. Norman, Chairman and Chief Executive Officer, Businessland, Inc. "Advanced EISA-based products such as the COMPAQ SYSTEMPRO and innovative laptop products like the COMPAQ LTE/286 are consistent with Businessland's position as the leading multivendor systems integrator."

"We are pleased with this agreement because Compaq customers will benefit from Businessland's nationwide presence and its focus on networking solutions and support," said Michael S. Swavely, President, North America, Compaq Computer Corporation.

Businessland and ComputerCraft locations in the U.S. will be covered under the standard Compaq Authorized Dealer agreement signed by the two companies. It is expected that, contingent on the timely completion of the authorization process, Compaq products will be available through all Businessland locations in the U.S. in the second quarter.

Compaq Computer Corporation is a world leader in the manufacture of PC systems, and desktop, portable and laptop personal computers. The Company's products are sold in 61 countries through a network of more than 3,000 Authorized COMPAQ Computer Dealers.

Founded in 1982, Businessland, Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The Company integrates products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity. Businessland operates centers and branch offices in 50 major metropolitan markets in the U.S., five metropolitan areas in Great Britain, two in West Germany and two in Canada. It reported sales of $1.2 billion in fiscal 1989.

COMPAQ and DESKPRO are registered trademarks (registered U.S. Patent and Trademark office) and COMPAQ SYSTEMPRO, COMPAQ LTE, COMPAQ LTE/286 are trademarks of Compaq Computer Corporation.

RESEARCH TRIANGLE PARK, NC (MARCH 7) PR NEWSWIRE - Ground was broken today for a major expansion of laboratory facilities at the headquarters of CompuChem Corp. (NASDAQ: CCEM), a national leader in the burgeoning fields of environmental and drugs-of-abuse testing.

The new facility, which will bring the total size of the CompuChem plant to 105,440 square feet, will house additional state-of-the-art environmental testing equipment. The existing CompuChem facility is already the world's largest Gas Chromotography/ Mass Spectrometry (GC/MS) laboratory. The new laboratory will also contain a "clean room" with sanitized air to conduct precise air and water testing in an atmosphere of absolute purity. In addition to sophisticated testing facilities, the new building will house the environmental division's sales and marketing arms, and its Quality Assurance Department. The new space will also be the final step in relocating and consolidating drug testing activities into one building.

CompuChem provides state-of-the-art, highly reliable drug testing for industry and government. As the nation's largest independent drug testing company, CompuChem screens 5,000 samples daily for evidence of drug abuse. Its clients include 40 percent of the Top 100 Forutne 500 corporations.

CompuChem's environmental division provides its clients with accurate measurements of toxic chemicals in soil, sediment, sludge and water, for identification and remediation of hazardous waste sites and monitoring of ongoing generation and disposal of toxic chemicals in the environment. The company's customers include engineering firms, industrial companies and numerous federal and state agencies, including the U.S. Environmental Protection Agency.

Due to EPA enforcement and concerns over industrial liability exposure, testing has become a $700 million a year industry, with growth forecast at 20 to 25 percent annually. The forensic drug testing market was estimated to be $300 million in 1989 and is forecast to grow in excess of 25 percent annually due to government initiatives and public opinion favoring drug testing in the workplace.

The new Research Triangle Park, N.C. , facility is scheduled for June 1, 1990, completion. CompuChem's headquarters, including the new building site, are leased from Highwood Properties, a leading Raleigh-Durham area developer. The new laboratory was designed by Envirotek Inc. and is being constructed by Davidson & Jones.

#90066p0033 03/07/1990 ~PR Newswire

NEW YORK (MARCH 7) PR NEWSWIRE - The Sterling Forest Corporation, a subsidiary of AmBase Corporation (NYSE: ABC), has been notified that on Friday, March 2, a Passaic County, N.J., judge ordered a valuation hearing within 90 days regarding the condemnation by Passaic County of 2,000 acres of Sterling Forest land.

The hearing will be held before three court-appointed special commissioners. The commissioners will make the first independent valuation of the Passaic County property.

Robert Thomson, chairman and chief executive officer of the Sterling Forest Corporation, welcomed the judge's action. "We believe that the 2,000 acres are worth substantially more than Passaic County's highest appraisal of $4.7 million. For example, last year Bergen County paid $14 million, or $11,200 per acre, for 1,250 acres of woodlands just a few miles from our land. More recently, we sold two 10-acre parcels in Sterling Forest for $20,000 an acre. We believe the fair market value of our land in Passaic County is much closer to these recent sales than the approximately $2,300-an-acre Passaic County's appraisal puts on our property," said Thomson.

If either the Sterling Forest Corporation or Passaic County disagrees with the commissioners' valuation, a trial to determine the value will be held in New Jersey. It is expected that the trial will be held by the end of 1990.

AmBase Corporation is an insurance, banking and investment services organization. Its principal subsidiaries include The Home Insurance Company, U.S. International Re, Carteret Bancorp, Gruntal Financial Corp., Home Capital Services and Sterling Forest Corporation.

ATLANTA (MARCH 7) PR NEWSWIRE - National Healthcare Inc. ("NHCI") announced today its registration statement covering 300,000 shares of 25 percent Participating Cumulative Convertible Redeemable Preferred Stock (referred to as "25 percent Preferred") $1 par value, has been declared effective by the Securities and Exchange Commission.

The 25 percent Preferred is convertible into voting common stock of the company at the rate of five shares for each share of 25 percent Preferred. The company said the shares are being distributed to plaintiff class members, pursuant to a settlement agreement entered into Dec. 30, 1987, by the company and other defendants in connection with the class action stockholder litigation entitled Mashburn, vs. National Healthcare Inc. The company said it expects to mail the shares this month.

It said it will receive no cash proceeds from the issuance and expects to recognize a charge to earnings of approximately $560,000 reflecting the estimated market value of the 25 percent Preferred at issuance.

The 25 percent Preferred has a redemption value of $7.5 million and the company indicated it expects to incur a charge to income each quarter until such redemption value is fully accrued.

The company noted it is presently precluded, by various debt agreements, from making any payments on the 25 percent Preferred.

National Healthcare Inc. is an Atlanta-based corporation which provides healthcare services to communities through ownership or management of general acute care hospitals and related healthcare services.

MIDDLETOWN, OH (MARCH 7) PR NEWSWIRE - A new, four-year labor contract has been ratified by Armco Steel Company, L.P., hourly employees at the company's Middletown, Ohio Works. The contract was approved by a margin of 2924-yes to 313-no.

"We are pleased that these negotiations are successfully concluded. Now, we can focus our energies on supplying high-quality steel products to our customers," Lyle A. Warren, Middletown Works manager, said.

The contract includes an eight-year Customer Assurance Plan. The provision assures customers of an uninterrupted supply of steel during the life of this and the succeeding contract that begins in March 1994. Currently, it is unique to the industry.

"Our Customer Assurance Plan sends a strong message to our customers that Armco Steel Company, L.P., can be viewed as a reliable, long-term supplier of steel. To our employees, it helps assure that jobs will be here well into the 90s," Warren said.

About 4100 Middletown Works hourly employees are represented by the Armco Employees Independent Federation (AEIF).

Armco Steel Company, L.P., is a limited partnership between Armco Inc. (NYSE: AS), Parsippany, N.J. and Kawasaki Steel Corporation, Tokyo. The company produces flat-rolled carbon steels for automotive and other markets.

SAN DIEGO (MARCH 7) PR NEWSWIRE - Great American Bank, SSB (NYSE: GTA) announced today it has retained the Financial Services Group of Shearson Lehman Hutton Inc. (NYSE: SLH) as its investment banking firm for the purpose of assisting in raising capital.

John Hopkins, managing director and co-head of the Financial Services Group, said, "Our firm is most pleased to have this opportunity to work with and advise Great American, one of the leading western financial institutions, in helping them realize their capital objectives. We have every confidence that Great American will achieve these plans successfully."

Great American Bank is the nation's seventh largest publicly held savings institution, and at Dec. 31, 1989, had $16.1 billion in assets. The bank has one of the strongest retail banking franchises in the western United States, with 214 offices located in key markets, primarily in Arizona, California and Washington.

AGOURA HILLS, CA (MARCH 7) PR NEWSWIRE - PIP Printing, the nation's largest franchise of retail business printing stores, announced that full-color printing of brochures is now available through its nationwide chain of nearly 1,200 locations. Advantage Color offers a new alternative to printing buyers who until now were usually required to use a commercial printer. The costs of full-color printing were prohibitive for most smaller companies in need of limited quantities.

Doug Reiter, vice president of marketing for PIP Printing, stated that PIP stores nationwide will be offering their customers full-color brochures

printed on heavy glossy stock in quantities of 1,000, 2,000, 5,000 and 10,000. Turnaround time is 10 days.

"What makes Advantage Color so unique," Reiter states, "is that we are able to supply high quality full color at an affordable price, and do it in a time frame that meets customers' needs." Reiter indicated that first year sales are projected at six million dollars.

Customers will have a number of formats to choose from when using PIP's full-color services. Two-sided jobs can be printed on both 8 1/2 x 11" and 11 x 17" sheets, with no limit to the number of photos. Customers will supply color photographs and copy, which PIP Printing stores will typeset or desktop publish. Jobs will retail at approximately less than $1 per 8 1/2 x 11" double-sided sheet. This price is 45 percent less than the average price charged by commercial printers nationwide and less than the price of most color copies with significantly improved results.

Extensive consumer research drove PIP Printing to enter the full-color market. "Business printing consumers indicated a strong desire for short-run, affordable full-color printing," says Reiter. "Until now, for the most part, this service has been unavailable through either commercial shops or retail printers."

"As leaders of the business printing marketplace, it was a natural progressive step for our stores to add color printing to their product menu," he adds. "Color printing is a trememdous way to catch reader attention. And color sells."

PIP Printing founded the retail instant printing industry 21 years ago. Today, the company is leading a totally new industry category known as "business printing" -- estimated to generate $15 to $25 billion in annual revenues.

NEW YORK (MARCH 7) PR NEWSWIRE - The Gitano Group, Inc. (NYSE: GIT) today announced record sales and profits for fourth quarter and year ended Dec. 31, 1989. Fourth quarter net sales totalled $156,498,000, a 73.0 percent increase compared to net sales of $90,469,000 in 1988. Net income totalled $5,421,000, a 77.8 percent increase in net income of $3,049,000 in the fourth quarter of 1988. Fourth quarter earnings per share were $.39 vs. $.22 per share for the fourth quarter of 1988, based on 13,920,655 average shares outstanding.

Net sales for the full year 1989 totalled $625,890,000, reflecting a 34.8

percent rise over net sales of $464,526,000 recorded a year ago. Net income for 1989 totalled $30,701,000, a 33.6 percent increase in net income of $22,977,000 in 1988. 1989 earnings per share were $2.21, based on 13,920,655 average shares outstanding, compared with $1.86 per share for 1988, based on 12,372,650 average shares outstanding.

Commenting on the company's performance in 1989, Haim Dabah, president and chief operating officer, said, "We are very pleased to report another record year of sales and earnings. The trend that shaped our outstanding performance is the increasing market share for the Gitano label. Womenswear has performed very well and we are also extremely pleased with the performance of our men's and boyswear lines. Men's and boyswear sales doubled in 1989 and are planned to double again in 1990. Also during 1989 we initiated and established the positioning of our Gloria Vanderbilt product lines and we intend to expand upon its initial success. In addition, Gitano retail stores were another strong contributor to sales and profits. Comparable store sales for 1989 increased by 9.8 percent. At year-end, Gitano had 70 stores in operation."

RESEARCH TRIANGLE PARK, NC (MARCH 7) PR NEWSWIRE - Governor James G. Martin has appointed John L. Walsh Jr. of The BOC Group to the Microelectronics Center of North Carolina (MCNC) board of directors.

In making the appointment, Gov. Martin indicated that The BOC Group, the parent company of Airco Electronic Gases, has strong ties to MCNC and North Carolina. An international supplier of high-purity gases used in semiconductor manufacturing, Airco has been an affiliate of MCNC's microelectronics program since 1984 and recently completed construction of its new Electronic Development Facility just a few miles from the MCNC campus in Research Triangle Park.

"The State of North Carolina will continue to work closely with industry leaders such as The BOC Group and Airco to support education, research and development programs for microelectronics," Gov. Martin said. "Airco has made an important investment in our state and is an active participant in the research underway at MCNC."

Mr. Walsh joined The BOC Group in 1986 and is now vice president for group electronic gases. He is responsible for its worldwide electronic gases business, headquartered in Murray Hill, New Jersey.

He earned his bachelor of science degree in economics from Harvard University and his master of business administration from Harvard Business School.

The MCNC board of directors include the chancellors of five North Carolina universities - Duke University, North Carolina A&T State University, North Carolina State University, the University of North Carolina at Chapel Hill and the University of North Carolina at Charlotte - the chief executive officers of Research Triangle Institute and MCNC along with representatives of state government and industry.

MCNC is a private, nonprofit research consortium involving North Carolina, its universities, research institutes and industry. The research programs in microelectronics, communications and supercomputing contribute in building a statewide technical infrastructure to support science-based economic development.

BOSTON (MARCH 7) PR NEWSWIRE - Citizens Energy Corporation today announced the establishment of a new subsidiary company, Citizens Housing Access, Inc., which will create home ownership opportunities from the growing inventory of foreclosed and financially troubled condominium developments. Citizens Housing Access, Inc. combines business and real estate expertise to help lenders restructure housing loans with the public service commitment to assist first-time buyers find an affordable home. The company will be based in Boston with the Citizens group of companies at 530 Atlantic Ave. and will operate throughout Massachusetts.

Citizens Housing Access, Inc. identifies groups of prospective homebuyers, provides them mortgage and credit counseling services, and negotiates favorable acquisition and financing terms for bank-controlled properties which match their housing needs. In addition to Kennedy, the other two principles of the new company are Andrew M. Olins and Thomas A. Bledsoe. Olins, the president of Citizens Housing Access, was a founding partner of The Finch Group Inc., the housing advisor to former Mayor Kevin White, and an independent housing consultant. Bledsoe, the senior vice president and chief operating officer, was until recently the deputy secretary of the state's Executive Office of Communities and Development and was formerly the director of Neighborhood Services for Mayor Raymond L. Flynn.

STAMFORD, CT (MARCH 7) PR NEWSWIRE - GTE Corp. (NYSE: GTE) today stepped up its support of the telephone industry's drive to enter the video services market with the mailing of 750,000 annual reports to its shareholders calling for congressional action on the issue.

The letter explains that the emergence of such new technologies as digital switching and fiber optics have increased the number and variety of services potentially available to telephone customers. "However, it is still not possible for us to offer advanced video-services technologies in our own operating areas. The Cable Act of 1984 restricts local telephone companies from owning cable television systems within their own operating areas, giving cable companies an unregulated monopoly in this expanding business," the letter states.

The potential for the new technology is emphasized in a two-page color photo heading a section of the annual report that highlights GTE's accomplishments in "making our world better tomorrow." The photo depicts a family using the types of services to be tested by GTE in Cerritos, Calif.

While one member of the family uses the GTE Main Street(SM) home shopping service on one television, other members prepare to select a pay-per-view movie on another set -- both functions that can be provided over the same fiber-optic line that will bring telephone service to the home.

Other photos in the section highlight more GTE products and services that improve the way people live and work through innovative improvements in lighting, telecommunications, military communications systems, satellite technology and precision materials.

The financial messages in the report are also significant for their forthrightness. Denoting the remarks made frequently by Johnson, Lee and Chief Financial Officer Nicholas L. Trivisonno during the year, the report states firmly the corporation's goal of achieving a 20 percent return on equity within the next few years and supports the goal by noting a 1989 ROE of 17 percent compared to 14.8 percent in 1988.

Finally, the report notes that GTE's record earnings for the year come at a time when the corporation is undergoing considerable consolidation and reorganization for long-term profitable growth. "We have demonstrated the ability to adapt successfully to change. All of us face the future with confidence and with a commitment to making our world better tomorrow," the letter to shareholders concludes.

ATLANTA (MARCH 7) PR NEWSWIRE - Contel Cellular Inc. (NASDAQ: CCXLA) today announced that, as a partner in a consortium to provide cellular service, it has received one of eight licenses granted by the government of Mexico to operate cellular service in that country.

In a cellular licensing process conducted by the Mexican government, Contel Cellular, as a member of a five-company consortium, will own 19 percent of the Mexico Region Two cellular system. Mexico's Region Two encompasses the northwestern coast of Mexico including the states of Sonora and Sinaloa, and including the cities of Hermosillo, Ciudad Obregon and Navojoa in the state of Sonora; as well as Culiacan, Los Mochis, and the major international port and tourist resort area of Mazatlan in Sinaloa. Region Two has a population of more than 4.2 million.

The consortium of which Contel Cellular is a partner will be the sole provider of cellular service in Region Two. As in the U.S., cellular service will have valuable applications for both mobile and portable usage. In addition, it will be provided in fixed applications for many businesses and homes throughout the region.

Besides Contel Cellular, members of the consortium include two Mexican companies, Tamcel, S.A. de C.V., and Industrias Bachoco, S.A. de C.V., which together own 59 percent of the interest in the system. In addition, two American companies, McCaw Cellular Communications Inc. and DBL Americas Development Association also participated in the consortium.

Contel Cellular will provide technological and operating expertise in the design and construction of the system, as well as in the training of personnel and the management of the network. System construction is expected to begin this year.

The licensing process for Mexico was begun Jan. 15, with applications recieved by all bidding consortia for eight regions, each consisting of two or more states. Each region was tendered to interested parties for the provision of cellular service.

Contel Cellular, the sixth largest cellular telecommunications company in the U.S., is a sector of Contel Corp. (NYSE: CTC). Contel retains approximately 90 percent ownership of Contel Cellular.

Contel, a company with $3.0 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

NEW YORK (MARCH 7) PR NEWSWIRE - Woolworth Corporation (NYSE: Z) today announced that its wholly owned subsidiary, Foot Locker Europe B.V., last week completed the purchase of substantially all the assets of Profoot Nederland B.V. and certain of its affiliates, a 14-store specialty athletic footwear retailer headquartered in Vianen, the Netherlands. The acquisition, announced in December 1989, included the leases, inventories, improvements, fixtures and equipment of the Profoot stores and the company's combined central office and distribution facility in Vianen. Terms of the cash transaction were not announced.

Ten of the Profoot stores are in the Netherlands and four are in Belgium. The stores, each with about 600 square feet of sales area, are located in urban shopping areas and offer men's, women's and children's athletic footwear and sports apparel. They are similar to the 8 Foot Locker units, which feature comparable merchandise, that are presently operated by Woolworth in West Germany.

The Profoot and West German Foot Locker stores will be operated under the direction of Paul Albregts, managing director of Foot Locker Europe B.V., which was formed in connection with the Profoot acquisition. Albregts, who had been managing director of Profoot Nederland B.V. prior to the acquisition, will report to Floyd Huff, senior vice president in charge of the United States and European athletic footwear and sporting goods divisions of Woolworth's New York- based Kinney Shoe Corporation subsidiary. In the United States, Kinney currently operates over 1,100 Foot Locker and some 770 other athletic footwear and sporting goods stores in addition to its more than 1,400 family shoe stores.

Kinney's Canadian and Australian subsidiaries operate a total of more than 1,500 stores, including some 163 Foot Locker units.

Harold E. Sells, chairman and chief executive officer of Woolworth Corporation, stated, "With specialty operations now in West Germany, Belgium and the Netherlands, we have improved our strategic position for continued expansion of our specialty athletic and other formats throughout the large and vital European market. We expect this expansion to be enhanced further with the advent of the market unification of Europe in 1992."

Of its more than 8,000 stores worldwide, Woolworth Corporation operates over 6,400 specialty units in six countries on three continents. Woolworth reported consolidated revenues of $8.8 billion and net income of

$329 million, or $5.11 per share, for the year ended Jan. 27, 1990.

WALTHAM, MA (MARCH 7) PR NEWSWIRE - Tecogen Inc. (NASDAQ: TCGN) today announced that it has signed an agreement with Carrier Corporation to market Tecochill(tm) natural gas-fueled cooling systems through Carrier's Building Systems & Services offices in North America.

The agreement authorizes Carrier to market and sell Tecochill systems which range in capacity from 125 to 500 tons, in key markets such as New York, New Jersey, Atlanta, Philadelphia, and Washington, D.C., in addition to various other locations in the Midwest, West, and Southwest U.S. Carrier, the world's largest manufacturer of heating and air conditioning systems and equipment, is a subsidiary of United Technologies Corporation (NYSE: UTX), a broad-based manufacturer headquartered in Hartford, Conn.

"Our line of Tecochill products, which are driven by our Tecodrive(tm) natural gas-fueled engine, provides Carrier with a new niche opportunity for sales of commercial cooling equipment," said Dr. Ravinder K. Sakhuja, president and chief executive officer of Tecogen Inc.

Tecogen continues to sell and market the Tecochill system in existing territories through its established independent and gas utility-affiliated distribution networks in the U.S. and overseas. The company has sold more than 125 of these systems to commercial, institutional, and industrial customers.

Tecogen develops, manufactures, markets, and services a complete line of packaged cogeneration systems, as well as gas-fueled air conditioners, for sale to a wide range of commercial, institutional, industrial, and multi-unit residential users. Tecogen is a public subsidiary of Thermo Electron Corporation (NYSE: TMO).

DENVER (MARCH 7) PR NEWSWIRE - AMDURA Corporation (NYSE: ADU) today

announced that it has signed a definitive agreement to sell its Crosby division to TMB Industries, Inc., a New York-based investment firm. Proceeds from the all-cash transaction will be used to reduce outstanding indebtedness. The sale is expected to close within the next 60 days.

Thomas M. Begel, president of TMB Industries, said, "Crosby is an excellent company and fits perfectly with our strategic objective to acquire and operate medium-sized manufacturing and distribution companies in basic industries. In addition, Crosby has a superior management team who will join us as equity partners."

Wayne E. Waldera, AMDURA's president chief executive officer, said, "The sale is part of our strategy to focus solely on our core distribution business. The purchase price is within our target range, and this transaction will significantly improve our balance sheet and financial condition."

This transaction represents the second acquisition for TMB Industries since it was formed last year. In the latter part of 1989, TMB acquired Dayton Superior Corp., the nation's leading manufacturer of accessory items used in concrete construction, for $72 million.

Crosby, with 1989 revenues of approximately $80 million, is the nation's leading manufacturer and distributor of components, primarily blocks and fittings, for the lifting and material handling industries. The company was founded by Oliver Crosby at the turn of the century in St. Paul, Minn. The Crosby Group's headquarters are now in Tulsa, Okla., and the company operates several other plants in the U.S. and internationally. Crosby has approximately 850 employees worldwide.

Last October, AMDURA announced that it had decided to sell its Crosby and Harris divisions to reduce its bank debt. Morgan Stanley & Co. is continuing in its effort to sell the Harris division, which manufacturers waste management and recycling equipment.

TMB Industries was formed in mid-1989 and is owned and controlled by Thomas M. Begel, former chairman of the board, president and chief executive office of the Pullman Company and ONEX Corporation, a diversified Canadian company with assets of $2.3 billion (Canadian dollars).

AMDURA Corporation is the nation's leading independent hardlines distributor.

LAPEER, MI (MARCH 7) PR NEWSWIRE - Durakon Industries, Inc. (NASDAQ-NMS: DRKN) announced today that they have entered into a new agreement to supply light-truck bedliners to General Motors Truck and Bus Group on an O.E.M. basis.

The new agreement is effective March 2, 1990, and will result in just-in-time delivery of Durakon's truck bedliners to three General Motors assembly facilities. Durakon manufactures the bedliner under the trade name Duraliner(TM). Distribution of the bedliners will be from Durakon's Lapeer manufacturing facility.

"This is a positive, material development for Durakon. We are very excited about this new significant agreement and the opportunity to build a strong relationship with General Motors," said Durakon President David Laro. "It will provide General Motors with still another way to offer their light-truck customers added value."

Durakon Industries is the world's leading manufacturer and distributor of truckbed liners, bug and travel deflectors and rollback car carriers. A publicly held company, it is traded on the NASDAQ National Market System.

NEW YORK (MARCH 7) PR NEWSWIRE - The creation of Johnston-Birlik Company was announced here today as a joint venture of Johnston Industries, Inc. (NYSE-JII), one of the country's leading producers of textiles primarily for the industrial and home furnishings markets, and Birlik Mensucat, a manufacturer of high-quality cotton textile products in Kayseri, Turkey.

Johnston-Birlik will market the products of the Turkish company in the U.S. and in Europe, primarily to upscale home furnishings and apparel trades. Subsidiaries of the parent organizations each will have a 50 percent interest in the equity of the new company, according to the agreement.

"This represents a tremendous opportunity for us to provide additional high-quality textile products to markets we do not currently serve," said Norman Silver, vice president-international marketing of Johnston Industries, who was named president of Johnston-Birlik. "We are excited by the initial prospects here and by the longer-term potential in Europe," he said. The new company will have its headquarters at 111 West 40th Street in New York City.

Johnston Industries, which operates Southern Phenix Textiles, Inc. in Phenix City, Ala., and Opp and Micolas Mills, Inc. in Opp, Ala., had annual sales of $116 million in the fiscal year ended June 30, 1989. The company also has a 34 percent equity interest in the net asset value of Greater Washington Investors, Inc., a venture capital company traded on the American Stock Exchange.

PLYMOUTH, MI (MARCH 7) PR NEWSWIRE - Wavemat Inc. (NASDAQ: WVMT) announced today the election of Neil M. Henderson to its board of directors.

"We are very pleased to welcome Mr. Henderson to our board of directors. His technical and operations background and experience in the materials industry will be a valuable asset to Wavemat," said Richard S. Garard, chairman and president of Wavemat.

Henderson has been employed by the Norton Company (NYSE: NRT) for 17 years in various management positions. As corporate vice president, he is responsible for a new entrepreneurial technology start-up within Norton,

dedicated to diamond thin film products. Henderson is a graduate of the United States Naval Academy and earned a master's degree in business administration from Dartmouth, Amos Tuck School, in 1972.

Wavemat recently entered into research and licensing agreements involving diamond thin film coatings with Norton. Norton, based in Worcester, Mass. is a world leader in the manufacture of abrasives and produces technologically advanced ceramics and plastics.

Wavemat designs, manufactures and markets proprietary microwave equipment for materials processing which include standard products for production integration, and turnkey development systems.

#90066p0073 03/07/1990 ~PR Newswire

MORRIS PLAINS, NJ (MARCH 7) PR NEWSWIRE - Warwick Insurance Managers, Inc. (NASDAQ: WIMI) announced today that it has reached an agreement in principle for a proposed $12 million capital investment by G.F.A. International Ltd. in Warwick Insurance Managers.

Under the terms of the agreement in principle, at the closing and subject to various conditions, G.F.A. or one of its affiliated entities would contribute $12 million new capital in Warwick Insurance Managers in exchange for approximately 34 million of newly issued shares of WIMI common stock at a $0.35 per share purchase price.

Under the agreement in principle, G.F.A. is to complete its investigation of Warwick Insurance Managers and a definitive stock purchase agreement is to be negotiated and executed as promptly as practicable and at least within the next 90 days. The closing of the investment will be subject to various conditions, including the restructuring of Warwick Insurance Managers' existing $12 million bank loan in form and substance satisfactory to G.F.A. Although preliminary discussions with WIMI banks have occurred, no terms of any such restructuring have been agreed to and there can be no assurance that any such agreement will be reached.

As part of the proposed transaction, Warwick will be required on or before March 31, 1993 to have an independent actuary determine as of the then most recent Dec. 31, the amount of any deficiency in the statutory loss and loss adjustment expense reserves of Warwick Insurance Company as at Dec. 31, 1989. If there exists any reserve deficiency in excess of $1 million then WIMI would be required to issue to G.F.A. one share of WIMI common stock for each dollar of reserve deficiency in excess of $1 million.

Based on the approximately 3.7 million WIMI common shares currently

outstanding, upon the closing of the proposed capital investment by G.F.A. G.F.A. would own approximately 90 percent of the then outstanding WIMI common shares. That share ownership percentage would further increase if Warwick's statutory loss and loss adjustment expense reserves as at Dec. 31, 1989 are deficient by more than $1.0 million. There can be no assurance that strengthening of Warwick's Dec. 31, 1989 statutory reserves in excess of this amount will not be necessary in future periods.

Under the terms of the agreement in principle, the current shareholders of the company are also to be given a right to participate, through the issuance of additional common stock, in up to 75 percent of appreciation in the value of the company if G.F.A.'s return on its investment exceeds 25 percent per annum during the first three year period after the closing of the transaction. The company's bank lender also expects to share with the WIMI shareholders in any such appreciation, and the particular sharing is subject to further negotiations with the banks. In no event, however, would such total participation result in G.F.A. retaining less than 65 percent of the common stock of the company.

The proposed investment by G.F.A. will be subject to approval by WIMI shareholders and by the New Jersey Insurance Commissioner under the New Jersey insurance holding company systems act, renegotiation of certain material agreements of WIMI with third parties, and other conditions and approvals, and there can be no assurance that the proposed transaction in fact will be consummated.

Barnett Mackta, chairman and chief executive officer of Warwick, said that he "was extremely pleased with the prospect of the G.F.A. investment and that it will provide Warwick needed capital to move ahead in the future."

G.F.A. International is controlled by Grant Fowler who currently has insurance company holdings in Great Britain. G.F.A. acquired Trinity Insurance Company Limited, a property and casualty company located in Great Britain, in 1988, and more recently acquired Bryanston Insurance Company Ltd. (London), a British reinsurance company.

The company, through its operating subsidiary Warwick Insurance Company, is engaged in writing commercial property and casualty insurance primarily in the state of New Jersey.

NEW YORK (MARCH 7) PR NEWSWIRE - Reuters Information Services Inc. announced an agreement with New York-based publisher American Banker- Bond Buyer under which stories from the American Banker will be available daily on the Reuter Business Report.

"Media subscribers to the Reuter Business Report already benefit from the report's access to the world's largest commercially available database of real-time business news and information," said Andrew M. Nibley, Reuters editor for the Americas.

"Now they will have daily access to material from one of the most respected publications in the banking and financial services industry. We are very pleased to be able to offer this to our subscribers," Nibley added.

The Reuter Business Report is especially designed for the business pages of North American newspapers. Its New York-based staff files about 30,000 words per day of business news drawn from Reuter professional economic services as well as developing its own interviews and analyses.

American Banker has a Monday-through-Friday circulation of 23,000 per day. Founded in 1836, it remains an important source of news and trends for banking and financial services professionals as well as for the media which follow the industry.

American Banker is published by the American Banker-Bond Buyer, a subsidiary of The Thomson Corporation, one of the largest communications companies in the world.

"Reuters has long been held in high esteem by the American Banker reporters and editors. We are delighted that this affiliation will broaden the reach of the American Banker," said Fred R. Bleakley, editor.

Reuters Information Services Inc. is the primary operating company in North America of Reuters Holdings PLC (NASDAQ: RTRSY).

Reuters supplies a wide range of services to both business subscribers and to the news media. It obtains its information from around 159 exchanges and over-the-counter markets, from data contributed directly by more than 3,715 subscribers in 82 countries and from a network of 1,268 journalists, photographers and cameramen. Reuters distributes information via some 199,706 video terminals and teleprinters, and directly into clients' computers.

MONTREAL (MARCH 7) PR NEWSWIRE - The board of directors of Techbyte Inc. today announced that Ron Moore has been appointed vice president and general manager of Techbyte Inc. of Canada.

Moore is currently director of education assistance for the Department of Education of the State of Kansas, responsible for state curriculum and special program initiatives. Prior to that, he was for several years vice president of sales for the Southeastern United States for Educational Systems Corporation, a developer and publisher of a successful computer-based Integrated Learning Systems product. Moore recruited and managed a sales team for Education Systems Corporation in his area that generated over $5 million in sales in less than two years, and gave the company a successful entry into the education market in the Southeastern United States. He was named top salesperson for the company in 1987. Softletter named Education Systems Corporation the fastest growing software company in the United States for 1987. Education Systems Corporation was acquired by Josten's Inc. in early 1989.

Prior to joining Education Systems Corporation, Moore was for several years national education marketing manager for the Tandy Corporation/Radio Shack Education Division, where he managed a sales team of 14 persons, and contributed to that company's success in the U.S. education market for personal computers and educational software.

William Gattis, President of Techbyte Inc., stated, "Mr. Moore's association with Techbyte will bring valuable sales and management experience, as well as a strong understanding of the education market for computers and software, to the company. We are very pleased to announce Ron Moore's association with the company."

Moore's responsibilities at Techbyte will include the areas of product development and educational sales and marketing.

Techbyte Inc., a federally incorporated company, was established in 1984

and has its head office in Longueuil, Quebec. Techbyte currently markets a series of products under the "Scenario" label. The company is currently engaged in the development of educational software systems under several research and development contracts. Onyx Informatique Inc. of Montreal, a wholly-owned subsidiary of Techbyte, produces computer-based training materials using the Scenario Professional Development System.

In November 1989, Techbyte International (USA) Inc., a wholly-owned subsidiary of Techbyte, specializing in sales and marketing, was established in the United States and is based in Arlington, Texas.

NEW YORK (MARCH 7) PR NEWSWIRE - Advatex Associates, Inc. (NASDAQ: ADTX), a leading independent asbestos abatement company, today reported record revenues and operating income for the fourth quarter and year ended Dec. 31, 1989.

For the fourth quarter, the company achieved net income of $470,682 or nine cents per share on earned revenues of $8,751,347 compared to net income of $196,296 or three cents per share on earned revenues of $5,229,959 for the same period in 1988.

Net income for 1989 was $1,007,935 or 19 cents per share on earned revenues of $23,730,967. In the prior year, income before extraordinary credit was $957,190 or 17 cents per share on earned revenues of $18,068,321. Net income in 1988 of $1,103,092 or 20 cents per share included an extraordinary credit of $145,902 or three cents per share from the utilization of net operating loss carry forwards.

"The results for the fourth quarter and fiscal year reflect strong penetration of the New York Metropolitan market with earned revenues growing 31 percent in 1989," Joseph P. Donnolo, chairman and chief executive officer, said. "These results were attained in a year during which we invested heavily in senior professional and technical personnel to help manage our continued growth. In addition, we successfully opened an office in the Boston area to serve the New England market.

"As stated at the annual meeting of shareholders in July 1989, the Advatex business strategy is for the long term. As a result, investment was made in people, markets and support systems during the past year. This investment will enable the company to effectively complete the record backlog of $10.6 million on hand and the additional contract activity anticipated during 1990," Donnolo said.

In addition, the company announced that the board of directors has authorized the repurchase from time to time of up to $250,000 of common stock from time to time, as market conditions dictate. "We believe the progress achieved during the first four years of operations, and our future prospects, make the repurchase of shares for future corporate usage a wise investment at this time," Donnolo concluded.

NAPERVILLE, IL (MARCH 7) PR NEWSWIRE - Varlen Corp. (NASDAQ/NMS: VRLN) said today it completed its previously announced acquisition of the laboratory equipment businesses of HEICO Corp. (AMEX: HEI), Hollywood, Fla. The businesses have combined annual sales of approximately $21 million.

Richard L. Wellek, Varlen president and chief executive officer, said the product lines of the businesses complement the core business of its Precision Scientific, Inc. subsidiary which produces research laboratory

equipment, primarily for the life sciences industries, and petroleum analysis equipment for oil refineries worldwide.

Wellek said the acquisition is also in line with the most recent of Varlen's restructuring actions in which it announced it would eliminate a number of under-performing properties so it could ''concentrate on businesses which have the level of performance and potential for growth we're looking for.''

Involved in the acquisition are four companies: NAPCO Scientific Company, Tualatin, Ore., in the Greater Portland area; Hotpack Corporation, Philadelphia; Germfree Laboratories, Inc., Miami; and Rush Enterprises, Inc., Hudson, N.H.

For the 1989 fiscal year ended Jan. 31, 1990, Varlen reported earnings from continuing operations of $9,987,000 or $2.23 a share, compared with $7,354,000 or $1.71 a share for the prior fiscal year. Net income, which includes results from discontinued operations, increased to $10,275,000 or $2.29 per share, compared to $9,748,000 or $2.27 per share in the prior fiscal year.

Sales from continuing operations for the 1989 fiscal year ended Jan. 31, 1990, were $226,741,000, compared with year-ago sales of $146,752,000, reflecting the company's acquisition during the year of Consolidated Metco and two product lines -- plus internal growth.

Varlen is a diversified manufacturer of precision industrial products for segments of the transportation and laboratory equipment industries as well as selected consumer product markets. Varlen has operating locations in six states.

Headquarters are in Naperville, Ill.

NEW YORK (MARCH 7) PR NEWSWIRE - Ernst & Young announced today that it has signed an exclusive co-operation agreement with TKD, the Polish Association of Consultants and Advisers, Ltd. The agreement is expected to facilitate movement of American and Western business into the region.

As the first Western firm to open a consulting office in Poland, Ernst & Young has solidified its position as the leading professional services firm in the Eastern Bloc and USSR. Ernst & Young International recently

established Ernst & Young Eastern Europe (EYEE), an umbrella organization supporting its activities in the Soviet Union, Poland, Hungary, Czechoslovakia and the USSR. In December Ernst & Young and Vneshconsult, a Soviet management consulting firm, and Mecra-Sov Consulting Oy, a Finnish management consulting firm, signed an agreement creating the first joint venture accounting firm in the USSR.

Said Jim Searing, Ernst & Young's director of International Business Services: "We have moved rapidly into Eastern Europe in anticipation of American business interest. This agreement gives us an opportunity to share our knowledge and expertise with companies considering investment in the Eastern Bloc."

This agreement formalizes the working relationship between the two firms which have already cooperated on a number of projects, the most recent being a study for the European Commission of the maritime industry in Poland. The move is seen as the first step towards creation of a broader joint venture company offering a full range of Ernst & Young's accounting, tax and consulting services.

Marian Gelder, president of TKD said: "We are immensely pleased to have signed this agreement with Ernst & Young. The international network and experience Ernst & Young brings to Poland will be complemented by a comprehensive consulting and advisory service to foreign and domestic organizations alike."

Added Jim Searing: "This move follows the recent opening our office in Budapest, Hungary and the launching of our joint venture firm, Vneshaudit, in Moscow. It confirms Ernst & Young's position as the preeminent international professional services firm in the Eastern Bloc."

Ernst & Young and TKD will be offering clients advice on doing business in Poland, including identification of potential partners, negotiations of agreements and contracts and advice on setting up joint ventures. They will offer market studies, accounting services and international tax planning.

TKD was established in April 1989 and currently has over 40 professional staffers. It has worked on nearly fifty projects including the two largest foreign joint ventures established in Poland, the Intercell paper mill and Sugerpol refinery.

Ernst & Young is the international professional services firm created by the merger of Arthur Young and Ernst & Whinney. It has 24,000 people in more than 100 U.S. cities. Worldwide, the firm has over 70,000 people in over 650 cities located in over 100 countries.

ARLINGTON, VA (MARCH 7) PR NEWSWIRE - Bell Atlantic's (NYSE: BEL) Caller ID service, which the company began actively promoting Feb. 12, has received "an enthusiastic and unprecedented public response," said Bruce Gordon, vice president of marketing and sales. "It's one of the hottest products of the year."

"We were prepared for 1,500 calls a day," Gordon said. "We're getting as many as 500 an hour." Gordon said Bell Atlantic had received more than 65,000 calls through March 3 at the special 800 number advertised in the commercials and that the commercials had also prompted calls to the local business offices.

In New Jersey alone, he said, the company has received 9,000 inquiries about Caller ID in its business offices since the commercials began running, resulting in about 4,000 orders. Total Caller ID sales throughout Bell Atlantic in the period were about 20,000.

Gordon said the calls were primarily in response to television commercials promoting Caller ID that began airing Feb. 12 in Northern New Jersey and Feb. 14 in Baltimore; Richmond, Va.; and Norfolk, Va.; and for the Maryland and Virginia suburbs of Washington, D.C. The television commercials were complemented by direct mail advertising mailed to customers beginning Feb. 20.

Bell Atlantic's Caller ID service lets customers see the telephone number of the person who is calling before they answer. The caller's number appears on a special display unit next to or built into the customer's phone. The service has been available in New Jersey for more than two years, in Maryland since October 1989, Virginia since November 1989 and West Virginia since December 1989.

"The response clearly demonstrates that Caller ID is a service people want and need," Gordon said. "Caller ID gives customers the ability to screen calls coming into their homes and to immediately deal with unwanted calls.

"Caller ID is a proven deterrent to the serious social problem of abusive, obscene and other unwanted calls," Gordon said.

He said that Bell Atlantic's Annoyance Call Bureaus each year handle more than 850,000 cases involving victims of such calls.

"With Caller ID, annoyance call complaints were cut in half in two years in Hudson County, N.J.," Gordon said.

Gordon said that Caller ID is also being used by police, fire and emergency squads to help save lives and to help reduce false fire alarms and bomb threats.

Philadelphia-based Bell Atlantic is the parent company of New Jersey Bell, Bell of Pennsylvania, Diamond State Telephone (Delaware) and the Chesapeake and Potomac Telephone Companies of Maryland, Virginia, West Virginia and Washington, D.C.

The company is also the parent company of businesses that provide mobile communications in the mid-Atlantic region as well as computer maintenance and financial services in national and international markets.

#90066p0095 03/07/1990 ~PR Newswire

EAST HARTFORD, CT (MARCH 7) PR NEWSWIRE - Singapore Airlines has placed orders and options for 234 Pratt & Whitney PW4000 engines worth nearly $2.2 billion to power the airline's new Boeing 747-400 and McDonnell Douglas MD-11 wide-body aircraft.

It is the largest single order for the PW4000, which is Pratt & Whitney's newest and most powerful engine.

Singapore has placed firm orders for 15 Boeing 747-400s and five McDonnell Douglas MD-11s. The airline also took options on 15 additional 747s and 15 more MD-11s.

Pratt & Whitney will supply Singapore with 99 PW4000 engines, including spares, for the aircraft on firm order. These engines have a value of nearly $900 million.

Deliveries of the aircraft will begin in 1994 and continue through the year 2000.

If Singapore converts all of the option aircraft to firm orders, Pratt & Whitney would supply the airline with 135 additional engines, including spares, worth nearly $1.3 billion.

Selwyn Berson, president of Pratt & Whitney's Commercial Engine Business, said, "We are very pleased to win an order of this magnitude from one of our most highly valued customers.

"Singapore operates one of the most modern aircraft fleets in the world, and the entire fleet is powered by Pratt & Whitney engines," Berson said. "We are proud to be a partner in Singapore's operation and are committed to meeting our responsibilities to this fine customer."

Since entering commercial service in 1987, the PW4000 has become the pace setter in its thrust class. Last year, airlines and leasing companies placed orders and options for some 700 PW4000 engines worth a potential $4.7 billion.

In addition to Boeing 747s and MD-11s, the PW4000 has been selected for Boeing 767s, and Airbus A300-600s, A310s and A330s. The PW4000 is the most fuel-efficient engine in its class, and has the highest degree of commonality on all wide-body aircraft types.

Currently certified at 62,000 pounds of thrust, the PW4000 engine family is designed to grow to 100,000 pounds of thrust to meet the power needs of proposed new transport aircraft.

Pratt & Whitney is a unit of United Technologies Corporation, (NYSE: UTX) headquartered in Hartford, Conn.

SHAWNEE, OK (MARCH 7) PR NEWSWIRE - Barton Industries, Inc. (NASDAQ: BART) announced today that earnings for its fiscal year ended Sept. 30, 1990, are estimated to be approximately $5 million on estimated revenues of approximately $32 million, compared with a $2.9 million loss on revenues of $9.2 million for Barton's 1989 fiscal year. Simultaneously, Barton announced the introduction of an updated version of Barton's pump-off control units, initially introduced during 1989.

C.W. Earl Johnson, chairman and chief executive officer of Barton, stated, "The updated version of our pump-off control units, known as the Pump-Off

Plus, is a part of Barton's 'Lease Management System 2000,' which will be formally introduced to the marketplace at the ENTELEC conference to be held March 12, 13, and 14 in San Antonio, Texas, appears to be initially well received by our customers and potential customers in the oil and gas production industry." Johnson went on to explain, "Barton's pump-off control units enable the oil and gas production industry to implement total reservoir management techniques utilizing state-of-the-art computer technology. The benefits to be derived by Barton's customers include increased production coupled with reduced maintenance and operating expenses, resulting in lower overall lifting costs per unit of production. This system is the answer and solution to the energy needs in the marketplace and will revolutionize the automation and management of current and future energy fields."

According to Johnson, "The innovative technology represented by the Pump-Off Plus is another step in Barton's recent transformation from solely a valve manufacturing concern to a company which is able to provide a full range of products and services to the oil and gas production industry, in addition to being able to provide various products and services to other industries."

Barton's forecast fiscal 1990 earnings and revenues are based upon estimated levels of sales of all of Barton's products and services, which sales levels have been enhanced by virtue of Barton's recent diversification program. According to Johnson, "Through our diversification efforts, Barton is, today, an industry leader in the field of oil and gas production automation which, together with Barton's service centers throughout the country, has enhanced its overall level of sales, including sales of Barton's traditional valve products."

#90066p0101 03/07/1990 ~PR Newswire

BOSTON (MARCH 7) PR NEWSWIRE - XTRA Corporation (NYSE: XTR) today stated that although, as previously announced, it has been actively soliciting acquisition proposals through its financial advisors, Goldman, Sachs & Co. the company at the present time has not been able to arrive at the terms of a transaction that the XTRA board believes would be in the best interests of XTRA stockholders.

The XTRA board believes that the exceedingly short time frame available for the sale process and the uncertainty regarding the future control of the company arising from the current proxy contest have significantly impaired the efforts of the board and Goldman, Sachs. Goldman, Sachs has advised XTRA that to fully explore a sale with those parties who have expressed an interest as well as those others who have indicated an inability to act within the limited time frame, additional time is required. It is currently not expected that an acceptable transaction would be developed prior to the annual meeting on March 15. However, the XTRA board will actively continue to pursue the sale of the company and remains committed to this goal.

The XTRA board has determined that if it is reelected at the March 15 annual meeting, it will irrevocably commit itself to a sale of the company at the earliest possible time at the highest price available in a fair and impartial manner.

In order to permit stockholders to evaluate the board's continued efforts in the sale process, the XTRA board believes that the XTRA stockholders should have the opportunity to evaluate its performance in finding the best available deal for the stockholders. It is fully prepared to subject its conduct to the scrutiny of its stockholders. Accordingly, if the current board of directors is reelected at the annual meeting on March 15, it will convene a special meeting of stockholders for the election of the entire board of directors on June 29, 1990.

In order to permit an orderly sale process to proceed, XTRA is making an offer to the XTRA Corporation Independent Stockholders Committee to substitute three nominees on the Committee's slate for three current XTRA directors. As a result, during the period between March 15 and the

special stockholders meeting to be held on June 29, 1990, the XTRA board would be comprised of three representatives of the Committee and four current XTRA directors. The XTRA board believes that that composition of such new board of directors will insure the integrity of the sale process and serve to protect the interests of all XTRA stockholders. Whether or not the Committee accepts the XTRA board's compromise proposal, it is expected that the annual meeting will be held as scheduled on March 15, 1990.

In addition, the XTRA board and Goldman Sachs will make available all information it provided to interested parties during the sale process so that the Independent Stockholders Committee can develop its own financial alternatives, restructuring proposals or its own offer for the company. The board will consider all proposals, including those presented by the Independent Stockholders Committee, and will make a recommendation to the XTRA stockholders at the special stockholders meeting.

CONTACT: Michael J. Soja of XTRA Corporation, 617-367-7810; or James E. Long or Pier Stiny of D. F. King & Co., 212-269-5550, for XTRA

ST. PETERSBURG, FL (MARCH 7) PR NEWSWIRE - Production volume of IMCO Recycling Inc. (NASDAQ: IMRI) should increase about 20 percent in 1990 from the 1989 level, Ralph L. Cheek, chairman, said here today. He also said the company's net income in the current year is expected to exceed its 1989 earnings of $5.0 million. However, he stressed that the improvement in net income will not equal the anticipated gain in 1990 volume because of a higher effective tax rate and other factors.

In remarks at the Raymond James & Associates Second Annual Environmental Services Conference, Cheek said "most of the expected improvement in IMCO Recycling's volume will occur in the remainder of the year, so our first quarter 1990 net income may not reach the $1.4 million earned in the comparable 1989 quarter. Also, during 1990 the company's earnings per share will be affected by a higher average number of shares outstanding."

Cheek told the conference that a major customer's temporary cutback in utilization of recycling services has been rescinded and that the company's new Morgantown, Kentucky plant began operating at full capacity for the fist time on March 1.

A large increase in U.S. aluminum recycling capacity that took place in 1989 has created competitive pressures for the company, Cheek said, "but we are confident that continued gains in can production and recycling will absorb the industry's excess capacity over the next year."

Cheek said that IMCO Recycling and other segments of the aluminum recycling industry "are benefiting greatly from the tremendous growth in aluminum beverage can production and recycling that has occurred over the past two decades. According to an estimate by Reynolds Metals Company, domestic shipments of aluminum cans rose six percent in 1989 to about 83 billion units, the recycling rate increased to approximately 58 percent from 54.6 percent in 1988, and the number of aluminum cans recycled during the year moved up over 10 percent to about 48 million. Reynolds Metals has already said it expects U.S. can production to rise to at least 86 billion units in 1990."

IMCO Recycling is the largest independent recycler of aluminum beverage cans and their by-products in the U.S. and is the nation's only publicly owned firm whose activities are concentrated in the aluminum can recycling market.

BALTIMORE (MARCH 7) PR NEWSWIRE - Baltimore Gas and Electric Co. (NYSE: BGE) announced today that the staff of the U.S. Nuclear Regulatory Commission (NRC) is proposing to fine the company $100,000 for violations of NRC requirements at the Calvert Cliffs Nuclear Power Plant.

The violations were cited during a safety inspection conducted by the NRC in October and November of 1989 and reviewed at an Enforcement Conference in January of this year.

The penalty was invoked in connection with the company's failure to meet previous commitments to ensure the protection of the reactor coolant system against the possibility of overpressurization during certain low temperature conditions.

George C. Creel, vice president-Nuclear Energy for BG&E, said that the company will pay the fine.

"We have taken steps to implement the commitments in question, and to verify the implementation of other commitments made to the NRC," Creel said. He expressed confidence in corrective actions being taken to satisfy the NRC's concerns on this matter and said no further impediments were expected to the restart of the Unit 1 reactor.

"It's also important to understand that NRC reviews of the Calvert Cliffs operation since November have begun to recognize the positive impact our programs and improvements have had," Creel noted. An NRC Resident Inspector's report for the month of January showed no violations. That

report even remarked that "Work observed reflected quality performance by the mechanics...." It also noted "the personnel displayed a good questioning attitude."

The company was also recently notified that a review of the Calvert Cliffs Emergency Response Plan found no violations in the overall Plan. And today officials at Calvert Cliffs were informed that the NRC had accepted the company's explanation of the reason for deferring a "local leak rate" test of a containment penetration - the subject of a December Enforcement Conference - and that no further enforcement action was necessary.

TROY, MI (MARCH 7) PR NEWSWIRE - Ovonic Imaging Systems, Inc. ("OIS") (OTC: OVONC) anticipates breaking ground this year near Rochester, N.Y., for a $26 million manufacturing facility. The company said this will be the nation's first plant specifically designed for producing active matrix liquid crystal flat panel displays (AMLCD). OIS President Dr. Zvi Yaniv said the company's decision to build AMLCDs in this country "is a first step in reversing a trend that has seen this American technology sold to foreign-owned companies or sent abroad for production."

Rochester, N.Y., Wins Site Bid Dr. Yaniv said OIS selected the Rochester area because Monroe County industrial development organizations as well as the State of New York "are working aggressively to complete a financing package that meets our needs."

Based on current negotiations, principal financing will come from the sale of $16.9 million in bonds guaranteed by the New York Job Development Authority ("JDA"). This would be the largest loan guarantee the JDA has approved to date. Additional funding of $2.6 million will come from the New York State Science and Technology Foundation, the New York State Urban Development Corporation, the U.S. Small Business Administration, and the local project developer. These arrangements are conditioned upon OIS securing $12 million of additional financing. To this end, OIS is already in discussions with potential investors.

Active Matrix LCDs Design engineers are turning to thin, flat panel AMLCDs for use in next-generation aircraft, defense systems, computers and other applications. In the 1990s, large-area AMLCDs may also be the displays favored by the High Definition Television (HDTV) industry.

Active matrix technology refers to the use of semiconductors at each picture element in displays that have high information content, in order

to provide the required contrast and persistence.

Dr. Yaniv believes that in volume production, AMLCDs can become affordable for portable computers and high-performance computer workstations. OIS displays rival cathode ray tubes in image quality, but emit no measureable radiation and are flicker-free, making them less tiring to work with.

OIS Chairman J. Montieth Estes said that within five years OIS hopes to be able to ship in excess of $50 million in products annually. He said, "There is an immediate and growing demand for AMLCDs in international avionic and defense markets."

Looking ahead to the era of High Definition Television, Estes said, "The market potential of HDTV is so vast I doubt that it can be accurately measured." He said OIS already has made prototype color displays which exceed the level of image detail required for HDTV.

Estes said the Rochester area also is advantageous to OIS because it is a center for optics and imaging technology. Kodak, Xerox and Bausch & Lomb are headquartered there, as are many smaller firms with related engineering expertise.

Sites in Arizona, Michigan, Missouri and other states were considered, Estes said, but "New York offered us the best incentives."

Timetable Estes said current plans call for the new plant to be built in the University Park of Rochester, a technology park south of the city, adjacent to the Rochester Institute of Technology "RIT"). Almost one-third of the planned 50,000-square-foot facility will be comprised of class 10 and class 100 cleanrooms.

He said the plant's size will satisfy the requirements of potential aerospace and defense customers who are evaluating OIS flat panel displays.

"As we gain experience, we should be able to ramp up production to over 15,000 units a year," Dr. Yaniv said. "Higher production rates for the computer and television industries will require expanding the plant."

When operating at full capacity the new facility is expected to employ some 200 skilled people. The Rochester area has a work force appropriate to OIS' needs, Yaniv said.

"Further, the RIT has an excellent microelectronics program, and graduates of that program will have opportunities to stay in the Rochester area," Yaniv said.

Dr. Yaniv said OIS intends to continue operating its Michigan-based research and development activity.

First Products The OIS plant's first products will include a variety of military and civilian aircraft cockpit displays, some of them as large as 15 inches, diagonally. OIS plans to manufacture both single-color and full-color displays. A number of products may be specially built for use in space. OIS also expects its early production to include display screens for special-purpose, portable military computers and "ruggedized" industrial applications.

DUBLIN, IRELAND (MARCH 7) PR NEWSWIRE - The directors of CRH plc today reported a pre-tax profit of 80,566,000 Irish pounds (1988- 63,351,000 Irish pounds).

Group sales reached 1,021,985,000 pounds, up from 914,083,000 pounds in 1988. (All pound figures are in Irish pounds unless otherwise noted.)

Earnings per share amounted to 22.11 pence compared with 17.24 pence in the previous year, an increase of 28.2 percent.

A significant feature of the results was the improvement in trading activity in the Republic of Ireland. If based on year-end 1988 exchange rates, profits for 1989 would have been some two million pounds higher.

The board has decided to pay a second interim dividend of 3.50 pence per share in respect of the year ended Dec. 31, 1989, in lieu of a final dividend. This makes a total dividend for the year of 5.25p per share (1988-4.50p). The total dividend is covered 4.20 times.

Expenditure on acquisitions and investments during the year totaled 70.4 million pounds, while capital expenditure amounted to 48.9 million pounds. This high level of expenditure was substantially matched by a strong cash flow so that net debt rose by only 17.5 million pounds to 123.6 million pounds and at year end represented 33 percent of shareholders' funds compared with 29 percent at year end 1988.

BOULDER, CO (MARCH 7) PR NEWSWIRE - TelWatch Inc. of Boulder today announced plans to develop an interface between AT&T's ACCUMASTER(R) Integrator and NetExec(TM), an intelligent network management system.

The interface allows NetExec to support AT&T's Unified Network Management Architecture (UNMA), the company's blueprint for end-to-end management and control of voice and data networks. UNMA is based on the international standard, Open Systems Interconnection (OSI) model. AT&T's family of ACCUMASTER products, including ACCUMASTER Integrator, supports OSI.

Currently in beta testing at several major locations, NetExec provides integrated, enterprise-wide management of multivendor, physical networks. By supporting UNMA, the UNIX-based network management system will be able to transmit alert messages from proprietary languages to the ACCUMASTER Integrator.

NetExec's centralized relational data base functions as a repository for network information allowing the network operator to control and exchange information with all components from a single point of control.

"NetExec's migration toward UNMA illustrates TelWatch's commitment to provide customers with a system that can fulfill the complete range of network management needs, across all major architectures," said Paul Jerde president of TelWatch Inc.

TelWatch Inc., a privately held company formed in 1987, is a developer and marketer of integrated network management tools and systems for multivendor networks. Headquartered in Boulder, the company's products include network management software and line monitoring hardware and software that operate on generic platforms. TelWatch applications provide customers with a strong solution to effectively monitor and control their communications networks.

PORTLAND, OREGON (MARCH 7) PR NEWSWIRE - Bioject Medical Systems Ltd. (NASDAQ: BJCTF) yesterday received a commitment from a Great Britain-based institutional investment fund to purchase 375,000 units for an aggregate purchase price of $506,250. Each unit will consist of one common share and a two-year warrant to purchase one common share for $1.6875.

The private placement is the second in two weeks for Bioject, bringing the total recently raised by the company to over $1 million. Proceeds will be used for activities associated with the launch of its first product, the Bioject(R) needleless syringe.

The company last week reported receipt of the first product orders, and this week delivered the first introductory/evaluation unit to a pediatric and internal medicine practice. "It's an historic moment for us," said Carl E. Wilcox, president and chief executive officer.

Manufacture of the Biojector(R) should begin at Bioject's Portland facility within the next month.

Bioject is continuing discussions with domestic and European funding institutions for additional equity financing. The five-year-old company has never incurred any long-term debt.

The Bioject Jet Injection System is designed to deliver medication

subcutaneously or intramuscularly without needle puncture of the skin. A carbon dioxide gas cartridge powers the unit, forcing medication from a disposable sterile plastic ampule at high speed. Because the Biojector has no needle, health care workers face only minimal risk of needlestick injury and subsequent infection.

VALLEY FORGE, PA (MARCH 7) PR NEWSWIRE - Paper Corporation of America (PCA), an Alco Standard (NYSE: ASN) company, announced today the acquisition of Smith Paper Ltd., of Vancouver, British Columbia, for an undisclosed amount of cash.

Smith Paper, with annual revenues of (U.S.) $32 million, has a 25- year history as the leading industrial paper distributor in the Canadian market.

In addition to Vancouver, Smith Paper has facilities in Kamloops, Penticton and Prince George, British Columbia. The company will remain at its present locations under the leadership of Patrick D. Mulhern, president. It will operate in affiliation with Unisource, PCA's largest operating company, which is headquartered in Long Beach, Calif.

Edward N. Patrone, president of Paper Corporation of America, stated, "The acquisition of Smith Paper marks PCA's entry into Canada. This fine company and its employees provide the perfect opportunity for PCA to expand its national network of distributors and converters of paper and related products into a North American network."

Alco Standard Corp., headquartered in Valley Forge, is a publicly owned company specializing in high growth, service-intensive industries. For its fiscal year ended Sept. 30, 1989, revenues were $4.1 billion.

Paper Corporation of America is today the largest distributor and converter of paper and related products in North America with fiscal 1989

revenues of $3.1 billion. PCA serves customers throughout the United States and British Columbia, through a national network of 21 operating companies with more than 200 locations.

MILPITAS, CA (MARCH 7) PR NEWSWIRE - Zitel Corp. (NASDAQ: ZITL) the independent industry leader in solid state storage technology for Unisys mainframes, announced today that the Dime Savings Bank of New York, has recently purchased and installed a three-gigabyte solid state RAMdisk subsystem.

The sale was valued at over $1.5 million.

Dime Savings Bank, with $12 billion in assets, is one of the largest banks in New York state. The Data Center, located in Valley Stream, New York, is responsible for all data processing functions, supporting 60 branches and backoffice operations in New York and New Jersey with a network consisting of 45 ATMs (automatic teller machines) and 1,500 terminals. The center's mainframe hosts, which control this large network, are two Unisys A17F processors.

Zitel Corp. is a publicly owned designer and manufacturer of advanced solid state memory systems for both OEMs (original equipment manufacturers) and business end users. Zitel's end-user product line focuses on the Unisys mainframe market. The company is headquartered at 630 Alder Drive, Milpitas, Calif. 95035 and has offices across the United States, in London, England and Paris, France.

SALT LAKE CITY (MARCH 7) PR NEWSWIRE - Research Industries Corp. (NASDAQ-NMS: REIC) announced today that its medical subsidiary has gained FDA approval to market a disposable surgical product, the Anteplegia(TM) catheter, that woulod expand Research's participation in the cardioplegia, or heart muscle cooling, marketplace.

Cardioplegia is an increasingly accepted technique in open-heart surgery and is performed in the majority of the 600,000 open-heart surgeries performed each year worldwide. This market approval completes the

corporation's strategy of offering a total package of all the surgical disposables required between the cooling solution infusion source, the monitoring hook-ups, and the cardioplegia catheters placed in the heart muscle. The company's previously approved cardioplegia products, featuring the patented Retroplegia(TM) balloon catheter and recently approved infusion/monitoring sets, constitute the fastest growing segment of its disposable cardiovascular devices.

Gary Crooker, president, indicated that with this cardioplegia catheter approval the company is now in an excellent position to more aggressively participate in this market as a full line supplier of cardioplegia disposables, which should lead to a significant increase in sales and earnings in the near term. Research Industries, paced by the growth of its cardiovascular disposables line, reported a 61 percent growth in earnings last fiscal year ended June 30, and earnings growth of 110 percent the first half of this fiscal year.

Research Industries is a diversified biomedical firm specializing in the development, manufacture and sale of hospital disposable products for open-heart surgery and specialty pharmaceuticals. Research Industries' common stock is traded over the counter, NASDAQ, National Market System, with the symbol REIC.

CARMIEL, ISRAEL (MARCH 7) PR NEWSWIRE - S.P.I. - Suspension and Parts Industries Ltd. (NASDAQ: SPILF) today announced the results of operations for the fourth quarter and year ended Dec. 31, 1989.

Net sales for the fourth quarter amounted to $4,904,000 compared with $2,048,000 for the fourth quarter of 1988. The net loss for the quarter amounted to $230,000, or ($.07) per share, compared with a net loss of $447,000, or ($.13) per share, in the corresponding period last year.

Net sales for the year ended Dec. 31, 1989 amounted to $17,478,907 compared with $13,810,918 in the previous year, an increase of 26 percent.

The net loss for the year amounted to $2,216,219, or $(.65) per share, compared with a net loss of $928,168, or ($.27) per share, in 1988.

Total order backlog at Dec. 31, 1989 totalled approximately $36 million compared with $40 million at Dec. 31, 1988.

The volume of sales in the last quarter of 1989 is more than double the volume of sales for the same period last year. The portion of export

sales has decreased while the portion of sales to the Israeli Ministry of Defense has increased.

The major portion of the loss for the year ended Dec. 31, 1989 ($1.9 million), was attributable to provisions relating to receivables from customers, defective products, obsolete and defective inventory and a provision on account of a termination of an order by a European client for convenience.

The company's previously announced purchase of Urdan (T.G.L.) Ltd., from its parent company, Urdan Industries Ltd., has been restructured from a share to an asset transaction. Otherwise, the transaction, which was effective as of Jan. 1, 1990, was unchanged from that previously announced.

Moshe Oren Pines has been nominated president of S.P.I. as of March 1990. Oren Pines served as vice president of Ashot Ashkelon, one of the leading manufacturers in the metal industry in Israel.

Headquartered, in Carmiel, Israel, S.P.I. designs, develops, manufactures and markets components for the suspension systems of a wide variety of military armored vehicles, including steel road wheels and support rollers sprocket wheels, track components and road wheel arms. The company believes it is currently one of the leading suppliers of steel road wheels used as spare parts by the United States Armed Forces and supplies substantially all the requirements of the Israel Defense Forces for steel road wheels, sprocket wheels, road wheel arms and certain track components.

#90066p0125 03/07/1990 ~PR Newswire

DALLAS (MARCH 7) PR NEWSWIRE - NCR Comten, the network products division of NCR Corporation (NYSE: NCR), today announced the industry's first network-based solution for integrating Open Systems Interconnection (OSI) applications into existing computer networks that are using standards-based architectures like TCP/IP or the proprietary SNA architecture. OSI is an emerging industry standard that will allow multiple vendors' devices to talk to each other in the same computer network.

Called Comten Open Systems Interconnection/Communications Processor (OSI/CP(TM)), the new software allows businesses to send information originating from OSI applications on personal computers or workstations over established and commonly used networks like TCP/IP and SNA. As a result, businesses can reduce costs by using the same, multi-purpose wide area network for transmitting both applications that use standard network architectures like OSI and Transmission Control Protocol/Internet Protocol (TCP/IP) and applications that use the proprietary Systems Network Architecture (SNA). Comten OSI/IP alleviates the need for using separate parallel networks for transmitting OSI or TCP/IP traffic and SNA traffic. In addition, this software allows businesses to preserve their existing investment in their wide area network resources, like mainframes and mainframe applications, and expand the capabilities of those resources as they migrate to or integrate standards-based network architectures, like OSI, with their existing networks.

The new software also allows businesses with OSI desk-top applications, like file transfer and electronic mail, to interoperate with each other over a wide area network independent of the mainframe. As a result, businesses save line costs through more efficient network routing and free mainframe resources for application processing. Other vendors' solutions require involvement by the mainframe, routers/bridges, or auxiliary processors for network routing between OSI devices.

The new product is in support of NCR Corporation's overall strategy for Open, Cooperative Computing (OCC). NCR's direction is to be an industry leader in providing networking solutions that are based on industry standards while preserving business' investment in their existing networks.

Comten OSI/CP operates on the family of Comten 56X5 communications processors: the industry's most powerful and flexible platform offering multiple options for SNA and standards integration, for managing network growth, and for consolidating local area networks with wide area networks. NCR Comten communications processors support both token ring and Ethernet local area networks and allow for LAN expansions and processor model upgrades in the field.

ENGLEWOOD, COL (MARCH 7) PR NEWSWIRE - Roadmaster Industries Inc. ("RMI") (NASDAQ: WHEL) announced today that it had signed an agreement to acquire 100 percent of the outstanding stock of Columbia Manufacturing Co. ("Columbia"). The purchase price is for cash. Closing is expected within the next 30 days.

Columbia, founded in 1877, is the oldest manufacturer of bicycles in the United States. The company operates out of 462,000 square feet of manufacturing and storage space on 39.7 acres of land, located in Westfield, Mass.

In addition to producing a full line of bicycles, the company manufactures a school furniture line that is approximately 30 percent of its annual revenues.

Fiscal Dec. 31, 1989 revenues were in the $40 million range. "We are pleased to effect this combination of two of America's oldest and most highly respected bicycle manufacturers," said Henry Fong, Roadmaster Industries president. "It gives Roadmaster an enlarged presence in the important Eastern corridor! The addition of the school furniture business gives Roadmaster a better balance of seasonal sales and access for a new customer base in a industry anticipating growth through replacements and new construction."

Columbia enjoys a premium position in this school furniture business," Fong said.

Roadmaster Industries operates through its two wholly owned subsidiaries, Roadmaster Corp. and Hamilton Lamp Corp. Roadmaster is a leading designer and manufacturer of junior wheel goods, bicycles and health fitness equipment. Hamilton Lamp is a leading manufacturer of lamps and replacement shades.

CONTACT: Henry Fong of Roadmaster Industries, 407-624-0885 or 303-290-8150; or Kenneth Howard of Columbia Manufacturing Co., 413-562-3664

#90066p0129 03/07/1990 ~PR Newswire

MINNEAPOLIS (MARCH 7) PR NEWSWIRE - Best Buy Co., Inc. (NYSE: BBY), today reported sales for February 1990 and fiscal year-end sales due to the change in the company's year end to a 52/53 week year ending on the Saturday closet to the final day in February.

The current fiscal year ended on March 3, 1990, and only contains approximately, 11 months of operating results.

According to Allen Lenzmeier, senior vice president/finance, February 1990 calendar month sales of $39 million were 26 percent more than the $31 million achieved the previous February.

Year-to-date sales through February 28 were $509 million, an 8 percent increase over $471 million for the comparable 11 month period last year. Fiscal year 1990 sales (11 months -- April 1, 1989 through March 3, 1990) were $513 million. Sales performance included the addition of eight new stores that opened during the third fiscal quarter.

Of the company's 49 stores, 41 are considered comparable, whose sales increased 8 percent for February 1990 and were even with last year for the 11-month period ended Feb. 28. Best Buy considers a store to be comparable the 14th full month following its opening or remodeling.

Best Buy reports sales on a monthly basis; net income and earnings per share are disclosed quarterly.

Best Buy is the fourth largest publicly held consumer electronics and major appliance retailer in the U.S.

The company sells nationally recognized name brand consumer electronic products, 35mm photographic equipment, home office products, entertainment software, and major appliances at 49 stores located in Minnesota, Iowa, Wisconsin, South Dakota, Illinois, Kansas, Missouri and Nebraska.

BIRMINGHAM, AL (MARCH 7) PR NEWSWIRE - Southern Natural Gas Company, the interstate gas transmission unit of Sonat Inc. (NYSE: SNT), has announced a $36 million construction project to expand its natural gas pipeline capacity in northern Louisiana.

Southern Natural's project, the Lake St. John Connection, designed to move initially 175 million cubic feet of gas per day, will consist of approximately 10,000 horsepower of compression and 80 miles of 20-inch pipeline extending from Winn Parish in north Louisiana to the Company's south system in Tensas Parish near Lake St. John Field. Construction of the Lake St. John Connection is contingent upon Southern Natural receiving sufficient long-term firm commitments from customers to transport natural gas received on the Company's north Louisiana system and upon receipt of necessary authorizations. Construction is scheduled for 1991, and the Lake St. John Connection is projected to be in service for the 1991-1992 winter season.

This pipeline will enhance Southern Natural's ability to transport the significant gas reserves being developed in north Louisiana and east Texas to the Southeastern markets served by Southern Natural, as well as to other areas of the country via pipelines that are interconnected with Southern Natural's. These pipelines include ANR Pipeline, Florida Gas Transmission, Tennessee Gas Pipeline, Texas Eastern Transmission and Transcontinental Gas Pipe Line.

Southern Natural Gas, headquartered in Birmingham, Ala., operates an 8,600-mile natural gas pipeline network serving seven Southeastern states. It is a subsidiary of Sonat Inc., also headquartered in Birmingham. Sonat is a worldwide energy company involved in natural gas transmission and marketing, oil and gas exploration and production, and oil services.

UNION, NJ (MARCH 7) PR NEWSWIRE - TransNet Corporation (NASDAQ: TRNT), an independent dealer of personal computers, peripheral and related equipment service and supplies today announced that it acquired Round Valley Computer Center, Inc. on March 6, 1990, for an aggregate 225,000 shares of common stock, $175,000 in cash and certain other consideration.

Round Valley Computer Center, Inc. sells and supports personal computers of several major manufacturers, including IBM, Apple and Hewlett Packard. Included in Round Valley's customer base are commercial and scientific companies, as well as companies engaged in research and development. Research and development represents a burgeoning market for computer equipment. Round Valley Computer Center, Inc. is headquartered in Branchburg, N.J., and has an additional sales location in Lebanon, N.J. Round Valley reported revenues of approximately $20,000,000 for the fiscal year ended Dec. 31, 1989.

TransNet Corporation, founded in 1969, is headquartered in Union, N.J., has commercial sales offices in Union, New York City and Philadelphia, computer retail stores in Union and Ocean, N.J., and two "walk-in/while you wait" service centers for repairs and maintenance. TransNet reported revenues in excess of $13,000,000 for the fiscal year ended June 30, 1989.

As a result of the acquisition, TransNet is the largest independent dealer of Apple Computer products in New Jersey.

Steven J. Wilk, president of TransNet, stated, "We're excited about the potential this acquisition offers, particularly with respect to the acceleration of the attainment of our revenue and profit goals and growth strategy. The acquisition of Round Valley brings to TransNet the opportunity to increase our participation in the rapidly expanding scientific and research and development markets and to expand our commercial customer base. We will also benefit from an expanded product line of popular products and a strengthened position to receive additional purchasing discounts from our vendors."

Annette Stanoch, president of Round Valley said, "We're happy to join TransNet, an established leader in the computer field. We're very excited about the prospects for the future."

BUFFALO, NY (MARCH 7) PR NEWSWIRE - Net income for Ecology and Environment, Inc.'s (AMEX: EEI) second fiscal quarter ending Jan. 27, 1990 reached $1.1 million, or $.28 per share, up 236 percent from the second quarter of last year. Net revenues for the quarter rose 34 percent to a record high of $16.9 million.

Ronald L. Frank, executive vice president and chief financial officer, announced these second quarter performance records for the company today. Operating margins for the quarter improved dramatically. Fiscal year-to-date performance reached new highs, with six-month net income of $2.3 million, or $.58 per share, up 75 percent from the prior year. Net revenues reached $33.7 million, up 23 percent from fiscal 1989's first half.

Frank attributed E & E's strong financial performance to increasing energy industry demands for environmental support and contamination remediation work. Projects begun recently are expected to continue to positively impact the company for several additional quarters. E & E also has expanded its services to federal agencies such as the Department of Energy and Department of Defense, in addition to the U.S. Environmental Protection Agency. Several long-term asbestos and hazardous waste site remediation projects at DOE and DoD installations have been announced by the company during the past few months.

The company also increased its project workload for several state governments, particularly New York and Florida. E & E's Analytical Services Center in Buffalo, N.Y., reported significant workload increases, requiring an expansion that was recently completed. E & E also has accelerated its marketing activities overseas, beginning a hazardous waste project in Taiwan and undertaking a major asbestos investigation project in West Germany. It is also expanding its marketing activities in the countries of the European Community, as well as the Eastern Bloc.

Ecology and Environment, Inc., is a firm of international specialists in the environment, founded in 1970 and headquartered in Lancaster, N.Y., a suburb of Buffalo. It has offices in 21 cities throughout the United States, and is represented in more than 20 countries around the world. It currently has more than 1,100 employees.

CHICAGO (MARCH 7) PR NEWSWIRE - Holstein, Mack & Klein today released the following:

H & R Block, Inc., the nation's largest income tax service company, was named today in a national class action suit filed in the Circuit Court of Cook County.

The case was assigned to Judge Anthony J. Scotillo of the Circuit Court of Cook County, Chancery Division.

The controversy surrounds H & R Block's Rapid Refund Service. For a fee of $25, H & R Block advises the customer that their IRS tax refund will be made available in two weeks or less. It is alleged that the program affects millions of taxpayers.

Instead, many customers are waiting substantially longer for their money.

"It appears to be another example of doing whatever is necessary to get the customer and his money in your store and then forgetting about your previous commitment," says Aron Robinson, attorney for the class.

The class action suit was filed on behalf of those taxpayers who were given a date or approximate date that they would receive their tax refund, but did not receive their money by that date. The suit requests that the fee of $25 be returned with interest.

Holstein, Mack & Klein is a Chicago-based law firm that specializes in complex civil litigation.

BROOKHAVEN, PA (MARCH 7) PR NEWSWIRE - SecurityLink Corporation announced today that it has consolidated its acquisition of Tri-State Alarms' operations in Pennsylvania, Maryland, Delaware and Southern New Jersey, and has established regional headquarters here under the supervision of Grey Westhoff, vice president and general manager. In making the announcement, Russell R. MacDonnell, the company's chairman and CEO, said that with this acquisition and additional territories in Virginia, Georgia Alabama and Florida as well as Washington, SecurityLink becomes the second largest privately held electronic security systems and services firm in the United States. The company is currently supplying and serving commercial and residential customers in the northeast, midwest, middle-Atlantic and southeast regions.

MacDonnell also said SecurityLink has become the country's sixth largest security service organization in terms of gross annual revenues, which currently exceeds $70 million. The company's 1,100 employees are currently servicing more than 120,000 customers that are spread over 23 states. Founded in November 1986, the company's growth was driven by mergers, acquisitions and new sales, MacDonnell explained.

Westhoff, a 21-year veteran of the electronic security industry, was most recently eastern regional manager of Westec Security Systems in Plymouth Meeting, Pa. Prior to that he was sales and marketing manager for Cal-Crim/Sonitrol.

SecurityLink had previously purchased Tri-State's facilities and customer base in New York City and the surrounding metropolitan area. SecurityLink also took over the territory Tri-State served as a licensed and authorized installer of Sears residential security systems, MacDonnell said. With this purchase, the company has acquired approximately 20,000 customers from Tri-State and it has expanded its licensing agreement with Sears to include five more states. With that recent addition, SecurityLink is now Sears' largest authorized seller and installer of home security systems, according to MacDonnell.

"The Tri-State purchase marks an important point in SecurityLink's rapid growth over the past three years," said MacDonnell. "Since 1986, the company has negotiated more than 46 merger and acquisition agreements," explained MacDonnell. "We have focused our energies on building a regional organization that has the financial resources, facilities and trained employees to provide outstanding customer service at the local level," added MacDonnell. Throughout this growth period, the company has retained its network of local offices.

The essential element of SecurityLink's success has always been its ability to deliver dependable service to each of its customers," explained MacDonnell.

#90066p0148 03/07/1990 ~PR Newswire

EL MONTE, CA (MARCH 7) PR NEWSWIRE - The standards for express service in Southern California will change today when Vons opens its first Drive-Thru Express Store.

The Drive-Thru, located at 2355 E. Colorado Blvd., is open 24 hours a day and will feature more than 1,400 items, including a wide variety of name brand grocery items as well as fresh baked goods and deli foods cooked on

the premises daily.

"We believe this is the first complete drive-thru service in the country," said Phil Hawkins, vice president, sales. "This idea is especially right for Southern Californians because time is a precious commodity for most of us. The drive-thru provides quality service and merchandise with valuable time savings for people on the go."

In keeping with the fast-paced California lifestyle, Vons President Bill Davila is scheduled to open the Drive-Thru at 11:30 a.m. by leading a parade of cars through the drive-up lane, placing the first order himself from a 1958 red and white Buick convertible. Like most Southern Californians rushing from one appointment to another, Davila will make his appearance on his way back from shooting a Vons commercial and before he drives off to a business luncheon.

Drive-Thru purchases are as simple to make as ordering at your favorite fast food stop. The driver pulls up to a "menu" board, places an order into the microphone and drives forward to the window. Vons goal is to fill all orders within three minutes.

The Drive-Thru is attached to an Express Store, located within the physical boundaries of the Vons store. The third of its kind, the Express Store features all the advantages of a convenience store with some extra attractions that make it "the" place to shop when you're in a hurry.

In addition to fresh baked goods, superior deli sandwiches salads, burgers and pizza, Express Store shoppers (includig Drive-Thru shoppers) can select from an expansive range of grocery and health and beauty aid items all priced at Vons everyday low prices. Express Store shoppers also can take advantage of Vons weekly specials and double coupons. There is no additional charge for the Drive-Thru service.

ST. PAUL, MN (MARCH 7) PR NEWSWIRE - The board of directors of Pentair, Inc. (NASDAQ-NMS: PNTA), the St. Paul-based manufacturer of industrial products and paper, has approved an Employee Stock Ownership Plan (ESOP). The ESOP is a modification of an existing defined contribution Retirement Savings Investment Plan. Established to reinforce the commitment of employees to top performance, the ESOP is expected to help improve productivity and enhance shareholder value.

Pentair will sell to the ESOP $56.5 million of a new series of convertible preferred stock. The ESOP, in turn, will borrow funds from Pentair to

purchase the stock. The board of directors also authorized the repurchase of up to $56.5 million of common stock to minimize dilution from the new preferred stock. The ESOP stock represents approximately 13 percent of voting shares before any common stock is repurchased.

An annual dividend of 8 percent will be paid on the ESOP shares, which will vote with the common stock. Ownership of ESOP shares will be allocated to eligible employees over an expected eight-year period beginning immediately.

"Pentair has explored forming an ESOP on an ongoing basis over the last two years," said D. Eugene Nugent, Pentair chairman and chief executive officer. "We believe the ESOP will generate long-term benefits for shareholders by enhancing employees' interest in, and commitment to, Pentair's success. The incentive value of ESOPs is supported by the experience of other companies which have taken similar actions to encourage productivity improvements."

ESOP coverage now will extend to non-bargaining employees in the United States, with certain exceptions. Approximately 5,000 employees will be eligible. Participation in the ESOP by represented employees will be discussed with union representatives and local bargaining committees.

The Pentair commitment to employee involvement and stock ownership is reflected in two existing programs: a Stock Purchase and Bonus Plan formed in 1978, and a smaller ESOP whose participants include employees of Federal-Hoffman, acquired in December 1988. Together, these plans account for approximately 6 percent of Pentair common stock.

Pentair, Inc., is a St. Paul, Minn.-based company comprised of 10 businesses which manufacture woodworking equipment, electric power tools, sporting ammunition, electrical enclosures, automotive service equipment, industrial lubrication and material dispensing equipment, pumps and paper. Pentair common stock is quoted on the NASDAQ national market system under the symbol: PNTA.

#90066p0152 03/07/1990 ~PR Newswire

LONDON (MARCH 7) PR NEWSWIRE - British Technology Group's hovercraft subsidiary -- Hovercraft Development Limited (HDL) -- today announced that it has successfully negotiated to $6.1 million out-of- court settlement with the U.S. government for the use of HDL patents in 32 hovercraft built for the U.S. Army, Navy and Transportation departments.

Litigation was initiated in November 1985 following an unresolved administrative claim for compensation over the use of its hovercraft patents.

This outcome represents a significant success for British Technology Group as the world's leading technology transfer organization, and demonstrates not only its professional and commercial capability, but also its resources and tenacity in taking on and winning a complex case against the U.S. government in four-and-a-half years. It is not unknown for cases in the U.S. Court of Claims to take up to 20 years in terms of resolution and settlement. By negotiating hard for a settlement at this relatively early stage of litigation, BTG has maximized the return from the case.

The strength of BTG's case against the U.S. government lay principally in its patent for the segmented skirt, which is used on all commercial and military hovercraft today. The segmented skirt comprises a collection of pockets or hollow fingers located around the craft at the interface with the surface and which, when inflated, enables the air cushion to be maintained while accommodating variations in the surface -- e.g. sea waves or passing objects. If one segment is lost, the others inflate further to take its place.

The U.S. government has been building hovercraft, incorporating HDL's technology, for military purposes since the early 1970s. Significant construction of the LACV-30s, an amphibious 30-ton load carrier, began in 1979. In all, 26 of these craft have been built. These craft have been followed by the larger LCAC craft designed for the U.S. Navy to carry 60-ton tanks.

British Technology Group is the world's leading technology transfer organization. It searches for new technology in laboratories and companies worldwide, licenses new scientific and engineering products to industry and provides finance for the development of new technology.

British Technology Group is the world's leading technology transfer organization with more than 40 years experience in identifying commercially promising technologies, patenting those technologies, providing financial support for their development, and licensing the

technology to companies throughout the world.

BTG's involvement in hovercraft began in April 1958 when Sir Christopher Cockerell approached BTG for assistance in applying for overseas patents for his hovercraft ideas. BTG agreed and Hovercraft Development Limited was formed in the following year to finance, manage and develop the technology. Over the years, HDL invested more than 2 million pounds in hovercraft development. Cockerell's shareholding in HDL was bought out by BTG in 1971.

DALLAS (MARCH 7) PR NEWSWIRE - Herbert D. Kelleher, chairman of the board and president of Southwest Airlines Co. (NYSE: LUV), announced today that the company flew 735.6 million revenue passenger miles (RPMs) in February 1990, a 6.4 percent increase over the 691.2 million RPMs flown in February of last year. Available seat miles (ASMs) increased 13.5 percent to 1,192.7 million from the February 1989 level of 1,050.4 million ASMs. The load factor for the month was 61.7 percent, down 4.1 points from 1989.

Kelleher stated, "We are very pleased with our strong February traffic results. The 61.7 percent load factor represents the best load factor for February since 1981, with the exception of last year, when we achieved an extraordinary 65.8 percent. The strong traffic is due, in part, to successful promotional activities and reduced long-haul fares, resulting in lower passenger revenue yields per RPM as compared to fourth quarter 1989. These yields are currently running ahead of first quarter 1989 numbers, however. March bookings are also strong as compared to February."

NEW ORLEANS (MARCH 7) PR NEWSWIRE - Avondale Industries Inc. (NASDAQ: AVDL) announced today that it has been notified by the U.S. Navy that it has been selected as the successful offeror for the construction of the T-AGS 45, an oceanographic survey ship.

The selection was made on the basis of Avondale's proposal being the lowest-priced, technically acceptable offer. The U.S. Navy also informed Avondale that in the near future it would be contacted with details

concerning the pending award of the contract to Avondale.

The vessel is a new design and will be delivered in November 1992. The pending contract is valued at approximately $100 million. It will provide employment for over 500 Avondale workers during 1991 and 1992.

Avondale Industries Inc., headquartered in New Orleans, is one of the nation's leading marine fabricators. In addition to its shipbuilding operations, the company specializes in boat and LCAC construction and is a major contractor for commercial and Navy ships. It is also involved in the modular construction of plants and components for a variety of land-based industries.

HIALEAH, FL (MARCH 7) PR NEWSWIRE - Equipment Company of America (NASDAQ: ECOA), today reported the election of John F. McKeon to its seven-person board of directors.

McKeon, age 64, brings to ECOA over 40 years of manufacturing and management experience. He is a consultant and director of Link-Belt Construction Equipment Company, the firm from which he retired as president in 1989. McKeon is also a director of Portec, Inc., a New York Stock Exchange company and LBS S.p.A., a manufacturing company located in Milan, Italy, in which he is also a major shareholder.

With masters degrees in Engineering and Business Administration from Dartmouth, McKeon was employed 17 years by General Electric Company. In

1966 he became vice president and general manager of the Construction and Mining Group of Westinghouse Air Brake Company. In 1972, McKeon became vice president and general manager of the Power Transmission Group of FMC Corporation. By 1974, the Construction Equipment Group was added, and he became responsible for $650 million in sales with 10,000 employees. McKeon became president of Link-Belt Construction Equipment Company in 1986 when FMC and Sumitomo Corporation of Japan formed the company through a joint venture.

Equipment Company of America is a manufacturer and worldwide distributor of materials handling equipment and other industrial products for the safe efficient movement and storage of factory products. The ECOA materials handling line encompasses 15 broad-based product categories, featuring both powered and non-powered items. These products are specially designed to save users time and money as well as to assist them in meeting all applicable personnel safety requirements. Under its AllTape (R) brand, ECOA also is a mill distributor and major converter of packaging and industrial, pressure-sensitive, adhesive tapes.

ATLANTA (MARCH 7) PR NEWSWIRE - Academy Insurance Group (NASDAQ: ACIG) today reported results for the year ended 1989.

Net income for the year 1989 was $4,093,000 ($.06 per share) compared to $8,256,000 ($.12 per share) for the year 1988. For the three months ended Dec. 31, 1989, net income was $1,501,000 ($.02 per share) compared to $1,521,000 ($.02) per share for the same period in 1988.

Rodney Hale, president and chief executive officer, said, "As expected, sales for the 12 months of 1989 were essentially flat compared to the same 1988 period." Sales of new annualized premium were $21,132,000 in 1989 compared to $22,626,000 for the comparable 1988 period.

"Net income for the fourth quarter showed significant improvement over the past two quarters," stated Hale. "We are now beginning to benefit from our efforts to streamline operations. The continued implementation of our expense reduction plan, should have a positive effect on 1990 operating results."

Academy Insurance Group Inc. is an insurance and financial services company that provides life, health and property/casualty products to specialty or "niche" markets. The company's primary market is noncommissioned and petty officers and their families. Academy's products

are endorsed by the Non Commissioned Officers Association (NCOA).

MIAMI (MARCH 7) PR NEWSWIRE - Eastern Airlines will donate a Boeing-727 charter flight and fuel to bring 140 young athletes and their chaperones from Dade, Broward and Monroe Counties to Tallahassee, Fla. on March 8 to compete in the state's Special Winter Olympics finals.

Eastern's pilots and flight attendants are also volunteering their time to crew the flight and Marriott In-Flite has agreed to cater the aircraft free of charge.

"For the third consecutive year Eastern is flying these Special Olympic children to Tallahassee," said Phil Bakes, president and chief executive officer. "We're happy to support these young Olympians who look so forward to the annual basketball, bowling, gymnastic and powerlifting competitions."

The flight departs Miami International Airport, Gate C-1, at 6 p.m. on March 8 and stops at Gate C-7 in Fort Lauderdale, Fla. at 6:20 p.m. After picking up 50 Broward County children, the flight leaves for Tallahassee at 7 p.m., arriving Tallahassee at 8:05 p.m.

The return trip on March 11 departs Tallahassee at 2 p.m. and arrives in Fort Lauderdale at 3:05. The flight returns to Miami at 3:50 p.m.

HOUSTON (MARCH 7) PR NEWSWIRE - The Board of Directors of Browning-Ferris Industries Inc. (NYSE: BFI) today declared the corporation's regular quarterly cash dividend on common stock. The cash dividend of 16 cents per common share is payable April 6, 1990, to shareholders of record at the close of business on March 19, 1990.

The Board of Directors also approved an amendment to the company's shareholder rights plan reducing certain percentage thresholds in the plan. The amendment reduces from 20 percent to 10 percent the percentage ownership which gives rise to a "stock acquisition date" and from 30

percent to 15 percent the percentage ownership which activates the "flip-in" rights under the plan. The holders of rights issued under the plan become entitled to special purchase rights in the event of certain merger or other business combination transactions on or after a "stock acquisition date" or when the percentage flip-in threshold is reached. The company indicated that the plan was not amended in response to any effort to acquire control of the company.

Browning-Ferris Industries Inc. is one of the largest publicly- held companies engaged primarily in providing waste services. Subsidiaries and affiliates collect, transport, treat and dispose of commercial, residential and municipal solid waste and industrial hazardous wastes. BFI subsidiaries are also involved in recycling, resource recovery facilities, medical waste services, portable restroom services, municipal and commercial sweeping operations and asbestos abatement.

BOULDER, CO (MARCH 7) PR NEWSWIRE - Advance Display Technologies Inc. (NASDAQ: ADTI) today announced that it has entered into an agreement with Triangle Research and Development Corp. (TRDC) of Raleigh, N.C. TRDC was recently awarded a Phase I research contract under the Small Business Innovative Research Program (SBIR) established by the Department of Defense (DOD). As the only Phase I award winner for this project, TRDC anticipates signing a Phase II cost plus fixed-fee contract with the DOD by mid-summer 1990. The contract calls for approximately $500,000 to be paid to TRDC over a period of up to 24 months.

The Phase I and Phase II awards to TRDC are for improvement of the Army's combat vehicle periscope system. The TRDC innovative design incorporates a coherent fiber optic display system manufactured by ADTI and is expected to increase combat vehicle safety and survival features and eliminate blind spots.

ADTI will receive approximately $125,000 during the Phase II period for specific contract tasks. Upon completion of a successful Phase II, ADTI is expected to become the exclusive Phase III manufacturer and distributor of these fiber optic periscopes to the DOD.

Dr. David P. Colvin, president of TRDC, said, "The development of an advanced fiber optic vision system for armored Army vehicles will be a significant improvement to current systems. The close working relationship between TRDC and ADTI, at such an early stage of the development process, will facilitate the introduction and acceptance of

such a new system by the military."

The DOD SBIR program is a three phase R & D process to develop advanced or innovative concepts which demonstrate a sound approach and make a significant contribution to the investigation of a solution to an important Department of Defense related engineering program.

NEW YORK (MARCH 7) PR NEWSWIRE - The Turner Corporation (AMEX: TUR), the nation's leading general builder, today announced that, consistent with management's expectations, the 1989 fourth quarter net income was $2.63 million or $0.55 per share, up from $1.7 million or $0.34 per share in the third quarter of 1989 and $957,000 or $0.21 per share in the fourth quarter of 1988.

For the year ending Dec. 31, 1989, net income was $2.77 million. This compares with 1988 net income of $3.67 million. On a per share basis, 1989 earnings were $0.54 per share of common stock, compared to $0.82 per share for 1988.

Alfred T. McNeill, chairman, president and chief executive officer of the The Turner Corporation remarked, "We are pleased to see the continued improvement in quarterly earnings which reflects our strong construction operations; however, healthy construction earnings continue to be impacted by the cost of carrying real estate properties for sale."

During 1989, Turner completed $3.56 billion of construction, up 11 percent from $3.2 billion in 1988. Construction completed in the fourth quarter was $884 million, up 2 percent from $868 million in 1988.

Anticipated earnings from construction backlog have increased from $106 million at year-end 1988 to $110 million at Dec. 31, 1989, while Turner's total volume of construction backlog has dropped slightly from a company high of $4.85 billion at year-end 1988 to $4.70 billion at Dec. 31, 1989. According to McNeil, "Although total construction backlog volume is down slightly, we are pleased that the anticipated earnings from the construction backlog continues to increase."

Based in New York, The Turner Corporation, through Turner Construction Company and other construction subsidiaries, is the nation's largest diversified builder of commercial, industrial, hospital and healthcare,

institutional, government building and multi-unit housing projects. Operating through more than 35 offices, Turner has construction projects underway throughout the United States and abroad.

STAMFORD, CT (MARCH 7) PR NEWSWIRE - Southern Connecticut Newspapers Inc. a subsidiary of The Times Mirror Company, (NYSE: TMC) announced today that it has reached an agreement in principle to acquire Acorn Press Inc., publisher of a group of five weekly newspapers serving the central portion of Fairfield County, Conn. Terms of the agreement were not disclosed.

Southern Connecticut Newspapers publishes The Advocate in Stamford and Greenwich Time in Greenwich.

Acorn Press, based in Ridgefield, Conn., has been owned and operated since 1937 by the Nash family, headed by Karl S. Nash, president and principal stockholder.

The five weekly papers involved in the transaction are The Ridgefield Press, The Wilton Bulletin, The Redding Pilot, The Bethel Home News, all in Connecticut, and The Ledger of nearby Lewisboro, N.Y. All are paid circulation newspapers with a combined circulation of 21,800. Average combined circulation of The Advocate and Greenwich Time is 43,361 daily and 51,844 Sunday.

"We're pleased to carry on the tradition of fine journalism established by the Nash family. The acquisition of Acorn Press is a strategic one for Southern Connecticut Newspapers because it allows us to expand in the market and the business we know best -- publishing high quality newspapers specializing in local news coverage, serving demographically strong Fairfield County," said William J. Rowe, publisher and chief executive officer of Southern Connecticut Newspapers.

Commenting on the acquisition, Nash said: "When I went off to college, my California roommate's father sent him the Sunday Los Angeles Times every week. Now, 64 years later, my five weekly papers are becoming part of the newspaper family that that paper has become.

"How fitting the motto of the first issue of The Ridgefield Press in 1875, selected by founder D. Crosby Baxter, 'Great oaks from little acorns grow.' I am confident that Times Mirror's Fairfield County dailies will ably guide the further growth of our little oaks, and I'm proud of the devoted, hard-working and competent people who produce our newspapers."

The acquisition, the first for Southern Connecticut Newspapers, is subject to satisfactory completion of a definitive agreement.

ACRE, ISRAEL (MARCH 7) PR NEWSWIRE - Electrochemical Industries (Frutarom) Ltd. (AMEX: EIF) today reported that its board of directors recommended that the company distribute a 30 percent stock dividend. The stock dividend would increase the number of outstanding ordinary shares, nominal value NIS 1 each, from 15,000,000 to 19,500,000.

The stock dividend is subject to approval of the company's shareholders, and will be voted upon at the company's annual general meeting to be held in New York in early April. A record date has not yet been set for the stock dividend.

Electrochemical Industries (Frutarom) Ltd. manufactures and markets chemicals, raw materials, flavors and essences for a wide variety of industrial applications. One of Israel's leading firms, it is the country's sole producer of PVC, which it markets both domestically and overseas.

CINNAMINSON, NJ (MARCH 7) PR NEWSWIRE - DNA Plant Technology Corporation (NASDAQ: DNAP) today reported that it had total revenues of $12,890,000 and a net loss of $2,948,000, or 14 cents per share, for the full year ended Dec. 31, 1989. For the previous year, the company had total revenues of $8,055,000 and a net loss of $9,840,000, or 52 cents per share.

For the fourth quarter of 1989, DNAP had total revenues of $3,228,000, compared to $2,055,000 in the same period of the previous year. The company had a net loss for the period of $1,017,000, or 5 cents per share, compared to a net loss of $3,739,000, or 19 cents per share, in the fourth quarter of 1988.

"As we anticipated, substantially increased revenues from product development agreements contributed to a significantly reduced loss for the year and fourth quarter," said Richard Laster, DNAP chairman and chief executive officer. "In each of our five core business areas, we continue

to advance both our business and scientific strategies. The California production facility for VegiSnax(R) carrots and celery, a product of our FreshWorld joint venture with Du Pont, has started up. FreshWorld, under a sales, merchandising and distribution agreement with Sunkist Growers, is beginning the national rollout of VegiSnax carrots and celery by introducing these premium vegetables in several West Coast metropolitan areas over the next few months.

"Our edible oils program, developing new canola varieties with improved fatty acid composition, is making excellent progress. Working with our partner Du Pont, we opened a new research and breeding station in Idaho Falls, and are now contracting with growers for significantly expanded cultivation of these new varieties for customer sampling following the 1990 growing season.

"Our product development work for our Florigene joint venture on novel cut-flowers continues to progress, with important advances in the application of 'transwitch' technology for pigment modification. The diagnostics products of our Agri-Diagnostics Associates joint venture with Union Carbide continue to receive strong market reception, and excellent progress continues on a program with American Cyanamid to apply Agri-Diagnostics' proprietary technology to develop a kit for the rapid on-site detection of soil residues. We are also in discussions with a major corporation concerning arrangements to exploit our important technical advances in ice crystal modification," Laster said.

DNA Plant Technology Corporation is a leading agricultural biotechnology firm, applying plant tissue culture and other technologies for the commercial development of products and processes for industrial and consumer markets.

HOUSTON (MARCH 7) PR NEWSWIRE - Panhandle Eastern Corp. (NYSE: PEL) today completed the restructuring of its petroleum products pipeline business into a master limited partnership, TEPPCO Partners, L.P., and has retired the remaining $411 million bank debt from the 1989 acquisition of Texas Eastern Corp. with part of the proceeds.

The debt retirement allowed Panhandle Eastern to negotiate a new revolving credit agreement totaling $1.3 billion with a group of banks led by Manufacturers Hanover Trust Co. This agreement became effective with the completion of the TEPPCO Partners offering.

"We have paid off all $2.6 billion of bank debt from the acquisition of Texas Eastern in less than one year," said Philip Burguieres, president and chief executive officer. "We have completed the divestiture program started by Texas Eastern much faster than originally anticipated and can now concentrate on being the industry leader in our primary business of natural gas transmission.

The company sold to the public 12,750,000 units of the new partnership at $20 per unit, representing 89.25 percent of the limited partner interests. Texas Eastern Products Pipeline Co. is the general partner with an approximate two percent interest plus an 8.75 percent limited partner interest in TEPPCO Partners.

The partnership has granted the underwriters, Goldman, Sachs & Co., Kidder Peabody & Co. Incorporated and Shearson Lehman Hutton Inc., an over-allotment option to purchase up to an additional 1,250,000 units. The publicly offered units are listed on the New York Stock Exchange under the symbol TPP.

The combined gross proceeds of approximately $630 million from the equity sale and the issuance of first mortgage notes by the partnership will be used to completely retire Panhandle Eastern's bank debt from the Texas Eastern acquisition and for other corporate purposes.

TEPPCO Partners owns and operates the petroleum products pipeline business previously owned by Texas Eastern Products Pipeline Co., which includes a

4,100-mile pipeline system extending from Southeast Texas through the Midwest to the Northeastern United States. TEPPCO Partners is one of the largest common carrier pipelines of petroleum products in the United States.

"TEPPCO Partners has retained the Texas Eastern Products Pipeline Co. management team, enabling the partnership to build on its commitment to provide facilities and service of the highest quality in the industry," said TEPPCO President Michael D. Burke.

#90066p0206 03/07/1990 ~PR Newswire

CHICAGO (MARCH 7) PR NEWSWIRE - Amoco Chemical Company announced today it will construct a new world-scale polypropylene unit at its Chocolate Bayou plant near Alvin, Texas.

The unit, based on Amoco's proprietary gas-phase process and high- yield catalyst, will add 300 million pounds per year capacity and position the company as a contender in international licensing.

Scheduled for completion in 1992, the new unit will be state-of-the- art environmentally, generating minimal wastewater and minimal air emissions. The proprietary process uses Amoco's high-yield catalyst, which streamlines the manufacturing steps and more efficiently produces a superior product.

Amoco Chemical Company is the second largest producer of polypropylene in the United States and the third largest in the world. Polypropylene is a versatile plastic that can be fabricated into a wide variety of products, including fiber for carpeting and upholstery, film for packaging, and molded parts for automotive, appliance, houseware, and medical uses.

Amoco has been operating a commercial gas-phase polypropylene plant since 1980 and has licensed the process to others in recent years.

A leader in polypropylene research, Amoco became the first company to market a polypropylene carpet for residential use with the introduction of Genesis carpet in 1988. Polypropylene is less expensive than nylon and better resists staining and fading. Amoco developed technology to add strength to the carpet fiber during manufacturing, which makes it as durable as nylon but with the added benefit of built- in stain resistance.

Amoco also is the world's largest supplier of woven polypropylene carpet backing and fabrics, and a leading producer of polypropylene yarn.

Chocolate Bayou's two existing polypropylene units currently produce more than 800 million pounds of polypropylene per year. Amoco also operates polypropylene units at its plants in Cedar Bayou, Texas, and Geel, Belgium.

Amoco Chemical Company is the worldwide chemical manufacturing and marketing subsidiary of Amoco Corporation (NYSE: AN).

#90066p0208 03/07/1990 ~PR Newswire

DENVER (MARCH 7) PR NEWSWIRE - Asset Investors Corp. (NYSE: AIC) today announced its net income for the year ended Dec. 31, 1989 was $20,446,000, or $1.47 per share (based on 13,892,000 weighted average shares outstanding), compared with $35,656,000 or $2.69 per share (based on 13,262,000 weighted average shares outstanding) for the year ended Dec. 31 1988. Federal taxable income for 1989 is estimated to be $23,100,000, or $1.66 per share. Revenues for 1989 were $737,566,000, compared with $717,217,000 in 1988.

For the three months ended Dec. 31, 1989 net income was $5,207,000, or 37 cents per share, after an accrual of $1,300,000, or 9 cents per share, for the anticipated settlement of the stockholder class action lawsuits against the company. This compares with $7,517,000, or 54 cents per share for the three months ended Dec. 31, 1988. Both the 1989 and 1988 figures are based on 13,892,000 weighted average shares outstanding. Federal taxable income for the fourth quarter of 1989 is estimated to be $6,500,000 or 47 cents per share. Federal taxable income for the three months ended Dec. 31, 1989 is greater than net income for like period, computed in accordance with generally accepted accounting principles, primarily because the amount of the anticipated class action lawsuit settlement is deductible for tax purposes only after the settlement is paid. Revenues for the fourth quarter of 1989 were $178,647,000, compared with $188,424,000 in the fourth quarter of 1988.

Asset Investors paid cash dividends to stockholders in 1989 of $1.56 per share, compared with $2.79 per share in 1988.

The decline in net income for the year was due, primarily, to the effects of substantially higher short-term interest rates in 1989 as compared to 1988 and the inversion in the yield curve. Higher short-term interest rates, specifically the London Interbank Offered Rate ("LIBOR") for Eurodollar deposits, resulted in higher interest expense on the company's LIBOR-indexed variable-rate liabilities. Because there was no corresponding increase in long-term interest rates, there was no

offsetting positive effect on income that would have been provided by the reduction in mortgage collateral prepayments normally expected with higher long-term interest rates.

To a lesser extent, net income declined due to the accrual for the anticipated settlement of the stockholder class action lawsuits, greater interest expense on short-term debt used to finance portfolio acquisitions made in the previous year, expenditures related to hedging transactions, a one-time charge for the cancellation of an interest rate swap agreement and legal and mangement consulting fees.

Asset Investors also announced the appointment of Michael H. Feinstein as its executive vice president and chief operating officer. Feinstein also will continue to serve as the company's treasurer and chief financial officer. Feinstein has been an officer of the company since its inception, previously serving as senior vice president, vice president and secretary.

Asset Investors is a real estate investment trust that generates income primarily from a portfolio of ownership interests in issuances of collaterized mortgage obligations and other mortgage-related assets.

#90066p0212 03/07/1990 ~PR Newswire

NEW YORK (MARCH 7) PR NEWSWIRE - Oppenheimer Management Corporation today announced the launch of Oppenheimer Global Environment Fund.

Oppenheimer Global Environment Fund is an open-end mutual fund requiring a $1,000 minimum investment. The fund's investment objective is to seek long-term capital appreciation through investments in companies which contribute to a cleaner and healthier environment. The fund will invest in foreign as well as domestic securities.

The fund's investments will include companies involved in:

-- pollution control
-- solid waste management
-- hazardous waste treatment and disposal
-- waste-to-energy conversion
-- asbestos and nuclear waste removal
-- energy alternatives
-- biodegradable products
-- pulp and paper recycling
-- biotechnology

According to Jon S. Fossel, president and CEO of Oppenheimer Management Corporation, "The environmental sector has become one of the greatest growth industries in the world today. In the U.S. alone, annual spending on waste management and environmental technology is expected to triple to $174 billion by 1995. The Oppenheimer Global Environment Fund enables the individual investor to capitalize on this enormous market opportunity -- both domestically and abroad."

Oppenheimer Management Corporation manages more than 25 mutual funds with assets in excess of $13 billion and more than 1 million shareholder accounts.

#90066p0220 03/07/1990 ~PR Newswire

HOUSTON (MARCH 7) PR NEWSWIRE - ANR Pipeline Company, a subsidiary of the Coastal Corporation (NYSE: CGP), and Panhandle Eastern Corporation (NYSE: PEL) today announced they have signed an agreement to combine the Ohio portions of their natural gas pipeline projects being constructed by the

two companies to serve the Northeast. The jointly owned $70 million project is expected to be in service by the summer of 1990.

The new 61-mile, 36-inch pipeline will connect ANR and Panhandle Eastern's pipeline systems in Darke County, Ohio, with facilities of Texas Eastern Transmission Corporation, CNG Transmission Corporation and Columbia Gas Transmission Corporation near Lebanon, Ohio.

ANR has completed a 37-mile, 30-inch pipeline from its mainline near Muncie, Ind., to link its system with the Ohio project. Panhandle Eastern has started construction on 52 miles of 30-inch pipeline from its mainline in Grant County, Ind., to the joint project.

ANR will construct the Ohio pipeline, and a Panhandle Eastern subsidiary will provide engineering services and operate the pipeline. The two companies will share equally in its capacity.

Initial capacity will be 480 million cubic feet of gas per day, which could be expanded to more than one billion cubic feet per day to meet future market needs.

"This joint project reflects a new spirit of cooperation within the pipeline industry, which is evident in several other recent agreements that Coastal and ANR have signed to facilitate the movement of gas to the Northeast," said James F. Cordes, chairman and chief executive officer of ANR Pipeline Company and executive vice president of its parent, the Coastal Corporation.

"The Lebanon connection will be one of ANR's major gateways to the Northeast," he continued. "It will greatly enhance our ability to provide ample supplies of natural gas from Oklahoma and the Midcontinent area, as well as Canadian gas, to the incremental market in that region."

"Construction of this pipeline will expand our 27,500-mile integrated pipeline network and increase the delivery of natural gas from major supply areas to the nation's growing major markets," said Panhandle Eastern Corporation Group Vice President George L. Mazanec.

"Our one-third share of the Northeast market can only be strengthened by this union of our systems, which provides Texas Eastern new access to abundant Midcontinent gas supply and Panhandle Eastern direct entry to Northeast markets," said Mazanec. "This crucial link of the Panhandle Eastern/Trunkline and the Texas Eastern/Algonquin systems was a key strategic factor in Panhandle Eastern's acquisition of Texas Eastern last year."

Panhandle Eastern Corporation operates one of the nation's largest interstate natural gas pipeline systems, providing gas to the Midwest and

Northeast markets.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of more than $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

TROY, MI (MARCH 7) PR NEWSWIRE - K mart Corporation (NYSE: KM) today announced the appointment of Wayne H. Patterson to executive vice president, specialty retailing, effective April 1, 1990.

In this new position, Patterson, 44, will be responsible for the following subsidiaries: PACE Membership Warehouse, Inc., Pay Less Drug Stores Northwest, Inc., and Walden Book Company, Inc. He will report directly to Joseph E. Antonini, K mart chairman of the board and chief executive officer.

"Wayne Patterson's planning approach to the PACE Membership Warehouse clubs will certainly prove beneficial as he assumes the additional responsibilities of Pay Less and Walden Books," said Antonini.

Pay Less and Walden Books previously reported directly to Antonini. The reporting move of Pay Less and Walden Books direct from Antonini to Patterson will allow Antonini to focus more strongly on the overall corporate strategic plans.

In addition, Larry M. Parkin, K mart's executive vice president, warehouse and grocery operations, has announced plans to retire at year- end, January 1991. American Fare, Builders Square, Office Square and Sports Authority will continue to report to Parkin until his retirement. At that time, Patterson will assume direct responsibility of all specialty retailing.

Patterson has served most recently as chairman of the board and co-chief executive officer of PACE. Prior to his PACE employment, he was managing partner of the Denver office of Touche, Ross and Company from 1983 to 1986 and previously as partner in the Pittsburgh office of Touche Ross.

K mart Corporation serves America with over 4,000 retail outlets in all 50 states in the United States and in Puerto Rico and Canada. K mart, currently operating 2,318 K mart stores, is also the parent company for

Pay Less Drug Stores, Builders Square, Waldenbooks, PACE Membership Clubs and The Sports Authority.

HOUSTON (MARCH 7) PR NEWSWIRE - Petroleum Equipment Tools Co. (NASDAQ: PTCO) today reported a net loss of $6.3 million or 60 cents per share on revenues of $34.2 million in 1989. This compares with a net loss of $8.3 million or 79 cents per share on revenues of $33.4 million during 1988.

The fourth quarter of 1989 reflected a net income of $10,000 or 0 cents per share on revenues of $10.0 million. This compares to a net loss of $2.7 million or 26 cents per share on revenues of $8.7 million during the fourth quarter of 1988.

David M. Johnson, chairman and president of the company, stated that the improved results during the fourth quarter of 1989 are a direct result of increased activity and the corresponding improvement in revenues.

Petroleum Equipment Tools Co. (PETCO) rents quality drill pipe and fishing and rental tools for drilling and workover operations to the oil and gas industry in the United States and the North Sea.

PETCO's common stock is traded nationally under the symbol PTCO on the

NASDAQ market.

HOUSTON (MARCH 7) PR NEWSWIRE - William H. Schell, formerly executive vice president of Pennzoil Co.'s (NYSE: PZL) oil and gas division, has been promoted to group vice president-oil and gas. Schell replaces David S. "Scotty" Holland, who is retiring. Holland will continue to serve the board of directors as an advisory director.

Schell, an experienced oil industry veteran, joined Pennzoil in 1979. Previously, he had worked in various oil production capacities with Standard Oil of California and as vice president and general manager of production for Aminoil U.S.A. (formerly Signal Oil and Gas), managing domestic and North Sea production. He began his career at Pennzoil as senior vice president of the company's U.S. offshore operations. He was promoted to senior vice president for production in 1983. As executive vice president, he directed oil and gas division operations. Schell earned a bachelor of science degree in petroleum engineering from the University of Texas.

"Scotty Holland has been a significant contributor to the success of Pennzoil's exploration and production activities," said Pennzoil Chairman J. Hugh Liedtke. "He leaves our oil and gas operations in the hands of a strong management team."

WHITE PLAINS, NY (MARCH 7) PR NEWSWIRE - William G. Lillis, president and chief executive officer of American Savings Bank (NYSE: ASB), today announced that Robert J. Anrig, president, chief executive officer, and a member of the board of directors of Riverhead Savings Bank, FBS, has resigned effective March 7, 1990.

American Savings Bank has elected Lillis and John K. Lundberg, chairman of American Savings Bank, as directors of Riverhead to fill an existing vacancy and that left by Anrig. Lillis said that at its meeting on March 9, the board of directors of Riverhead would elect William R. O'Brien, a director of Riverhead, to succeed Anrig.

Lillis noted that, "With his extensive lending experience in the Long Island market, Bob Anrig has provided Riverhead with strong and effective

leadership. We commend him for his fine service. This change in leadership reflects a decision to phase out commercial lending at Riverhead and is a major step in American's back to basics strategy. The move will help us to concentrate on our core businesses -- income property lending and retail banking. Riverhead will continue to operate its branch system as it always has, and we are committed to maintaining Riverhead's high quality service in the community," concluded Lillis.

Riverhead Savings Bank, FSB, with $400 million in assets, was acquired in 1988 by American Savings Bank. Riverhead has four offices in the Suffolk Country communities of Riverhead, Lake Grove, East Northport, and Bay Shore. American Savings Bank, a New York state- chartered bank, specializes in lending on existing income properties and is an active residential lender. Together with Riverhead Savings Bank, FSB, American operates 39 branch offices in New York City and in Westchester, Nassau and Suffolk Counties. With consolidated assets of $4.4 billion, American is one of the largest savings banks in New York. Its deposits are insured by the Bank Insurance Fund of the Federal Deposit Insurance Corporation. The bank's common stock and $1.8125 cumulative convertible exchangeable preferred stock, Series A are both listed on the New York Stock Exchange.

WHITE PLAINS, N.Y. (MARCH 7) PR NEWSWIRE - NYNEX Corp. (NYSE: NYN) and New York Telephone today responded to the New York PSC decision as follows:

"We are disappointed in the commission's rejection of the proposed agreement developed jointly by the PSC staff and the company. The agreement provided economic certainty for the customer as well as certain other customer benefits such as modernizing the network, provisions for consumer outreach programs, and the avoidance of costly rate cases. These benefits may not be available through a rate case.

"The rejection of this settlement in favor of a rate case contradicts for now what is becoming across the nation a more effective, less costly form of regulation. New York Telephone, for example, led the nation with the signing of the original moratorium in 1986 and has reduced rates by $467 million since, while at the same time avoiding the cost of as many as four rate cases.

"We are examining our options, but it appears that a rate case must be filed promptly."

ST. PAUL, MN (MARCH 7) PR NEWSWIRE - Northwest Airlines passenger traffic grew 23.5 percent last month compared with February 1989, NWA Inc., Northwest's parent, announced today. The increase marks the 12th consecutive month of double-digit year-over-year traffic growth.

Northwest flew 3.55 billion revenue passenger miles in February, up 23.5 percent over the 2.87 billion revenue passenger miles flown in February 1989. Capacity was up 18 percent to 5.74 billion available seat miles in February from 4.86 billion a year earlier. Load factor climbed 2.7 points to 61.8 percent.

The airline's cargo ton miles grew 3.9 percent to 134.3 million from 129.3 million.

For the first two months of 1990, Northwest flew 7.48 billion revenue passenger miles, an increase of 25.7 percent over the 5.95 billion flown in January and February 1989. Available seat miles were up 17.9 percent to 11.93 billion from 10.12 billion in 1989. Load factor for the two-month period jumped 3.9 points to 62.7 percent from 58.8 percent. Cargo ton miles were up 3.8 percent to 272.1 million from 262 million.

HOUSTON (MARCH 7) PR NEWSWIRE - Global Natural Resources Inc. (AMEX: GNR) today reported the purchase of a 10 percent participating interest in an oil and gas explortion venture which holds operating rights to acreage in the Paradox Basin located on the Navajo Indian Reservation in Arizona, New Mexico and Utah.

Global purchased the interest from Chuska Energy Co. for $5 million. Global also agreed to carry Chuska for the next $7,500,000 of capital expenditures allocable to Chuska's remaining 40 percent interest in the venture.

The venture has recently completed two exploratory wells which tested oil at the rate of 1,226 and 1,705 barrels per day and two additional gas wells that are producing at an aggregate rate of 8 MMCF per day. In addition, 47 additional seismic structures have been identified on the acquired acreage.

Global Natural Resources Inc. is a Houston-based energy company engaged in the exploration, development and production of oil and gas in North America and owns an interest in long-term oil and gas production sharing contracts in Indonesia.

UNIVERSAL CITY, CA (MARCH 7) PR NEWSWIRE - Fred Mound has been promoted to president of Universal Pictures Distribution, it is announced today by Tom Pollock, chairman of the MCA Motion Picture Group. In his new post, Mound will continue to oversee the sales and distribution efforts for all Universal releases.

"Fred Mound's leadership in the area of distribution has clearly been one of the key elements in the success of Universal Pictures over the last year," says Pollock. "He has been able to put together some of the most competitive terms in the industry while continuing to insure that Universal product is played on the best screens in the country."

Prior to assuming his new post, Mound served as executive vice president of Universal Pictures Distribution, a post he has held since September 1988. He joined Universal in 1981 as vice president and assistant general sales manager and was promoted to senior vice president and general sales manager in 1984.

Mound began his career in 1951 as a booker with Universal in St. Louis. From 1952 to 1978, he held various positions with United Artists Corp., eventually being named vice president and assistant general sales manager. He also served as vice president and general sales manager of Associated Film Distributors from 1978 to 1981.

FAIRFIELD, CT (MARCH 7) PR NEWSWIRE - Clifford V. Smith, Jr., chancellor of the University of Wisconsin at Milwaukee, has been named president of the GE Foundation. The appointment is effective June 1, following the conclusion of the current academic term.

Smith, 58, has been chancellor of the Milwaukee institution since 1986. Immediately prior to that, he held a series of teaching and administrative positions at Oregon State University in Corvallis, Ore., where he also

served as director of the Council for Advanced Science and Engineering Education for the Oregon State System of Higher Education.

Earlier in his career, Smith held senior management positions with both the U.S. Environmental Protection Agency and the U.S. Nuclear Regulatory Commission, including the position of EPA regional administrator for the Pacific Northwest.

Smith holds a B.S. in civil engineering from the University of Iowa and both a M.S. in environmental engineering and a Ph.D. in radiological science from Johns Hopkins University. He and his wife Nina have three grown daughters.

GE and the GE Foundation are among the nation's leading supporters of education. Together they contributed nearly $40 million in 1989 to support education, social service, arts, environmental, and other not-for-profit organizations in the U.S. and abroad.

Last year, the GE Foundation announced two major initiatives for the 1990's: College-Bound and Faculty for the Future. Partnered with GE employee and retiree volunteer resources, the $20 million College-Bound program is helping to double the number of college-ready high school seniors from designated schools in poor, inner-city communities. The $15 million Faculty for the Future program will increase the number of women and minorities teaching at the higher education level in the fields of engineering, business, and the physical sciences.

At the GE Foundation, Smith will succeed Paul M. Ostergard who recently was named vice president and director of corporate contributions at Citibank.

PORTAGE, WI (MARCH 7) PR NEWSWIRE - Portage Industries Corp. (AMEX: PTG) today, reported the highest fourth quarter revenues in its history. Revenues of $7,151,000 rose 66 percent or $2,855,000 from depressed year-ago fourth quarter volume. The Dec. 31 period is the fourth consecutive quarter to quarter revenue increase. Revenues for the year rose to $25,685,000 versus $24,645,000 for 1988.

Earnings for the quarter rose to $310,000, or $.14 a share, compared to a 1988 fourth quarter loss of $520,000, or $.24 per share. Fourth quarter earnings more than offset the $290,000 nine-month loss through September, thereby resulting in fiscal 1989 earnings of $20,000, or a penny a share. A year earlier, 1988 resulted in a loss of $704,000, or $.32 a share.

Commenting on the significantly improved operating results, Bert Figi, vice president-finance, indicated that continued emphasis on new business development, improved manufacturing performance and cost containment programs resulted in substantially higher gross margins.

Portage's ongoing sales rose 21 percent during 1989. Revenues in 1988 contained more than $3,500,000 that were discontinued when Portage's largest customer began in-house extrusion in the third quarter of that year. Comparing $25 million of 1989 sales with $21 million of 1988 sales (excluding the customer), better reflects the success of the marketing programs.

Figi also indicated that new orders remain strong, with February backlog up $1,800,000 since year end. With the successful penetration of several new markets in 1989 and the installation of new "value added" production capability planned for the second quarter 1990, the company is optimistic that further growth in revenues and earnings will be achieved this year.

Portage Industries Corp. manufactures and markets a broad range of extruded plastic material, which includes a variety of monolithic (single layer) sheet and rollstock, as well as coextruded and barrier coextruded (multi-layer) materials used primarily to form specialized packaging, automotive parts, and industrial components.

The company has an outstanding reputation for quality products and working with new resins. Its coextrusion operation can produce from the broadest array of resin combinations in the industry.

HYANNIS, MA (MARCH 7) PR NEWSWIRE - Fibronics International Inc. (NASDAQ: FBRX) today announced year-end operating results.

For the year ended Dec. 31, 1989, revenues increased 21 percent to $48,983,000, as compared with revenues of $40,524,000 for 1988. The company's profits for the 12-month period ending Dec. 31, 1989, were nearly triple that of 1988 or $2,461,000, or 39 cents per share, as compared with a profit of $901,000, or 15 cents per share, for the same period in 1988.

Revenues for the fourth quarter of 1989 were $14,824,000, an increase of 38 percent, as compared to $10,757,000 for the fourth quarter of 1988. Net income for the quarter was $1,012,000, up 44 percent, or 16 cents per share, as compared with a profit of $704,000, or 11 cents per share, for the same period in 1988.

Fibronics International Inc. designs, manufactures, sells, installs and services fiberoptic and other high-speed information transfer and distribution systems. Fibronics offers total systems capability for integrated on-premises networks.

#90066p0265 03/07/1990 ~PR Newswire

EAST PALO ALTO, CA (MARCH 7) PR NEWSWIRE - The city of East Palo Alto and Ford Aerospace have launched an innovative summer intern program to help motivate local high school students to complete school and seek jobs in the aerospace industry.

The program will begin with eight to 15 students, selected by the Sequoia Union High School District, who will attend special orientation and training sessions in April and May. The students will assume entry- level jobs at Ford Aerospace's Space Systems Division this June.

The students will be exposed to the responsibilities and demands of corporate life, while simultaneously learning the skills needed to land a regular job in the industry after graduation. The students also will be involved in a year-round mentor program, and Ford Aerospace officials have agreed to provide classroom speakers and to assist the school district with field trips.

The Space Systems Division, located in Palo Alto, is one of Ford Aerospace's largest units and is responsible for building communications and weather satellites.

The head of the division, Bob Berry, and East Palo Alto Mayor Bill Vines met during a visit by President Bush to the Ford Aerospace complex last April. They began discussing the idea of an intern program last fall and resolved to make it a reality.

"The mayor and I both believe this is an excellent opportunity for all involved," said Berry. "These summer positions are going to expose the student to the industrial work environment, with actual hands-on experience, while demonstrating the job opportunities that exist in the aerospace and 'high tech' industries located in this area.

"We gain by developing a new local source of employees, and by providing our supervisors and potential supervisors the chance to refine their training skills."

The city government and school district serving East Palo Alto are working hard to counter drug abuse and a high dropout rate among local teens. According to Vines and Berry, the intern program will focus on students who have demonstrated their desire for an education, but who may be having some troubles in the classroom.

For example, a student who has demonstrated an interest in math, but who is struggling with English, could be motivated to improve his English performance by the knowledge of a job opportunity awaiting graduation.

"The targeted student is one who, with a shot in the arm, can go back to school in the fall looking forward to preparing himself for a satisfying career," Berry concluded.

Ford Aerospace, a wholly owned subsidiary of Ford Motor Company (NYSE: F), is a leader in command, control, communications and intelligence systems;

tactical weapon systems; satellites and space systems, and professional and technical services. The corporation is headquartered in Newport Beach Calif., with operations around the country.

HOUSTON (MARCH 7) PR NEWSWIRE - Union Texas Petroleum Holdings Inc. today reported that its Union Texas Petroleum Limited subsidiary has a 20 percent working interest in a successful well located four miles west of the Claymore field in the British North Sea.

The well, 14/19-24, flowed at daily rates of 2,542 barrels of oil with gravity of 33 degrees API and 0.5 million cubic feet of gas through a half-inch choke. The well was drilled to a total depth of 11,815 feet. Further drilling will be required to establish the full potential of the area.

In July 1989, a successful discovery located 2.6 miles northwest of the Claymore field was announced. The discovery well, 14/19-23, flowed at a rate of 2,500 barrels of oil daily.

Occidental Petroleum (Caledonia) Limited, as operator, has a 36.5 percent interest in well 14/19-24. The remaining interest is held by Texaco Britain Ltd. with 23.5 percent and LASMO North Sea plc with 20 percent.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

TOMS RIVER, NJ (MARCH 7) PR NEWSWIRE - Grayhound Electronics, Inc. (NASDAQ: GRAY) and IRC USA, Inc., a subsidiary of INOAC, the Japan-based billion dollar global company announced today the signing of a joint venture agreement.

The resulting new firm, INOAC No Fire Inc. to be owned equally by Grayhound and IRC, will market and distribute Grayhound's NO FIRE(R), a non-toxic, flame-retardant coating material. The territory specified in the agreement includes Japan, the People's Republic of China, Hong Kong, Australia, India and major Pacific Rim countries.

Grayhound's No Fire(R) coating material is a class A fire retardant: ratings of Zero Flame Spread, Zero Smoke Toxicity were achieved in certified tests conducted by United States Testing Company, Inc. Further successful flammability tests were conducted by Underwriters Laboratories Inc.(R), on surfaces composed of PVC, stainless steel and aircraft grade aluminum. No Fire also has exceedingly impressive insulation properties.

INOAC, IRS's parent firm, is a privately held billion dollar global industrial concern, comprised of operating companies & joint ventures in Japan and numerous overseas subsidiaries and joint ventures. Its product mix is diverse with primary emphasis on automotive parts sold to major Japanese and American manufacturers of passenger vehicles.

Thomas M. Ricci, president of Grayhound, said after the signing of the agreement, "We consider our arrangement with the INOAC organization to be a milestone in the continued growth and success of Grayhound. We look forward with great anticipation to working with our new partner in bringing our "No Fire" technology to the Pacific market.

WALTHAM, MA (MARCH 7) PR NEWSWIRE - Cambex Corporation (NASDAQ: CBEX) today announced a reduction in list prices for memory storage systems used with IBM Systems/3090 mainframe computers.

The Waltham, Mass., storage system supplier reduced prices of its STOR/9000 central memory product by 5 percent effective immediately. Pricing for its expanded storage unit remains unchanged. "With this modest adjustment, we continue to maintain at least a 30 percent list price advantage over IBM in both central and expanded memory pricing," Louis J. Finnegan, Cambex vice president of marketing, stated.

The new price for a 64-megabyte increment of Cambex STOR/9000 central storage is $275,000 compared to $392,000 for a similar increment from IBM. A 64-megabyte increment of STOR/9000 expanded storage remains at $105,000, compared to IBM's price of $150,000, Finnegan said.

Cambex is an independent supplier of memory systems for IBM mainframe computers. In the past 15 months, the company has shipped over 15 billion bytes of its STOR/9000 systems for installation in over 120 IBM system/3090 mainframes.

During the past 20 years, Cambex is the only independent memory supplier

to have built and installed memory in all five generations of IBM mainframes, including System/360, 370, 3030, 3080 and the current 3090 series.

IRVINE, CA (MARCH 7) PR NEWSWIRE - The "Man with the Hammer" continues to spread his influence. The well known trade mark will now be seen throughout the Central Coastal communities.

Western Exterminator Company, the largest pest control company serving California and Arizona, has acquired Cal Coast Pest Control, the leading providers of pest control service to the Central Coast area for more than 12 years. The sale to Western, effective Feb. 1, still provides a continuity of service and management. Bernie Parkins will continue to serve as manager of the Western/Cal Coast office located in Santa Maria, and all previous Cal Coast personnel will be staying on with Western.

Central Coast communities will benefit from the extended services now available. Western is recognized as a leader throughout the pest control industry, having the experience, staff and technical support necessary to

meet the needs of the entire area. Western/Cal Coast will offer complete commercial and residential pest control services. The Western staff of highly trained Service Technicians is supported by a Training and Technical Division which includes urban entomologists, quality assurance inspectors, environmental health specialists, registered sanitarians and an educational systems designer. Two of this division's members have lived in the Central Coast area for some time; Rick Coleson in Nipomo and Mike Storm in Los Osos.

Western Exterminator Company has been owned and operated since 1921 by the same family that founded it and is known for its commitment to quality service and customer satisfaction. Corporate headquarters are in Irvine.

HOUSTON (MARCH 7) PR NEWSWIRE - The Board of Directors of Browning-Ferris Industries Inc. (NYSE: BFI) today declared the corporation's regular quarterly cash dividend on common stock. The cash dividend of 16 cents per common share is payable April 6, 1990, to shareholders of record at the close of business on March 19, 1990.

The Board of Directors also approved an amendment to the company's shareholder rights plan reducing certain percentage thresholds in the plan. The amendment reduces from 20 percent to 10 percent the percentage ownership which gives rise to a "stock acquisition date" and from 30 percent to 15 percent the percentage ownership which activates the "flip-in" rights under the plan. The holders of rights issued under the plan become entitled to special purchase rights in the event of certain merger or other business combination transactions on or after a "stock acquisition date" or when the percentage flip-in threshold is reached. The company indicated that the plan was not amended in response to any effort to acquire control of the company.

Browning-Ferris Industries Inc. is one of the largest publicly- held companies engaged primarily in providing waste services. Subsidiaries and affiliates collect, transport, treat and dispose of commercial, residential and municipal solid waste and industrial hazardous wastes. BFI subsidiaries are also involved in recycling, resource recovery facilities, medical waste services, portable restroom services, municipal and commercial sweeping operations and asbestos abatement.

CHICAGO (MARCH 7) PR NEWSWIRE - GATX Terminals today announced that it has acquired the worldwide interests of the Unitank bulk liquid storage business of Tate & Lyle PLC, and DRT Industries Inc. for approximately $121 million. Unitank is an international terminalling company comprised of terminals in the United States and the United Kingdom, and joint venture relationships in the United Kingdom and Malaysia.

The acquisition includes two United States chemical terminals; seven United Kingdom terminals; and interests in two additional United Kingdom joint ventures, a chemical terminal in Malaysia, and a majority interest in a 10-mile pipeline to the Manchester airport under construction in the United Kingdom. This acquisition adds over 9.0 million barrels to GATX Terminals' capacity.

Robert E. Claypoole, president, GATX Terminals, stated, "In addition to enhancing our key markets in the United States, this acquisition renders an opportunity for continued growth for GATX Terminals in worldwide operations, enabling us to better serve our customers.

"Because of the location of Unitank's terminals in the United Kingdom, we will be able to reach many primary distribution markets for both chemical and petroleum products. This investment marks a first for GATX Terminals in the United Kingdom."

James J. Glasser, chairman, president and chief executive officer of GATX added, "This acquisition reinforces one of our corporate objectives to be a leader in our respective business lines. The addition of Unitank to GATX makes our capacity and number of facilities dedicated to the public storage of bulk liquid products the largest in the world with 48 facilities having a capacity of 64 million barrels."

GATX Terminals provides storage and handling of commodities such as petroleum, chemicals, petrochemicals, and vegetable oils; and serves as a vital interface among distribution and transportation modes including railroads, ships, barges, trucks and pipelines. GATX Terminals are located near major distribution and transportation points in North America and the United Kingdom, as well as continental Europe and Asia. GATX's North American terminalling network includes the ownership of three pipelines.

GATX Corp. (NYSE: GMT) provides asset-based services to industry by providing railcar leasing, maintenance and management; capital equipment leasing, financial services, real estate financing, bulk liquid terminal storage; warehousing and distribution services; and Great Lakes shipping.

LANDOVER, MD (MARCH 7) PR NEWSWIRE - Hechinger Company (NASDAQ-NMS: HECHA HECHB), a chain of specialty retail do-it-yourself home centers, today announced that the board of directors has elected John W. Hechinger Jr., president of the company, to serve as Hechinger Company's new chief executive officer.

The board further elected Stephen E. Bachand, executive vice president of the company, to assume the responsibilities of chief operating officer of the company.

Until now, the post of chief executive officer was jointly held by John W.

Hechinger Sr. and Richard England, Hechinger Company co-chairmen, both age 70, who shared these responsibilities. England has announced plans to retire and become chairman emeritus, and John W. Hechinger Sr. will assume the responsibilities of chairman.

John W. Hechinger Jr. has been with Hechinger Company for 18 years and has served as a member of the board of directors since 1984 and as the company's president since 1986. Hechinger's tenure with the company has included serving in the Real Estate, Construction, Market Research, Store Operations and Merchandising areas of the company.

Bachand joined Hechinger Company in 1963. He was named a director in 1971 and executive vice president in 1984. As chief operating officer, Bachand will oversee all operating functions of the company including the Home Quarters Warehouse division.

England has expressed his desire to curtail his business activities in order to devote more time to philanthropic and community activities. He will, however, remain an active member of the Hechinger Company board of directors and will serve on the Finance and Compensation committees of the board.

TORONTO (MARCH 7) PR NEWSWIRE - Denison Mines Limited (Toronto, Montreal: DEN.A) announced today that it will reduce its Elliot Lake workforce by about 28 percent to protect the viability of its operations in the face of extremely competitive uranium markets.

Jake Fowler, Denison's president and chief operating officer, said that the company plans to reduce its current workforce of 1,560 by approximately 450 people by August 1, 1990.

"The decision, taken after careful review, is necessary to protect the jobs and livelihoods of our remaining Elliot Lake employees," he said.

"To achieve the workforce reduction with a minimum number of layoffs and with the least economic dislocation, we intend to meet with the unions representing our employees and with the various levels of government to formulate programs that would include early retirement, inter-company transfers and relocation assistance."

Fowler said that, "The inescapable reality all of us must accept is that the Elliot Lake orebody is very low grade and present and forecast prices

for uranium in the international marketplace will not support current production levels."

PHILADELPHIA (MARCH 7) PR NEWSWIRE - To the children hurt in Wednesday's train accident, and to the other children lying abed, Apple Computer, Inc. brings hours of fun.

This Friday, Apple will very gently place its MacIntosh computers at the children's bedsides. For these children, unable to go outside to see the first signs of spring, Apple will have software that invites youngsters to draw flowers, paint with MacPaint, and follow the adventures of a pussycat who scampers through gardens, up trees, and into secret hiding places.

It's part of Apple's national Thanks to Teachers campaign, which encourages students in grades K-12 to nominate excellent teachers in the greater Philadelphia, Southern New Jersey and Northwestern Delaware areas. In addition to Apple Computer, other program sponsors include KYW-TV, The Private Industry Council of Philadelphia, Inc., and Friendly's Restaurants.

A panel of local community leaders will select five winning teachers from this area from the nominations. Each winning teacher will receive an Apple Computer and an invitation to participate in a national awards ceremony and leadership institute in Washington in June.

To nominate a teacher you want to thank, simply pick up a free application form at any Apple Education Computer Dealer, at any Friendly's Restaurant, or call for an application form at KYW-TV at 215-238-4923. Deadline for submitting applications is March 12, 1990.

CONTACT: Carla de Augustine of The Children's Hospital, 215-590-4100, or Joyce Winslow of The Pellerin Group, 202-337-5990, for Apple Computer, Inc.

HOUSTON (MARCH 7) PR NEWSWIRE - Packaging Corporation of America, a unit of Tenneco Inc. (NYSE: TGT), has acquired the assets of Hanover Container, a manufacturer of corrugated products located in south central Pennsylvania.

Hanover Container, formerly known as Bliss Box, is a 50,000 square-foot sheet plant which produces corrugated packaging for customers in the Mid-Atlantic states. Hanover's 1989 sales approached $5 million.

"Adding Hanover Container to our already strong base on the Eastern Seaboard is a strategic move that will benefit both PCA and its customers " said Monte R. Haymon, president and CEO of the Evanston, Ill.-based company. "With the recent investment of capital in our Lancaster, Pa. corrugating facility, and the continued strong performance of our Baltimore sheet plant, we can provide product selection and service that are second to none."

A reputation for service has earned a loyal customer following for Hanover Container, founded in 1972 by Thomas Bliss. Bliss, the company's owner at the time of the asset acquisition, will join PCA as general manager of the Hanover facility.

Sheet plants like Hanover Container print, cut and fold corrugated sheets made by larger plants, converting them into containers, displays and other corrugated products. These facilities are often able to respond to customer demands more quickly than corrugating facilities and are adept at meeting tight deadlines and filling small orders.

PCA, a Tenneco company, has built a network of container facilities including both corrugating and sheet plants, that serve customers in various industries across the United States. The company is also a leading manufacturer of recycled paperboard, folding cartons, molded fibre products and aluminum foil and plastic food containers.

Tenneco Inc. is a Houston-based, diversified industrial corporation with major business interests in natural gas pipelines, farm and construction equipment, automotive parts, shipbuilding, packaging, chemicals and minerals.

HOUSTON (MARCH 7) PR NEWSWIRE - Union Texas Petroleum Holdings Inc. (NYSE: UTH) today announced that Pertamina, the state petroleum enterprise

of the Republic of Indonesia, and the Indonesian Joint Venture, in which Union Texas has an approximate 38 percent working interest, initialed a 20-year extension to the current production sharing contract (PSC). The extension is subject to government approval. Formal signing of the extension is expected to occur in the second quarter of 1990. The extended PSC, as initialed, will expire August 7, 2018.

The joint venture is involved in the exploration, development and production of oil and gas in a 1.5 million-acre area of Indonesia. Revenues of the joint venture are derived principally from the sale of liquefied natural gas under long-term contracts with utility and industrial companies in Japan.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. explores for and produces oil and gas in the United States and overseas and has petrochemicals and natural gas processing interests.

CAMDEN, SC (MARCH 7) PR NEWSWIRE - Builders Transport, Incorporated (NASDAQ: TRUK) today announced operating results for the fourth quarter and year ended Dec. 31, 1989.

Revenues increased 7 percent and 12 percent for the fourth quarter and year ended Dec. 31, 1989, respectively, compared to the same periods in the prior year, while results of operations reflect a loss of $2,366,894, or 55 cents per share, for the fourth quarter of 1989 and a loss of $2,283,276, or 54 cents per share, for the year ended Dec. 31, 1989. The results of operations for both the fourth quarter and year ended Dec. 31, 1989, include an extraordinary gain of $3,224,000, resulting from early retirement of a portion of the company's 6-1/2 percent subordinated convertible debentures. Results for the same periods ended Dec. 31, 1988, reflected net losses of $2,723,545, or 65 cents per share, and $611,498, or 15 cents per share, respectively.

Operating results for the fourth quarter and the current year were adversely affected by severe weather conditions, accident-related expenses and sharply increased fuel costs in December, as well as substantial increases in workers compensation costs, and increases in group health costs. Demand for the company's services remains strong, as evidenced by continued revenue growth of 7 percent for the quarter and 12 percent for the year.

On Feb. 26, 1990, the company and Comcar Industries, Inc. announced their

execution of a non-binding letter of intent, which is subject to a number of conditions, providing for the combination of their companies through Comcar's acquisition of all Builders' outstanding common stock for a cash price of $15 per share. There is no assurance that a transaction will be concluded.

Builders Transport is a truckload carrier transporting a wide range of general commodities.

HOUSTON (MARCH 7) PR NEWSWIRE - Pogo Producing Co. (NYSE: PPP) today reported production test figures from its Donato Serna No. 1 well in Zapata County, Texas. Pogo is the operator of this Wilcox sands well which represents a discovery of new gas reserves south of the Lopeno Field.

Pogo will complete this well dually from the "I" and "K" sands from perforations between 10,944 to 10,960 feet and 11,308 feet to 11,318 feet, respectively. The "K" sand tested 4.5 million cubic feet on a 12/64 inch choke with 107 barrels of water at a flowing tubing pressure of 5,570 pounds; the "I" sand tested 1.9 million cubic feet per day on a 10/64 inch choke with a flowing tubing pressure of 3028 pounds.

Pogo owns a 50 percent interest in this new gas well and expects initial deliverability from both zones to be 6 million cubic feet of gas per day when the well is brought on-stream. Pogo's partners in this well are AMAX Oil & Gas Inc. (28.33 percent), Tesoro Exploration and Production Co. (16.67 percent) and Bergstein Oil and Gas Partnership (5 percent).

SPRINGFIELD, VA (MARCH 7) PR NEWSWIRE - Versar Inc. (AMEX: VSR) announced today the promotion of George K. Oss to vice president in charge of laboratory operations.

Oss joined Versar in December 1989 as general manager of laboratory operations. In this capacity, Oss has overall business management responsibility for the company's environmental laboratory services. This includes strategic planning, marketing, and operational control of all laboratory operations.

Prior to joining Versar, Oss was with Atlantic Research Corporation in Alexandria, Va., from which he retired in October 1989 after 26 years of service. When he retired, Oss was vice president and director, space and strategic systems. Before that, he was vice president and general manager of ARC's Teleproducts Division, which became a $40 million-a- year 300-person operation under his leadership.

Oss received his bachelor of science degree in aeronautical engineering from West Virginia University in 1958. His graduate studies were in engineering management at George Washington University. Oss has five patents and is the author of numerous technical publications on rocket propulsion and data communication systems. He is a member of the American Institute of Aeronautics and Astronautics, the American Electronics Association, the Armed Forces Communications and Electronics Association, and the Advisory Committee to the Mechanical and Aerospace Engineering Department of West Virginia University. He is currently a licensed pilot and a member of the Aircraft Owners and Pilots Association.

Versar also announced today the promotion of Gordon E. Hamlet to the position of treasurer. Hamlet, the recipient of a bachelor of science degree in business administration from the University of Richmond, Richmond, Va., made his home in that city until joining Arthur Andersen & Co. in Charlotte, N.C. in 1962. He served a audit manager for that firm until 1968 when he joined The Stanwick Corporation in Arlington, Va.

Stanwick, a government contractor providing engineering systems and management consulting services primarily to the U.S. Navy, also maintained operations in Europe and the Middle East. Hamlet served as the company's vice president, treasurer, and chief financial officer until 1983, at which time he joined the executive staff of Penril Corporation as corporate controller. Hamlet, a C.P.A., brings to Versar over two decades of experience in the fields of finance, accounting, and government contracts administration.

Dr. Michael Markels Jr., president and chief executive officer of Versar, said, "These promotions are part of a continuing effort to strengthen the management of the company in order to improve profitability and provide efficient services to our clients."

Versar provides a wide range of scientific and technical services to solve environmental and health and safety problems caused by pollutants, hazardous materials and toxic substances.

SAUSALITO, CA (MARCH 7) PR NEWSWIRE - Phoenix Network Inc. (NASADQ: PHXN) a long distance network management company based here, today announced the addition of two executive officers to its corporate staff.

J. Erik Mustad, a 25-year veteran in telecommunications, has been elected executive vice president-marketing and will oversee all of the company's sales, advertising and promotional efforts.

Mustad most recently has been involved in venture capital and start up activities.

He was the founder, CEO and largest stockholder of TCI Communications, a major Southern California interconnect company that was sold to Intertel Inc., a NASDAQ NMS company, in 1982. He was also an initial investor, marketing officer and director of San Francisco-based Centex Telemanagement (NASDAQ: CNTX), also a NASDAQ NMS company.

The company also announced the appointment of Jeffrey L. Bailey as chief financial officer and vice president-finance. Bailey has spent 14 years as a financial executive in public accounting, 10 of which were with Arthur Young, most recently as a principal. Prior to joining Phoenix, he was senior manager at Grant Thornton.

Thomas H. Bell, chief executive officer, commented that "The addition of two executives with the kind of expertise and success that these men share

in their past endeavors will help us meet our objectives of growth, professionalism and success in the coming years."

Phoenix Network trades over the counter on NASDAQ under the symbol PHXN.

#90066p0369 03/07/1990 ~PR Newswire

NEW YORK (MARCH 7) PR NEWSWIRE - Avery, Inc. (NASDAQ: AVRY) announced today that it has changed it year end from a fiscal year ending on Sept. 30 to a calendar year ending on Dec. 31. The change in year end caused the three-month period ended Dec. 31, 1989, to be a transition period for which the company will file a transition report on Form 10-K rather than the normal quarterly report on Form 10-Q.

For the three months ended Dec. 31, 1989, Avery, Inc. reported income from continuing operations of $159,000 versus a loss of $420,000 for the year-earlier period. The company's results from continuing operations primarily consist of investment income on its marketable securities and commercial paper, interest expense, and general and administrative expenses.

Income from discontinued operations increased to $25.6 million (36 cents per fully diluted share) in 1989 versus $3.6 million (4 cents per fully diluted share) in 1988, reflecting the $25.6 million after-tax gain on the previously reported October 1989 sale of Uniroyal Chemical Holding Company (UCHC). The operating results of UCHC are deferred subsequent to June 30, 1989, and, accordingly, are not included in the 1989 period. The 1988 income, which reflects only the operating results of UCHC, principally represents investment income including an $8.4 million gain on the sale of the company's investment in Triangle Industries, Inc. less interest expense.

Net income for the three months ended Dec. 31, 1989, amounted to $23.1 million (34 cents per share), compared to $6.5 million (8 cents per fully diluted share) last year. Such income is net of an extraordinary charge of $2.7 million (3 cents per share) for the 1989 period and includes extraordinary income of $3.3 million (3 cents per fully diluted share) for the 1988 period. The extraordinary items are associated with the early extinguishment of debt in both the 1989 and 1988 periods and the utilization of a capital loss carryforward for income tax purposes in the 1989 period.

The company, following the sale of UCHC and related transactions, has working capital of $25.9 million (including cash, cash equivalents and marketable securities of $28.2 million), long-term debt of $12.5 million,

and stockholders' equity of $13.4 million. The company will attempt to invest its remaining cash and marketable securities, after liquidating current liabilities, in acquisitions and is continuing its search for acquisition candidates meeting the following criteria:

-- a United States industrial company (i.e., one that is not primarily engaged in the service section or real estate development or management) that derives at least two-thirds of its revenue from domestic operations;

-- a purchase price for the stock or assets acquired (including the amount of all indebtedness and contingent liabilities assumed) of $250 million or less; and

-- a strong, in-place management.

Pending any such acquisition, the company's cash is being invested primarily in high quality commercial paper.

(A) On Oct. 30, 1989, the company completed the sale of Uniroyal Chemical Holding Company (UCHC), a wholly owned subsidiary of the company, the parent of Uniroyal Chemical Acquisition Corporation (UCAC) and the indirect parent of Uniroyal Chemical Company, Inc. to UCC Investors Holding, Inc., a company formed by certain members of the management of Uniroyal Chemical. The company originally had announced on Jan. 27, 1988, its intention to sell Uniroyal Chemical and, subsequently, the company changed the entity being held for sale to UCAC effective June 30, 1988, and to UCHC effective June 30, 1989.

The company realized a gain of $25,601,000, which is net of operating losses and translation adjustments deferred since the respective sale announcement dates to Oct. 30, 1989, and a deferred gain of $14.5 million. The $25,601,000 gain on sale is included in discontinued operations for

the three-month period ended Dec. 31, 1989. The results of operations for UCHC for the quarter ended Dec. 31, 1988, have been reclassified to discontinued operations and, since the company believed the sale would result in a profit, the results of operations of Uniroyal Chemical, UCAC and UCHC subsequent to their respective sale announcement dates to Oct. 30 1989, were deferred.

Additionally, management of the company has previously disclosed its intention to dispose of Avery Coal Co., Inc., a wholly owned subsidiary of the company. The company tried unsuccessfully to sell Avery Coal, and as an alternative Avery Coal has ceased coal mining operations and is disposing of its assets, after which the company plans to proceed with the liquidation of Avery Coal. Such asset dispositions and liquidation should be completed by April 30, 1990. Such undertaking is expected to result in a loss of approximately $5,348,000, all of which was provided as of Sept. 30, 1989, and $352,000 of which was provided during the quarter ended Dec. 31, 1988.

(B) The income (loss) from continuing operations for the three months ended Dec. 31, 1989, includes a gain on the sale of an investment of $781,000, net of taxes of $403,000, partially offset by a provision for unrealized losses on marketable securities of $355,000, net of a tax benefit of $183,000. Such realized and unrealized gains and losses are dependent upon the timing of securities transactions and/or fluctuations in values as the securities markets and, accordingly, can be non-recurring.

(C) The extraordinary income (charge) for the three months ended Dec. 31, 1989, includes a charge of $2,785,000, net of tax benefit of $696,000, attributable to the writeoff of previously incurred but unamortized financing fees associated with the early extinguishment of debt and income of $82,000 from the utilization of a capital loss carryforward for income tax purposes. The extraordinary income for the prior period represents the net gain (with no tax effect) attributable to the early extinguishment of debt that was acquired at market prices, which in the aggregate were less than the principal amount of the debt. Such gain is net of expenses principally representing the writeoff of previously incurred but unamortized financing fees and original issue debt discount associated with the debt.

(D) Fully diluted earnings (loss) per share are based on the weighted average number of outstanding common shares increased by (i) common share equivalents which included the assumed conversion of the company's convertible preferred stock and the assumed exercise of stock options and warrants during the periods such preferred stock and stock options and warrants were outstanding, and (ii) contingent issuances of common shares from the assumed conversion of the company's convertible debt during the period such debt was outstanding.

Such common shares, common share equivalents and contingent issuances of common shares aggregated 71,581,000 and 98,013,000 for the three months ended Dec. 31, 1989, and 1988, respectively. The earnings (losses) for earnings (loss) per share purposes have been adjusted by $975,000 (including $321,000 relating to the extraordinary income (charge) per share) and $1,223,000 (including $296,000 relating to discontinued operations per share) for the three months ended Dec. 31, 1989, and 1988, respectively, relating to the assumed exercises of stock options and warrants.

DENVER (MARCH 7) PR NEWSWIRE - At a special meeting here today, stockholders of Ideal Basic Industries Inc. (NYSE: IDL) approved the merger of Ideal into Holnam Inc., the U.S. subsidiary of Holderbank Financiere Glaris Ltd., a publicly-held Swiss corporation and one of the world's largest manufacturers of cement. The merger is expected to be effective at the close of business March 8.

Holnam common stock has been approved for listing and is expected to begin trading on the New York Stock Exchange under the symbol HLN, on March 9, 1990. Under the merger agreement, stockholders of Ideal will receive one share of Holnam common stock for every four shares of Ideal common stock. As a result of the merger, minority shareholders will own approximately 14.4 million shares of Holnam common stock. Holderbank will own 87.2 percent of the outstanding common stock of the company.

Additionally, Ideal's 9-1/4 percent sinking fund debentures, which will be assumed by Holnam in the merger, will continue to be listed for trading on the New York Stock Exchange.

Holnam owns 100 percent of Dundee Cement Co., which is expected to merge into Holnam on March 21, and 60 percent of the shares of St. Lawrence Cement Inc., a publicy-held Canadian manufacturer. With the Ideal merger and consolidation of the Dundee operations, Holnam's total cement production capacity in the U.S. and Canada will total 15.2 million tons annually, making Holnam one of the largest producers in this market.

Principal officers of Holnam, which is to be headquartered in Dundee, Mich., are: Peter Byland, chairman; Marc R. von Wyss, president and chief executive officer; and James J. Woods, executive vice president and chief financial officer.

Holnam is a leading producer of cement and related construction products in the U.S. and Canada. Combined revenues of Holnam are in excess of $1 billion.

WASHINGTON (MARCH 7) PR NEWSWIRE - Eastern Airlines today received antitrust clearance from Department of Justice for the proposed sale of its Latin American routes to American Airlines.

The company said it anticipates the Department of Transportation will give the route sale expedited consideration, and the U.S. Bankruptcy Court has scheduled a March 29 hearing on the transaction.

"We're pleased that the Department of Justice has given its unconditional approval," said Phil Bakes, Eastern's president and chief executive officer. "The sale of these routes serves the public interest and is an essential part of our plan to emerge from bankruptcy as a strong, viable airline."

Eastern's unsecured creditors committee has already approved the sale as part of the airline's plan to emerge from bankruptcy. The company expects the deal to close early this summer.

Eastern announced its plan to sell the routes and related assets on Dec. 19. Eastern will realize $349 million from the sale, which includes routes to 14 Central and South American countries.

WASHINGTON (MARCH 7) PR NEWSWIRE - The following was released today by the National Council of IRS Whistleblowers:

A Boston woman who made a 10 cents error on her 1986 tax return, has been hit with a tax bill for $54.94, 500 times the dime she originally owed the Internal Revenue Service.

"When I saw the letter from the IRS that night," explained Mary Stinson, "I said, 'What do they want now?'"

The IRS letter informed Stinson that she had not paid the 10 cents owed

from her 1986 tax return. The IRS assessed the startled Bostonian a $24 late filing penalty plus $30.84 in interest, bringing the grand total to $54.84.

Paul DesFossess, president of the National Coalition of IRS Whistleblowers a watchdog group established by the Church of Scientology's Freedom magazine, termed the IRS billing "obscene."

"When the IRS can harass honest, hard-working taxpayers by billing them 500 times what they owe, it's time for Congress to take a serious look at this agency's operations," said DesFossess, a 20-year veteran with the IRS.

SAN FRANCISCO (MARCH 7) PR NEWSWIRE - Chevron U.S.A. Inc. announced a change in the posted prices it will pay for crude oil from California and Alaska fields. Postings are decreased by up to $0.50.

The change was effective today at 7:00 a.m.

Chevron will now pay:

for 35 API -- Cook Inlet -- $17.65
26 API -- Buena Vista -- $17.45
19 API -- Huntington Beach -- $16.70

13 API -- Kern River -- $15.75
27 API -- Long Beach -- $17.85
13 API -- Midway Sunset -- $15.75
17 API -- Wilmington -- $16.55

The gravity adjustment scale is as follows:

Above 40.0 deg. -- $0.000 per tenth degree API
20.0 to 40.0 -- $0.015 per tenth degree API
Below 20.0 -- $0.010 per tenth degree API

New prices for all fields are reflected in Chevron's California and Alaska Crude Oil Price Bulletin 90-CA5. Bulletins are issued periodically reflecting price increases or decreases as market conditions change.

GAINESVILLE, GA (MARCH 7) PR NEWSWIRE - ZF Transmissions, Gainesville, Ga., has been awarded Ford North American Automotive Operation's ''Q1 Award'' for quality, the company has announced.

The award recognizes outstanding quality control practices and performance by Ford suppliers. ZF Transmissions, a division of ZF-AG, Friedrichshafen, West Germany, has manufactured almost 200,000 manual light truck transmissions for Ford F-Series pickup trucks since it began

operations in Gainesville in 1987. The plant also manufactures Super Duty parking brakes for Ford.

The Gainesville facility is one of six ZF plants worldwide to receive the Q1 Award from Ford.

''The Q1 Award is something very difficult to get in the automotive manufacturing industry,'' according to Roland Heil, vice president, ZF Transmissions. ''The award evaluation entailed a comprehensive review of plant practices and performance. Ford pays particular attention to a plant's ability to maintain the highest quality while implementing new manufacturing processes.

''The satisfaction of the customer -- both Ford assembly plants and the ultimate retail customer -- is a major consideration in determining who gets the award,'' Heil said.

The Q1 Award places ZF in a ''preferred supplier situation with Ford,'' he added. ZF supplies transmissions for five Ford Motor Co. assembly plants in the United States and Canada.

ZF's worldwide manufacturing facilities produce gears, transmissions, pumps, axles and other drive systems. Markets served include on- and off-road heavy duty vehicles, automotive, marine and special equipment industries. ZF-AG, a Fortune International 500 company, is celebrating its 75th anniversary in 1990.

#90066p0398 03/07/1990 ~PR Newswire

LOS ANGELES (MARCH 7) PR NEWSWIRE - East met West today in a demonstration of a practical, economical technology for connecting Integrated Services Digital Network (ISDN) systems on opposite sides of the world.

The demonstration, conducted by Pacific Bell, AT&T, Nippon Telegraph and Telephone Corp. (NTT), and Kokusai Denshin Denwa Company Ltd. (KDD), connected ISDN systems located in Los Angeles and Tokyo.

Pacific Bell used its recently introduced CENTREX IS (Integrated Systems) for the demonstration of ISDN international videoconferencing and Group 4 facsimile transmission. AT&T's 56-Kilobit-per-second Switched Digital International Service (SDI) carried the international signal to Japan.

"This demonstration is a significant milestone in dispelling the myth in

some wings that ISDN is a technology without immediate usefulness because of the difficulty in interconnecting system 'islands,'" said John Seymour, Pacific Bell vice president for the company's Southern California business market. "It's important not because it shows the future possibilities for ISDN, but because it demonstrates what we can do today."

"These applications of ISDN show the benefits of creative partnering between vendors and service providers to meet customers' needs," said Dale Rogers, AT&T ISDN International project manager. "As a result, important ISDN services are now available on a switched basis using AT&T

technology, such as our 5ESS Switch and switched-56-Kbps offering."

The link carried compressed video at 112 Kbps by combining two CENTREX IS "B" channels and a pair of SDI circuits. In another demonstration, a single 56-Kbps circuit transported the Group 4 facsimile transmissions.

The demonstration utilized videoconferencing units from PictureTel and Kyocera, Canon Group 4 facsimile machines and ISDN terminal adaptors manufactured by Fujitsu and Hitachi. Pacific Bell's CENTREX IS was served from an AT&T 5ESS Switch.

Seymour said that using a switched transmission system allows users to conduct videoconferences or other applications on an ISDN system at a fraction of the cost because they pay only for the time they use the network. In addition, compressing the video signals from the standard bandwidth of 1.5 Megabits per second to 112 Kbps reduces costs for transmission and equipment.

"Overall, this is a very cost-efficient design for connecting ISDN systems " said Seymour, "and it uses technology that's available today."

Seymour said Pacific Bell currently can provide interconnections between CENTREX IS and international or domestic interexchange carriers under contract, subject to the approval of the California Public Utilities Commission. He said that the company plans to ask the commission for approval to offer the service under tariff later this spring.

CENTREX IS is a basic-rate (2B+D) ISDN enhancement to the company's flagship business communications system. It is available in major metropolitan areas throughout California.

Group 4 is the designation for the next generation of facsimile services. Group 4 facsimile produces letter-quality reproductions of documents on standard paper at a rate of less than 10 seconds per page.

Pacific Bell is a subsidiary of Pacific Telesis Group, a diversified telecommunications corporation based in San Francisco.

LOS ANGELES (MARCH 7) PR NEWSWIRE - Hilton Hotels Corp. (NYSE: HLT) announced that its board of directors met today to consider two acquisition proposals. After extensive deliberations, the board concluded that the interests of the company and its shareholders will be best served by remaining independent and realizing its long-term values as an independent company. The board has therefore decided to terminate its consideration of acquisition proposals.

Barron Hilton, chairman of the board and president of the corporation, stated, "We have been considering a sale of the company, among other alternatives, since last summer. At the time we began the exploration process, the world economy, the market for acquisition financing and the investment climate for real estate and hotels were each far stronger than they are today. The significant adverse developments in each of these areas were reflected in the acquisition proposals we received."

Hilton further stated that the board expressed its confidence in the strategies being pursued by management to improve corporate profitability. "Our new hotel-casino in Laughlin, Nev., is expected to make an immediate contribution to profit. The introduction of two new Hilton Suites and two Cresthil by Hilton properties this year will further our penetration in new hotel segments in the United States. Our presence internationally will be much more visible with the opening of properties in London, Hong Kong, Monte Carlo, Dublin and Cancun.

"These exciting new properties, as well as our existing portfolio of hotels and hotel-casinos, will benefit from our improved HHonors frequent visitor and other marketing programs. Our experienced and talented management team will redouble their efforts to improve profitability and aggressively pursue expansion opportunities."

#90066p0405 03/07/1990 ~PR Newswire

NEW MILFORD, NJ (MARCH 7) PR NEWSWIRE - Polifly Financial Corp. (NASDAQ: PFLY), the holding company for Polifly Savings and Loan Association ("Association"), announced today that the corporation and the association have entered into a consent agreement with the Office of Thrift Supervision ("OTS") which substantially restricts their activities.

In the event that the corporation, the association or their directors or officers default on any obligations, duties or conditions under the agreement, the OTS may take whatever legal action it deems appropriate including, commencing administrative enforcement proceedings, imposing civil money penalties, placing the association into conservatorship or receivership, or commencing a civil action in the federal courts.

The consent agreement affirms the prior determination of the OTS that the association is deemed not to be an "eligible savings association" within the meaning of the recently enacted Financial Institutions Reform, Recovery and Enforcement Act of 1989 and under OTS regulations. Therefore at the present time the association may no longer include supervisory goodwill in its calculation of core capital. If the exclusion of approximately $8.9 million of supervisory goodwill from core capital results in the association not meeting any of its minimum regulatory capital requirements, the association will be required to submit a capital plan to the OTS for approval. In any event, the association is required to adopt a business plan and submit such plan to the OTS for approval.

Under the terms of the consent agreement, the association is not permitted to increase its total assets during any quarter in excess of net interest credited on deposits without the prior written approval of the OTS. The association is required to cease all commercial lending to corporate entities, partnerships, joint ventures and other groups. In addition, the association is generally prohibited from making any new loan or investment without the prior written approval of the OTS, except (1) advances necessary to honor existing binding commitments to fund loans or loans in process, (2) investments that qualify as liquid assets pursuant to regulations, (3) owner-occupied, one-to-four family mortgage loans and (4) certain mortgage-related securities.

Without first obtaining prior approval from the OTS, the association is generally also prohibited from (1) advancing any funds to any of its service corporation subsidiaries or affiliates, (2) making additional advances on construction loans in process, (3) extending or modifying the terms of any loan, (4) selling or exchanging bulk assets, (5) engaging in any sale of deposits, (6) releasing any borrower or guarantor from personal liability on any loan, (7) accepting or renewing any brokered orjumbo deposits and (8) making any dividends or other capital distributions. Polifly has suspended the declaration and payment of dividends on its common stock.

The consent agreement also places restrictions on both the corporation's and the association's relationship with its directors, officers and employees and with agents, attorneys and consultants. The terms of the agreement require, in certain instances, that the OTS give its prior approval to transactions between the corporation, the association and such

persons. In addition, the OTS is given the authority under the agreement to request the resignation of any director or officer and, if necessary, issue an order for the removal of any institution-affiliated person of the association. The consent agreement is to remain in effect until it is terminated by the OTS.

Polifly received notice today of a class action lawsuit filed in the United States District Court for the District of New Jersey on March 2, 1990, on behalf of certain purchasers of Polifly stock against Polifly, its president and chief executive officer and its chief financial officer. The lawsuit alleges, among other things, violations of the federal securities laws with respect to various documents, releases and statements issued to the investing public regarding Polifly's financial condition. The lawsuit seeks unspecified damages, including costs and expenses of the lawsuit and attorneys and other fees. Management of Polifly intends to vigorously defend against the lawsuit.

HOUSTON (MARCH 8) PR NEWSWIRE - Rockwell International Corp.'s Space Operations Company (RSOC) has been selected by the National Aeronautics and Space Administration's (NASA) Johnson Space Center (JSC) for negotiations leading to an award of the Operations Support Contract (OSC).

The 10-year cost-plus-award-fee Operations Support Contract totals $814 million.

Other team members include Barrios Technology Inc., Houston; Bendix Field Engineering Corp., Columbia, Md.; Unisys Corp. Space Systems Division, Houston; Omniplan Corp., Santa Monica, Calif.; Science Applications International Corp., San Diego; and Systems Management American Corp., Norfolk, Va.

The Rockwell team will be responsible for the support related to operations concepts development and mission, flight crew, and facility operations functions for the Space Station Freedom Program (SSFP) and other advanced space flight programs supported by JSC.

The work involves maintenance and operations support to the JSC Mission Operations Directorate for major new ground facility development and sustaining engineering.

"The Operations Support Contract is a major win for the Rockwell team," said Glynn S. Lunney, RSOC president. "Our four years of proven performance on the Space Transportation System Operations Contract was a

plus for us, and we believe the award of this contract by NASA is a direct vote of confidence in our employees."

RSOC currently manages Space Shuttle operations functions for JSC under the Space Tranportation System Operations Contract (STSOC). RSOC employs approximately 2,200.

Rockwell International (NYSE: ROK) is a $12-billion, multi- industry company applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

NEWPORT BEACH, CA (MARCH 8) PR NEWSWIRE - Air/Lyon Inc., announced the acquisition of International Aircraft Support Inc. (IASI), an aviation engine and engine parts supplier in Belmont, Calif., from its chairman and owner, Roland Gauthier. Details of the acquisition were not disclosed.

Air/Lyon Inc., based in Newport Beach, is a recently formed partnership with William Lyon as chairman and David A. Banmiller as president. Lyon, a retired Air Force major general, is a well- known national real estate developer and builder and former co-owner and chairman of AirCal. Banmiller is the former president of AirCal.

Under the terms of the acquisition, Banmiller will act as chairman of IASI while Fred von Husen, its current president, will continue in that capacity.

Incumbents John S. Gleason and Don Reynolds will serve as vice president and chief financial officer and vice president Technical Operations respectively. Gauthier will pursue other interests in the aviation industry.

The announcement marked the second recent acquisition for the newly formed partnership. Earlier, Air/Lyon had won the approval of the Orange County Airport Commission and the Federal Aviation Administration for the acquisition of Martin Aviation at John Wayne/ Orange County Airport. Final approval by the Orange County Board of Supervisors is expected on or about March 13.

IASI was founded by Roland Gauthier in 1979 as a supplier of overhauled JT3D engine materials. Since then, it has grown to become one of the aviation industry's most successful engine and engine parts suppliers in all major engine types. Headquartered in Belmont, 20 minutes south of San

Francisco International Airport, the company has 20 employees and maintains offices in London, as well as representation in Rio de Janeiro.

Martin Aviation is one of California's oldest and largest general aviation companies, operating a highly respected flight school as well as passenger and cargo charter operations with a fleet of 40 aircraft, aircraft sales, maintenance and parts services and fuel sales to both general aviation and airlines serving John Wayne Airport. It also has an East Coast charter facility in Leesburg, Va. Founded in 1923 by pioneer aviator Eddie Martin the company had gross revenues by $23 million in 1989.

#90066u0129 03/07/1990 ~United Press International
PANAMA CITY, PANAMA (MARCH 7) UPI - Former President Manuel Solis Palma left the residence of the Venezuelan ambassador Tuesday and returned home, giving up the diplomatic protection he had received since the U.S. invasion more than two months ago.

Attorney General Rogelio Cruz said no arrest warrants had been issued for Solis Palma, who served as president for a year and a half. Cruz said the former president was being investigated in connection with a number of charges and he would not be allowed to leave the country for the time being.

Solis Palma became president in February 1988 after former President Eric Arturo Delvalle tried to fire former military strongman Gen. Manuel Antonio Noriega. Noriega instead ousted Delvalle, and the Noriega-controlled National Assembly installed Solis Palma as president.

Solis Palma, who left office Sept. 1, 1989, had made no formal request to Venezuela for political asylum and was staying at the residence as a guest of Venezuelan Ambassador Faustino Pulgar Gruber.

Pulgar Gruber resumed his ambassadorial functions last week when Venezuelan President Carlos Andres Perez established formal ties with the government of U.S.-installed President Guillermo Endara.

A number of high-ranking Panamanians took refuge at foreign embassies following the Dec. 20 U.S. invasion of Panama.

Among them were Noriega's wife and daughters and Luis Gaspar Sanchez, president of the pro-Noriega Panamanian Revolutionary Party. They were granted safe passage out of the country and left for the Cuban capital of Havana on Friday.

(MARCH 7) UPI - ALMANAC:

Today is Friday, March 16, the 75th day of 1990 with 290 to follow.

The moon is waning, moving toward its new phase.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Pisces. They include James Madison, fourth president of the United States, in 1751; German physicist Georg Ohm, a pioneer in the study of electricity, in 1787; former first lady Pat Nixon in 1912 (age 78); entertainer Jerry Lewis in 1926 (age 64); actor Erik Estrada in 1949 (age 41) and actress Kate Nelligan in 1951 (age 39).

On this date in history:

In 1802, Congress authorized the establishment of the U.S. Military Academy at West Point, N.Y.

In 1926, Robert Goddard launched the world's first liquid-fuel rocket.

In 1966, American astronauts Neil Armstrong and David Scott docked their Gemini-8 space vehicle with an Agena craft, a first in orbital history. In 1968, some 300 Vietnam villagers died at the hands of American troops in what came to be known as the My Lai massacre.

In 1978, the Senate approved the first of two Panama Canal pacts. The treaty guaranteed neutrality of the canal after Panama assumes control at the end of 1990.

A thought for the day: Irish playwright and wit Oscar Wilde wrote, ''The only way to get rid of temptation is to yield to it.''

(MARCH 7) UPI - ALMANAC:

Today is Sunday, March 18, the 77th day of 1990 with 288 to follow.

The moon is waxing, moving toward its first quarter.

The morning stars are Mercury, Venus, Mars and Saturn.

The evening star is Jupiter.

Those born on this date are under the sign of Pisces. They include John C. Calhoun, the first U.S. vice president to resign that office, in 1782; Grover Cleveland, 24th president of the United States, in 1837; Russian composer Nikolai Rimsky-Korsakov in 1844; German engineer Rudolf Diesel, inventor of the engine that bears his name, in 1858; British Prime Minister Neville Chamberlain in 1869; clairvoyant and therapist Edgar Cayce in 1877; actor Edward Everett Horton in 1886; racecar driver Andy Granatelli in 1923 (age 67); authors George Plimpton in 1927 (age 63) and John Updike in 1932 (age 58); and Michael Reagan, President Reagan's eldest son, in 1946 (age 44).

On this date in history:

In 1922, Mahatma Gandhi was sentenced to six years in prison for civil disobedience against the British rulers of India.

In 1937, a natural gas explosion at a public school in New London, Texas,

killed 410 people, most of them children.

In 1962, France and Algeria signed a cease-fire agreement ending a seven-year civil war and bringing independence to the North African country.

In 1965, Soviet cosmonaut Alexi Leonov became the first person to take a ''walk in space.''

In 1989, the shuttle Discovery completed a five-day mission with landing at Edwards Air Force Base in California.

A thought for the day: When asked what he thought of Western civilization, Mahatma Gandhi said, ''I think it would be a good idea.''

BOGOTA, COLOMBIA (MARCH 7) UPI - The State Department eased travel guidelines for Americans in Colombia, saying most cities are relatively safe but warning U.S. citizens to avoid rural areas and the drug cartel stronghold of Medellin, the U.S. Embassy in Bogota announced Tuesday.

The earlier advisory told Americans to defer travel to Colombia and made no distinctions between regions. The advisory was issued when the drug cartels declared war on the nation last August in response to Colombia's decision to extradite drug-trafficking suspects to the United States.

The new guidelines, however, said most cities in Colombia are relatively safe for Americans, and gave a cautious go-ahead for U.S. tourists bound for resorts on the Caribbean coast.

A U.S. Embassy spokesman told United Press International that the new advisory would improve prospects for Colombia's depressed tourist industry badly hurt by the drug cartel bombing spree last year that killed some 200 people.

The embassy, however, warned Americans against traveling in rural areas and the drug cartel base of Medellin, citing leftist rebel and drug-related death squad violence, saying Americans should ''always be alert to threats to their well being.''

One leftist guerrilla group, the National Liberation Army, has specifically targeted Americans. Last month, the rebels kidnapped three Americans, all later released, and declared U.S. interests in Colombia ''primary military objectives.''

At least 29 people died in political violence from the left and the right last week with the approach of congressional elections scheduled for Sunday. The Defense Ministry reported that more than 880 people had been killed so far this year in Colombia, and 245 people have been kidnapped by rebels, drug cartel hit squads and common criminals.

''Colombia continues to experience random criminal and political violence '' the advisory said.

(MARCH 7) UPI - The U-S Chamber of Commerce calls ''unreasonable and unjustified'' the proposed postal rate hike announced Tuesday by the Postal Service Board of Governors. If given final approval by the independent Postal Rate Commission, the 19-percent overall increase... the largest in Postal Service history... would raise the cost of mailing a first-class letter from 25 to 30 cents.

It was only two years ago that the Pentagon acknowledged the existence of the radar-evading and highly classified FA stealth fighter... the older cousin of the B-2 stealth bomber. That'll soon change. Defense Secretary Cheney plans within the next two to three weeks to release details and costs about the aircraft. It was used to drop bombs on Panama during the December 20th invasion.

Violence in Mexico's Guerrero state. The official Mexican news agency says two police officers were killed and dozens of people injured Tuesday when heavily armed riot police tried to evict opposition party militants from several city halls. The militants are contesting the results of December's state elections in which the ruling party claimed victory. Authorities say eight city halls were recaptured, but seven remain occupied.

The Census Bureau estimates the U-S population hit the quarter-BILLION mark Tuesday. Demographers say an estimated one birth every eight seconds, one death every 14 seconds, one immigration every 35 seconds and one emigration every three minutes averages out to a net gain of one person every 14 seconds.

(MARCH 7) UPI - Perrier officials in New York say the mineral water is being pumped back into the market. The French product was withdrawn from store shelves worldwide three weeks ago after traces of the chemical benzene was found in the water. The company says new quality control procedures will ensure purity, and shipment of the mineral water to the New York market will begin Wednesday. A Perrier spokesman says the small traces of benzene were never a health or safety concern, but the recall

was ordered to- quote- ''ensure the good name of Perrier.''

As of late Tuesday, three-time Iditarod winner Susan Butcher was in the lead in the world's longest sled dog race through the wilds of Alaska. But a handful of top contenders are on her heels in the 11-hundredmile Anchorage-to-Nome trek and are giving her a run for the money. Waiting at the finish line... a 50-thousand-dollar first prize.

THE STATE, COLUMBIA, S.C.

Problems caused by the Federal Aviation Administration's shortage of air traffic controllers have received much public attention. But recent federal investigations indicate the agency's safety inspectors are similarly overworked and understaffed which, in some cases, has contributed to fatal plane accidents. ...

In 1989, a year in which the U.S. airlines had one of their worst safety records in recent times, the National Transportation Safety Board cited FAA inspection lapses as contributing to several accidents, some of which were fatal. ... Indeed, in some cases the FAA has failed to inspect airlines for more than one year, and many others have gone months between inspections or have received cursory checks that did not turn up serious, existing safety violations.

... Now the public, which has shown understandable concern about the air controller shortage, also should insist that Congress should provide adequate funding for airline safety inspectors.

THE TAMPA (FLA.) TRIBUNE

Efforts must be undertaken to maintain the spotlight on Africa. We can forget that troubled continent only at our cost.

Despite its serious human problems, Africa is rich in resources, fertile land, mineral deposits and untapped energy reserves.

The view by some that Africa now faces the threat of being marginalized is

indeed moot. Africa has been marginalized since independence. Look at global politics and you will find Africa has not been consulted.

The continent has been relegated to the sidelines as a spectator from where it watches developments, many of which have a direct impact on its own development. Instead, Africans are told what the West will pay for the commodities it sells. Is it any wonder that Africa's earnings for its major cash crops, coffee and cocoa, have plummeted?

ST. PETERSBURG (FLA.) TIMES

Roger Coleman, spokesman for the National Food Processors Association, says the industry helps consumers by refusing to print the percentages of ingredients on food packaging. ''It's not in the consumer interest to put that kind of clutter and detail on labels,'' he told reporters.

Details, details. According to the Center for Science in the Public Interest, consumers of American products abroad are more likely than consumers at home to know how much of a given ingredient they are actually getting. ...

In contrast, American consumers are spared the heady knowledge of how much beet, parsley, spinach, watercress and lettuce they are likely to find in a can of V-8 brand juice. Those who buy citrus canned ''in light syrup'' needn't worry how much that syrup might actually weigh in relation to grapefruit or mandarin orange sections. One breakfast food boasts of ''better taste, more fruit filling,'' leaving only the pickiest of shoppers to wonder: Better and more compared to what?

BOSTON HERALD

For a multitude of reasons Americans are hoping that the meltdown of the Cold War will spread its warmth all the way to the Caribbean. The reasons are not all political; if only the 30-year ban on doing business with Cuba could be lifted, one precious Cuban commodity could again waft its way to the United States.

Despite those whose noses crinkle in disgust at the merest hint of cigar smoke, the long-deprived devotees of rolled tobacco leaves yearn for the day they can have their Havanas back.

Cuba is the undisputed premier-cigar producer of the world. Cuban tobacco is the best. Its varieties, along with closely guarded secrets of mixing, blending and wrapping, draw comparisons among cigar connoisseurs akin to those reserved in other countries for great wines.

Cigars have been good to Cuba. They are one of the country's main earners of foreign currency - though perestroika and currency fluctuations in

Soviet nations have now lowered profits on Cuban sales of 5 million cigars a year.

... Tobacco haters do not grasp a critical difference between cigarettes and cigars. Cigars are not so much smoked, as savored. A fine Havana is plump, moist and has a woody aroma. For perfection, it must be lighted within 14 days of being rolled, a treat long denied Americans.

Perhaps a revival of Irving Berlin's song about the delights of watching ''dark-eyed Stellas light their fellas' panatelas'' could help promote improved U.S.-Cuban relations. Negotiations might be aided by having the conferees puff on elegant Cuban cigars, which Winston Churchill and others knew to be genuine instruments of communication.

(MARCH 7) EDITORIAL SAMPLER:

THE CLEVELAND PLAIN DEALER

When it comes to a new clean-air law, time is on the side of the Weakeners. So it was welcome news last week that a bargain had been struck between Senate negotiators and the White House on a new clean-air compromise.

The new proposal, expected to hit the Senate floor for debate this week, augurs well for a strong new law this year. Yet the Weakeners, cheered on by President Bush, who threatened to veto an earlier version as too costly have been busy. They've wrongly filed the law's teeth in crucial areas, including mileage standards.

The earlier version called for new vehicles to meet a minimum fuel-economy standard of 40 miles per gallon by the year 2000. This standard went well beyond clean air. It promised to reduce U.S. dependence on imported oil. ... It promised to reduce reliance on an energy source that's non-renewable and whose reservoirs are increasingly found in fragile Arctic environments easily damaged by oil drilling and transport.

It promised to curb the emissions of carbon dioxide. ... Perhaps most importantly, the 40-mpg standard promised to fly with voters, who have indicated ... they're willing to pay more for cars with better gas mileage.

Senators niggling behind closed doors for the last month ignored all these pluses to pander to an industry that has flooded Washington with special-interest dollars and to a White House obsessed by the costs of environmental protections rather than their inherent value.

Ironically for a state like Ohio, the Weakeners managed to dilute just about every section of the Senate bill except the one that most affects this part of the country: acid rain. Utilities were given more flexibility in how an emissions-trading system would work. But no deal was struck in the all-important area of shared costs.

DETROIT FREE PRESS

The next two months will tell whether the Sandinistas in Nicaragua try to get cute about their pledge to relinquish power gracefully. The last few days have showed, however, how much an election can do to assure that there isn't much slippage.

What the United States ought to do, as part of assuring that the transition occurs smoothly, is to move ahead on a parallel track to assure the disbanding and the resettlement of the contras. The existence of the contras now, far from being an insurance policy that the new government of Violeta Barrios de Chamorro needs, constitutes the only possible excuse the Sandinistas might be able to conjure for refusing to turn over the control of the police and the army.

The United States should do everything within its power to assure that the contras are not permitted to be a threat to reconciliation in Nicaragua. The contras have no place in the post-election Nicaragua.

MILWAUKEE SENTINEL

Corporate, as well as environmental, interests should support the Justice Department's decision to bring criminal charges against Exxon Corp. in connection with last year's major oil spill at Valdez, Alaska.

If the government did not take tough action against Exxon, it would have provided ammunition that environmentalists legitimately could use to impede Alaska oil drilling.

And the need for Alaskan oil is just as clear as the responsibility of those who extract and ship it to operate in an environmentally safe manner.

As a practical matter, this effort must be looked upon as a reasonable accommodation of competing interests. If the oil companies do not keep their part of the bargain mandated by controlling legislation, there must be a clear message from the government that this will not be tolerated.

The alternative would be to encourage carelessness, give the appearance of favoritism and sanction the desecration of the magnificent Alaskan land and seascape, including the birds and sea life that thrive there.

Penalties arising from a conviction of Exxon on the charges against the

corporation could cost the corporation at least $600 million in fines.

It should not be the government's intent to siphon operating cash from a major corporation entity. But the consequences of the alleged crimes are so severe that punishment must be harsh enough to deter a similar seafaring disaster in the future.

(MARCH 7) EDITORIAL SAMPLER:

ARGUS OBSERVER, ONTARIO, ORE.

There comes a time in life when one must stand and be counted - or fall by the wayside.

The Nicaraguans stood tall, joining other nations around the world who have finally concluded they had little to lose and much to gain, mostly their freedom, if they no longer can be intimidated by a dictator or similar head of state.

While the United State would like to take much of the credit for the UNO victory, we recognize that people like Violeta Chamorro and the people of Nicaragua must receive recognition for their bravery. They are the ones who registered and voted; they are the ones who dared to enter the elections as candidates; they are the ones who stood to lose all.

Much credit must also given to Manuel Ortega, the strong man, who no doubt had the power to suppress the freedom effort but vowed to accept the vote of the people. However, he probably saw the handwriting on the wall when other nations in Europe as well as neighboring Central American countries demonstrated a resounding preference for self determination over violence and revolution.

We admire the courage of Violeta Chamorro and her fellow candidates who remained strong and fearless although faced with repeated threats during the campaign in an atmosphere tight with tension and where the opposition held power through the army and the police, to destroy them.

DALLAS MORNING NEWS

Everyone knows that in recent years women have been entering the U.S. labor market in unprecedented numbers. But a recent report by the Bureau of Labor Statistics has astounded even the experts. It turns out that the number of females with two or more jobs had quintupled since 1970, while the number of moonlighting men had not even doubled over the same period of time.

The reasons for this phenomenon vary. The taking on of one or more extra jobs by women has in many cases been a reflection of ambition, achievement and the opening of doors previously closed to females. This is progress. On the other hand, a record divorce rate in recent decades has forced many more women to work as much as possible in order to avoid the poverty that the sudden loss of a husband's income brings. Or many women are having to take two jobs because they are still paid less than men. This is progress?

... More women in the work force is a good idea, if that's where women want to be. ... But the female labor force is not monolithic; a certain segment of working women is doing better than another. When women hold down two or more jobs just to keep baby bottles filled, there is reason to wonder whether moonlighting is uniformly a sign of progress or whether it merely signals a quickening treadmill.

Of course, in the final analysis, the real problem is not women in the work place, but rather the inability of family incomes to keep up with prices, a trend that has, not coincidentally, paralleled the trend of more female moonlighting.

ROCKY MOUNTAIN NEWS, DENVER

With two months of hindsight, the U.S. invasion of Panama still looks like a near-exemplary military operation, but one recent report is particularly disturbing and deserves further attention.

Army Lt. Gen. Carl Stiner, a commander of the invasion, says Panamanian forces loyal to Manuel Noriega were alerted to the operation several hours in advance. Stiner says the leak accounted for some of the 23 American soldiers lost in Panama.

Stiner cited Panamanian communications intercepted by American forces at 10 p.m. on Dec. 19, three hours before the scheduled start of the invasion. According to Stiner, ''They were saying such things as, 'They are coming. The ball game is at 1 o'clock in the morning.'''

The leaked information made it to Rio Hato, a Panamanian Defense Force outpost into which U.S. Army Rangers were parachuting. The Rangers hoped to catch the Panamanians asleep in their barracks, but instead were met with a barrage of gunfire. At least one Ranger was shot in a plane as he attempted to parachute.

Whatever the actual source, this breach of security should be taken with the utmost seriousness. Sen. Jesse Helms (R.-N.C.) has formally asked Secretary of State James Baker to conduct an investigation with the cooperation of the FBI, but the State Department has so far been noncommittal.

That's unacceptable. For the sake of future operations, and of those lives lost in Panama, the government should get to the bottom of this leak.

#90066u0257 03/07/1990 ~United Press International

LIBERIA, COSTA RICA (MARCH 7) UPI - Nicaraguan President-elect Violeta Chamorro presented to Costa Rican President Oscar Arias a plan for the demilitarization of Central America with cooperation from all governments in the region.

Chamorro, who takes office April 25 from outgoing President Daniel Ortega, met Tuesday with Arias in the city of Liberia, 40 miles from the Nicaraguan-Costa Rican border. It was her first trip out of Nicaragua since winning Feb. 25 elections.

''When the superpowers are at this time reducing their arms to improve the standard of living for their people, there is even more reason for our small countries to put an end to this drain on our economies,'' Chamorro said in her proposal.

Accompanied by Vice President-elect Virgilio Godoy and Antonio Lacayo, a principal adviser, Chamorro said one of her first acts as president would be to decree a general amnesty.

''I hoped President Daniel Ortega would give an amnesty, since it would clear the slate and allow us to start over, and everyone would return to their homeland,'' Chamorro said.

In Honduras Tuesday, a three-member delegation sent by Chamorro began talks with leaders of Nicaraguan Contra rebels to clear the way for the demobilization of the rebels and their return to Nicaragua.

Thousands of other Nicaraguans have left the country because of hardships under the Sandinista government. Many went to the United States.

''All Nicaraguans have the right to be in their own country. Whoever wants to leave is another matter because we cannot bring them back tied up,'' Chamorro said.

The Contras, funded since 1981 by the United States in an attempt to overthrow Ortega's leftist Sandinista Front, have agreed to disband after Chamorro takes office.

Chamorro said the problem of the Contras will be solved ''little by little'' and added that Nicaragua's 70,000-strong Popular Sandinista Army ''will also have to be reduced.''

Arias, who won 1987 Nobel Peace Prize for designing a Central American peace plan, is scheduled to leave office May 8. He will be replaced by Rafael Angel Calderon Fournier, who was elected Feb. 5.

#90066u0266 03/07/1990 ~United Press International

EAST RUTHERFORD, N.J. (MARCH 7) UPI - The New Jersey Devils closed out NHL trading Tuesday by acquiring veteran center Peter Stastny from the Quebec Nordiques for defenseman Craig Wolanin and future considerations.

Stastny, 33, has played his entire NHL career in Quebec, starting with the 1980-81 season after he and brothers Marian (now retired) and Anton (playing in Sweden) defected from Czechoslovakia.

Peter Stastny scored 40 or more goals five times, scored 100 or more points in seven different seasons and has played in six All-Star games. He played in 62 games this season, scoring 24 goals and 38 assists. He was Quebec's second leading scorer this year behind Joe Sakic.

''I love the fans in Quebec City, they've stuck with me and the whole team through all the hard times,'' said a shocked and emotional Stastny after learning of the trade. ''I will never forget the 10 years I spent in Quebec City.''

The Devils management was delighted with the deal.

''We feel we are bringing to our team an offensively fine player with several years left,'' Devils General Manager Lou Lamoriello said. ''We feel he will fit right in and will have a chance to go out a winner. He's also an excellently conditioned athlete. I envision him playing well here with anybody.

''We looked into the future and our organization and projected our needs. This year is very important to us.''

Wolanin, 22, was drafted by the Devils in the first round of the 1985 Entry Draft. He was limited to 56 games last season due to a knee injury. He scored one goal and had seven assists this season, including 47 penalty minutes.

''He (Wolanin) is a young player who was under a lot of pressure in New Jersey because he was asked to be a leader in defense,'' Quebec GM Maurice Filion said. ''We will only ask him to do his job and not necessarily ask to save our organization.''

Filion talked all weekend with the Buffalo Sabres but said they wanted too

much in return for Stastny. Also, Filion said he did not want to ''see Stastny come to Quebec four times a year,'' so the Nordiques dealt Stastny to a Patrick Division team.

''When you trade your captain, it's very hard for everyone in your organization,'' Filion said. ''We will never forget the years he gave us. But we have to rejuvinate our team and leave sentiments aside.

''Stastny did not want to leave Quebec but he could no longer play with a team that loses on a regular basis and that's why we sent him to a team that will go farther in the playoffs.''

Stastny's trade completes a shocking housecleaning at Quebec, which traded Michel Goulet away Monday.

''In the past 48 hours we have traded 2 players who marked hockey in Quebec City,'' said Nordiques Coach Michel Bergeron. ''It's a sad day for the Quebec Nordiques. I just talked to Peter Stastny and he seems to feel just like I did when I was traded to the New York Rangers 3 years ago.''

''Peter is part of hockey history in Quebec City. I don't know if there'll ever be another player who will reach the 1000 point plateau with Quebec. In my book, Peter Stastny is the first Europeen player to dominate the NHL.''

The deal was not announced until after the first period of the Devils-St. Louis Blues game. According to Lamoriello, there were certain technicalities that had be cleared up.

''Evidently, there was an influx of trades at the same time to the NHL's Central Registry,'' Lamoriello said. ''There were things that had to be checked out on both sides. These were extenuating circumstances over which we had no control.''

#90066u0395 03/07/1990 ~United Press International

NEW YORK (MARCH 7) UPI - Baseball negotiators ended a six-hour bargaining session Wednesday morning without a key to solving the arbitration issue at the center of a three-week spring training lockout.

Union chief Don Fehr said the parties made some progress on minimum salaries and on the benefit plan, but added the gap had widened on outright assignments.

Fehr reported no change on the issue of when players can become eligible for salary arbitration. He also said owners are trying to eliminate the maximum paycut rule.

''If anybody thought there was an agreement in sight, that was not right '' said Fehr.

''The bad news is that we have not bridged the gap on the two-three year arbitration,'' said Chuck O'Connor, who represents owners. ''The good news is that I think we have narrowed the gap on .. a number of remaining issues.''

Asked to assess the progress, National League player representative Tom Herr said, ''You have to dissect each issue. We're closer on some, we're farther apart on others.''

Both sides said they expect talks to resume Wednesday, sometime after the owners' labor committee meets in the morning.

''The position they've taken on outrights is regressive,'' Fehr said. ''The position they've taken on eligibility is something that nobody I know of thinks can provide the basis for an agreement.''

Tuesday's bargaining session began shortly after 6 p.m. EST and several factors led to hope that a settlement might result. First, there was the sheer length of the talks; they lasted more than six hours.

Second, the PRC had caucused earlier in the day, raising the possibility that new proposals might be forthcoming. Third, owners indefinitely postponed their scheduled meetings Thursday in Dallas.

Fourth, the proximity of Opening Day provided a certain urgency. Both sides agree they will lose the scheduled season Opener of April 2 unless an agreement comes by the end of the week.

Despite all those factors, talks deteriorated over the arbitration issue.

''The clubs' position through 10 minutes ago is there will be no movement on salary arbitration eligibility,'' Fehr said. ''You can't get there from here.''

Fehr said the union has produced four or five ''concepts or frameworks'' for bridging the gap on arbitration. Union official Gene Orza said the concepts involve service time, performance, and combinations of the two. He said at least two of the suggestions could be called ''novel.''

O'Connor defended the proposal to eliminate a rule placing a limit on how much salaries could be cut for players eligible for arbitration.

''I would characterize it as an effort to bring some equity into the salary arbitration system,'' O'Connor said. ''The maximum cut rule applies

where the player has the option of going to salary arbitration and there is no cap on what the player can achieve. The maximum cut rule has provided an artificial floor as to what compensation can be for a player.''

#90066u0401 03/07/1990 ~United Press International

TORRANCE, Calif. (MARCH 7) UPI - Voters Tuesday overwhelmingly rejected by a 3-1 margin a controversial city ballot measure designed to regulate Mobil Oil Corp.'s processes for manufacturing gasoline.

With all 57 precincts reporting, there were 4,925 ''yes'' votes, 25.9 percent, for Measure A, while 14,074 voters, 74.1 percent, cast ''no'' votes.

About 27.9 percent of the South Bay community's 70,000 registered voters cast ballots in the city elections.

Measure A was closely scrutinized by the oil industry, which feared that its passage would send shockwaves throughout oil-producing states and pave the way for local governments to meddle with the intricacies of gasoline manufacturing.

The measure would have made it a misdemeanor to store more than 250 gallons of the chemical hydrofluoric acid, a key component in the process to convert petroleum into gasoline.

The initiative's primary sponsor, Councilman Dan Walker, said hydrofluoric acid needs to be regulated in such a way because of its potential to create a lethal cloud over the community on a par with the gaseous fog that escaped from a Union Carbide plant in Bhopal, India, in 1984, killing 3,400 people.

''I thought it would be a lot closer,'' Walker said of the vote. ''Perhaps it was just foolishness on my part, but I thought we would win. I guess we just couldn't compete with a company that spent $700,000 to $800,000 or more in a community that involved an election involving a total of 12-13,000 votes.''

''The city council (members have) each stated there is no place in the community for large quantities of (hydrofluoric acid),'' Walker said. ''We just disagreed on how to accomplish the goal. The change will occur.''

There was no immediate response from Mobil Oil officials.

The Mobil facility, operating 24 hours a day, uses 29,000 gallons of the acid at any given time as it is pumped through the refinery, mixing with pure crude to convert petroleum molecules into gasoline, said Mobil

spokesman Thomas Collins.

The city and Mobil have had an increasingly tenuous relationship over the past several years, weakened by labor strife and a series of refinery accidents, including a fire and explosion in November 1987 that emitted 100 pounds of hydrofluoric acid into the air.

''There was the perception that the 1987 fire, the accidents, the strike and picketing had a cumulative effect,'' Collins said. ''We were in the news a lot and a lot of people were wondering. Walker stepped up and exploited it for his own reasons. That's why Measure A exists.''

Others in Torrance also saw the initiative as a political ploy by Walker to ride into higher office.

Walker, who spent $72,000 in support of the measure, is alone among his six council colleagues, all of whom oppose Measure A.

The remaining council members, instead, support a pending lawsuit by the city against Mobil, alleging it is a public nuisance and seeking tighter regulations on plant operations, including storage of hydrofluoric acid.

Walker also supports the suit, but he broke ranks with his peers and pursued the initiative, collecting more than 10,000 resident signatures.

Walker and other Measure A supporters contend that sulfuric acid could be substituted for the hydrofluoric acid in the refining process, producing the same results.

Mobil says sulfuric acid is just as deadly and to convert the refinery would cost $100 million, Collins said.

''We don't believe sulfuric acid, the money issue aside, is any more safe for the refinery,'' he said. ''Both are acutely hazardous.''

On Tuesday, Mobil, which spent more than $500,000 to try to defeat Measure A - more than 10 times ever spent on a Torrance electin, paid for a quarter-page ad in the local newspaper, striking an upbeat note that despite the measure's outcome, the company would continue to ensure community and worker safety.

The 750-acre refinery, among the city's top employers with 850 workers, was built in 1929 when the area ''was just a beanfield.'' Today, it pays more than $14 million in federal, state and local taxes, Collins said. ''We don't think that Measure A would make Mobil any more safe or the community any more safe,'' Collins said. ''Its passage would upset and delay the safety proceducres being put in place right now.''

He said recent findings by oil industry researchers has led to new and improved methods for safely handling hydrofluoric acid, including methods currently being installed at the Torrance plant. They include a major water deluge system and an acid evacuation system, Collins said.

#90066u0424 03/07/1990 ~United Press International

(MARCH 7) UPI - The expiration of the NHL trading deadline Tuesday afternoon signalled the beginning of playoff fever. With only a dozen or so games left, the teams heading for postseason showdowns have taken on their final looks and will now settle down to playing serious playoff hockey.

Tuesday night's scores in the usually goal-happy league indicate that the close-checking, fiercely competitive playoff mindset has taken hold. Seven of the ten teams in action scored 2 goals or less, and only two teams scored as many as 4 goals.

Boston's 2-1 victory over the Philadelphia Flyers, and New Jersey's victory over St. Louis by the same margin, were classic examples of the stingy defensive style that emerges as the playoffs approach.

Even Edmonton's 4-3 overtime victory over Pittsburgh was a defensive struggle between two explosive goal-scoring clubs.

Philadelphia, in last place in the Patrick division, was fighting for its life, while Boston, with the best record in the league this season, was working two ex-Flyers into the lineup for the stretch run.

In a tense finish, Bob Gould scored the game-winner with 41 seconds to play to give Boston its fourth straight victory.

The Flyers had a chance to take a lead late in the third period but Boston goaltender Reggie Lemelin stopped Ilkka Sinisalo's shot from in front of the net.

''That was the save of the game,'' Gould said. ''Whoever scores the go-ahead goal that late, I won't say the win is guaranteed but you're darn close to having the game in your pocket.''

Philadelphia went ahead 1-0 at 4:55 of the second period on a goal by Kevin Maguire, who was acquired from the Buffalo Sabres on Monday in return for defenseman Jay Wells.

Maguire snuck behind the Bruins defense and deflected a pass from Craig Berube into the net for his seventh goal of the season.

''It was great to score a goal but I wish we had won instead,'' Maguire said.

The game marked the return of former Flyers Dave Poulin and Brian Propp to Philadelphia. Poulin was sent to the Bruins for Ken Linseman on Jan. 16 and Propp went to Boston last Friday for a second-round draft pick.

''It was not strange at all,'' Propp said. ''Everyone has made me feel right at home. It's like I'm already part of the team. I saw most of the (Flyers) at the morning skate and we talked. When game time came, I had a job to do. And if I can't do it against my former teammates, I can't do it against anyone.''

-- AROUND THE NHL --

Elsewhere in the NHL, New Jersey edged st. Louis 2-1, Edmonton tripped Pittsburgh, 4-3 in overtime, Hartford dumped the NY Islanders 4-2 and Buffalo and Washington skated to a 1-1 tie.

DEVILS 2, BLUES 1

At New Jersey, the Devils made second-period goals by John MacLean and Doug Brown stand up against St. Louis, stopping league-leading goal-scorer Brett Hull in the process. St. Louis remained two points ahead of Chicago in the Norris division.

The game was overshadowed by the announcement that the Devils had obtained sharpshooter Peter Stastny from the Quebec Nordiques for defenseman Craig Wolanin. Stastny said he would help the Devils nail down a playoff spot in the hotly contested Patrick division, where they are tied for fourth place one point ahead of Washington.

''Now I have a chance to make the playoffs and win the Stanley Cup,'' said Stastny. ''It will be a challenge in New Jersey but I know I can overcome this challenge. Any team can make the playoffs in the Patrick division and the Stanley Cup is open to any team in the league.''

OILERS 4, PENGUINS 3, OT

At Edmonton, Craig MacTavish scored short-handed 77 seconds into overtime to lift the Edmonton Oilers into first place in the Smythe division, one point ahead of the Calgary Flames, who have two games in hand. The Oilers forced overtime with 6:11 left in regulation. Pittsburgh obtained goaltender Alain Chevrier Tuesday for their playoff drive, but the close-checking style they used against Edmonton will be even more important to their chances.

''They're a better defensive team since Mario Lemieux got hurt,'' said

Edmonton Coach John Muckler. ''I've never seen Pittsburgh play so well defensively. If they continue to play that well, they should make the playoffs no problem.''

WHALERS 4, ISLANDERS 2

At Uniondale, N.Y., Kevin Dineen scored a hat trick to extend Hartford's winning streak to four and the Islanders' winless streak to ten games (0-8-2). Hartford is firmly entrenched in fourth place in the Adams division, while the Islanders, stricken by injuries and without center Pat LaFontaine, fell into a third-place tie with New Jersey.

CAPITALS 1, SABRES 1 OT

At Landover, Md., Pierre Turgeon slammed in Phil Housley's rebound during a power play at 6:46 of the third period pull the Sabres into the tie. It was Turgeon's 34th goal of the season. The tie dropped Washington out of a fourth-place tie with New Jersey for the last playoff spot in the Patrick division, but pulled them to within a point of the slumping Islanders.

#90066u0425 03/07/1990 ~United Press International

(MARCH 7) UPI - Two teams Tuesday joined the field for the NCAA Tournament, bringing the number of automatic bids to 10.

Towson State earned its first-ever Tournament appearance by posting a 73-60 victory over Lehigh in the championship game of the East Coast Conference tournament. Illinois State secured a berth by capturing the Missouri Valley Conference series with an 81-78 victory over Southern Illinois.

Six schools captured their tournaments to qualify for the Tournament. They are Coppin State (Mid-Eastern Athletic), East Tennessee State (Southern), La Salle (Metro Atlantic Athletic), Richmond (Colonial), Robert Morris (Northeast) and South Florida (Sun Belt). Two schools qualified because they were the regular-season champions, Loyola Marymount (West Coast) and Princeton (Ivy League).

At Towson, Md., Kurk Lee, ECC Player of the Year, scored 22 points to guide Towson State. Lee connected on 8 of 11 shots from the field and made all five free-throw shots for the Tigers, 18-12.

Lee hit two straight field goals early in the second half to extend Towson State's lead to 45-38. Lehigh never got closer than three points the rest of the way.

The Engineers missed three straight one-and-one free throw opportunities

and Towson State went on an 11-2 run late in the second half to clinch the victory. Devon Boyd scored 13 points for the Tigers, Kelly Williamson added 11 and Mike Morin had 10.

Dozie Mbonu scored 23 points and Bob Krizansky finished with 12 points and 11 rebounds to pace the Engineers, who finished the season at 18-12.

At Normal, Ill., Jarrod Coleman scored 23 points to lead Illinois State over top-seed Southern Illinois.

Illinois State improved to 18-12, winning 12 of 15 games after a 6-9 start.

''I hoped we wouldn't give up when we were 6-9, but it's like the lights were dim and they were flickering a little bit,'' first-year Illinois State Coach Bob Bender said.

The team had a meeting after the bad beginning to the season, and agreed Tuesday it really turned things around.

''We had the meeting and got a lot of frustration out of our system,'' senior Randy Blair said. ''From then on we played as one.''

The Redbirds will be making their fourth appearance in the Tournament in the past decade. Southern Illinois, 26-7, the regular-season MVC champions is expected to get an at-large bid when they are announced Sunday.

Coleman poured in 13 points in the first half, including nine in a span of 2:34 late in the half, helping the Redbirds to a 42-33 lead.

The Salukis closed to a point in the second half before Rickey Jackson scored 10 points in just under four minutes to help Illinois State expand its lead to 75-69.

Jerry Jones, who led Southern Illinois with 21 points, made two free throws with 34 seconds to play to draw the Salukis within 79-78. But Freddie McSwain missed a three-point attempt at the buzzer that would have tied the score.

-- AROUND THE NCAA --

Elsewhere in conference tournaments Tuesday, in the first round of the ECAC North Atlantic, Boston University beat New Hampshire 63-56, Colgate clipped Hartford 54-53 and Vermont defeated Maine 78-75.

At the Mid-Continent, Wisconsin-Green Bay beat Western Illinois 49-46 and Northern Iowa edged Southwest Illinois 63-61 in the semifinals.

At the Southland, Northeast Louisiana beat Texas-Arlington 65-50 and North

Texas defeated Northwestern Louisiana 63-61 in the semifinals.

At the Trans America, in the first round, Centenary beat Georgia St. 102-91, Arkansas-Little Rock defeated Hardin-Simmons 91-68 and Texas-San Antonio tipped Samford 98-85.

In a regular-season game, Miami of Florida crushed Florida International 83-55.

-30- 3948

#90066u0429 03/07/1990 ~United Press International

(MARCH 7) UPI - On a night when Clyde Drexler played his worst statistical game of the season, Kevin Duckworth played his best.

The Portland Trail Blazers needed all of Duckworth's season-high 28 points to pull away from New York down the stretch Tuesday night and post a 112-100 victory over the Knicks.

Duckworth keyed a 13-0 surge with 4 baskets that took the Blazers from a 99-98 lead to 112-98 with 1:23 remaining. Terry Porter, who finished with 16 points, scored the other 5 points in the run.

Drexler, who returned last Tuesday after missing a week with a sprained ankle, scored just 3 points against the Knicks. In finishing 20 points below his average, Drexler had a string of 181 double-figure games snapped.

He converted just 1 of 10 shots from the field, but did have a game-high 9 assists.

''Clyde didn't have that good a game,'' said Portland Coach Rick Adelman. ''But the great thing about Clyde is that he did not force anything and did other things to contribute to the win. That says a lot about our team, guys have been stepping up and doing the job.''

The Blazers held the Knicks scoreless for 3:58 in the closing minutes. The only points they could muster in the final 4:11 was a meaningless basket by Patrick Ewing with 13.5 seconds remaining.

''There was a lot of talent out there with many guys capable of scoring so we knew the difference would be who wanted it more on the defensive end,'' Duckworth said.

Ewing, who shook off a twisted ankle in the third period, finished with 40 points for the Knicks, whose lead over Philadelphia dwindled to a half-game in the Atlantic Division. The Knicks and Sixers play Wednesday in Philadelphia.

''Things just aren't going right,'' Ewing said. ''I don't really have an explanation for it. We just have to start playing better and get back to what we were doing early in the season when we had our big winning streak.''

Charles Oakley finished with 13 points and 14 rebounds for New York. Jerome Kersey added 19 points and 10 rebounds and Buck Williams 21 points for Portland, which snapped a four-game road losing streak.

The Trail Blazers are entering a key part of their schedule as they play seven of their next 11 games away from home. The Trail Blazers own the fourth-best record in the NBA and trail the Los Angeles Lakers by 3 1/2 games. Their 40-18 record has surpassed their 39 victories of last season.

-- AROUND THE NBA --

In other games Indiana dumped Washington 113-98, Detroit defeated Sacramento 101-91, Chicago clipped Milwaukee 114-105, Phoenix topped Altanta 113-111, Utah beat Orlando 111-101, Houston defeated the LA Lakers 112-95, Denver whipped Charlotte 122-96, and Seattle beat Cleveland 93-90

PACERS 113, BULLETS 98

At Indianapolis, Chuck Person scored 36 points and Rik Smits added 24 to allow Indiana to break a three-game losing streak. Jeff Malone scored 19 points for Washington.

PISTONS 101, KINGS 91

At Auburn Hills, Mich., Joe Dumars scored 8 of his 25 points during a 15-0 Detroit run midway through the fourth quarter to seal the triumph. Wayman Tisdale led Sacramento by tying a career high of 40 points.

BULLS 114, BUCKS 105

At Milwaukee, Michael Jordan scored 35 points, including the final two baskets to cap a game-ending 10-0 run for Chicago. The Bulls posted their ninth straight victory.

SUNS 113, HAWKS 111

At Atlanta, Jeff Hornacek hit a 20 footer with 25.2 seconds remaining and Tom Chambers scored 31 points to give Phoenix the victory. Dominique Wilkins scored 43 points for the Hawks.

JAZZ 111, MAGIC 101

At Orlando, Fla., Karl Malone scored 16 of his 31 points in the final

period to propel the Jazz. The Magic led 82-77 going into the final period.

ROCKETS 112, LAKERS 95

At Houston, Akeem Olajuwon had 27 points, 14 rebounds and 8 blocks for the Rockets. Magic Johnson scored 27 points and James Worthy had 18 for the Lakers.

NUGGETS 122, HORNETS 96

At Denver, Danny Schayes came in from Denver's season-high snowstorm to shoot a red-hot 7-for-7 from the floor, 9-for-9 from the free throw line, and grab a game-higg 12 rebounds.

SONICS 93, CAVALIERS 90

At Seattle, rookie Dana Barros scored 23 points to help the Supersonics overcome a 14-point first quarter deficit. The Sonics, 30-28, missed their first 12 shots and didn't score for nearly five minutes. But the Cavaliers who have lost five straight road games, could manage only six points of their own during that stretch.

WASHINGTON (MARCH 7) UPI - The powerful American Medical Association added its voice to a chorus of calls for reforming the nation's health care system Wednesday, proposing that employers provide insurance for all workers and the government expand coverage for the poor.

The AMA's 16-point plan follows last week's recommendations by the bipartisan Pepper Commission, which called for a slightly different form of mandated employer insurance combined with an expanded public program.

However, the AMA stopped short of joining the congressional panel in proposing a government program to cover long-term care, calling instead for tax incentives to encourage private insurance for nursing home stays.

''The AMA intends to move forward vigorously in the coming year to join all interested parties in a dialogue to strengthen the American health care system and provide high-quality care, at reasonable cost, for every American,'' said the group's president, Dr. Alan Nelson.

Prospects appear dim for health care legislation following last year's repeal of Medicare catastrophic illness coverage, but congressional sources who work on health issues said the AMA's proposal for universal access to care would be significant, particularly because of the group's influence with Republicans.

''This AMA report is just what the doctor ordered,'' said Sen. Edward Kennedy, D-Mass., the sponsor of legislation to require employers to provide insurance for employees who work more than 17 1/2 hours a week.

Under the AMA plan, employers would be required to provide health insurance for full-time employees and their families. Small businesses, which oppose mandates, would be given tax breaks to help them afford such coverage.

State insurance risk pools would be created to help people who cannot buy insurance because of pre-existing conditions, and ''major'' Medicaid reforms would expand coverage for all people below the poverty level.

The AMA program would restore catastrophic coverage to Medicare - funded through individual and employer taxes instead of contributions by seniors - while making cuts to keep the program ''actuarially sound.''

Costs under the plan would be held down by ''practice parameters'' devised by doctor groups, less state regulation and - not surprisingly - reductions in the costs of malpractice insurance.

The AMA program would cost less than the Pepper plan because it does not include coverage for long-term care. The congressional program would cost the federal government $66.2 billion - $42.8 billion for long-term care.

America spends more on health care than any other industrial country, about 11.5 percent of its gross national product, while lagging behind other nations in such indicators as infant mortality.

Between 31 million and 37 million Americans, about a third of them children, have no health insurance. Another 9 million people, mostly elderly, need coverage for expensive nursing home stays.

#90066u0447 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - The Saudi royal family helped bankroll Nancy Reagan's anti-drug campaign at the same time the country sought to win controversial approval to buy U.S. military aircraft, published reports said Wednesday.

Reports of the Saudi connections to the ''Just Say No'' charity championed by Mrs. Reagan and secret funding of the Nicaraguan Contras at President Ronald Reagan's request were published by The Washington Post and the New Republic.

James Rosebush, the former chief of staff to Mrs. Reagan, denied the $2

million in Saudi-generated donations to her charity influenced White House views on the Saudi military aircraft deal. He said it also had no bearing on the Reagan administration's policy on the U.S.-backed Contra rebels fighting the Sandinista government in Nicaragua.

''That's why we set up this arm's length fund,'' said Rosebush, to insulate the family from that kind of allegation.

Mrs. Reagan established the Nancy Reagan Drug Abuse fund in 1985 under the auspices of the Community Foundation of Greater Washington, which also administered other charitable causes.

The Post reported that the charity distributed $1.4 million to drug abuse prevention programs around the country from 1985 to 1988.

Mrs. Reagan moved her fund - an estimated $3.6 million funded primarily by the two Saudi donations - to Los Angeles last year, establishing a charity exclusively under her name.

King Fahd of Saudi Arabia donated $1 million to Mrs. Reagan's Washington fund prior to his visit to the United States in February 1985. In March of that year, the Saudi government chipped in $24 million to the Contra cause reports said.

And in 1986, the administration began delivery to the Saudis of the long-awaited AWACS surveillance aircraft. A fighter plane deal for the Saudis supported by Reagan was blocked by Congress.

After the Fahd contribution, foundation officials said they received a call from ''the White Hosue'' asking them to meet with Mouaffak Al Midani, who donated $1 million to the charity.

Little is known about Midani. Post sources described him as a millionaire with utility and telecommunications links in Saudi Arabia and other business interests California and Europe. Midani threw a lavish ''welcome home'' party for the Reagan's last year when they returned to California from the White House.

In another case detailed in the Post and the New Republic, the sultan of Brunei in 1983 donated $500,000 to the National Federation of Parents for Drug-Free Youth, a charity suggested by Mrs. Reagan, the reports said.

Three years later Reagan administration officials tapped the sultan for a $10 million check to the Contras.

The money went into the wrong Swiss bank account, according to officials who investigated U.S. arms sales to Iran and the funneling of those profits to the Contras, a practice banned by Congress at the time.

Rosebush and others blamed unnamed disappointed parties in the Washington charitable community for a rash of rumors and allegations about the fund and its contributors.

The new fund, the Nancy Reagan Fund, is run out of offices in the Reagan transition complex at the Century Plaza. The fund pays its own ''normal'' expenses and spends money only in connection with raising and distributing charitable funds.

In 1989, the fund distributed slightly more than $500,000 to local charities.

#90066u0483 03/07/1990 ~United Press International

BEIJING (MARCH 7) UPI - Participants in last year's pro-democracy movement are still being investigated and prosecuted, Beijing Mayor Chen Xitong said Wednesday, but he refused to reveal how many people have been arrested or jailed.

At a wide-ranging news conference, Chen also vowed to suppress any further anti-government unrest and dismissed recent complaints that Chinese had been harassed by police for contacts with foreign journalists and business people.

''Turmoil like that (last spring) will never again be allowed in Beijing '' Chen said. ''We will stop any turmoil, big or small.''

The news conference, held at a hotel in the southwest suburbs, was Chen's first full session with foreign reporters since the unrest last year.

Chen, 60, a former police and party official who has held the politically sensitive Beijing mayor's post since 1987, was among the government hard-liners who advocated the violent crackdown last June on the massive pro-democracy protests in the capital.

As many as 10,000 people are believed to have been arrested in Beijing in the military and police sweep that followed the army's firing on demonstrators. Some have been released, but large numbers are reportedly still held, many without being formally charged.

Authorities, however, have steadfastly refused to give official figures on the number of arrests. Chen said the investigations were still under way and asserted: ''We don't have the numbers.''

''At present, the procedure has not been finished,'' he said. ''According to Chinese law, it is being undertaken step by step.''

Speaking about arrest figures, he said, ''We will gradually issue them according to the completion of the legal procedure.''

Pressed on how the government could still not have figures nine months after the crackdown, Chen went as far as to compare the situation to the assassination of President John F. Kennedy in 1963, saying that investigation took years.

''The numbers are very small,'' Chen said.

Chen also declined to discuss specifics of security precautions being taken in Beijing in advance of this spring. Fears have been expressed of possible renewed unrest on key anniversaries of last year's disturbances.

''We are not worried about the reappearance of the turmoil that occurred last year,'' Chen said. ''There are reasons, but I will not tell what they are.''

He also discounted complaints by foreigners recently of stepped-up surveillance of their activities and contacts with Chinese. Police are known to have detained and questioned some Chinese for contacts with foreigners.

''I don't know what evidence you have,'' Chen told a reporter asking about the incidents. ''If these persons were arrested, it is certain that they committed crimes. This has nothing to do with the open-door policy.''

CORTLAND, NY (MARCH 7) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates

that no report was received from that ski center or that it may be a weekend facility.

#90066u0574 03/07/1990 ~United Press International

(MARCH 7) UPI - Around the world... around the clock... U-P-I brings you the news:

Afghan President Najibullah says forces loyal to the government crushed yesterday's coup attempt led by the defense minister. Najibullah appeared on Afghan television last night... saying he'd ordered Defense Minister Shah Nawaz Tanai delivered to general headquarters ''dead or alive.''

Visiting Italian Prime Minister Andreotti will address a joint session of Congress this morning. Last night, Andreotti attended a state dinner at the White House after talks with President Bush on German unity. Andreotti wants assurances that NATO will be consulted on the re-unification.

Federal agents are investigating the cause of an explosion in Crested Butte, Colorado, which leveled a two-story brick bank yesterday morning... killing three people and injuring 12 others. Town residents say there had been bomb threats made in recent days to other businesses in the town.

Leaders of Israel's Labor Party are demanding that the Inner Cabinet

approve a U-S compromise plan for opening peace talks with Palestinians. Likud Prime Minister Yitzhak Shamir says the proposal put forward by Secretary of State Baker would be discussed at the Inner Cabinet meeting today.

Nicaragua's Sandinista government and the Contra rebels are accusing each other of violating a cease-fire. The Defense Ministry says Contra attacks during the weekend left one rebel dead and two Sandinista soldiers wounded. In turn, a Contra leader accused the Sandinistas of bombing rebel troops.

#90066u0579 03/07/1990 ~United Press International

(MARCH 7) UPI - Widespread criticism has led West German Chancellor Helmut Kohl to back down from statements linking recognition of the present German-Polish border to Warsaw's renouncing claim to reparations from World War Two. Kohl also sought to link the border issue to a guarantee of rights of ethnic Germans in Poland.

In Moscow, Soviet President Gorbachev met yesterday with East German Premier Modrow. After the meeting, Gorbachev rejected any notion of a unified Germany being a member of NATO. The Soviet news agency Tass quoted Gorbachev saying ''We cannot agree to this. It is absolutely ruled out.''

A top Greyhound executive and the head of the union for striking employees say they both want to resume contract negotiations... but failed yesterday to agree on resuming talks on the fifth day of a walkout. The strike by many of the nine-thousand Greyhound union workers began Friday.

The Census Bureau says the United States hit the quarter-BILLION mark of 250-Million people yesterday. The estimate comes three weeks before the nation takes part in ''the big count''- the April 1st once-a-decade census. The bureau says the nation's population grows by one person every 14 seconds.

Ron Kovic, the Vietnam veteran and anti-war activist whose life is dramatized in the film, ''Born on the Fourth of July''... says he will NOT run for Congress in California. Tim Carpenter, a Democratic Party activist says Kovic gave NO specific reason for his decision and did NOT issue a statement.

-30- 1679

#90066u0707 03/07/1990 ~United Press International

MIAMI (MARCH 7) UPI - The FBI denied charges that it suspended a decorated Hispanic agent in retaliation for his testimony in a successful discrimination suit against the bureau.

But the agent's lawyer said Tuesday the man was suspended as a warning to whistle-blowers, and not because he was suspected of spying.

''There's a real chilling message to any FBI agent who wants to stand up against the FBI and tell the truth, and that message is, 'My friend, you do it at your own peril becuase if you do we can make life miserable for you.' And that is exactly what they're doing to him and to other people,'' attorney Hugo Rodriguez said.

He represents Fernando Mata, a counter-intelligence expert who was given the Justice Department's highest award in 1983. Mata has been placed on administrative leave with pay and had his security clearance revoked, Rodriguez said. He said Mata had not been told the reason for the actions.

The FBI has refused comment on specifics, but reportedly is investigating Mata's contacts with Cuban agents and allegations that he misled them on a lie-detector test.

Rodriguez contended news leaks about the suspension were suspiciously timed to coincide with Mata's scheduled hearing before a federal panel reviewing promotions of the Hispanic agents.

''It is very ironic that those hearings are going to go forth next month and that allegations against Mr. Mata and other agents ... are all of a sudden surfacing,'' Rodriguez said. ''There will be no charges. Fernando Mata is not a spy, they know that, everyone knows that.''

He said ''other agents'' also had been targeted because of the lawsuit, but did not elaborate on that charge.

FBI spokesman Robert Davenport, in a statement issued in Washington, ''strongly denied that the FBI has retaliated against Mata or any FBI agent for participation in that litigation.''

Mata, 48, was a key witness in a 1988 suit in which 311 Hispanic agents accused the FBI of discrimination in hirings, promotions and discipline. U.S. District Judge Lucius Bunton in Texas decided for the agents.

In its statement Tuesday, the FBI said the suspension ''is totally unrelated to Special Agent Mata's participation in a discrimination class-action suit filed on behalf of Hispanic special agents.''

-30- 2510

#90066u0737 03/07/1990 ~United Press International

(MARCH 7) UPI - Afghanistan puts down a coup attempt... Italy's prime minister speaks to Congress... another accident in New York-New Jersey

waterways... and the Greyhound strike rolls on. Those stories and more, next from U-P-I.

Troops of the Soviet-backed Afghan government are searching for the nation's defense minister, who led yesterday's failed coup attmept.

Official Kabul Radio says government forces have re-captured Defense Ministry headquarters and some leaders of the rebellion surrendered.

Reports yesterday from Moscow and the United Nations headquarters in New York said fighting had raged around Kabul. Moscow says the fighting broke out at the airport, around the Defense Ministry and the presidential palace was bombed. There were an unknown number of casualties.

President Najibullah appeared on television last night to announce that loyal Afghan forces had crushed the uprising. He said he had ordered all units to find the rebellious defense minister and deliver him ''dead or alive'' to the general headquarters.

The whereabouts of the former government official are NOT known.

Najibullah came to power in 1986. The defense minister, a professional soldier... rose through the ranks to become army chief of staff and was appointed to his top post by Najibullah in 1987.

Italian Prime Minister Andreotti will address a joint session of Congress this morning on the second day of his visit to Washington, D-C.

Andreotti spent his first day in talks with President Bush and top administration officials and last night at a state dinner at the White House.

Yesterday's talks between the two leaders centered on NATO's role in German re-unification. Andreotti declared that the 16 NATO members must ''handle together'' a U-S-backed re-unification proposal. He wanted assurances from Bush that all NATO nations would be involved.

In the present four-plus-two talks... Bonn, Berlin and the four leading allies- the United States, Britain, France and the Soviet Union- would be involved.

An assistant secretary of state for European and Canadian Affairs says Bush and Andreotti agreed that a single German state should remain a full member of NATO and that re-unification should honor existing borders of other nations.

After talks yesterday in Moscow with East German Premier Modrow , Soviet President Gorbachev flatly rejected any German membership in NATO after

re-unification.

-30- 2630
#90066u0741 03/07/1990 ~United Press International
(MARCH 7) UPI - Coast Guard officials will survey by air today the waterway separating New Jersey and Staten Island to see the extent of damage caused by the giant explosion of a barge yesterday.

Authorities are NOT sure how much of the four-point-four-Million-gallon heating oil cargo spilled into the Arthur Kill as the result of the massive blast, which almost tore the vessel in half.

The explosion forced the Coast Guard to close the entire waterway.

It also created an outcry by area politicians. Governor Mario Cuomo of New York and his New Jersey counterpart, Jim Florio, issued a joint statement saying... ''the oil industry is NOT doing enough.''

The statement also criticized current oil industry safety practices.

New York City fireboats and local emergency workers used foam to battle the flames, snuffing it two hours after the explosion.

The Coast Guard has positioned booms around the disabled ship to try to catch some of the number-two fuel oil gushing from it.

There's little progress to report as the strike by nearly nine-thousand Greyhound workers enters its sixth day.

A union spokesman says the head of the Almagamated Transit Union got in touch with a bus company executive in Dallas to follow up a weekend telegram asking the company to return to the bargaining table.

The 10-minute phone call ended with both men ageeing to speak again. But they did NOT say when.

Meanwhile, management succeeded in convincing another judge to impose restrictions against picketing at bus stations.

The action by a Burlington County, New Jersey, judge yesterday limits the number of pickets at a driver recruitment center and a maintenance garage. It's the sixth injunction against union activities since the labor action began last Friday.

Since the walkout, management has refused to bargain with striking employees and has hired substitute drivers to keep its fleet operating at close to one-third its capacity.

-30- 2140
#90066u0753 03/07/1990 ~United Press International
(MARCH 7) UPI - U-S District Judge Harold Greene says he thinks opening statements could begin tomorrow in the Iran-Contra trial of former Reagan national security adviser John Poindexter.

But before legal proceedings can start, Greene must approve 10 more potential jurors.

So far, the Washington federal judge has approved 35 prospective jurors. Once there are 45 potential jurors chosen, lawyers from both sides will whittle the number to 12 regular jurors and six alternates.

Among those accepted by Greene yesterday to was an insurance company auditor who says she stopped watching the news because it was ''too depressing.'' She now spends her free time reading Gothic ''romance novels '' which she says allow her to ''escape.''

Poindexter faces five charges, including accusations that he obstructed congressional inquiries and made false statements to Congress.

The 35-year-old woman who has won the the Iditarod race three times was out front last night in the world's longest sled dog race.

Susan Butcher is heading toward flat, snow-covered country where a large herd of buffalo roam.

Butcher and her team of 15 huskies tore out of the uninhabited Rohn Roadhouse mountain checkpoint 274 miles from the starting line with several top contenders on her heels in the one-thousandmile Anchorage-to-Nome race.

However, a handful of men are giving Butcher a run for the money in the race for the 50-thousand-dollar first prize waiting in Nome.

Dashing out of Rohn with Butcher was one of Iditarod's youngest mushers, 23-year-old fisherman Tim Osmar. Leaving Rohn a few minutes later was Joe Runyan, who won last year's Iditarod.

All three front-runner are Alaskans, but Minnesota musher Robin Jacobson was running fourth about a half-hour behind them.

From Rohn, mushers have 887 miles to go to reach Nome with very little chance of rest for the next week. The 93-mile trail between Rohn and the next checkpoint at Nikolai is the longest UNinterrupted run in the entire wilderness route.

-30- 2213
#90066u0787 03/07/1990 ~United Press International
(MARCH 7) UPI - A faltering Japanese yen and computerized program selling combined to drive stocks broadly lower in thin trading Wednesday on the Tokyo Stock Exchange.

The key Nikkei Average of 225 selected issues, which lost more than 266 points in the previous two sessions, plunged another 428.74 points, or 1.27 percent, to 33,362.34.

The broader-based Tokyo Stock Exchange Index of all major listed shares lost 20.10 points to 2,516.27 after gaining a scant 0.89 point on Tuesday.

Trading was light as an estimated 450 million shares changed hands, compared with 562 million shares Tuesday.

Prices fell across the board as declines pounded advances 735 to 230, with 158 issues unchanged.

Elsewhere in Asia, prices closed lower in light trading on the Hong Kong Stock Exchange.

The Hang Seng Index, which fell 5.45 points Tuesday, fell another 6.78 points to 2,926.45.

The property sector was the most actively traded. Following active support in the morning session, property counters fell back to close off 11.35 points. Industrials fell 13.55 points, utilities rose 6.86 and the finance sector fell 5.52 points.

Turnover was 849 million shares, below the 902 million traded Tuesday.

In Australia, stocks closed slightly higher in thin trading on the Sydney Sharemarket boosted in part by better-than-expected earnings from CRA Mining.

The key All Ordinaries Index, which eased 0.6 point Tuesday, gained 2.8 points to 1583.3.

Volume amounted to 57.2 million shares, compared with 63 million shares changing hands Tuesday.

TOKYO (MARCH 7) UPI - Two business giants of Japan and Germany - Mitsubishi Corp. and Daimler-Benz AG - have reached broad business

agreement aimed at challenging U.S. aerospace industries, Mitsubishi officers and reports said Wednesday.

The business tie-up will include negotiations on joint ventures and technological exchanges centered on the fields of aeronautics, electronics and services, Mitsubishi said in a statement.

The two groups agreed to hold talks on expanding the marketing relationship in Japan between Mitsubishi Motor Corp. and Mercedes-Benz AG, the passenger car division of the Daimler-Benz group, the company said.

''Depending on progress in future talks, the two groups may also undertake a capital tie-up through swapping of stocks and other activities,'' Mitsubishi officers said.

''The tie-up with Daimler-Benz is primarly aimed at challenging the dominant position of U.S. companies in aerospace industries,'' the English-language Daily Yomiuri newspaper reported, quoting unnamed Mitsubishi executives.

The newspaper said the agreement is part of Mitsubishi's attempt to maintain a position in the volatile European economic environment, which is heading toward integration of the European Community in 1992 along with moves toward unification of East and West Germany.

The accord, reached after a meeting of the two business groups in Singapore last weekend, does not cover defense-related areas in light of Japan's ban on exports of arms and related technologies, Mitsubishi officers said.

Japan's Ministry of International Trade and Industry welcomed ''the two groups entering into broad-ranging cooperation at the time when international cooperation is seen in so many areas.''

Yoshio Taniguchi, vice president of Mitsubishi Corp., told a news conference the agreement ''should help the two sides increase their competitive edge in world markets and relax trade friction between Japan and the European Community.''

On the Japanese side, the agreement includes Mitsubishi Corp., the nation's biggest trading house, and three other firms of the Mitsubishi group - Mitsubishi Heavy Industries Ltd., Mitsubishi Electric Corp. and Mitsubishi Motor Corp.

The West German side is headed by Daimler-Benz AG, which serves as a holding company for the Daimler-Benz group including companies involved in the auto, electronics and aerospace industries.

Specific cooperation programs will be worked out through talks between the various companies of the two groups, the Mitsubishi statement said.

''The Mitsubishi-Daimler accord is certain to spark strong reaction from the United States, since the Japanese-West German tie-up could threaten U.S. competitiveness in the key aerospace industry, with its close links to U.S. defense capabilities,'' the Daily Yomiuri said.

#90066u0932 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - The Labor Department, in a revised report, said Wednesday worker productivity edged up by a scant 0.2 percent in the fourth quarter of 1989 while pay jumped by six percent. For the entire year, worker productivity increased by 0.9 percent.

The revised report, compiled by the department's Bureau of Labor Statistics, is identical to a preliminary estimate that the government issued last month and indicates Americans may have to pay more for goods and services. The reason: while worker productivity lagged, labor costs increased.

The number of hours worked, meanwhile, fell by 0.2 percent during October, November, and December, and a key inflation gauge tied to the report increased 3.4 percent in the fourth quarter compared to a 2.7 percent hike in the third quarter. All the statistics are adjusted for seasonal factors and calculated at an annual rate.

The drop in hours worked marks the first decline since the second quarter of 1986, and the small increase in productivity compared to a healthier 2.4 percent increase during July, August, and September, the department said.

Hourly compensation increased by six percent in the fourth quarter, but when inflation is taken into account, that amounts to a gain of only 1.9 percent, the Labor Department said in its revision.

In the manufacturing sector, productivity "increased a good deal more rapidly" at 2.8 percent during the quarter, the department said. But factory output fell by 1.6 percent and the number of hours worked was off by 4.3 percent, it added.

"Hourly compensation of maunfacturing workers increased 6.9 percent during the fourth quarter, the largest such increase since the second quarter of 1982 when it rose 8.2 percent," the report said. When inflation is taken into account, that increase in pay amounts to a gain of 2.8 percent, the Labor Department said.

FREEPORT, IL (MARCH 7) UPI - The Thermos Co. has issued a nationwide recall for some of its Thermos and Structo brand gas-operated barbecue grills sold since April 1989 that may contain parts that could result in a fire.

All of the affected grills have the name Taiwan Pao-An Ind. Co. stamped on the product's round metal regulator assembly connected to the liquid propane gasoline tank, Thermos Co. executives said Tuesday. In addition, the affected grills have serial numbers between 721791 and 886390 stamped on the bottom base or inside panel, officials said.

The company has determined that 87,606 of an estimated 675,000 grills shipped since April 1989 contain parts that may be defective. Of those, however, studies indicate only one percent need parts replaced, officials said.

The U.S. Consumer Product Safety Commission has said it is unaware of any fires caused by the hose, valve and regulator assemblies in the affected grills. The company will voluntarily replace the component parts, Thermos Co. said.

Owners of the affected grills are asked to call Thermos Co. 1-800-448-0475 between 9 a.m. and 5:30 p.m. EST.

SITE 2, THAILAND (MARCH 7) UPI - Cambodian refugees and resistance officials reacted with dismay and confusion Wednesday to the Thai government announcement it would send more than 300,000 Cambodians back home or to ''neutral camps.''

The Thai plan could well be part of reported Thai efforts to end the 10-year civil war by cutting off the rebel groups from supplies of fighters, U.N.-provided food and medical care and secure bases for rest and shelter from Cambodian government troops.

Meanwhile, Suwit Suthanukul, secretary-general of the Thai National Security Council, contradicted a spokesman's statement that the government planned to ask the Vietnamese-backed government of Cambodia to take the refugees back. He said the refugees should be sent to resistance-held ''liberated zones'' once the zones are safe.

''Neutral camps mean no more resistance,'' said Thou Thon, the chief of the Rithisen section of Site 2 refugee camp about 130 miles east of Bangkok.

Thou Thon, an official of the Khmer People's National Liberation Front, a U.S.-backed resistance group, said the plan would separate resistance fighters from their relatives in the camps and deprive the resistance of its main support base.

A spokesman for Prime Minister Chatichai Choonhavan announced Tuesday that the government planned to send the 300,000 refugees, held for up to 10 years in camps controlled by the three resistance groups, to neutral U.N.-controlled camps or back to Cambodia.

Thou Thon estimated about 14,000 KPNLF fighters had relatives among the 150,000 refugees in Site 2, a crowded refugee camp just 2 miles from the Cambodian border. And many guerrillas from the other two rebel groups - Prince Norodom Sihanouk's followers and the Khmer Rouge - had relatives in six other camps along the Thai-Cambodian border.

The KPNLF official said Thai administrators at the camp had asked him to begin a survey to determine who wanted to return home and who wanted to go to the neutral camps.

Refugees interviewed at random in the camp expressed fear and confusion at the reported decision of the government.

Ngeth Ngor, 60, said she spent six months in prison under the Vietnamese-backed government because she was suspected of distributing tapes of Prince Sihanouk's speeches.

''I will never go back until there is peace and a non-communist government '' she said.

Ngeth Ngor said she still had hopes of joining two of her children now living in Stockton, Calif., and Providence, R.I.

But Thailand, to stop the flood of hundreds of thousands of Cambodians fleeing famine and war in 1979, classified the Cambodians as ''displaced persons'' and does not allow them to apply for resettlement in Western countries, even if they have relatives there.

Many refugees expressed faith that the United Nations would protect them if they returned to Cambodia.

"I was a (resistance) soldier for three years so it wouldn't be safe to go back unless the United Nations is there to supervise,'' said Sim Koliyang, 31.

Other refugees said they feared they would be killed by the Vietnamese soldiers believed to be still in Cambodia, or that the Vietnamese-backed government would be as harsh as the rule of the Khmer Rouge.

An international aid worker at the camp said few refugees had an adequate idea of the situation inside Cambodia and this made them afraid to return even though many were fed up after years of confinement in the camps.

Tom Or, chief administrator of a section of the camp, said the KPNLF had been working to establish a liberated zone inside Cambodia where it would be safe to resettle those refugees willing to return.

But he said a recent Vietnamese-led offensive and heavy shelling with Soviet-supplied rocket launchers had made much of the liberated zone near the Thai border too dangerous.

''If we have enough weapons and ammunition we can expand our zone, but now we are short of everything,'' he said.

International aid groups have long urged the establishment of neutral camps to prevent manipulation and abuse of the refugees by resistance groups - particularly the brutal Khmer Rouge and the sometimes ill-disciplined KPNLF.

ANALYSIS BY HELEN THOMAS

WASHINGTON (MARCH 7) UPI - The Cold War is over, and now the United States is trying to iron out differences with former hot war enemies.

After 45 years of healing and a benevolent postwar relationship with Germany and Japan, some problems are coming to a head as the communist world goes through stunning political changes.

President Bush, who prefers the kid gloves approach to those new allies, met with the leaders of each country recently to try to reach some understandings as new relationships are bound to emerge.

West Germany and East Germany are on a fast track to reunify, probably by the end of the year, and the process is being accepted by the superpowers as inevitable. There is some concern in Western Europe, where there are vivid memories of the last two world wars when Germany was on the march, that a strong Germany may once more seek to dominate the continent.

The problem with Germany and its postwar borders with its neighbors was aired at a meeting between Bush and West German Chancellor Helmut Kohl at a weekend meeting at Camp David.

Although Bush stated unequivocally that the United States considers the

post-war border between Germany and Poland as inviolate and a settled issue, Kohl was not as specific.

He told a news conference that the question of borders with Poland would have to be settled by the parliament of a reunified nation.

The Poles fear that Germany may try to regain lands it lost after World War II, including Silesia, Pomerania and East Prussia. A line at the Oder and Neisse rivers was drawn as the boundary after the war and this is what the Poles want to maintain.

Kohl's refusal to say that a unified Germany will honor that border has evoked memories of friction in the past and planted the seeds of possible future dissension in Europe.

With Japan, the United States has a big problem. It has a trade imbalance of $49 billion, and so far there has only been talk and promises to study the issue that is becoming a major source of irritation between the two countries.

Bush met with newly elected Japanese Prime Minister Toshiki Kaifu in Palm Springs, Calif., stress the fact that congressional patience is running out, and if Japan continues to basically close its doors to several U.S. products including satellites, supercomputers and wood products, U.S. sanctions may be the next step.

Kaifu promised a ''maximum effort'' to try to rectify the problem, and at the same time told Bush that the United States has to put its house in order in terms of its enormous budget deficit.

In other areas, the United States has targeted Japan's high savings and investment rates, restrictive land-use policies, exclusionary business practicess, and pricing mechanisms, which are harmful to American opportunities to export to Japan.

In the case of Germany and Japan, the United States exercised magnanimity in victory. It helped both countries get back on their feet economically and led them by the hand into more democratic political procedures. In recent years, they have managed to surpass the United States in terms of their prosperity and solvency.

But if Germany tries to recapture territory now held by Poland and Japan continues to put up barriers against American products, future relations are bound to deteriorate.

NEW YORK (MARCH 7) UPI - Latest metal market prices as quoted Wednesday by the American Metal Market, authoritative metals publication:

Aluminum, New York Merchants, 99.7 percent pure ingots 67.00-66.00 c-lb.

Antimony, domestic, refined in alloy, $1.25-$1.40 lb.

Copper, electrolytic wirebars, delivered U.S. (Warrenton Refining Co.) 135.00 c-lb.

Lead, common, U.S. primary producers 44.00-45.00 c-lb.; U.S. non-primary (secondary) producers 44.00-48.00 c-lb.

Magnesium, 99.8 percent, ingot 163.00 c-lb.

Manganese, 99.9 percent, boxed regular 91.00-95.00 c-lb.

Mercury, $285.00-$300.00 76-lb. flask.

Nickel, briquettes delivered to customers, merchant, N.Y., $3.54-$3.66 per pound.

Palladium, N.Y. Am. Met. Mkt. dealer $130.00-132.00 per troy ounce.

Platinum, soft, 99.5 fine, producer - $506.00-$508.00; dealer-approx., $508.00-$509.00 per troy ounce.

Steel, No. 1 heavy melt scrap - Pittsburgh $98.00 per gross ton (consumer buying price); Am. Met. Mkt. composite scrap price $101.80 per ton.

Tin, N.Y. Am. Met. Mkt. ex-dock - 303.25 c lb.

Titanium, aircraft quality, 8 1/8 inch round rotating billet, f.o.b. shipping point $8.87-12.96 lbs., domestic sponge 99.3 percent, domestic and imported duty-paid $5.35-5.50 lb.

Tungsten powder (H-Red), 99.9 percent minimum pure $10.00 per lb.

Zinc, prime western, U.S. 70.50 c-lb.

#90066u0988 03/07/1990 ~United Press International

(MARCH 7) UPI - The Postal Rate Commission has 10 months to act on a request by the Postal Service Board of Governors to raise the cost of mailing packages in the United States by an average of 19 percent. Postmaster General Anthony Frank says the rate hike matches a 19 percent increase in the postal service's operational costs since mail prices were

last elevated in March 1988.

It looks like many West Virginia classrooms will be without teachers today. A spokeswoman for the state's Education Association says most educators woN'T show up for work after Governor Gaston Caperton withdrew a proposal yesterday that asked for a five-percent pay hike for educators. The West Virginia Education Association represents 16-thousand of the state's more than 21-thousand teachers.

Fear NOT lovers of bottled water. The head of the American branch of Perrier says the sparkling water will return to the U-S market next month. The one difference between the new product and the one removed from store shelves around the country after last month's contamination scare is that the pear-shaped green bottle will have the phrase ''nouvelle production'' stamped on it.

The Air Force S-R-71 reconnaissance plane, otherwise known as the Blackbird, made its way to its new home at the Smithsonian Institute. But NOT before racking up a coast-to-coast flight record. The retiring jet flew from Los Angeles to Washington in one-hour, eight minutes and 17 seconds, shattering the previous record by more than three hours.

#90066u0994 03/07/1990 ~United Press International

DALLAS (MARCH 7) UPI - Dallas-based First Gibraltar Bank, a creation of the 1988 thrift bailouts, has been selected to acquire San Antonio Savings Association in another federal bailout, the Dallas Times Herald said Wednesday.

Federal regulators were scheduled to announce later this week that First Gibraltar will buy San Antonio's largest savings and loan, which has $2.3 billion in assets, banking sources said. First Gibraltar emerged the winner in a bidding contest against NCNB Texas National Bank and Bank One Texas, both of Dallas.

The newspaper said the Resolution Trust Corp., the federal agency that sells ailing thrifts, reached a decision Tuesday in a meeting and notified bidders. The agency, which has met a number of times over the past two weeks to review bids and even postponed the selection, is ironing out details of the deal with First Gibraltar. Terms were not available.

A spokesman for First Gibraltar in New York declined comment, except to say bank officials are still negotiating with the agency for a possible acquisition of San Antonio Savings. RTC officials could not be reached.

The deal was considered a coup for First Gibraltar, which was formed under the widely criticized Southwest Plan. A New York holding company

controlled by Revlon Chairman Ronald Perelman bought the five insolvent savings and loans with $5 billion in taxpayer assistance from the Federal Home Loan Bank Board, which has been dissolved.

With $9.8 billion in assets, First Gibraltar is the largest savings and loan in Texas. The thrift reported $7.1 million net income in the first nine months of 1989.

San Antonio Savings has the largest branch system for retail deposits in San Antonio and presented a prime opportunity to enter the San Antonio market through a thrift purchase. NCNB Texas had been especially vocal about wanting to acquire the thrift.

"The deal propels First Gibraltar into a leadership role for all three of Texas' major cities Houston, Dallas and San Antonio," Robert Rieke, banking analyst at Rauscher Pierce Refsnes in Dallas, told the Times Herald.

#90066u1003 03/07/1990 ~United Press International

HASBAYA, LEBANON (MARCH 7) UPI - Residents of the Israeli-declared ''security zone'' Wednesday demanded that an American they accused of building Jewish settlements there leave the area.

The inhabitants of Rashaya, 33 miles southeast of Beirut, gave William Robinson, who has been living in the security zone for three years, one month to leave the area.

They said in a statement that Robinson ''was engaged in a suspicious plan to build Jewish settlements in the security zone under the cover of humanitarian projects.''

Israel established the security zone when it withdrew the bulk of its troops from Lebanon in 1985. The zone, which runs up to 9 miles north of the border with Israel, is inhabited by 180,000 Lebanese.

Sources said Robinson was an American Jew who migrated to Israel five years ago. They could not say where he was from in the United States.

According to the statement, Israeli authorities brought Robinson, his wife and four children to the security zone about three years ago and settled them in the house of a Lebanese in the town of Marjeyoun, 8 miles

southeast of Beirut.

Robinson also used the house as a shelter for handicapped,

''He was identified as an American who has dedicated his life to charity and wanted to found a center for handicapped people in the area,'' the statement said.

After winning the confidence of some local officials, Robinson asked the municipality of Marjeyoun to register a piece of land under his name, saying he planned to build a rehabilitation center.

The statement said Mayor Bahgat Shams ''was surprised and refused such a request.''

Robinson left the house in Marjeyoun, claiming he needed a larger place for his humanitarian project, the statement said, adding that he moved to Rashaya and with the help of the Israeli security service.

Upon his arrival in Rashaya, Robinson contacted local officials and proposed to built a rehabilitation center in return for a piece of land on the outskirts of the village.

The officials, suspicious of his intentions, rejected his demand and supported the residents in asking him to leave the village within a month.

Rashaya residents also sent cables to President Elias Hrawi and Prime Minister Selim Hoss warning against ''such a plan which is no more than an Israeli trick aimed at settling Jewish immigrants on Lebanese territories under the cover of humanitarian projects.''

Reports have been published in the Beirut press that Israel was planning to settle Soviet Jews in south Lebanon.

In 1989, 12,900 Soviet Jews emigrated to Israel and 4,600 others joined them in January this year. Israeli officials estimate as many as 100,000 Soviet Jews may arrive in Israel this year.

Palestinians and many Arab states including Lebanon have expressed alarm over the large number of Soviet Jews emigrating to Israel. They fear the newcomers would be settled in the occupied territories.

#90066u1018 03/07/1990 ~United Press International

(MARCH 7) UPI - A howling snowstorm that closed airports and schools and left hundreds of travelers stranded in the Rockies pushed to the east Wednesday, while New England dug out from a wintry wallop and

thunderstorms caused flooding in Texas.

Snowplows and tow trucks dealt with the aftermath of the blizzard that smacked eastern Colorado and crippled the Denver area. It left behind a sea of stranded cars on highways and closed many schools and businesses Wednesday.

Hurling 40-mph winds, the storm dumped up to 50 inches of snow in the mountains and about a foot in Denver.

''It's like the wild, wild West out here,'' said Perry Spitzmiller of Fort Collins, which is 60 miles north of Denver. ''Even four-wheel-drive vehicles and county (road) graders were stranded.''

The storm began Monday night and intensified throughout the day Tuesday, reaching its peak around the evening rush hour. Many commuters heading home from work in Denver never got there.

''I've got people sleeping in my lobby,'' said Bob Holsten, general manager of downtown Denver's Comfort Inn. ''I've never seen anything like it.''

Stranded motorists also spent the night in churches and schools - and wherever else they could.

''People can't get to work. They can't get home. But they can get to the nearest bar,'' said Beckie Wood, who tends a suburban watering hole.

Several hundred airline passengers spent the night at Stapleton International Airport after their flights were canceled. An airport official said about 30 percent of the scheduled flights actually landed or took off Tuesday.

Two main runways were open at Stapleton early Wednesday and the rest of the runways were expected to reopen by midday. But officials said it would be Thursday before flights returned to normal because the airlines couldn't find airline crews to man planes.

The heavy, wet snow was blamed for collapsing the roof of a home in northeast Denver Tuesday night. A family asleep inside escaped unharmed.

Most highways were reopened Wednesday, but stranded cars littered the roads. Crews towed the cars away so snowplows could clear the highways.

The main commuter road between Denver and Boulder, U.S. 36, was a parking lot Tuesday night. Many motorists sat in their cars for eight hours without moving, finally abandoning their vehicles to walk to nearby buildings.

Nearly all schools in northeastern Colorado were closed Wednesday, including the University of Colorado in Boulder and Colorado State University in Fort Collins. Many businesses in the Denver area either closed or delayed opening.

The winter also blast sent Wyoming reeling. Up to 18 inches of snow Tuesday closed the Cheyenne airport and all highways leading from the capital city.

The weather service reported 3 feet of snow at Taos ski valley in New Mexico.

The storm was moving east into the central United States Wednesday. It was not snowing in Denver at mid-morning.

But freezing rain coated much of Iowa with a glaze of ice. A section of busy Interstate 35 north of Des Moines was closed by the Iowa Highway Patrol when numerous semis jackknifed and vehicles slid into ditches.

''The highway is completly broken down, a man can't even stand up much less a semi, a state trooper said.

Southern New England dug out from up to 6 inches of snow that fell Tuesday while northern states basked in sunshine. Snow in Massachusetts, Connecticut and Rhode Island made roads slick and triggered several car accidents.

The mercury dipped to a record 7 degrees early Wednesday in Hartford, Conn., breaking the old mark of 8 set last year, and Providence, R.I., tied the record 10 degrees set in 1913. It fell to 10 degrees at Bridgeport, Conn.

A wide area of thunderstorms moved through Texas, Oklahoma, Arkansas and Louisiana, causing some flooding. More than 3 inches of rain fell in areas northwest of Dallas-Fort Worth, prompting the weather service to issue flash flood warnings and flash flood watches for much of north Texas.

In the South, it was warm. Temperatures ranged from 55 in Atlanta to 54 in Charleston, S.C., 52 in Knoxville, Tenn., and 68 in Miami.

WASHINGTON (MARCH 7) UPI - U.S. commercial banks posted disappointing fourth-quarter earnings of $2.7 billion as real estate portfolios weakened and bankers set up provisions to cover domestic credit losses, the Federal Deposit Insurance Corp. said Wednesday.

The modest fourth-quarter earnings, less than half the earnings of the year-earlier period, followed a loss during the third quarter and were the fourth-lowest quarterly earnings total since 1983, the FDIC said.

FDIC Chairman L. William Seidman said he did not view the weakened

earnings as a "major downturn" in the banking industry, which posted record profits during the first two quarters of last year. "We don't see a repetition of the fourth quarter," Seidman said. "We don't expect to see that repeated in the first and second quarters."

Separately, the Office of the Comptroller of the Currency, reported preliminary fourth-quarter results for 4,200 national banks that showed earnings of $578 million, the lowest earnings level in two years.

For the year, national banks reported preliminary earnings of $10.9 billion, down $2.8 billion from record earnings of $13.7 billion in 1988, the comptroller said.

FDIC officials attributed the modest fourth-quarter profit of all commercial banks to greater provisions for domestic credit losses and a continuation of problems in bank real estate portfolios.

Bank charge-offs of $9.2 billion absorbed nearly all of the $10 billion set aside for loan losses. The quarterly charge-off rate was the highest since banks began reporting this information in 1948, the FDIC said.

Of these quarterly provisions, banks set aside a record $8.4 billion to cover possible domestic loan losses. Consumer lending gained 5.5 percent during the year largely from a 12 percent growth in credit card plans.

Real estate played a great role in bank portfolios last year, with noncurrent real estate loans rising sharply nationwide and more than doubling in the Northeast.

The FDIC said banks in the Southwest continued to wrestle with the nation's heaviest burden of real estate woes, with net charge-offs on real estate loans reaching almost four times the national average.

Real estate loans fueled the nation's banking engine, providing more than half of the industry's $168 billion increase in assets last year. "Real estate is becoming an increasing part of bank portfolios and they have to pay greater attention to it," Seidman said.

Seidman said weakened real estate portfolios were a factor in the demise of many of the 206 banks that failed last year. But bank failures overall are declining, down 15 last year from the 221 failures the year before and fewer banks are forecast to fail this year, Seidman said. The number of "problem" banks also declined by 300 during the year to 1,093.

Continued consolidation in the banking industry brought the number of FDIC-insured banks down to about 12,700 at year's end from an industry high of 14,496 in 1984.

#90066u1127 03/07/1990 ~United Press International
WASHINGTON (MARCH 7) UPI - Italian Prime Minister Giulio Andreotti, telling Congress the Western allies ''have traveled together a long road'' since World War II, urged the United States Wednesday to keep its soldiers in Europe to support peace and stability.

Andreotti, who a day earlier told President Bush that all the NATO allies should be consulted on the rush toward German reunification, said the United States can play an important role in Central Europe and in bringing the Soviet Union into the community of democratic nations.

But the Italian leader told Congress that a new relationship among the United States, its allies, Eastern Europe and the Soviet Union must first address the issue of security.

''A New Deal with the East should first of all include a drastic reduction of arms, especially conventional weapons which threaten us Europeans in terms of proximity and continuity,'' Andreotti told the senators and representatives.

''However, nothing could better safeguard Western interests than the success of democracy in the East,'' he said.

''We want to continue building a Europe that is open to the world, not a fortress Europe as some mistakenly fear, but a Europe that is available, ever ready to collaborate in a spirit of true partnership with the United States, whose military presence in Europe must remain and must continue to work for all, as in the past, a gurantee of stability and balance,'' he said.

Andreotti, 70, sought and obtained assurances from Bush that all NATO nations - not just the United States, Britain, France, and the Soviet Union - would be involved in redrawing the political map of Europe with a reunified Germany.

It was clear that Andreotti, a six-term prime minister, sees a critical role for the United States in Europe, despite arguments that the easing of superpower rivalry and the breakup of the Soviet bloc should mean a smaller security role for America.

''The United States, by signing the Helsinki Accords, has accepted to contribute permanently to the security and the development of cooperation in Europe,'' Andreotti said of the 1975 agreement with the Soviet Union and the European nations on security and human rights in Europe.

''We have traveled together a long road in the framework of NATO, which was created as a defensive alliance, but it was above all an association of free nations.

''Yesterday as today, freedom, justice and the vitality of our societies are our most precious heritage, to be defended against poverty and unemployment, but also from the deterioration of the environment and drug abuse.

''The real issue today is how can we encourage change in the East without provoking repercussions that would stop its impetus. It seems to me that a concerted action of Western countries is more necessary than ever before '' Andreotti said.

Andreotti, whose nation fought with Nazi Germany in World War II, said the reunification of the Germanys must come about in a way that ensures ''fundamental political stability for Europe.''

''In this framework the reunification of Germany finds decisive support in the solidarity of its community partners, just as it has an essential anchorage in NATO and a secure guarantee in the larger assembly of the 35 Helsinki Conference nations.''

On Tuesday, Raymond Seitz, assistant secretary of state for European and Canadian Affairs, said Bush and Andreotti agreed that a united Germany should remain a member of NATO and that reunification should honor the existing German borders with other nations.

West German Chancellor Helmut Kohl moved to defuse the explosive issue Tuesday by backing down from earlier statements linking recognition of the Polish border with Poland's renunciation of reparations from World War II.

BOSTON (MARCH 7) UPI - Ever since the government began urging all Americans over age 20 to get their blood cholesterol levels tested, technicians with portable analyzers have been showing up at health fairs, shopping malls and grocery stores.

Even David Letterman had his cholesterol checked on his popular late night television program.

But two recent studies suggest such tests often are inaccurate, either because of problems with the analyzers themselves or because the people who operate the devices are inadequately trained.

Researchers in Massachusetts and Minnesota discovered that the screening results showed people's cholesterol levels to be higher or lower than they actually were as much as 25 percent of the time.

Consequently, some people with high cholesterol counts apparently have been falsely reassured that their levels are within a safe range, while others have been needlessly alarmed, according to Dr. Harvey W. Kaufman of the Boston University School of Medicine.

Numerous studies have demonstrated that people who have high amounts of one type of cholesterol in their blood known as low-density lipoproteins are more likely to have clogged arteries and thus have a greater heart attack risk.

The National Heart, Lung and Blood Institute recently reported that public cholesterol screening, if done properly, may be a good way of getting hard-to-reach populations into treatment. A survey of 13,000 people found 40 percent of those with high cholesterol levels on public tests went to a doctor for followup, and three-quarters changed their diets.

But a study co-authored by Kaufman casts serious doubt on the accuracy of most public cholesterol teats.

Blood was drawn from 96 people who were referred to a research center at Tufts University in Medford, Mass., and each blood sample was tested by five of the most popular portable cholesterol analyzers. The results were compared to measurements made by a laboratory system that had a high degree of accuracy.

Kaufman said the research showed only two of the machines produced readings accurate enough to meet federal guidelines. They were the Ektachem DT-60, made by Eastman Kodak and Vision, manufactured by Abbott Laboratories. The accuracy ratings were 95 percent and 94 percent.

Three analyzers failed to make the grade. They were Analyst, from Du Pont, Seralyzer, made by Miles Laboratories and Reflotron, made by Boehringer-Mannheim Diagnostics. Their accuracy ranged from 83 percent for Reflotron to 75 percent for Seralyzer and 74 percent for Analyst.

Kaufman said better calibration might have improved Analyst's performance, but only redesigns would probably help the Seralyzer and Reflotron, despite manufacturers' claims that the instruments do meet federal guidelines.

The Boston study appeared recently in the Journal of the American Medical Association, which carried a second report that found the accuracy of cholesterol tests also can depend on the training of those who operate portable analyzers.

In the second study, researchers from the University of Minnesota looked at the precision of tests carried out at four public settings, including a state fair, two stores and a workplace.

Like the Massachusetts researchers, they compared the results from portable analyzers to highly accurate laboratory tests. What they found was a correlation between the degree of an operator's training and the accuracy of the results.

At the one site at which operators had at least four days of training, the results were wrong 5.6 percent of the time. At two other sites, where the operators had two days of training, the inaccuracy rate grew to about 14 percent. And at one test site that had operators with only one day of training, the results were wrong nearly 25 percent of the time.

Kaufman said the research findings should not discourage people from taking advantage of public screenings, but should make them aware that the results are not always precise.

He said people who have readings that clearly are high - 240 milligrams or more per tenth of a liter of blood - should see their doctors for further tests. Those who have borderline readings, between 200 and 239, should see a physician if they also have other risk factors, such as being male, a smoker, diabetic, obese or having high blood pressure, he said.

#90066u1188 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - Saying its plan would require new taxes, the influential American Medical Association proposed Wednesday that employers provide health insurance for all workers and the government expand coverage for the poor.

In adding its voice to a chorus of calls for providing access to care for the 31 million to 37 million Americans without health insurance, the doctors group declined to put an extact price tag on its plan.

AMA officials told a news conference that expanding Medicaid coverage for the poor would cost $30 billion to state and federal governments while other costs of its plan would have to be worked out.

''It's going to require new revenues, and some of those revenues are going to be tax revenues,'' said the group's president, Dr. Alan Nelson.

The AMA's 16-point plan follows last week's recommendations by the bipartisan Pepper Commission, which called for a slightly different form of mandated employer insurance combined with an expanded public program.

The AMA stopped short of joining the congressional panel in proposing a government program for long-term care, calling instead for tax incentives and aid to the poor to encourage private insurance for nursing home stays.

The Pepper Commission drew criticism for not saying how it would raise the $66.2 billion its plan would cost the federal government, and the AMA acting executive vice president, Dr. James Todd, said he feared the need for coverage was being ''deep sixed'' by an emphasis on costs.

''Everybody tries to put a dollar figure on them and decide how they are going to pay for them before they decide whether they have the right programs,'' Todd said. ''We're approaching it from the point of view of what is it that Americans should have for access to health care.''

Prospects have appeared dim for health care legislation following last year's repeal of Medicare catastrophic illness coverage, but congressional sources who work on health issues said the AMA's proposal would be significant, particularly because of the group's influence with Republicans.

''This AMA report is just what the doctor ordered,'' said Sen. Edward Kennedy, D-Mass., the sponsor of legislation to require employers to provide insurance for employees who work more than 17 1/2 hours a week.

Under the AMA plan, employers would be required to provide health insurance for full-time employees and their families. Small businesses, which oppose mandates, would be given tax breaks to help them afford such coverage.

State insurance risk pools would be created to help people who cannot buy insurance because of pre-existing conditions, and Medicaid would cover all people below the poverty level.

The program also calls for building up Medicare funds through employer and individual taxes and giving senior citizens vouchers to choose their system of care - which would include catastrophic coverage.

Costs under the AMA plan would be held down by ''practice parameters'' devised by doctor groups, less state regulation and - not surprisingly - reductions in the costs of malpractice insurance.

Of the uninsured, two-thirds are workers and their families and a third are children. In addition to those without insurance, another 9 million Americans, mostly elderly, need coverage for expensive long-term care.

#90066u1195 03/07/1990 ~United Press International

PRESCOTT, AZ (MARCH 7) UPI - Sam Steiger, a colorful rancher and horse breeder who began his political career in the state Legislature 30 years ago, announced Wednesday that he will seek the Republican nomination for governor.

Steiger became the fifth announced candidate in the GOP field, which includes his former boss, ex-Gov. Evan Mecham. Steiger resigned as an aide to Mecham in 1987 after he was accused of threatening a state paroles board member over a vote.

Saying he has nothing against Mecham, Steiger said he entered the race because he believes that Mecham - who was removed from office through impeachment in 1988 - cannot win a general election.

Steiger's, whose announcement Wednesday came three days short of his 61st birthday, served two terms in the Arizona Senate and five terms in the U.S. House of Representatives. He said Wednesday the governor's job is one he always has wanted.

''This is my last hurrah or my last roundup, whatever you want to call it '' he said. ''I'm going to do the best job I can in the next four years. I've been to Washington, I don't want to go anywhere else. Arizona is more important than any place else in the country, regardless of the political rewards.''

#90066u1202 03/07/1990 ~United Press International

MOSCOW (MARCH 7) UPI - A landmark law that chips away at the total state ownership by recognizing citizen ownership of property and opening the way for the first non-state businesses in the Soviet Union in six decades has won approval in the Supreme Soviet.

The measure, which has been debated for six months, was passed Tuesday by the Supreme Soviet in a vote of 350 to 3 with 11 abstentions in a major victory for Mikhail Gorbachev's economic reforms.

Following its passage, the legislators stood and applauded, and the vice chairman of the Supreme Soviet, Anatoly Lukyanov, broke into a broad smile after shepherding the landmark bill through voting that at times went article by article.

The law, to become effective July 1, 1990, recognizes for the first time that there are other forms of property besides state ownership, tenet of Soviet socialism since the state was born in November 1917.

In the only extensive exception to total nationalization, state founder Vladimir Lenin allowed businesses during the New Economic Policy - NEP - of 1921-28, the most successful period of overall economic growth in Soviet history.

But the next Soviet leader, Josef Stalin, ended NEP as well as all private farming, ushering in total state control of the means of production and the end of markets.

The new law, however, according to the Tass news agency, says ''ownership in the U.S.S.R. exists in the form of citizens' property, public (collective) property and state property.''

Aversion to private property in the collectively minded Soviet Union is so strong that the bill did not specifically pronounce the term.

''The law does not contain the notion of private property, but allows citizens to own some means of production in order to conduct individual economic activity,'' Tass said.

''Simultaneously, it extends to the republics the right to establish kinds of property.''

If past experience is any indicator, the law could be emasculated by bureaucrats who run the economy, which has still not been decentralized by Gorbachev's reforms.

Without a well-developed wholesale economy, businesses cannot flourish. Lack of such markets for raw material has hindered the cooperative business allowed by Gorbachev in what was also earlier billed as vital

legislation.

#90066u1211 03/07/1990 ~United Press International

SEOUL, SOUTH KOREA (MARCH 7) UPI - Eight student radicals armed with homemade noise bombs and iron bars tried to seize the headquarters of the newly formed ruling Democratic Liberal Party Wednesday but were arrested by police tipped about the plan, authorities said.

The youths, who allegedly wanted to stage a sit-in, gathered at a hotel coffee shop near the government party headquarters in a southern district of Seoul and tried to sneak into the party building through a parking lot, police said.

Authorities tipped about the plan had posted police and other law enforcement agents, who arrested the eight, police said.

The youths allegedly told police they were members of a ''death squad for national salvation'' formed by the National Council of University Student Representatives, a hard-line dissident group.

Police said the students carried four homemade bombs, four iron bars and a large placard demanding ''Disband DLP seeking prolonged one-party dictatorship.'' The bombs were explosives in cans that can cause loud noises but not injuries, police said.

The students allegedly said they wanted to stage a protest sit-in at the office of Kim Young-sam, a former opposition leader who now is one of the three leaders of the government party, police said.

The students carried leaflets announcing a ''students declaration for national salvation,'' denouncing formation of the new ruling party as ''a political trick designed by the United States to control South Korea and perpetuate Korea's division,'' police said.

The new government party was created earlier this year by merging the former ruling Democratic Justice Party led by President Roh Tae-woo and two opposition groups led by Kim Young-sam and Kim Jong-pil.

The merger left Kim Dae Jung's Party for Peace and Democracy as the lone opposition force in parliament.

Kim Dae Jung's party and hard-line dissident groups have demanded that the new ruling party be disbanded because it could impose a one-party dictatorship by controlling more than two thirds of the 299 parliamentary seats.

The government party has 216 seats in the National Assembly. Kim Dae Jung's party controls 70 while there are 11 independents. Two seats remain vacant.

#90066u1228 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - Backstairs at the White House:

Many viewers reached the conclusion that Barbara Bush differs with her husband on the question of abortion after watching NBC-TV's ''A day in the life of George Bush.''

The first lady artfully dodged the question but made it clear that she was avoiding it simply because she did not want to appear to differ from her husband on major public issues.

Bush is adamantly against abortion, but in recent months he has been taking a different tack, asserting that there is room in the Republican Party for all points of view, including pro-choice supporters.

Mrs. Bush, so far, except for a brief slip on the question of automatic weapons, has basically been able to avoid controversial issues. It is not required that the first lady must always agree with her husband. But she has decided that is the way to avoid headlines.

She religiously keeps a diary and maybe in her memoirs she will express her views more frankly.

Right now she believes the better part of valor is to go along to get along.

Furthermore, she contends that she only wants to express her views on issues where she can make a difference.

NBC had nine camera crews at the White House the day of the filming of ''A Day in the Life of President Bush'' and they covered all bases. The editors had to crash all night to edit the film after some 12 hours of shooting. It was all reduced to one hour, and much of it apparently landed on the cutting room floor.

As usual, Millie, the Bush spaniel, played an important role in the documentary.

When reporters want to tease the powers that be at the White House, they quip who was ''General Vessey.''

Vessey was chairman of the Joint Chiefs of Staff during President Ronald Reagan's administration, but Reagan, in giving videotaped testimony in the Iran Contral scandal case of former national security adviser Adm. John Poindexter, could not remember who Vessey was. ''The name is very familiar '' said Reagan.

President Bush loves to travel, as evidenced by his five-day swing that began when he flew to Staten Island on Feb. 28 and ended on Mar. 4 when he returned to Washington from Palm Springs, Calif. He also made stops in San Francisco and Los Angeles.

A reporter, signing up for the trip, decided to put a couple more stops on the list as a gag. He added Little Rock, Ark., and Dalton, Ga. Bush did not make those stops but there is a feeling when he learns of the joke, he may just decide to add those cities to future trips. He is bound to break his presidential travel budget again this year.

President Bush has a hidden talent of mimicking, which he exhibits only in private. He does a good imitation fo Clayton Williams, the front-running GOP ''good 'ol boy'' candidate running for governor of Texas. Bush, who claims his adopted Texas as home, has mastered the style and accent after

years in the oil business in Midland. And he is relishing stories about Williams' free wheeling go-for-broke style of politicking.

White House chief of staff John Sununu has become a lightning rod for White House critics, especially activist environmentalists, who consider Sununu a Rasputin of sorts in dealing with environmental issues.

Sununu gets the flak on other issues as well. But press secretary Marlin Fitzwater dismisses the heat that Sununu is getting from many quarters, telling reporters that ''it goes with the turf.''

He ought to know. Fitzwater is in hot water with another group, the nation's lawyers, after gratuitously telling reporters that lawyers ''deserve all the criticism they get.''

#90066u1257 03/07/1990 ~United Press International

BOGOTA, COLOMBIA (MARCH 7) UPI - Authorities broke up several urban cells of two leftist rebel groups in three large cities, dealing a blow to guerrilla plans to sabotage Sunday's congressional elections, military sources said Wednesday.

The gravest blow was dealt to the National Liberation Army. Authorities captured 36 members of the rebel group in Cali, including 10 leaders of the organization in the city, 200 miles southwest of Bogota.

''We consider, according to initial interrogations, that these 10 are the directive military staff of this regional branch'' of the rebel group, Gen. Manuel Jose Bonnet, commander of the 3rd Brigade in Cali, told reporters.

Authorities also foiled a rebel plan to sabotage several elections posts in Bogota, capturing 10 members of the Maoist Popular Liberation Army and several letters and encoded documents, a Defense Ministry spokesman said.

A Bogota newspaper reported the rebels had a manual on homemade bombs and a document titled, ''Strategic Plan for Taking Power.''

The National Liberation Army, known as ELN by its Spanish initials, launched a spree kidnappings and armed attacks last January as part of a ''no vote'' campaign to thwart the congressional elections. The rebels recently announced they were holding 15 political prisoners to protest elections, and claim to still hold 14 soldiers captured during an ambush on an army patrol last week.

The rebels last month abducted three Americans, David Kent, James Donnelly and the Rev. Francisco Amico, to protest the visit of President Bush to the anti-drug summit in Cartagena Feb. 15. The Americans were released a few days later.

Among the captured guerrilla suspects were workers affiliated with one of the largest labor unions in Colombia, the United Workers Central, although Bonnet assured reporters authorities were ''in no way accusing the unions of belonging to this criminal organization,'' referring to the ELN.

ELN rebels, in a recently published interview with the Chilean journalist Marta Honecker, said they planned to infiltrate labor unions and other civic organizations to broaden the non-military scope of the group.

In further actions, security police said they arrested two ''heads'' of the Medellin arm of the Popular Liberation rebels on Tuesday.

''These actions are supremely important, because they totally neutralized a sabotage plan and terrorist acts in Bogota and Medellin,'' the Defense spokesman told United Press International in a telephone interview.

More than 14 million Colombians are expected to vote Sunday for members of Congress, local legislators, mayors and the Liberal Party's presidential candidate.

Guerrilla actions are only part of a general violence wave in Colombia as elections approach. Police say 606 people have been killed so far this year in Medellin, 160 miles northwest of Bogota.

Last week, 371 people were killed in Colombia in violence from leftist rebels, right-wing death squads, drug traffickers and common criminals, authorities reported Tuesday.

#90066u1272 03/07/1990 ~United Press International

BOSTON (MARCH 7) UPI - A tobacco company ''turned an entire generation of Americans into lab mice'' by withholding details of the dangers of smoking an attorney charged Wednesday in closing arguments in a lawsuit brought by the widow of a man who smoked for 27 years.

Attorney Gary Inge told the eight-member U.S. District Court jury that American Tobacco Co. and other manufacturers ''experimented on an entire generation of Americans'' by refusing to voluntarily disclose health risks prior to a 1964 U.S. surgeon general's report cataloging the health risks of smoking.

But the attorney representing the tobacco company, Andrew Lane, urged

jurors to ''resist any temptation to read history backwards.''

Lane said George Kotler, a Cambridge resident who smoked two packs of cigarettes a day for 27 years, was not addicted to nicotine and could have quit ''when the information was known ... George Kotler paid not the slightest bit of attention until he was ready.''

Kotler's widow, Joanne, claims her husband died of lung cancer in 1986 at the age of 55 because he had smoked for more than two decades the non-filtered Pall Mall cigarettes made by American Tobacco, a subsidiary of Old Greenwich, Conn.-based American Brands Inc.

Her lawyers are seeking ''at least a few million dollars'' in damages against American Tobacco, arguing the company failed to publicly disclose information available about the carcinogenic effects of cigarettes before Congress began requiring a warning label in 1966.

Jurors were expected to begin deliberations in the case Wednesday afternoon, after receiving instructions from Judge Walter Jay Skinner.

Lawyers for the tobacco company have maintained that Kotler on several occasions tried to quit smoking, but always returned to the habit.

In closing arguments, Lane outlined medical studies through the 1930s and 1940s which offered no conclusive link between cigarette smoking and lung cancer. Kotler's widow testified during the trial that her husband started smoking in the 1940s, when he was 11 years old.

Even during the 1950s the American Cancer Society and American Medical Association could find no firm eveidence of the health risks, Lane said.

But ''when you are talking about people dying, you cannot wait for conclusive scientific evidence,'' Inge countered, accusing American Tobacco of spending ''money of stupefying proportions'' to pay expert witnesses to testify about the available evidence linking cigarettes and cancer.

During the trial, Kotler's lawyers argued that George Kotler had tried to quit smoking after receiving a warning from a doctor in 1975, but could not. As part of their strategy, they brought to the stand one of the editors of the surgeon general's landmark 1988 report that warned nicotine is as addictive as heroin and cocaine.

Dr. Neal Benowitz, a pharmacologist who helped edit the 1988 report, testified that when attempting to quit, smokers face psychological difficulty in trying to disassociate smoking from daily routines.

Kotler's wife said he regularly smoked while watching sports on television

and reading several newspapers. She gave an emotional account of her husband's final days, hooked to an oxygen tank and so weak that it hurt him to have the family cat climb onto his lap.

But she also admitted during cross examiniation that she had never objected to her husband's smoking - except for asking him not to smoke in bedrooms - until nine years after the surgeon general's first warning in 1966.

Only four cases of smokers suing tobacco companies have gone to federal court, with just one case resulting in favor of the plaintiff.

A federal jury in New Jersey two years ago ordered a tobacco company, Liggett Group Inc., to pay $400,000 to Antonio Cipollone, whose wife, Rose died of lung cancer in 1984 at age 58 after smoking cigarettes for 42 years.

But a new trial was ordered in that case earlier this year because of legal errors by the trial court.

WASHINGTON (MARCH 7) UPI - The administration rejected a call by Rep. Richard Gephardt, D-Mo., to give U.S. aid to the Soviet Union, with the White House spokesman branding the Democratic House leader Wednesday ''the Maxwell Smart of politics.''

Press secretary Marlin Fitzwater, responding for a second time to the criticism of President Bush and the Soviet aid suggestion offered by Gephardt on Tuesday, said, ''It's hard to figure out what he's up to.''

Fitzwater reiterated that the Soviets themselves have ''indicated that they don't want direct support'' and have not made the kind of internal economic reforms that would justify U.S. support. Then the spokesman added: ''He's hard to believe. It's like he's the 'Maxwell Smart' of politics,'' referring to the bumbling secret agent who battled Russian spies in the popular 1960's television series, ''Get Smart.''

''Can you believe he wants to raise taxes on the American people to give money to the Soviet Union?'' Fitzwater asked. ''I don't know what he's doing.''

Another ranking official, deputy Secretary of State Lawrence Eagleburger, earlier told the House Foreign Affairs Committee that the time was not right to provide U.S. economic aid to the Soviet Union.

An administration proposal for $300 million in economic aid to the new

governments emerging from the breakup of the Soviet East European empire must be tied to such conditions as democracy, economic reform, respect for human rights, and ''a friendly'' relationship with the United States, the State Department official said.

Eagleburger said it is fundamental that the recipient nations support a market-driven economy and ''the Soviets are far from it.

''Because of many issues of disagreement that are not settled, this is not the time to suggest including the Soviet Union in this (aid) exercise.''

Gephardt, in a sharp political attack on President Bush's policies, proposed Tuesday that the United States launch a wide-ranging economic assistance program to support the move toward democracy in the Soviet Union and Eastern Europe.

''We should waive trade restrictions ... relax restrictions on high-tech exports, and encourage private investment in the Soviet Union. We provide Export-Import Bank loans and (other) assistance to China, why not to the Soviet Union,'' he said.

Rep. William Broomfield, R-Mich., jumped on the suggestion, saying the United States should provide no aid to Moscow while it supports Cuba, Syria and other nations opposed to many U.S. interests.

''I do not believe we should start a new welfare program for the Soviet Union with foreign aid,'' Broomfield.

Eagleburger, widely respected in Congress for his career service as a diplomat, said Moscow has not requested direct U.S. aid and that it will take time to educate the Soviets in Western economic practices.

''This bill does not include the Soviet Union, as some in the House would like,'' Eagleburger said.

But he appealed to Congress to give the administration ''flexibility'' in releasing economic aid to Eastern Europe and other nations. The administration opposes the practice of congressional ''earmarking'' of aid for certain nations, as Israel and Egypt, which gurantees their assistance will be protected during budget cuts while less politically favored countries suffer.

''What you will hear from me, more than any other word, is 'flexibility ''' Eagleburger said. ''If I have to get down on my knees to ask for it, I will do so.''

Eagleburger said the rush to democracy and market reform in Eastern Europe is moving so swiftly that the U.S. foreign aid budget cannot be locked up

months beforehand, leaving the administration with few dollars to respond to new conditions.

#90066u1283 03/07/1990 ~United Press International

NEW YORK (MARCH 7) UPI - The value of coffee exported by members of the International Coffee Organization tumbled to a 6-year low in 1989 of $8.6 billion or 87.6 cents pound, according to published reports Wednesday.

The governing body representing 74 nations that grow and consume coffee said that 1989 exports were down 8.5 percent from $9.4 billion in 1988.

The ICO reported that 74.2 million bags of coffee, each weighing 132 pounds, were shipped by exporting members during 1989.

The unit value of the shipped coffee fell to 87.6 cents a pound, down from slightly more than $1.08 a pound in 1988 and almost 90 percent below the record $1.68 paid to exporters in 1986.

On the Coffee, Cocoa and Sugar Exchange, the spot March contract for immediate delivery is currently selling for around $1 a pound for a $37,500 coffee futures contract.

Analysts said the sharp drop in the value of coffee shipped was a direct result of the July 1989 suspension of export quotas under the 1983 International Coffee Agreement, which helped to maintain the average world price for coffee at $1.20 a pound.

The decision to suspend coffee quotas came after consumer countries, including the United States, wanted tighter restrictions on the sale of coffee at cut-rate prices to countries that are not members of the ICO.

The suspension of quotas caused a flood of coffee in the marketplace, pushing the price of coffee to its lowest level in almost 14 years, but also increased the availability of high-quality coffees at lower prices.

Also according to the ICO, overall exports of coffee to all destinations by producer members in January rose to 6.37 million bags, the highest January level in 6 years.

Exports to all destinations between July 4, 1989, when export quotas were suspended, and Jan. 31 reached their highest levels in 6 years at 39.86 million bags of coffee.

The organization's producing members shipped 24.6 million bags of coffee between Oct. 1989 and Jan. 31, also a 6-year high, up from 20.63 million bags in the same period of 1988-89.

#90066u1289 03/07/1990 ~United Press International
JERUSALEM (MARCH 7) UPI - Despite a demand by the Labor Party for a decision on the peace process, the Israeli Inner Cabinet Wednesday delayed until Sunday voting on a U.S. proposal for holding talks with a Palestinian delegation.

Prime Minister Yitzhak Shamir adjourned the Inner Cabinet until Sunday when he said the discussion would continue until there was a decision. But Foreign Minister Moshe Arens said later no date had been set for a decision.

The Inner Cabinet is a 12-member committee of the full 26-member Cabinet that deliberates key policy issues.

Cabinet ministers from the Labor Party, who on Tuesday called for a vote on the proposal, scheduled a meeting of the party's Central Committee for Monday to consider leaving the coalition if Likud rejects the U.S. proposal.

During Wednesday's Inner Cabinet meeting, Labor Party Chairman Shimon Peres called on the ministers to approve the questions posed by U.S. Secretary of State James Baker on the formation of a Palestinian delegation for talks in Cairo.

Baker asked if Israel will be willing to accept any Palestinian from the occupied territories on a name basis and that a deportee be included as well as West Bank Arabs with a second address or office in East Jerusalem.

Defense Minister Yitzhak Rabin asked the Likud ministers to accept the proposal in order to allow the peace process to continue and said the Labor-Likud differences could be worked out later.

Labor Energy Minister Moshe Shahal said his party had not wanted to postpone the decision.

''As far as I can judge, the prime minister from the beginning knew he was not going to vote,'' Shahal said. ''We pushed for pushed for continuing tomorrow and he agreed to call it on Sunday.''

Labor made the demand for a quick decision after the Likud demanded assurances from Labor before it approved the Baker formula. The Likud wanted a guarantee East Jerusalem Arabs would be excluded from the peace process and that Israel would withdraw from negotations if it became clear the Palestine Liberation Organization had a role in the Cairo talks.

The purpose of the Israeli-Palestinian talks is to plan for elections in the territories. Elected Arab representatives will negotiate a transitional period of limited self-rule.

Meanwhile, a newspaper in Cairo reported that former President Jimmy Carter would arrived in the Egyptian capital Monday in a bid to revive the stalled Middle East peace process.

The semi-official daily Al-Ahram reported that Carter, who mediated the 1978 Camp David accords that led to the subsequent Egypt-Israel peace treaty, will visit Israel and Tunisia after leaving Egypt.

In the occupied Gaza Strip Wednesday, five Arabs were slightly wounded by army gunfire during clashes, Palestinian sources said.

About 200 women held a sit-in at the Gaza City offices of the International Red Cross to mark international women's day. Border Police used tear gas to break up a march after the sit-in.

#90066u1293 03/07/1990 ~United Press International

ATLANTA (MARCH 7) UPI - New Coke, suffering a decreasing market share, will get a new look and a new name that Coca-Cola Co. executives hoped would give their product new life.

Company executives said Tuesday the company will begin test-marketing the sweeter version of Coca-Cola in a single city ''in a few months'' under the name Coke II.

The can also will be painted red, white and blue - the same color scheme competitor Pepsi uses.

Since its introduction in April 1985, new Coke's market share has dropped from 15 percent to 1.4 percent.

Coke spokesman Randy Donaldson said the product will not be changed. Pepsi is sweeter than traditional Coke, and officials had hoped new Coke would draw some of Pepsi's customers.

New Coke originally was introduced as a replacement for original Coca-Cola but a consumer rebellion forced the company to bring back the original formula under a new name, Coca-Cola Classic.

Donaldson said the company decided on the name change because the product, now five years old, is no longer new.

Some analysts said the change in can color and product name was intended

to separate the new product from the old one before ambiguity about what Coke means destroys the brand name's hold on the American public.

''It's sort of like ice cream, which people associate with their childhood and memories,'' said Emanuel Goldman, a Paine Webber analyst. ''When someone asks for a Coke, they mean a Coke Classic. Yet Coke refers to new Coke. So there's an ambiguity.''

Company executives denied any plan to remove the word Classic from their traditional product.

#90066u1298 03/07/1990 ~United Press International

KHARTOUM, SUDAN (MARCH 7) UPI - A Sudanese military leader said Wednesday the Islamic government was intent on pursuing peace negotiations with Christian rebels but said continued fighting was an important part of the peace process.

Maj. Gen. Alzubair Mohamed Salih, deputy chairman of Sudan's Revolutionary Command council, said his government was serious about pursuing peace negotiations with the Sudanese People's Liberation Army, which has fought against all of Sudan's governments since 1983.

He said that while efforts were being made to hold talks with the rebels, however, military operations against them would continue.

''They are part of the peace process,'' Salih said of the government manuevers against the rebels. ''They even constitute a positive step for achieving peace.''

Sudan's hard-line Islamic military junta, which took power in a last year, has held two sets of unsucessful talks with the predominantly Christian and black African SPLA.

No progress was made at a Nairobi conference in December chaired by former President Jimmy Carter, who said later the two sides were far from an agreement.

A third set of talks was tentatively scheduled to take place in neighboring Zaire at an unspecified date.

Salih said Sudan's ruler, Gen. Omar al Bashir, would travel to Zaire Saturday for talks with President Mobuto Sese Seko aimed at advancing the new negotiations.

The rebels accused the government Tuesday of having no intention of negotiating peace. The group charged al Bashir with approaching Libya for

military assistance to crush the rebel movement.

#90066u1308 03/07/1990 ~United Press International
(MARCH 7) UPI - Diplomatic sources in Afghanistan say anti-communist Moslem fundamentalists are continuing their campaign to dump Moscow-backed President Najibullah. The reports contradict state-run radio, which said that the government had crushed the coup attempt. Najibullah's former defense minister is a leader of the revolt.

Iran's official news agency quotes President Rafsanjani as saying the issue of Western Hostages held in Lebanon ''is going to be solved.'' The dispatch monitored in Athens quotes Rafsanjani as saying Iran will use its influence to free the captives when America and Britain work to free Iranian hostages.

Jury selection continues today in the Iran-Contra trial of former Reagan aide John Poindexter. U-S District Judge Harold Greene says opening statements could begin as early as tomorrow. Greene must approve only 10 more potential jurors. Attorneys from each side will then select 12 panel members and six alternates.

Coast Guard officials will fly over the latest spill in the waterway between New Jersey and Staten Island this morning to determine where to focus clean up efforts. Yesterday, two explosions rocked a barge containing four-point-four Million gallons of Number Two grade fuel oil. There's NO word how much fuel leaked into Arthur Kill.

Fired Exxon skipper Joseph Hazelwood's trial continues today in Anchorage. His lawyers are expected to ask the judge to toss the case out for what they feel is the prosecution's failure to prove that Hazelwood was drunk and negligent in causing the massive 11-Million-gallon oil spill last March.

#90066u1314 03/07/1990 ~United Press International
BRUSSELS, BELGIUM (MARCH 7) UPI - Western aid to Eastern Europe conditioned on specific democratic reforms represents a ''new monster'' on the horizon, the Soviet ambassador to the European Community said Wednesday.

''Putting conditions on economic aid is the wrong way to go,'' Vladimir Shemiatinkov told the Center for European Policy Studies.

He said ''democratic conditionality of aid'' is a ''new monster appearing over the horizon,'' and urged Western nations and institutions to ''take

it or leave it'' in dealing with Eastern Europe on financial aid.

''You either like the processes going on in the East or you don't,'' he said. ''You accept them, you think they are worthwhile and you take it.''

Several Western institutions, including the European Commission and the new European Bank for Reconstruction and Development, call for countries receiving economic aid to meet certain levels of democratization.

The commission has established a five-point list of conditions, including the rule of law, respect for human rights, establishment of a multi-party system, free elections and moving toward market economy, for East European countries seeking Western aid for economic reforms.

The Soviet Union signed a trade and economic cooperation agreement with the EC last year, but has not applied for such aid as other East European countries have done.

The Soviet mission to the EC feels the new reconstruction bank is a worthy idea, but that the bank would serve its purpose better if not bound by specific conditions of democratization in recipient countries.

''The country (the Soviet Union) is so vast that it can solve problems only by itself,'' he said. ''No foreign aid can solve our problems.

''Foreign aid should not have strings attached,'' he said.

On the issue of German unification, the Soviet ambassador acknowledged that positions had hardened regarding a united Germany's NATO status.

The Western alliance seeks a single Germany within NATO, with no NATO troops on the present territory of East Germany. The Soviets insist on a neutralized Germany.

''There is no way out at the present moment,'' he said.

''I can well understand my colleagues who think NATO is beautiful, but for us it is difficult to perceive this idea,'' said the ambassador, who was introduced to the podium by a NATO economist.

''NATO is not transparent and the Soviet Union does not participate in the decision-making or even the policy-shaping of NATO.''

He said, however, both NATO and the EC ''are part of the total European future and we are prepared to cooperate with them in any way possible.''

#90066u1315 03/07/1990 ~United Press International
(MARCH 7) UPI - State-run Israel Radio reports that the Inner Cabinet adjourned today without reaching a decision on a U-S proposal to include Palestinians in the country's peace process. The 12-member panel normally debates key policy issues, but opted to call upon the full 26-member Cabinet to discuss the issue.

Ethiopia's ruling Workers' Party has voted to introduce sweeping political and economic changes. Following President Mengistu Haile Mariam's lead, the formerly hardline Central Committee endorsed the idea that the Marxist nation will pursue policies that reflect reforms elsewhere in the communist world.

Published reports say the Saudi royal family boosted Nancy Reagan's anti-drug campaign by Millions of dollars at the same time the Saudis sought U-S approval of crucial arms sales. A Reagan spokesman denies that the hefty donations influenced White House support for the military sale.

Italian Prime Minister Andreotti goes to Capitol Hill today to speak before both chambers of Congress. Andreotti is expected to press his campaign for all NATO member-nations to play a role in potential German re-unification talks. Yesterday, President Bush assured Andreotti that any talks will honor European concerns.

New York City Schools Chancellor Joseph Fernandez wants to put classrooms in office buildings so that very young children can be near their parents. He says the plan would lower worker absenteeism and help re-introduce the middle class into the city's classrooms. Fernandez ran a similar program when he headed the Dade County, Florida, schools.

#90066u1316 03/07/1990 ~United Press International
BARTOW, FL (MARCH 7) UPI - A man has been arrested on charges of practice of medicine without a license for allegedly posing as a doctor, asking female clerks at a convenience store to bend over and giving them vitamin B-12 injections.

The shots were given to three clerks in a back office of the Farm Store in Lakeland where they worked, according to an arrest affidavit filed by the State Attorney's Office in Polk County.

Hurtis Lamar Proctor, 37, was charged Tuesday with two counts of practicing medicine without a license and one count of violating the nurse's practice act.

The suspect visited the store Feb. 15 and told the first two victims he was a doctor. The Lakeland man convinced them that they looked listless

and needed injections of vitamin B-12.

''We felt like idiots,'' one of the clerks, Rachel M. Echols, said after realizing they had been duped. ''It could've been anything.''

She said the suspect wore nice slacks, a shirt, tie and sports coat.

''The way he talked, it was very professional,'' Echols said.

He told manager Sandra Hampton that Echols, who was at the front counter doing paperwork, looked tired and stressed, Echols said. The suspect asked whether either woman took vitamins, and then suggested the shots, she said.

''I wasn't so sure about it. I don't like shots anyway,'' Echols said.

But she and Hampton accepted the injections. Inhibited about baring her posterior, Echols said she offered only enough bare bottom to give the man a target.

Each of the needles were packaged individually, and he filled each syringe with liquid he extracted from a vial, Echols said.

She received about five injections in the hip, and Echols said she could taste the vitamin as it circulated throughout her body.

Asked whom he worked for, the suspect became evasive and left the store, she said.

About two weeks later, he returned and convinced clerk Elaine McCommis he was a physician's nurse's assistant. She, too, accepted the injections.

After the second visit, one of the three turned Proctor's name over to Polk County sheriff's investigators.

Proctor was placed on three years probation without a finding of guilt in 1987 for similar charges in Holmes County.

That probation was revoked when he was charged in Leon County with hyping B-12, authorities said.

He was sentenced to 30 months in prison plus 30 months probation, but was released in eight days on an appeal bond, records show.

#90066u1320 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - Health and Human Services Secretary Louis Sullivan, likening the supermarket to the Tower of Babel, Wednesday

announced the first major government effort to improve food labeling in 17 years.

Sullivan said the labeling changes are needed to reduce the ''confusion and frustration'' that exists among Americans trying to select healthful foods.

''Some food labels are hard to read and understand. Vital information is missing. And frankly some unfounded health claims are being made in the market place,'' Sullivan said. ''It's a real mess.''

The labeling changes to be proposed by the Food and Drug Administration this year will require most foods to carry consistent nutrition labels, Sullivan said.

Currently, the FDA requires nutrition labeling only when a food company adds vitamins, minerals or protein or makes a nutritional claim. About 60 percent of all packaged foods currently bear nutrition labels, most provided voluntarily by manufacturers.

Other changes include establishing uniform serving sizes, and standardizing currently unregulated descriptions like ''low fat'' and ''high fiber,'' the health secretary said.

''The grocery store has become a Tower of Babel, and consumers need to be linguists, scientists and mind readers to understand the many labels they encounter,'' said Sullivan, referring to the biblical story in which God mixed up human language and people could not understand each other.

The last time U.S. food labels were changed significantly was in 1973, when the FDA established requirements based on a conference convened by President Richard Nixon.

It will probably take about a year before any of the new regulations take effect, FDA officials said.

In a speech to the National Food Policy Conference, Sullivan outlined the FDA's strategy for revising food labeling to provide better nutritional information.

Within the next six months, the FDA will propose rules to:

-Require nutrition labeling for all foods that are ''meaningful sources'' of nutrition. Some spices, flavors and foods made by small businesses may be exempt.

-Mandate new nutrients - such as saturate fat, fiber, cholesterol and calories from fat - be listed on labels. Make some currently required

nutrients, such as thiamine, riboflavin and niacin, optional.

-Ensure standard serving size.

In a second stage of proposals, which will start ''later this year,'' the FDA will aim to:

-Standardize descriptive terms such as ''low fat'' and ''high fiber.''

-Begin consumer tests of different label formats.

-Possibly require the percentage of each ingredient be listed. Currently, just the names of ingredients are listed in order of weight.

The third phase of food labeling changes, starting in 1991 ''and beyond,'' will involve making specific changes to the food label format, Sullivan said.

#90066u1326 03/07/1990 ~United Press International

BONN, WEST GERMANY (MARCH 7) UPI - West German Defense Minister Gerhard Stoltenberg announced Wednesday that the United States will begin removing its stockpiles of chemical weapons from West Germany by July.

Stoltenberg told a news conference that by September all of the weapons will be transferred to a site in the Pacific, where they will be destroyed.

He said the 400 tons of U.S chemical weapons stored in military warehouses near Clausen, in the western part of the country, would be shipped in 5,000 specially designed air-tight, steel containers to the Pacific Johnston atoll.

More than 100,000 artillery grenades, as well as large quantities of the volatile nerve gas Sarin, have been stored in the warehouses for over over 20 years ''but were never moved,'' the minister said.

The special containers will be taken to a nearby U.S. depot before being transfered by rail to the North Sea port of Nordenham. From there they will be transported on U.S. ships to the Johnston atoll, where the weapons will be destroyed.

Stoltenberg refused to reveal the specific route the weapons will travel, citing security concerns. But he said the maneuver will not endanger people or the environment and said special precautionary measures will be taken to eliminate any chances of en-route-accidents.

West Germany pledged after World War II not to produce chemical weapons,

but it was the only member of NATO, other than the United States, to store U.S.-made chemical arms.

The West Germany and United States agreed in 1986 that the chemical weapons should be removed from Germany by 1992, but later agreed to bring forward the deadline.

#90066u1338 03/07/1990 ~United Press International

LONDON (MARCH 7) UPI - Stock prices closed higher in moderate trading Wednesday on the London International stock exchange, boosted in part by better-than-expected earnings from two blue-chip companies.

The key Financial Times 100-stock index, which tumbled 14.5 points Tuesday gained 14.3 points to 2,230.3. The narrower top 30 industrial average added 11.3 points to 1,757.0.

Volume amounted to around 415 million shares, compared with the 401 million shares that changed hands Tuesday.

''The market is not listening to Japan,'' said one dealer, referring to the 428.74-point plunge in the Tokyo Stock Exchange's Nikkei Average.

Analysts noted the market would remain cautious because traders were waiting to see if there were any changes in the interest rate policies of West Germany's Bundesbank or the Bank of Japan.

Market watchers said prices moved higher from the opening bell following news that Ultramar PLC, the giant holding company engaged in oil and gas exploration and production, reported its earnings for the year climbed by 78 percent.

Also, analysts said news that the engineering group BICC PLC reported a 21 percent rise in its earnings helped send prices higher.

Both stocks closed broadly higher in active trading.

Speculators also showed interest in companies scheduled to report earnings results this month, including Glaxo, Hawker, Rolls Royce and Croda.

Elsewhere, Rothmans International PLC, the tobacco company, gained 35 cents to $9.85 following a favorable report by Warburg Securities Ltd.

Among some of the day's other highlights, Ricardo jumped 27 cents after being approached by First Technology, while Braithwaite tumbled $1.76 after issuing a warning on its profits.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed broadly higher in moderate trading.

The German Stock Index closed up 22.50 points to 1,844.72.

Traders said some bargin hunting after the steep declines over the past month helped to boost prices.

#90066u1357 03/07/1990 ~United Press International

COLUMBIA, SC (MARCH 7) UPI - The theory of relativity may be easier to understand than the saga involving the return Wednesday of rare films depicting physicist Albert Einstein that fell off the back of a delivery truck last week.

Nearly 4,000 feet of film depicting the famed scientist at various functions in the 1930s was picked up from the University of South Carolina Feb. 27 by Federal Express for shipment to Audio Plus Video International in Northvale, N.J., a company that was to transfer the footage to videotape.

The problem was the films never made it out of Columbia. It seems the doors on a Federal Express truck flew open as the vehicle drove down a city street, dumping the Einstein films and several other packages onto the road.

By the time the delivery truck driver realized what happened and went back with other Federal Express personnel to search for the lost parcels, they were nowhere to be found.

The university, which kept the films in its collection, put out an urgent plea for anyone who found the Einstein footage to return it.

The good news came Wednesday when Columbia bail bondsman Sam Rivers brought the films and other missing packages to the university's Instructional Services Center.

The center's director of media services, Glenn Smith, said Rivers was given the parcels by a man who spotted them and picked them up shortly after they fell off the truck.

That person, who apparently didn't want any publicity, asked Rivers to return the packages to their owners.

''The story that's coming to us is that he had a criminal record and didn't want to deal with the authorities in any way, shape or form,'' Smith said.

The university official said the school was just relieved to have the films back.

''When you're dealing with a piece of film that's not replaceable, it's one of a kind,'' he said. ''Most people are looking for a dollar value, but you can't really place a dollar value on a film like that. Needless to say, since this was nearly all the film we had on Albert Einstein, we are just elated to have the film returned.''

Smith said the films, which have historical value to researchers and historians, will be sent on to the New Jersey firm for transfer to videotape. Federal Express will get another chance to get them there.

''When we started using Federal Express, we did our research and found they were the most reliable people to deal with,'' Smith said. ''The loss of the films was an unfortunate incident, but we still feel they're the most reliable.''

Smith said, however, that ''with the next few packages, we'll have some anxiety when we drop them off.''

#90066u1359 03/07/1990 ~United Press International

FORT SMITH, Ark. (MARCH 7) UPI - Beverly Enterprises, the nation's largest operator of nursing homes, will relocate its corporate headquarters to Fort Smith, it was reported Wednesday.

The Southwest Times Record quoted informed sources in a copyright story as saying the move ultimately could mean creation and relocation of ''well over 500 executive, financial, computer-related and white-collar jobs'' with an annual payroll estimated between $15 million and $20 million.

David Banks, president of the company, now headquartered in Pasadena, Calif., confirmed that his corporate board approved the move to Fort Smith last week, along with plans to relocate major corporate offices to Fort Smith from Atlanta and Virginia Beach, Va., the newspaper reported.

Officers at the company's headquarters declined comment on the story.

Banks declined to specify a timetable, but described it as a phased move that could begin in the summer.

''It would be premature to go into dollar amounts concerning payrolls, specific number of employees, plans for buildings or other detailed information,'' Banks said in the article, ''but the decision to relocate in Fort Smith is official.''

In 1989, Beverly invited Fort Smith, Little Rock, Ark., and Virginia Beach to submit information for bids for the headquarters. Beverly's Central Division offices already are located in Fort Smith, as well as a supply center. In 1977, Beverly merged with Leisure Lodges of Fort Smith.

#90066u1360 03/07/1990 ~United Press International

NIKOLAI, AK (MARCH 7) UPI - Two women led the male-dominated field Wednesday one-third of the way through marathon Iditarod Sled Dog Race, but the men were nipping at their heels.

Dee Dee Jonrowe held a slight edge over three-time champ Susan Butcher when the two women pulled into Nikolai early Wednesday before dawn.

Nikolai is 367 miles from the Anchorage starting line, where 70 teams set out Saturday across the Alaska wilderness in the 1,161-mile race to Nome.

Once in Nikolai, teams have passed the worst threat from moose and buffalo and come into the first in a series of Alaska native villages.

Jonrowe reached Nikolai at 4:52 a.m. Alaska time followed by Butcher at 5:22 a.m.

Jonrowe was a frontrunner last year, too, but near the Nome finish, her dogs went on a sitdown strike and refused to budge. She still finished a respectable fourth.

Butcher won the race in 1986, 1987 and 1988 and came in second last year. The two women are friends who have trained together in past years and recently become competitors.

Running an hour behind them was Rick Swenson, the race's only four-time winner, followed by two other top Alaska mushers, or sled dog drivers, Lavon Barve and Jerry Austin.

The only non-Alaskan near the front was Robin Jacobson of Squaw, Minn., running sixth.

Women have won four of the last five Iditarod races.

Six women entered the 18th annual Iditarod, which has a $250,000 purse, including a $50,000 first prize.

#90066u1372 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - Former Defense Secretary James Schlesinger said Wednesday the Bush administration should seek assurances there can be some flexibility in a proposal to limit U.S. forces on the flanks of Europe to 30,000.

The United States and Soviet Union have agreed that both U.S. and Soviet troop levels in Central Europe come down to 195,000, with another 30,000 American personnel permitted in nearby Britain, Italy and Turkey, but Schlesinger told a Senate Foreign Relations subommittee that the deal should not be a straitjacket.

''I am uneasy about that (30,000 limit),'' he said.

Citing the case in 1973 when the United States added about 7,000 personnel in the Azores to handle the Israeli resupply effort during the Middle East war, Schlesinger said U.S. objectives in the Middle East may require some adjustment of the European agreement.

He said the ''adjustment'' would assure that, in the event of an emergency not directly involving the United States and Soviet Union, ''we are able to reinforce.''

A number of senators have expressed similar concerns about a firm limit of 30,000 U.S. forces on Europe's flanks.

Schlesinger also said the United States should not take immediate, unilateral steps to draw down its forces in Europe, but should start planning for substantial reductions.

''Our forces should not be significantly reduced until we see the unraveling of Soviet power in Eastern Europe,'' he said.

However, he said, the United States should ''look to the next phase'' by beginning talks with NATO allies about the size and composition of a residual U.S. force of perhaps 100,000.

Schlesinger also cautioned that West Germany or a unified Germany may at some point review the invitation to station U.S. troops on German soil.

''We do not know what the attitude of a new German government will be after unification. ... They might say, 'Hell, you've done your job. You can go home. Leave us the Berlin brigade and go home,'' he said.

Also testifying before the European Affairs Subcommittee was Gen. John Calvin, the senior U.S. commander in Europe. He argued the NATO policy of ''flexible response'' - threatening the first use of short-range nuclear weapons to handle a massive conventional force attack - should be retained. Negotiations on those limiting those weapons, he said, can

follow conventional arms control agreements.

''The great danger in thinking about the planning for the future is believing we are already there. We are not,'' he said.

Galvin's position was countered by Morton Halperin, a former assistant defense secretary, who argued the United States ''should take the opportunity of a reduced threat to end our reliance on the first use of nuclear weapons.''

He also said the United States should not link the continued presence of U.S. forces in Germany to the continued stationing of nuclear weapons there. Any linkage, he said, could create a situation in which U.S. forces were inevitably forced out of Germany.

#90066u1373 03/07/1990 ~United Press International

DAR ES SALAAM, TANZANIA (MARCH 7) UPI - Freed black South African leader Nelson Mandela spoke Wednesday in Tanzania of an ''atomic bomb'' of peaceful change he would take back to his country.

''We will go back to South Africa with an atomic bomb in our heart and blood, not for the purposes of destruction, but to bring about peace and equality in our country,'' Mandela said in an address to more than 30,000 people in Dar es Salaam's sports stadium.

The bomb ''will bring happiness and not misery to all South Africans,'' he said.

Mandela, 71, released last month after 27 years in a South African jail, is in Tanzania on a six-day visit as part of a 17-day African tour to promote the anti-apartheid cause.

Earlier Wednesday he held lengthy talks with former president Julius Nyerere, opened a road named after him and received the Order of Kilimanjaro, 2nd Class, one of the highest decorations of the Tanzanian government.

At the stadium, he praised Tanzania, and Nyerere in particular, for their solidarity with the cause of black liberation in South Africa.

Nyerere, who shared the podium, had words of caution for the crowd about celebrating reforms announced Feb. 2 by South African President Frederik de Klerk.

Mandela was not yet truly free, he said, as long as the apartheid system remained in place in South Africa.

''We are not fighting de Klerk or his wife or his children or anybody else '' Nyerere said. ''We have to fight the system, apartheid, until it is abolished.''

Nyerere, 67, who was president of Tanzania for nearly 25 years, is the most outspoken opponent of apartheid Mandela has met so far on his tour, which has included Zambia and Zimbabwe.

Now chairman of Tanzania's sole party, the socialist Chama Cha Mapinduzi, Nyerere has consistently advocated armed struggle against the Pretoria government. It was he who invited Mandela in 1961 to set up African National Congress military training camps in Tanzania.

His talks with Mandela were expected to focus on his cautious reaction to de Klerk's reforms and on violence this week in South African homelands.

A military coup in the coastal Ciskei homeland three days ago caused Mandela to send leading African National Congress member Walter Sisulu back to South Africa and reportedly almost forced the cancellation of his Tanzanian visit.

There was further trouble Wednesday in Bophuthatswana homeland.

Mandela said Tuesday in Zimbabwe he was optimistic that talks on a new South African constitution were possible with de Klerk, provided the ANC's conditions - including release of all political prisoners - were met.

Mandela received a hero's welcome in Tanzania Tuesday, when he met South African exiles he had not seen since before his 27-year imprisonment, which ended last month.

On Thursday, Mandela, made deputy leader of the ANC in talks last Friday in Zambia, is scheduled visit the camps he set up almost 30 years ago.

His three-day inspection will be secret, as the Tanzanian authorities have banned press coverage at Mandela's request.

On Thursday morning, he will briefly visit the island of Zanzibar.

He leaves Tanzania Sunday for Stockholm, Sweden, where ANC president Oliver Tambo is recovering from a stroke. Tambo's illness means that Mandela is effectively in charge of Africa''s oldest liberation movement.

WASHINGTON (MARCH 7) UPI - The chairman of the House Agriculture

Committee disagreed with a colleague's proposal for a ''Food for Freedom'' program Wednesday, saying there was no need for food giveaways to the Soviet Union.

House Democratic leader Richard Gephardt, D-Mo., proposed the program in a speech Tuesday, saying it would share ''the strength of America's agricultural abundance with the Eastern European and Soviet people.''

However, Rep. Kika de la Garza, D-Texas, chairman of the House Agriculture Committee, pointed to recent reductions in U.S. food stockpiles and said Eastern Europe would benefit more from improved technology and equipment than food aid.

''My theory has always been, 'Sell it if you can,''' de la Garza said during a meeting with reporters. ''If we're selling to the Soviets and they're paying for it, I don't see why change it.''

Gephardt provided few details of how his food program would work. During an interview with National Public Radio, he mentioned the possibility of including the Soviets in the Food for Peace program, which allows food donations or concessional sales.

The Soviet Union bought a record 21.7 million metric tons of U.S. corn and wheat last year. A large portion of the wheat was sold at subsidized prices through the Export Enhancement Program.

U.S. and Soviet negotiators are working on a trade agreement that would open the way to improved trade relations between the superpowers. Gephardt advocated the removal of trade barriers in his speech.

#90066u1453 03/07/1990 ~United Press International

SANTIAGO, CHILE (MARCH 7) UPI - President-elect Patricio Aylwin said Wednesday he has no plans to change Chile's armed forces, an apparent bid to reassure troops after outgoing President Augusto Pinochet said any attempt to alter the military ''will be rejected.''

Aylwin, the 71-year-old opposition leader who won election in December, told reporters minutes after Pinochet paid him a courtesy call that he expected a normal relationship with the armed forces. His inauguration Sunday puts an end to the military government that took power in a 1973 coup d'etat.

''I don't have even the smallest proposal to alter the historic institution of the Chilean armed forces,'' Aylwin said.

The statements follow a series of speeches and remarks by Pinochet and other outgoing military officers who asked the armed forces to remain alert in the face of attempts to divide the corps.

Pinochet, a 74-year-old general, told a army ceremony Tuesday night marking the end of his rule that ''whatever attempt to change direction with the pretext of modernizing, professionalizing or democratizing the armed forces will be rejected.''

The words reflect the ideological debate taking place between the military and the opposition over the role of the armed forces in society.

The military believes it is the final guarantor of the constitutional and institutional stability of the country. Opposition politicians, political scientists and military experts argue its role is to defend the nation's borders without interference in internal political matters.

In a series of speeches during his last week in office, Pinochet told military audiences there were attempts to divide their ranks and warned against efforts by the new government to prosecute the armed forces for human rights violations.

Ruling junta member Adm. Jose Toribio Merino also told reporters Tuesday that unnamed forces ''are trying to infilitrate the armed forces.''

''I don't doubt that in Chile there also are people who are trying to divide the armed forces, who are the only bulwark and containment that there is against the pretentions of the communists,'' said Merino, who steps down Thursday as naval commander.

Vice Admiral Fernando Navajas also said Monday upon his retirement that there were ''dark clouds forming behind the horizon'' and that ''the forces of evil have not forgotten their defeat of 16 years ago.''

Aylwin said there would be no prosecutions of the armed forces 's,a whole for human rights violations, but said investigations would take place. Aylwin also has said individuals could be prosecuted, but has not ruled out an amnesty for violators.

(MARCH 7) UPI - TODAYS PEOPLE

WILLIE AND THE TIRE FIRE: Willie Nelson has a new cause - the victims of a tire fire in Canada. Nelson has five shows scheduled this month in Ontario and a portion of the proceeds from them will go toward the environmental relief fund set up to help residents of the rural community of Hagersville recover from a fire that burned 12 million tires over a three-week period. Nelson, who is touring with Ricky Van Shelton and George Fox, a Canadian country star and cattle rancher, has helped raise millions of dollars for farmers with the Farm Aid concerts. ''Farming plays a big part in the economy of the area and when Willie Nelson and the other artists were made aware of the situation they were very anxious to help,'' said concert promoter Joe Owens.

ITALIANS' NIGHT OUT: Two of the country's most famous Italian-Americans - Lee Iacocca and Frank Sinatra - were at the White House Tuesday night for the state dinner in honor of Italian Prime Minister Giulio Andreotti. The Chrysler chairman was with his fiancee, Darrien Earle, and Sinatra, who was identified on the official guest list as ''Francis Albert Sinatra, president, Sinatra Enterprises,'' escorted his wife, Barbara. Also attending were Elizabeth Taylor, who was in Washington to campaign for AIDS research, and Edward J. deBartolo Jr., owner of the Super Bowl champion San Francisco 49ers.

MCFERRIN LEADS THE ORCHESTRA: Bobby McFerrin usually makes his own sound effects but on Sunday he will have the San Francisco Symphony to back him up. The Grammy-winning singer will conduct Beethoven's Symphony No. 7 and also will perform his ''headTales,'' a composition for voice and cello, with the celebrated cellist Yo-Yo Ma. The program also features McFerrin's new 10-voice a cappella ensemble, Voicestra.

HIGH COST OF ENTERTAINMENT: The age of the $100 Broadway ticket is coming. British showman Cameron Mackintosh plans to charge that much for front mezzanine seats and $60 for orchestra seats when he brings his hit London musical, ''Miss Saigon,'' to the Broadway Theater in March 1991. Mackintosh says the high price is needed because it will cost a record $10 million to redesign the show for Broadway. It also will allow the show to gross $750,000 a week with a weekly operating profit of $250,000 and pay off its investors in 35 to 40 weeks. The current top seat price on

Broadway is $60 for ''Jerome Robbins' Broadway.'' ''Miss Saigon'' was written by the same team that created ''Les Miserables.'' The composer is Claude-Michel Schonberg and the lyricist is Alain Boublil, working with Tony-award winning American lyricist Richard Maltby Jr.

GLIMPSES: Guitarist Stevie Ray Vaughan and his brother Jimmie Vaughan of the Fabulous Thunderbirds are finally going to make an album together. They go into the studio next week with Nile Rodgers as producer. The brothers want the album to be something different so no members of the Thunderbirds or Stevie Ray's band, Double Trouble, will be on the record ... Someone asked divorce lawyer Marvin Mitchelson who he he thought would win the battle of the Trumps. ''I won't predict who's going to win,'' Mitchelson said, ''but I'll predict who won't lose - the lawywers'' ... Country-pop singer K.T. Oslin will appear on an episode of the TV Western series ''Paradise'' as a woman obsessed with finding the Army deserter who killed her son.

#90066u1483 03/07/1990 ~United Press International

RIO DE JANEIRO, BRAZIL (MARCH 7) UPI - Luis Carlos Prestes, whose name was as synomymous with communism in Brazil as Lenin's was in Russia, died of a heart attack Wednesday. He was 92.

Prestes, who Chilean Nobel prize winning poet Pablo Nerudo called a ''reincarnation of the heroes of times of old,'' had been in a coma for two days, also suffering from urinary infection, respiratory difficulties and a kidney illness.

Prestes' readiness to fight for a revolutionary cause against impossible odds made him a legend to many Brazilians searching for a quick path to pull their country out of poverty and backwardness.

The Communist Party under his leadership grew to be a major influence in Brazil, especially among the highly educated elite, although it was often outlawed and never came close to taking power through elections.

Prestes was secretary general of his nation's Communist Party for 37 years until he lost an internal dispute in 1980 and defected, saying the party had become ''contaminated'' with reformers.

Prestes death brought immediate repercussions throughout Brazil.

In Brasilia, the Chamber of Deputies and the Senate dedicated their sessions Wednesday to eulogies to Prestes, who served as senator from 1945 to 1947.

Rio de Janerio Mayor Marcelo Alencar decreed three days of official

mourning while the body rested in state Wednesday in the Rio de Janeiro state legislature.

Armed insurgencies led by Prestes in the 1920s represented the beginning of the end of the old Brazilian political system dominated by coffee planters in Sao Paulo and political families of the mining state of Minas Gerais.

His admirers called him the ''The Knight of Hope,'' and a book about him by that name was written by prominent Brazilian author Jorge Amado.

Born Jan. 3, 1898, in the southern Brazilian state of Rio Grande do Sul to a lower middle-class family, he attended the Rio de Janeiro military school.

He and other young officers first attempted a revolt in 1922 that was crushed in Rio de Janeiro.

Increasingly radicalized and undaunted, Prestes and 300 other rebels in 1924 attacked a federal police headquarters in Rio Grande do Sul state.

Then he and his followers headed into the interior on an odyssey that lasted 647 days, a trek from the Uruguayan border in the south across Brazil towards the northeast coast. At one time the ''Prestes column'' numbered 1,500 men, before it was hounded and decimated by government.

Prestes went into hiding in Bolivia and later in Uruguay. In 1930 he declared himself a communist, moving to the Soviet Union the next year.

After training and indoctrination in Moscow, Prestes returned in 1935 to Brazil and allegedly masterminded an attempted uprising by a few communist-dominated units in the armed forces in Rio and two other cities.

Brazil's military command never forgave the Communist Party for that rebellion, in which some officers were reportedly shot in their beds. Senior commanders routinely commemorate the uprising by delivering anti-communist harangues.

Prestes was arrested in 1936, and his pregnant German-Jewish wife, Olga Benario, was deported to Germany. She died in a gas chamber in 1942.

His daughter Ana Leocadia, born in jail, was released by the Nazis after an international campaign and currently lives in Brazil.

Prestes had nine other children from different relationships.

He was not released from prison until 1945, when the dictator Getulio Vargas was overthrown and the Communist Party was temporarily legalized.

Prestes won a Senate seat with more votes than any other candidate, only to go underground in 1947 when the party was again outlawed.

The party leader surfaced in the 1950s, but he had to flee the country again in 1964 after a right-wing military revolt. Prestes could not return until an amnesty was declared for political exiles in 1979.

In his Moscow exile Prestes toed the Kremlin line and was awarded the Order of the October Revolution in honor of his 75th birthday.

In his later years he was supported financially by contributions from sympathizers, including Oscar Niemeyer, the architect who designed the buildings of Brasilia.

#90066u1490 03/07/1990 ~United Press International

VATICAN CITY (MARCH 7) UPI - The Vatican confirmed Wednesday that Pope John Paul II will visit Mexico May 6-13, with a stop in the Netherlands Antilles island of Curacao on the way home.

The trip was first announced by Catholic Church officials in Mexico in July last year, but the Vatican makes no formal announcement until a few weeks before a papal trip.

It will be the pope's second trip to Mexico, which, although its population is 95 percent Catholic, is a ''lay'' state in which the church and state are separated under the terms of the constitution.

His first visit to Mexico, in January 1979, was also John Paul's first trip outside Italy after he was elected head of the Roman Catholic Church in October 1978. The coming trip in May will be his 47th outside Italy.

The Vatican and Mexico have not had full diplomatic relations since 1857. But last Feb. 17 the Vatican announced that the pope and Mexican President Carlos Salinas De Gortari were exchanging ''personal representatives'' - a possible prelude to the restoration of full diplomatic relations for the first time in 133 years.

Mexico's opposition Peoples Socialist Party and left-wing labor unions protested the decision when it was announced in Mexico City.

#90066u1497 03/07/1990 ~United Press International

SPRINGFIELD, MA (MARCH 7) UPI - The state offered a sheriff a National Guard armory in Holyoke as a temporary jail if he agrees to remove

prisoners from a Springfield armory commandeered last month because of overcrowding at his county lockup, officials said Wednesday.

''The state had put all its eggs in one basket and that's the Holyoke armory. It's the state's final offer as an alternative site,'' said Hampden County jail spokesman Richard McCarthy.

''The state presented to us what they would be able to do to make the Holyoke armory workable for us, and the sheriff is looking at those details now and seeing if it would be workable as an alternative to the Springfield armory,'' McCarthy said.

The alternative National Guard armory is located on Sargeant Street in nearby Holyoke, which is also a Hampden County city. Holyoke Mayor Martin Dunn, who heard reports the armory in his city might be offered as a temporary solution to overcrowding at the county jail, has threatened to go to court to stop the state from allowing inmates to be housed there.

Hampden County Sheriff Michael Ashe was considering the state's final offer and was expected to make a decision sometime Wednesday, McCarthy said.

State officials were not immediately available for comment.

Negotiators for Ashe and the state have tried to work out an agreement that would move the inmates out of the armory in Springfield, which was commandeered Feb. 16 by the sheriff and 30 deputies.

Ashe commandeered the Massachusetts Army National Guard armory because his overcrowded 102-year-old lockup in downtown Springfield had reached a court-ordered inmate cap and some prisoners were being released early or having jail sentences delayed. Inmates have remained in the armory since it was seized by Ashe.

Both sides had hoped to reach an agreement before they return to Hampden Superior Court next Monday to update a judge on the status of the talks. If an agreement is not reached by Monday, attorneys for Ashe planned to ask the court for a preliminary injunction to allow the sheriff and inmates to remain in the Springfield armory.

#90066u1511 03/07/1990 ~United Press International

BEIRUT, LEBANON (MARCH 7) UPI - A terrorist group said Wednesday it had no intention of releasing the two American hostages it holds without ''a positive atmosphere'' and charged the United States was mounting a military operation to free the captives.

The group, which calls itself the Justice Organization and which holds U.S. nationals Joseph Cicippio and Edward Tracy, warned it would retaliate against ''American interests'' if the United Stattes resorted to force to try to free the hostages.

Its comments were in a two-page statement that was delivered to the office of the leading newspaper An-Nahar. It was backed with a close-up photograph of Cicippio.

The group's statement came as a flurry of activity had raised hopes of an impending release of some or all of the 18 Western hostages, including eight Americans, held by Shiite radicals.

Iranian President Akbar Hashemi-Rafsanjani said Wednesday the issue of the hostages held by the pro-Iranian radicals ''is going to be solved,'' the official Islamic Republic News Agency reported.

Rafsanjani, speaking at a press conference in Tehran, set no timetable for the release of the captives and said Iran was not negotiating with the United States on the release of the hostages. He also linked any Iranian action to efforts by the United States and Britain ''to obtain the release of Iranian hostages.''

In Damascus, Syria, Hezbollah (Party of God) Council member Hussein Musavi also hinted the hostages may be freed soon, saying he ''hoped the release of the hostages in Lebanon would ensure the interests of the oppressed and Moslem people in Lebanon.''

He said ''coordination between Iran and Syria is the only way to solve the problem.''

In Washington, White House press secretary Marlin Fitzwater said the administration was encouraged by Rafsanjani's remarks, which he said reflected recent statements from Iran about a desire for better relations with the West.

''We hope that is the case and that it will result in the release of the hostages,'' Fitzwater said. ''But we have no direct knowledge that that is going to happen.''

''And we have no direct knowledge of Mr. Rafsanjani's motives in making those remarks,'' he said. ''But they are certainly more hopeful than what we have heard in the distant past.''

The Justice Organization's statement claimed that Washington recently ''dispatched spies'' to the Middle East to locate the hideouts of the 18 Western captives.

''By monitoring American movements ... and tracking dowm some spies, we have gathered accurate information that a military operation was under way to target spots where the hostages are believed held,'' the group said.

''The Justice Organization holds spies. They (Cicippio and Tracy) would deserve a just punishment,'' the shadowy organization said.

It warned Washington against resorting to ''the difficult (military) option.''

''Today, we are much more prepared, capable and determined to strike at American interests,'' the group said.

The pro-Iranian group hinted that the hostages would be freed only as a result of diplomatic activitiy. ''We have no intentions to free the hostages. A solution to their plight should only be requested in a positive atmosphere ...,'' the statement said.

Cicippio, 59. American University of Beirut's deputy comptroller, was kidnapped Sept. 12, 1986. Tracy, 59, an educator, was abducted Oct. 21, 1986.

IRNA, in a dispatch monitored in Athens, quoted Rafsanjani as saying Iran was not negotiating with the United States and that ''we only have received messages on this issue by Western politicians who have come to Iran."

''The issue of the hostages does not concern us at all, of course. The U.S. and Britain have time and again requested us to use our influence in Lebanon for the release of the hostages,'' Rafsanjani said.

''We have told them that we will use our influence when they mutually use their influence for the release of Iranian hostages and also reduce their mischievous acts.

''I and my friends like the issue to be settled since the U.S. and others are exploiting the matter as a means for branding Lebanese as terrorists and so they are not seriously seeking a solution.

#90066u1525 03/07/1990 ~United Press International

BY PATRICK MOSER - UPI

BONN, WEST GERMANY (MARCH 7) UPI - After a week of harsh, controversial statements that outraged politicians at home and in foreign capitals, the government faces a tough challenge in trying to banish the specter of a mighty and arrogant unified Germany.

Yielding to mounting pressure, Chancellor Helmut Kohl backed down from his insistence that Poland renounce any claim for war reparations if it wants Germany to recognize its post-World War II border. German land was given to Poland after the war.

Despite the turnaround, West Germany's allies were left with a bitter aftertaste and may well wonder if Kohl's remark is not a sign of things to come.

Kohl had angered his foreign political friends earlier for failing to consult with them before presenting his plans for political and economic unification.

Faced with national elections in December, and more likely than not the hope of eventually becoming the first chancellor of a reunified Germany, Kohl is obviously determined to keep his electorate happy, even if it means alienating foreign powers and liberal coalition partners.

Although Kohl no longer links the potentially costly issue of reparations to recognition of the border, a statement he adopted with his coalition partners says West Germany assumes Poland will stick to a 1954 pledge not to seek any further reparations from a unified Germany.

West German taxpayers are well aware that the costs of reunification will be huge, chiefly the rehabilitation of East Germany's shattered economy. And they are aware, too, of the looming threat of hundreds of billions of dollars in reparation claims.

At the same time, Kohl appears intent on being remembered as the man who led the two German states to reunification.

Dismissing opposition calls for restraint, Kohl is determined to move toward early unification, citing the massive exodus from East Germany as a reason to act quickly, before the East German infrastructure disintegrates completely.

And he has made it embarrassingly plain that he wants unity on his terms: the adoption of the West German currency, constitution and political system by East Germany.

Kohl's aides react angrily to comparisons with Adolf Hitler's 1938 ''Anschluss'' of Austria, in which Nazi Germany swallowed the smaller state without a shot fired. But critics insist Kohl's plan amounts to little more than an outright annexation of East Germany.

At a recent rally in support of conservative East German parties campaigning for March 18 elections, Kohl was at pains to tell about 25,000

people that there would be no ''Fourth Reich'' - a reference to Hitler's Third Reich (empire).

In the past week, Kohl has been working a tough schedule, dealing with complex political issues at home and, as other West German politicians, stumping in East Germany, where the party political landscape closely reflects that of West Germany.

A strong showing in the ballot box by East German conservatives March 18 certainly would boost Kohl's chances of winning West German elections and heading a unified Germany.

NEW YORK (MARCH 7) UPI - A key index monitoring advertising placed by companies seeking employees was down three points in January compared to December, a nationwide survey said Wednesday.

The Conference Board, a non-profit research organization, said in a survey that its Help-Wanted Advertising Index slipped to 146 in January, down from 149 in December.

The monthly indicator, first set at 100 in 1967, is based on the help-wanted advertising volume in 51 major newspapers across the United States.

''The January figure reading is up only one point from the November figure but five points below the October figure and substantially lower than the year-ago figure of 155,'' the survey said.

''The nation's unemployment rate has been holding at 5.3 percent for five months,'' said Ken Goldstein, an economist with the board.

''There is widespread anticipation of sustained moderate growth, which could easily lead to some pivkup in labor demand,'' he added.

The index monitors advertising volume in nine regions.

The East South Central and Mountain regions registered the steepest declines in January, down 10 and 9.9 percent respectively. The West South Central recorded the highest increase during this period and was up 7.7 percent.

Other regions to record a decline included the Pacific, down to 269 from 290, and the West North Central region, down to 92 from 97.

Other regions to record an increase were East North Central, up to 98 from

95, South Atlantic up to 170 from 165, and New England, up to 93 from 91. The index for Middle atlantic was unchanged at 70.

LINDEN, NJ (MARCH 7) UPI - The explosion and fire that almost blew an oil barge in half spilled more than 100,000 gallons of home heating oil into the waters between Staten Island and New Jersey, the Coast Guard reported Wednesday.

But most of the oil was contained behind booms, and more than 36,000 gallons had been recovered less than 24 hours after Tuesday's explosion, Captain Robert North said. Environmentally sensitive areas, including a bird sanctuary on nearby Prall's Island, were also boomed off.

The Arthur Kill remained closed to marine traffic. Coast Guard spokesman Gary Rives said the waterway, which is lined with oil terminals, a container port and New York's Fresh Kills landfill, the world's largest, might reopen Thursday.

The Cibro Savannah, owned by Montauk Oil Transportation Co. of New York, was carrying about 4.4 million gallons of oil when it was hit by an explosion. The barge had just left the Citgo Petroleum Corp. terminal in Linden, bound for Boston, and was 100 to 200 feet offshore.

A smaller explosion followed about 15 minutes later as the blaze sent a cloud of black smoke hundreds of feet into the air.

Firefighters used water pressure to push the Cibro Savannah back to the dock and to hold it there, North said. The fire was extinguished at about 4:30 p.m. Tuesday, leaving about half of the barge's 12 tanks undamaged and much of its cargo salvageable.

The explosion was the latest in a series of troubling mishaps - including three major spills since January - that have dirtied local waterways and angered local officials.

While federal, New York and New Jersey environmental agencies investigate whether any laws have been violated, the Coast Guard will try to determine what set off the explosion, North said. But the cause is not expected to be known for several days.

Just hours after the blast, the governors of New York and New Jersey ordered a meeting with oil refining, transport and storage officials in the New York Harbor area.

''It is clear that the standards of care applied by the industry in the

management of oil in the New York-New Jersey area are inadequate,'' said a statement from Govs. Mario Cuomo of New York and Jim Florio of New Jersey.

''The oil industry is not doing enough. We need greater public scrutiny of current industry practices. Industry explanations for these spills are no longer sufficient.''

Two crew members were aboard at the time of the accident, but both escaped without serious injury.

Donald Wright, 41, of Saratoga Springs, N.Y., the barge's captain, said the explosion hit him as he put an entry in his log, and his first thought was, ''I'm dead.''

''I knew there would be a second explosion,'' he said. ''I got out of the quarters, got the mate, got a life jacket and got off it.''

The fire appeared to be confined to the four center compartments on the 12-compartment barge, said James Staples, a spokesman for the New Jersey Department of Environmental Protection.

The barge was bound for Northeast Petroleum, a division of Cargill in Boston, Young said.

The explosion followed two serious oil spills at Exxon's Bayway Refinery in Linden. More than 500,000 gallons of oiling Bayway with a Bayonne tank farm in January, while 27,000 gallons spilled last week while a barge was loading at Bayway.

#90066u1564 03/07/1990 ~United Press International

SEATTLE (MARCH 7) UPI - The future of the Blue Moon Tavern, where prize-winning writers and counterculturists gulped beer between arguments and scribbled grafitti in Sanskrit, teetered between preservation and the wrecking ball Wednesday.

The debate over whether the Blue Moon should be saved has become a cultural face-off between supporters who see the tavern as a crucible of intellectual, artistic and political creativity and detractors who view it as a smelly den of derelicts who should live on in legend only.

Owners of the fumey beer joint at the edge of Seattle's University District, with support from hundreds of current and past patrons, applied to the city's Landmarks Preservation Board for landmark protection to save the building from being torn down and replaced by luxury apartments.

Cries of ''Save the Blue Moon'' have been rolling in from unexpected

quarters ever since the jeopardy of the tavern's future became public months ago.

New Yorker columnist Calvin Trillin sent pleas for preservation. So did beat poet Lawrence Ferlinghetti, whose work blazed a trail for a generation of writers.

Ferlinghetti wrote a letter saying he composed a poem at a back table of the Blue Moon in the 1950s. His friend, beat icon Allen Ginsberg, also was a patron.

Still, there are those who claim the tavern's reputation is overrated. One of those is the Robert Hannah, who owns the property and wants to develop it.

''I'm angry,'' he says, ''because the preservationists have chosen to fight this out through the media. For the landmarks board to cave in to this media pressure would be a real detriment to the credibility they've built up. The Blue Moon just isn't worth it.''

But the list of the famous and nearly famous who quaffed draughts in a blue haze at the Blue Moon is long. It includes Pulitzer-prize winning poets Theodore Roethke, Carolyn Kizer and Stanley Kunitz and novelist Tom Robbins, who is helping to lead the preservation drive.

Jack Kerouac, who composed one of his books while working as a forest fire watcher in the North Cascades, also is said to have binged once or twice at the Blue Moon, but ''that's an unconfirmed sighting,'' says Walt Crowley, a leader of student dissent at the University of Washington during the late 1960s.

Crowley, another leader in the preservationist drive, assembled facts of the Blue Moon's history to bolster the group's argument the bar should be saved for reasons of cultural significance.

''The Blue Moon is Seattle's off-center,'' said Crowley, a television commentator and former staff member of The Helix, an underground newspaper during the years of anti-war tummult at the University of Washinton. ''It is the counterbalance intellectually, artistically, politically and culturally to the homogenized, money-driven, establishmentarian pseudo-community. And you need that counterbalance to keep your society sane.''

Not so, says The Seattle Times, which ran an editorial this week calling the ''The Moon'' a place where ''would-be intellectuals...and other assorted hangers-on wallow in nostalgia. They fondly recall the days when they sat around chugging beer, smoking dope, plotting revolution and radiating angst.

''A cultural oasis? Rubbish. It's a dive,'' the newspaper editorialized.

But some of the best of the city's grafitti - some of it in Greek and Sanskrit - grace the walls. Bartender Bill Heintzelman, a playwright, keeps a dictionary behind the bar to settle word disputes.

The Blue Moon's nadir came in the late 1970s, after the countercultural bloom on college campuses had faded and a clientele of heavy drug users moved in. The trio of new owners - Three Fools Inc. - include a couple of people who were bartenders at the Moon during the 1960s.

''They cleaned it up and brought the Moon back,'' says Crowley.

#90066u1583 03/07/1990 ~United Press International

CHICAGO (MARCH 7) UPI - Soybean meal held moderate gains but other grain and soybean futures were mostly lower Wednesday on the Chicago Board of Trade.

The buying in meal was based on hopes of near-term export sales. Iraq is expected to bid late this week for 200,000 tons of meal and Algeria reportedly is interested in 60,000 tons. Commercials and professionals dominated the buying in meal.

Soybeans and soybean oil prices were mixed at the final bell. Moderate country movement and profit-taking pressured soybeans in choppy trading, as did the weakness in the cash market.

Corn was lower in quiet trading with commercials on both sides of the market. News that South Korea bought 150,000 tons of corn and may buy more

later this week provided underlying support.

Wheat futures were mostly higher on fairly good buying interest and ideas the market was oversold, although precipitation over a wide area of the Grain Belt kept the market on the defensive.

At the close, corn was off 1 to 2, soybeans down 1 1/4 to up 2, wheat off 1/4 to up 2 and oats unchanged to down 1 1/4.

#90066u1612 03/07/1990 ~United Press International

ANKARA, TURKEY (MARCH 7) UPI - A senior Turkish journalist and his driver were killed in Istanbul Wednesday in what authorities said was part of a rising tide of terrorism aimed at destabilizing democracy in the country.

Police said unidentified gunmen shot Cetin Emec, a columnist for the Istanbul newspaper Hurriyet, as he was entering his car parked in front of his home.

The gunmen also killed Emec's driver Sinan Ercan before fleeing in a car parked nearby, police said. A search was launched for the gunmen, believed to be in their early 20s. The car they used during the slaying was later recognized as a vehicle stolen a day earlier.

No group immediately claimed responsibility for the killing, but Emec's collegues at the newspaper said he recently wrote a series of articles on the growing threat of Islamic fundamentalism in Turkey.

Turkey is constitutionally a secular republic but its population is predominantly Sunni Moslem. Over the past few years, Turkish officials and secular intellectuals claimed Iran was responsible for whipping up Islamic fundamentalism in the country.

President Turgut Ozal said after the killing: ''The gun pulled at Emec is a gun aimed at democracy and free thinking which Turkey enjoys.''

Emec's murder was the latest in a series of recent incidents of terrorism in Turkey, which officials said was aimed at destabilizing democracy in the country.

Prime Minister Yildirim Akbulut said those behind the killings ''will not be able to pull Turkey back to the dark days of the pre-coup period,'' a reference to the 1980 military coup that ended several years of political murders and street clashes.

Last month, unidentified gunmen killed Parliament deputy Muammar Aksoy in front of his home in an Ankara suburb. Police still have not tracked down

the killers, but unidentified callers said the Islamic Revenge Organizaion claimed responsibility. Police said the group was previously unknown.

In January, a retired Turkish intelligence service officer and a police constable were shot dead in two separate incidents in Istanbul.

Emec, a journalist for 38 years, was a member of Hurriyet's executive board. His collegues said he was a mild-mannered person but held strong views and had a hard-hitting writing style, which made his column widely read and respected.

He recently wrote a series of articles on the rise of Islamic fundamentalism in Turkey.

Erdal Inonu, the leader of the Social Democratic Populist Party, said Emec's killers aimed at destroying secularism, one of the five main principles of the constitution that Kemal Ataturk gave Turkey in the 1920s when he founded the republic.

#90066u1616 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - The House failed Wednesday to override President Bush's veto of a bill that would have created a special commission to recommend a settlement of the long and bitter strike against Eastern Airlines. Opponents of the measure said it would disrupt efforts by the ailing airline to put together a reorganization plan and emerge from bankruptcy.

On a largely party line vote, the Democrat-backed bill won a 261-160 majority, but fell short of the two-thirds needed to override the president's veto.

The vote came nearly one year after the House passed the original version of the bill. The Senate passed an amended version in October and Bush vetoed the bill Nov. 21, shortly before Congress adjourned for the year.

The vetoed bill was sent back to committee when Congress reconvened in January and then brought to the floor Wednesday for the unsuccessful override attempt.

The bill would have established a four-member commission to investigate the Eastern strike and make recommendations to resolve the dispute between the airline and its machinists, pilots, and flight attendants. The recommendations would have been non-binding.

Eastern filed for bankruptcy last March, just five days after the machinists began their strike. The pilots and flight attendants honored the picket line for several months, but ended their walkout in November.

As a result of the strike and bankruptcy, virtually all Eastern operations were suspended last year, but the airline since has hired replacement workers and gradually resumed many flights.

In his veto message, Bush said Eastern's future is the subject of reorganization efforts in bankruptcy court, and "this state of affairs should not be disturbed by new legislation."

Supporters of the veto cited a recent letter from the court-appointed bankruptcy examiner, David Shapiro, who said the bill would not help the Eastern situation, but "will, instead, do a great deal of harm." He urged that Congress "permit the bankruptcy process to complete the remaining steps necessary to the successful reorganization of Eastern."

During debate, Rep. Glenn Anderson, D-Calif., chairman of the House Public Works and Transportation Committee, urged an override of the veto, saying the commission plan "represents our last best hope of resolving the labor disputes at Eastern Airlines and reviving the carrier."

Anderson said the airline's labor disputes "are not likely to be resolved through normal collective bargaining," because of "a long history of mistrust between the Frank Lorenzo managment and Eastern's employees."

"Unless labor peace can be restored the public is going to continue to stay away from Eastern," which suffered a record $850 million loss last year, Anderson said.

Rep. John Paul Hammerschmidt, R-Ark., ranking Republican member of the panel, said the bill would not help resolve the labor dispute and "could ruin that airline's effort toward recovery."

Hammerschmidt said the dispute already has been "thoroughly investigated and mediated" by the National Mediation Board without an agreement between the warring parties. He said the commission idea actually discourages agreement because it holds out hope that the government will impose a settlement. "No transportation emergency exists" to justify government action, said Rep. Mickey Edwards, R-Okla.

#90066u1623 03/07/1990 ~United Press International

LONDON (MARCH 7) UPI - An inquiry released Wednesday said the Egyptian al-Fayed brothers persistently lied about their origins, business standing and wealth throughout their 1985 takeover of the Fraser group, which runs the world-famous Harrods department store.

The government on Friday said no laws had been broken in the $1.045 billion purchase and it planned no further action after a two-year investigation by the Department of Trade and Industry.

Parliamentarians grilled Trade and Industry Secretary Nicholas Ridley, who said it was not in the public interests for him to use legal powers to dismiss Ali and Mohammad al-Fayed for not being "fit and proper" to run the company.

The main opposition Labor Party ridiculed his explanation, and, in a rare show of unity, backbenchers of the ruling Conservative Party joined in in calling for Ridley to act.

"If he does nothing about it, he is in fact condoning a money-laundering charter which is capable of being used in the future by any international mafia or drug baron," said Sir David Steel of the Liberal Democrats.

The report's conclusions reignited the acrimony that has surrounded the takeover because it backed allegations made by Tiny Rowland, the owner of Lonrho PLC and The Observer newspaper which have bitterly fought the

Fayeds.

The inquiry said the Fayeds, when bidding for the House of Fraser, "repeatedly lied about their family background, their business life, and their wealth" and probably borrowed money from the Sultan of Brunei.

"None of the activities of the Fayeds of which we have been told generated sufficient cash for the Fayeds to have been in a position to acquire the House of Fraser," it said.

The report also said the Fayeds were assisted by their prestigious financial representatives, Kleinwort Benson, because "the lies the Fayeds were telling ... were given a credibility they would not otherwise have attained when they were repeated by their very reputable advisers."

The House of Fraser issued a statement calling the report "shocking in its ineptitude ... wrongheadedness ... injustice." It denied any money came from the Sultan of Brunei and said the Fayeds had misled no one and made the purchase with their own funds. Investigators did not give them a fair hearing and "have held us to be guilty, unless proven innocent," the statement said.

Lonrho chairman Sir Edward du Cann said the inquiry demonstrated the need for tighter regulations to govern takeovers or London's position as a financial center could be jeopardized.

"It matters more than I can possibly say that we have a regulatory system in this country in which people have confidence," du Cann said. "It matters that if somebody deliberately sets out to lie, to cheat, to deceive, that they should not be allowed to get away with their offence." He said the report gave Lonrho "substantial ammunition" in its plans to prosecute through the civil courts.

The struggle for control of the House of Fraser began in 1977, when Rowland began purchasing stock. He was turned down in 1981 in a $375 million takeover offer because the Monopolies Commission ruled his assumption of a retail concern would not be in the public interest.

Lonrho in 1984 sold its stock to Mohammad al-Fayed for undisclosed reasons before a second commission investigation was completed. However, no investigation was launched when the Egyptian family purchased the House of Fraser three years later, prompting Rowland to charge that he had been victimized and unfairly treated.

The Fayed brothers also own the Ritz Hotel in Paris, some Mediterranean ferries, oil interests, and other real estate in the United States, France, and Britain.

WASHINGTON (MARCH 7) UPI - Sen. Rudy Boschwitz, R-Minn., once a champion of agricultural "decoupling," introduced a farm program bill Wednesday to give more crop flexibility and provide income protection to soybean farmers.

The bill, the first in the Senate to suggest what crop policy should be for the next several years, also would freeze target prices - a key in calculating farm subsidies - and require the government to pay farmers to idle land.

At present, the government does not pay farmers to idle land and there is no mechanism for subsidy payments for soybeans. Boschwitz said his bill "will give farmers some real flexibility."

There is general agreement on Capitol Hill that the farm policy law being written this year should give farmers additional discretion in deciding what to grow. Farmers have complained they must plant the same crop year after year to protect eligibility for crop support payments.

The Bush administration has proposed its own form of crop flexibility. Boschwitz used the same approach of letting farmers shift land among wheat feed grains, cotton, rice and oilseeds such as soybeans. However, he would put an additional five million acres into the Conservation Reserve, for a total of 45 million acres.

Boschwitz also proposed a "graduated oilseed payment" that would be available whenever soybean prices fall below $5.02 a bushel but stay above $4.50, the current loan rate. For each cent market prices run below $5.02, farmers would be paid 30 cents for each acre of oilseeds they plant.

At a news conference, Boschwitz emphasized his plan is not decoupling, a proposal under which farmers would receive government support regardless of what they plant. "It is much different from our bill of 1985," he said.

#90066u1677 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - Members of Congress from Great Lakes states introduced legislation Wednesday to combat the zebra mussel, a tiny shellfish that has infested Lake Erie and threatens to damage other lakes and rivers.

''The experts seem to think that this can spread very rapidly just as it has in Lake Erie,'' said Sen. John Glenn, D-Ohio, a co-sponsor of the $40 million measure. ''So we hope to get some handle on it by the research and by preventing more infestations coming in.''

In addition to research, the bill also authorizes the Coast Guard to regulate the discharge of ballast water by freighters.

The zebra mussel is believed to have arrived in North America in 1986 when a European freighter flushed its ballast water into Lake St. Clair or the St. Clair River near Detroit. The mussels have since spread down the length of the Detroit River and into Lake Erie, moving at about 160 miles per year.

According to a report by the Congressional Research Service, the mussels could spread through waterways across much of the United States.

Sen. Carl Levin, D-Mich., another sponsor of the bill, noted that the zebra mussels forced Monroe, Mich., to ration water for several days because the shellfish had clogged its drinking water intake pipes.

''Over 50 other major municipal intake pipes in Michigan, not to mention industry users, are at risk from this same type of fouling,'' Levin said. ''They threaten the Great Lakes's $4 billion sports fish industry by robbing the fish and other acquatic species of essential food sources such as algae and plankton.

The zebra mussel, also known as Driessena polymorpha, is native to the Black, Caspian and Azov seas in southern Russia.

A female mussel lays up to 40,000 microscopic eggs in a year, and the shellfish feed on the microscopic plants that serve as food for fish. Because they absorb toxins, zebra mussels are also inedible.

Glenn said Wednesday that while the immediate target of the legislation would be the Great Lakes, the bill, which also includes the cooperation of Canada, is designed to help other areas of the United States experiencing similar problems.

''This is because the problem of nuisance species is not exclusive to the Great Lakes or the zebra mussel,'' Glenn said, noting that the northeastern coast of America is threatened by a Japanese seaweed that could harm that region's shellfish.

''Action is desperately needed, and we're already late,'' he said.

THE HAGUE, NETHERLANDS (MARCH 7) UPI - Scandinavian countries sharply criticized Britain Wednesday for its reluctance to stop dumping sewage and industrial waste in the North Sea by agreed dates.

''We are extremely concerned that Britain has not made the effort to have their facilities ready in time for the date agreed, by which time dumping should stop,'' said Lone Dybkjaer, Denmark's minister for the environment at the start of a two-day, nine-nation environment conference.

''Being a peaceful person I don't want to start a war with the United Kingdom. But we are becoming very dissatisfied with Britain's actions,''

said Dybkjaer in an unusual show of undiplomatic ire.

Dybkjaer was co-signatory of a letter from Denmark, Sweden and Norway that was handed to Britain Wednesday in which the three countries complained at Britain's announcement last Monday it will halt its dumping in 1998 instead of 1995 as it had agreed during a London conference on the same topic in 1987.

Britain's environment minister Chris Patten was unrepentant in the face of criticism at Wednesday's meeting.

''I think one or two people had written their speeches before they got here. We have put forward some important measures,'' Patten said of the outspoken criticism of Britain at the meeting.

''People in glass houses shouldn't throw stones,'' he added.

The meeting in The Hague is designed to try to reach agreement on how to clean up the North Sea, one of the world's most polluted bodies of water.

Opening the meeting Wednesday, Holland's royal consort, Prince Claus, told the assembled delegations they should not attempt to take easy solutions.

"We must adopt far-reaching solutions to cut pollution," said Prince Claus. He said the sea, a 222,000-square-mile arm of the Atlantic between Great Britain and the North European mainland, was in the process of becoming a "cesspool."

Delegates at the meeting are expected to discuss a variety of measures, including previous programs that have called for severe cuts in the amounts of heavy metals and other toxic pollutants dumped in the sea by the mid-1990s and cuts in fertilizer and other pollutants by the end of the decade.

The Dutch Ministry of Transport claims that more than 100 million tons of sewage sludge and some 40,000 tons of heavy metals are poured into the fish-rich North Sea each year.

Environmentalists said there is concern the nine major West European industrial nations at the meeting will adopt the sweeping policies scientists feel are needed to clean up the waterway.

''The British government continues to endorse policies that have turned the North Sea into a chemical sewer,'' said Tim Birch of Greenpeace. ''This conference is the only real chance to turn back the tide of pollution before it's too late.''

The organization Friends of the Earth, which had a representative at the

conference, called for measures to end the shipping industry's use of chlorofluorocarbons and halons, which are believed to destroy the ozone, Earth's protective shield against harmful untraviolet radiation from the sun.

The environmental group said a total of 3,800 tons of the damaging gases are used every year in the construction of new ships, another 34,700 tons are stored in refrigerated containers and more than 3,000 tons of halons are stored in ships' fire-extinguisher systems.

Environmentalist Fiona Weir said proposals should be adopted ''to ensure that these destructive chemicals are not used in the shipping industry longer than absolutely necessary. In many cases, that means an immediate ban.''

There has been some progress in the amount of industrial waste dumped into the sea.

Dutch transport minister Hanja Maij-Wetten, hosting the Hague conference, said the amount of industrial waste dumped into the North Sea had fallen this year from 3 million tons to 200,000 tons.

"And we all know where those 200,000 tons come from," she said angrily in a clear allusion to Britain, which had promised to stop dumping industrial waste in the North Sea by Jan. 1, 1990, but has pushed that deadline too back to 1998.

''That is far too late, far too late,'' she said.

Britain was also criticized for failing to end all industrial waste dumping in the North Sea by January 1, 1990, as agreed at the London conference.

#90066u1752 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - The Nuclear Regulatory Commission violated its own rules and lost sight of its public safety responsibility by approving a license for the Seabrook nuclear power plant, Seabrook opponents said in an appeal filed Wednesday.

Massachusetts Attorney General James Shannon, the New England Coalition on Nuclear Power and the Seacoast Anti-Pollution League sought a court order blocking a full-power operating license for Seabrook, which the NRC

approved March 1. The appeal was filed in the U.S. Court of Appeals for the District of Columbia Circuit.

Barring court action, the commission said the effective date of its order would be one week from the date of the appeal, which would be March 14.

The appeal is yet another round in Seabrook's 18-year battle to generate electricity. While plant construction was completed three years ago, opponents have delayed the licensing process with numerous safety objections.

The appeal contends the NRC improperly reversed decisions by the agency's Appeal Board and should not have given credence to the utility's emergency evacuation plan for an area within a 10-mile radius of the southern New Hampshire plant, including communities in Massachusetts.

''Ultimately, the NRC relies either on the incantation that in the event of a Seabrook accident, the tens of thousands of people stuck in traffic for hours within sight of the reactor and with no adequate sheltering available to them would magically escape death and injury, or on the conclusion that it does not matter,'' the appeal said.

''Either way, the NRC has turned its long-promised review of the protections afforded in the (evacuation plan) into a sham. It has violated its own regulations, acted arbitrarily and capriciously and completely lost sight of its public duty and charge - 'first and foremost public safety,''' it said.

The NRC's Appeal Board had reversed an earlier decision by the agency's Licensing Board that upheld the adequacy of the evacuation plan. But the NRC sided with the Licensing Board's decision in its March 1 order.

#90066u1791 03/07/1990 ~United Press International

PHILADELPHIA (MARCH 7) UPI - A packed six-car subway train derailed in a tunnel near a busy station during rush hour Wednesday morning, killing three people and injuring 152 in the city's worst transit accident, officials said.

It took rescue crews 4 1/2 hours to pull all the passengers from the train.

''Everything went dark. People were screaming in pain,'' said Lea Green, a commuter on the train. ''We had to walk over people to get out of the train.''

Transit Chief Louis Gambaccini said three people were killed in the derailment. Their names were not released.

''It is clearly the worst accident'' in the history of the Philadelphia transit system, Gambaccini said.

Linda Clossey Connolly, a spokeswoman for Hahnemann University Hospital, said a woman in her mid-fifties who had been trapped for two hours died at 12:04 p.m.

''She had her right leg amputated at the scene. She also had multiple fractures of the left leg and chest injuries,'' Connolly said.

Police Commissioner Willie Williams, who was at the scene with Mayor Wilson Goode, said, ''The rescue crews, police, fire, Army Medical Corps and various others are having to cut sections of the train apart.

''We have people with saws cutting sides of the train literally out from the bottom to get to the people and bring them out alive. There's about 30 to 50 people down there working.''

The last passenger finally was extricated 4 1/2 hours after the accident and rushed to a hospital.

The Southeastern Pennsylvania Transportation Authority train derailed in a tunnel about a block west of Philadelphia's busy 30th Street Station at about 8:45 a.m.

SEPTA engineer Pete Brauner said the train derailed when a motor underneath the second or third car dropped off and dragged along the tracks. He said the fourth car was nearly severed in half by the impact.

''The engine did not come completely off but it was off enough ... where it would cause the wheels to jump off the track. That's what they think may have caused it now,'' Brauner said.

Dozens of people were trapped and needed to be removed by the Jaws of Life hydraulic instrument.

Charles Zimmerman, a passenger on the train, saw a man caught by his legs between the train and a pole in the tunnel.

''He was still alive but he was screaming and yelling. He was in a great deal of pain,'' Zimmerman said.

Zimmerman said the fifth car of the train was tilted on its side and the train ''had wrapped itself around one of the poles.''

''It had jumped the tracks and was in between the tracks between the east and westbound lanes. It was going westbound and jumped over to the eastbound side,'' he said.

At least 152 people, including six children, were rushed to nine hospitals. Most of the hospitalized received minor cuts and bruises or broken legs. Four were in critical condition and one man was in guarded condition with a spinal column injury.

Police Sgt. Terese Young said most of the injured were able to walk out but about a dozen needed to be carried out on stretchers.

It was not known how many commuters were on board the six-car train, which was leaving the station westbound when it began to tremble and rumble.

''It's fair to say it was a fully loaded train at that hour,'' said SEPTA spokeswoman Donna Alston. She said it was one of the worst accidents in SEPTA's history and the first on that route.

Alston said the train was pulling out of 30th Street Station and picking

up speed when the third car derailed. Two other cars partially derailed.

Alston said the train turned sideways at a switch but it was not certain if the train hit the switch.

SEPTA immediately cut power to the line, plunging the train into total darkness and setting off panic among screaming passengers.

Passenger Gene Malado described how the lights in his train went out, the riders pitched forward and then chaos broke out.

''My hip is swollen. I got knocked to the floor,'' Malado said. ''They told us to stay seated and remain calm. They had to pry our doors open to lift us out.''

Adrian Cozart, 34, of Voorhees, N.J., suffered minor injuries and was taken to Presbyterian Hospital with 48 other people.

''When we were leaving 30th Street the train started jumping, then the lights went out and the ceiling started caving in. I was hanging on for dear life trying not to fall out,'' Cozart said.

''There was one person trapped in between a seat and train metal. He was screaming and people were trying to get him out but couldn't''.

The Rev. Daniel DeVine, who was allowed into the tunnel, described the scene: ''It was like being in a tunnel in your very worst nightmare. There was a great deal of confusion all over although the police know what they're doing.''

All trains running on the line were stopped and there was no service on the line for the rest of the day.

The 30th Street Station serves Amtrak trains as well as the city's Market-Frankford Elevated train, which travels underground for 42 blocks through downtown Philadelphia.

The National Transportation Safety Board planned to investigate the accident Wednesday afternoon.

#90066u1792 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - A bipartisan task force recommended Wednesday a series of reforms for Senate campaigns, including some spending limits, and Republican leader Robert Dole of Kansas said the recommendations provided new hope for a compromise on the troublesome issue.

The task force, composed of three Democratic and three Republican citizens considered political experts, suggested that ''reasonably high'' and flexible voluntary spending limits be enacted for the first time in Senate campaigns, but rejected any form of public financing for the races.

For years, Democrats and Republicans in Congress have been unable to break an impasse on how to revise campaign financing. However, with campaign costs rapidly escalating and the public becoming increasingly upset with congressional ethics questions, lawmakers hope to approve some changes this year.

Some of the biggest sticking points have long been spending limits and public financing, both of which are strongly opposed by most Republicans. The last time Congress attempted to revise campaign financing, it was killed by a GOP-led filibuster in the Senate.

But Dole said Wednesday, ''I do believe there is some hope we can form a bipartisan compromise based on the recommendations.'' He also characterized the document as ''a potential breakthrough.''

However, neither Dole nor Senate Democratic leader George Mitchell of Maine supported or rejected any specific part of the report and both noted that many major issues still have to be resolved.

But Mitchell said he was encouraged that the task force had reached an agreement. ''It shows the issue is capable of being resolved despite the strong differences between Republicans and Democrats,'' he noted.

Instead of strict spending limits, the report suggested ''flexible'' ceilings that would not apply to support from the political parties and limited donations from in-state contributors.

Because of a Supreme Court ruling that spending limits cannot be imposed, any ceilings would have to be voluntary, with candidates given a variety of incentives to comply.

The task force also suggested that the maximum any individual can contribute to a candidate be increased slightly from its current level of $1,000 and recommended that some slight new restrictions be put on political action committee contributions.

''While any one of us may retain reservations about one or more components of the reform package, all of us believe that the overall package of reforms is balanced and stakes out a constructive middle ground on many of the issues which have proven most divisive,'' the task force said.

Mitchell has said he would like to get a compromise bill to the Senate floor later this month. However, the outlook for an agreement in the House

on campaign finance changes there appears bleak.

Rep. Beryl Anthony, D-Ark., head of the Democratic Congressional Campaign Committee, said Wednesday the Democratic leadership is considering pushing through a bill with a House spending limits of $550,000 per race, half of which could come from PACs. Republicans want a $1 million limit.

Anthony said he was not concerned that President Bush might veto such a bill, because Democrats could then try to paint the GOP as being against reform.

''They want to go and buy their way back into the majority after voters have rejected them for the last 10 years,'' Anthony said of Republicans. ''I would take a Bush veto and go beat the hell out them at the polls in November.''

Members of the task force included Herbert Alexander, a University of Southern California professor; Jan Baran, a lawyer who has done extensive work for the Republican Party; Robert Bauer, a Washington lawyer; David Magleby, a professor at Brigham Yound University; Larry Sabato, a professor at the University of Virginia; and Richard Moe, a Washington lawyer.

#90066u1800 03/07/1990 ~United Press International

WARSAW, POLAND (MARCH 7) UPI - Solidarity Prime Minister Tadeusz Mazowiecki appointed the editor of a Catholic newspaper as deputy interior minister Wednesday, the first non-Communist official in the police agency in four decades.

The Interior Ministry, headed by Gen. Czeslaw Kiszczak, has been the target of criticism by the Solidarity government that insisted the ministry should strive for a human image following years of harassment of the people.

The Interior Ministry was instrumental in the imposition of martial law and later was implicated in the assasination of the pro-Solidarity priest Jerzy Popieluszko in 1984.

Mazowiecki cut funds for the ministry and fired several thousand security people in recent months.

The official news agency PAP said Krzysztof Kozlowski, 58, editor-in-chief of the Catholic weekly Tygodnik Powszechny, was appointed deputy interior minister Wednesday.

Kozlowski took part in the round-table negotiations between Solidarity and

former Communist government that resulted in the signing of the accord last April under which Solidarity was relegalized. The accord also paved the way for the landslide victory of Solidarity in the June 4 parliamentary election.

The new Cabinet formed by Mazowiecki following the elections put the army and interior ministry under the control of the Communists and the majority of the other ministries were taken over by Solidarity.

WASHINGTON (MARCH 7) UPI - President Bush will present a new transportation policy Thursday that officials say will seek to ease mounting congestion and increase the state and local share of highway spending.

Administration officials said Wednesday that the policy would address mobility problems on land, sea and air - and urge greater reliance by states and localities on road tolls and other user fees.

Drafted over the past year by Transportation Secretary Samuel Skinner, the first national transportation policy in more than a decade is entitled, ''Moving America: New Directions, New Opportunities.''

State and local officials say a new policy is sorely needed to provide a framework for improvements. But they are concerned about the desire to stick them with what would be billions of dollars in increased highway costs.

The policy would focus federal spending on major national arteries and impose new responsiblities on states and localities for designing, building and maintaining their own roads, officials said.

In keeping with Bush's pledge of no new taxes, the administration would pay for the federal share without raising the federal motor fuel tax. But it would urge the states to increase their own fuel taxes.

Frank Francois, executive director of the American Association of State Highway and Transportation Officials, said, ''The government wants the states to do more. But many feel they are at their limit.''

The average state gasoline tax is now 16 cents a gallon, double a decade ago. The federal gasoline tax has stood at nine cents a gallon since 1982.

Under the new policy, highway funding would still be covered by the highway trust fund, which now totals about $15 billion.

Currently, the government pays an average of 82 percent of the cost of all federal highway projects, up to 90 percent on some. Federal officials have said they would like to reduce the average to about 75 percent.

Jody Thomas, a policy analyst at the National Governors Association, said several governors told Skinner last week that they are unable to boost their share. ''They feel they can't ask taxpayers for more,'' she said.

According to the administration, congestion in 1987 bogged down 65 percent of urban rush-hour traffic on interstate highways and 17 percent of rural rush-hour interstate traffic. And it is getting worse.

The transportation policy is comprehensive. In addition to highways, it will address mass transit, waterways and airways, including the needs of the nation's air traffic control systems.

To advance the policy into law, the administration will present various legislation to Congress during the next two years. Skinner was to testify on Capitol Hill Thursday about the overall plan.

WASHINGTON (MARCH 7) UPI - The Social Security Administration began looking Wednesday for people who speak Spanish and other launguages to serve as claims representatives in areas with large non-English speaking populations.

Claims representatives are stationed in 1,300 local offices nationwide to determine whether applicants are eligible for benefits and to figure out how much they will receive each month.

Social Security Commissioner Gwendolyn King said SSA personnel offices had been directed to add the ability to speak an appropriate foreign language to the selection criteria for claims representatives.

''America's Social Security program must serve the needs of all the people not just those who speak English,'' King said. ''In the coming months, we will continue seeking new and better ways ... to meet this important goal.''

NEW YORK (MARCH 7) UPI - Prosecutors Wednesday revealed they had reduced the police charges against two of the suspects arrested for the slaying of a state trooper during an undercover drug investigation that erupted into a frenzied gun battle.

Police had originally charged the two suspects with first-degree murder for the shooting Monday of Aversa, 31, a member of the New York Drug Enforcement Task Force.

But in a complaint released Wednesday by the Manhattan district attorney's office, the two suspects, David Hernandez, 20, and Oswaldo Santana, 26, were charged with second-degree murder, in addition to first-degree attempted murder and attempted robbery.

Aversa was killed during a firefight on the Lower East Side which flared

after the two suspects tried to rob undercover detective Joseph Mendez, 29 of more than $40,000 in cash he was using to buy 4.4 pounds of cocaine.

Police officials said another undercover detective, Craig Moruzzi, 41, was wounded in the thigh by a bullet fired by the trooper and detective Mendez shot himself in the leg while struggling with one of the suspects.

The charges against Hernandez and Santana were apparently rolled back because authorities determined the two did not know Aversa was a state trooper, one of the key stipulations for a first-degree murder charge, which applies to the killing of a law enforcement officer, the district attorney's office said.

But the two were charged with first-degree attempted murder because they tried to kill Mendez after he had identified himself as a police detective the complaint said.

The second-degree murder charge was for felony murder, which applies to a killing during the commission of a felony, in this case the attempted robbery.

Prosecutors chose not to charge the two with intentional second-degree murder, backing up the determination by police that they will probably never be able to find out whose bullet actually killed Aversa.

The bullet that struck Aversa in the left eye, passing through his head and killing him, was never recovered, said Inspector Richard Mayronne, a police spokesman.

Prosecutors do not need to prove Hernandez or Santana fired the bullet that killed Aversa to obtain a second-degree felony murder conviction.

The penalty is the same for both first- and second-degree murder - 25 years to life. New York State does not have a death penalty law.

ANCHORAGE, AK (MARCH 7) UPI - The prosecution rested its case Wednesday against Exxon Valdez Capt. Joseph Hazelwood with a final witness who said the skipper was drunk when he sailed his tanker out of Valdez and drunk when it hit Bligh Reef and caused the nation's worst oil spill.

More than five weeks ago prosecutors began their case with witnesses who said Hazelwood sat in bars drinking before sailing out of Valdez. They finished their case with an expert who used a controversial theory to calculate that Hazelwood had an illegal blood alcohol level on the grounded tanker many hours before the only blood test he was given.

No sooner had the prosecution rested its case after testimony by 44 witnesses than defense attorneys declared that the evidence was insufficient even to send the case to the jury and they asked for a directed verdict of acquittal.

Following lengthy arguments, state Superior Court Judge Karl Johnstone denied the motions for acquittal, setting the stage for the opening of the defense case, expected to last up to two weeks.

The first defense witness, Valdez flower shop owner Emily Kaiser, was called to give Hazelwood an alibi - testifying that the skipper was in her store wiring flowers to his wife at a time when he was supposedly in a bar drinking.

Johnstone said the prosecution presented enough evidence for the case to go to the jury, but the debate made it apparent that the defense considered the prosecution case weak and beatable.

Defense lawyer Dick Madson argued that since Hazelwood was in his cabin when the grounding occurred, the prosecution had failed to prove a case of drunk driving.

But Johnstone bought out the prosecution contention that Hazelwood was still in command of the vessel - and in fact was the only licensed officer for Prince William Sound - when he left the bridge.

Johnstone said Hazelwood should have known the risks involved when he set

his tanker on a course around icebergs toward Bligh Reef and left turning orders with unqualified crewmen.

Prosecution alcohol expert Richard Prouty said Hazelwood's blood alcohol level probably ranged from 0.14 to 0.17 last Mar. 24 when his laden tanker smashed into Bligh Reef and spilled nearly 11 million gallons of oil.

That exceeds the state legal limit of 0.10.

However, the wreck was almost 11 hours old when the only blood sample was taken from Hazelwood - showing a moderate alcohol level of 0.061, within state limits.

Prouty calculated backwards to extrapolate that Hazelwood's blood alcohol level was substantially higher a few minutes after midnight when the grounding occurred.

Prouty said he used the prosecution drinking scenario that Hazelwood had five vodkas in Valdez bars Mar. 23 from 1:30 p.m. until 8 p.m. and calculated the skipper's blood alcohol level at 0.17 at the time of the wreck.

Defense lawyers have acknowledged that Hazelwood drank, but have insisted that he spent less time drinking and that he had fewer drinks than the prosecution maintains and also that among Hazelwood's drinks were Moussy beer, which contains a minute amount of alcohol.

Madson tried to chip away at Prouty's theory and his numbers, attacking the retrograde extrapolation theory as highly uncertain - especially in light of the absence of evidence that Hazelwood acted intoxicated or impaired - but Prouty was resolute.

He stuck to his backwards extrapolation and asserted that it gave a scientifically accurate picture of Hazelwood's likely level of blood alcohol based on the later blood test and the evidence of Hazelwood's drinking.

Hazelwood, 43, of Huntington, N.Y., is charged with operating the tanker while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

Hazelwood faces up to seven years, three months in jail and a $61,000 fine.

#90066u1912 03/07/1990 ~United Press International
PRETORIA, SOUTH AFRICA (MARCH 7) UPI - A self-confessed member of a police death squad testified Wednesday that he and three accomplices stabbed a black human rights lawyer to death in 1981 on the instructions of senior South African police officers.

In testimony to the one-man commission investigating alleged political assasinations, Butana Almond Nofemela said the four-man covert police unit killed human rights lawyer Griffiths Mxenge in his hometown of Umlazi near the Indian Ocean port of Durban on Nov. 19, 1981.

''We started hitting him and punching him till he fell down. ... We were all in possession of knives. We started stabbing,'' Nofemela told Justice Louis Harms.

Nofemela explained to Harms how the unit monitored Mxenge's movements and killed his dogs with poisoned meat prior to the slaying.

He told Harms he later made a sworn statement regarding Mxenge's murder shortly before he was to be executed for an unrelated non-political murder and then received a stay of execution the night before his scheduled hanging.

Information concerning Nofemela's role in a police hit squads and other allegations have been published before, but Wednesday's testimony was the first public statements by the 31-year-old former member of the African National Congress.

Police Capt. Dirk Coetzee, the officer in charge of the secret unit who has left the country, also revealed details of the hit squad to the independent Afrikaans-language weekly Vrye Weekblad before he joined the ANC.

Coetzee has indicated through the ANC his willingness to testify before the commission. But it was unclear how his testimony would be provided because he faces arrest if he returns to South Africa.

Nofemela told the Harms Commission during its third day of hearings that he had been recruited for security work after graduating from a six-month course at a police college.

Nofemela, brought in handcuffs from prison, told in detail how he was trained to conduct ambushes and kidnapping and described weapons he received under Coetzee at a farm near Pretoria. He also told the commission he had been promised bonus money for this work.

Asked how much, Nofemela said, ''it depends on how effective is the person

you are called to eliminate.''

Nofemela and his accomplices each received $390 for killing Mxenge, who Coetzee identified as an ANC member.

Under direct questioning from Harms, Nofemela said he had made only one arrest during his eight years with the police.

''All other times I've kidnapped. I kidnap and kill,'' he said.

Many of those trained at the farm were ''askaris,'' the name given to former members of the ANC and Pan-Africanist Congress who were employed by the police to identify guerrillas of the two organizations, which were then banned.

President Frederik de Klerk, who appointed the Harms Commission in January lifted the 30-year bans on the two movements Feb. 2 as part of his bold racial reform initiative.

Testifying about the slaying of Mxenge, Nofemela said Coetzee told the four-member squad to make the killing look like a robbery. Nofemela and his accomplices - David Tshikalange, Joseph Mamaselela and Brian Justice Nqulunga - removed Mxenge's jacket, watch and money, and also took his car.

Earlier, Nofemela told the commission he had been told by police Brig. Willem Schoon to obey Coetzee's orders.

''You are going to Durban on a mission and you must listen carefully to the captain (Coetzee) and do everything he tells you,'' Nofemela said Schoon told him in Coetzee's presence.

On the evening of the murder, the murderers pretended their car had stalled in the road near Mxenge's home and asked him for help as he drove past. They abducted him, took him to a vacant lot and killed him, ignoring his pleas for mercy.

''He was pleading, 'why did we take him away','' Nofemela said.

Nofemela reported back to Coetzee each night in November 1981 on Mxenge, according to police records on the unit's expenses submitted to the commission.

During the night of the murder, he and Coetzee drove Mxenge's white Audi to the town of Piet Retief, where a radio tape deck Coetzee said was for Schoon was removed.

#90066u1913 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - In the wake of the changes in Eastern Europe, Panama and Nicaragua, the Communist government of Cuba ''is not viable'' in the long run, a senior administration official said Wednesday.

The official, addressing a meeting of the Overseas Writers, and speaking on the basis of no closer identification, said, ''Cuba is at odds with two global trends: the desire to end regional conflicts, and the desire for internal democratic reforms.''

The official said the economic trends in Cuba are disappointing ''and Eastern Europe is not going to prop up the Castro regime any longer.''

The official carefully avoided predicting the early collapse of the Cuban government, but he said, ''In the long run, the communist government is not viable. The system is not going to work.''

Other predictions along the same lines have been met with defiance from the Cuban government.

The government-run radio station, Radio Havana Rebelde, said in a commentary Monday, ''In response to these strange ideas, in response to these illustrious gentlemen who openly discuss how to overthrow governments of other countries, we should say the following: Our country has reaffirmed the socialist nature of our state and the role of our party as a superior leading force of society.''

The Havana broadcast ended, ''Let no one be mistaken, Cuba is a hard nut to crack.''

The American official conceded that there are certain differences between the countries of Eastern Europe, where the Communist governments disappeared with little struggle, and Cuba.

One difference, he said, is that communism was imposed on the Eastern European satellites by the force of Soviet arms, and when Mikhail Gorbachev announced his policy of non-interference, there was nothing supporting the communist governments.

The Cuban government, on the other hand, stems from a genuine local revolution.

Secretary of State James Baker has ruled out any direct intervention against Cuba, saying, ''There is no military threat to Cuba from the United States.''

The administration official said Cuba remains ''an irritant'' in the relationship between the United States and the Soviet Union and it remains

difficult for the United States to understand why the hard-pressed Soviet economy should subsidize the Cuban government at a level of an estimated $5 billion per year.

#90066u1968 03/07/1990 ~United Press International
CAIRO, EGYPT (MARCH 7) UPI - Former President Jimmy Carter is scheduled to arrive in Cairo on Monday to meet with Egyptian officials in a bid to revive the stalled Middle East peace process, a Cairo daily reported Wednesday.

The Cairo semi-official daily Al-Ahram reported that Carter, who mediated the 1978 Camp David accords that led to the subsequent Egypt-Israel peace treaty, will visit Israel and Tunisia after leaving Egypt.

The Carter Center at Emory University in Atlanta confirmed that Carter

would travel to Egypt, Syria, Jordan and Israel March 11-24 to meet with government and religious leaders, but did not say he would be mediating in the peace process.

Egypt and the United States hope to arrange a meeting of U.S., Egyptian and Israeli officials in Washington as a prelude to the first Israeli-Palestinian talks in Cairo.

Efforts to bring Israeli and Palestinian representatives to the negotiating table have foundered recently, partly as a result of Israeli objections to the proposed composition of the Palestinian delegation.

Carter will arrive in Cairo at a time when Arab states fear Israel will allow an influx of Soviet Jews to settle in the Israeli-occupied West Bank of the River Jordan and the Gaza Strip.

Carter has made several recent attempts to mediate conflicts in African and has led delegations of American observers to recent elections in Central America, including the Feb. 26 Nicaraguan polls.

#90066u1974 03/07/1990 ~United Press International

(MARCH 7) UPI - Greyhound, the nation's largest intercity bus line, said Wednesday it will not resume negotiations with striking drivers because the union has failed to yield in its demands and talks ''at this time'' would prove futile.

Anthony P. Lannie, the company's chief negotiator, said the Amalgamated Council of Greyhound Unions should understand that the company has already ''offered every single red cent that it can afford to pay.''

The nationwide strike by many of Greyhound's 9,000 employees began Friday after five days of intense talks in Phoenix failed to yield a new three-year contract.

''No new talks ... are scheduled because we have not received a request for talks that would be fruitful at this time, given the present attitude of the council,'' Lannie said.

Lannie said union president Edward Strait requested an ''off-the-record'' meeting with company negotiators, but Strait had no new proposals to make.

''Instead, he engaged in a rambling conversation that was nothing more than a rehash of issues discussed at the negotiating table and a repeated demand that the company raise its wage for drivers,'' Lannie said.

By Wednesday, the sixth day of the strike, Greyhound, based in Dallas, had

succeeded in obtaining court orders in at least 11 cities, including Los Angeles, Chicago and Philadelphia, limiting the activities of pickets at terminals and bus yards.

The strike has severely curtailed Greyhound service, though the company said it is operating at about 31 percent of its regular schedule. Another 300 replacement drivers fresh from training programs were expected to be working by week's end.

Meanwhile, about 300 union members and others gathered in Redding, Calif., for a memorial march and service for a 59-year-old striking driver who was crushed to death Saturday by a bus driven by a non-union driver.

James La Sala, international president of Amalgamated Transit Union, urged the company to release safety records and drug and alcohol test results on Theodore Graham, the replacement driver whose bus killed Robert Waterhouse.

Waterhouse was pinned between a concrete retaining wall and the bus.

Greyhound spokeswoman Ann Wheat said Graham was suspended without pay pending an investigation of the mishap by the company and authorities.

Prosecutors were expected to decide early next week whether to file charges against Graham, who reportedly was cited for five traffic violations in as many years.

La Sala called on the union's 160,000 members to observe five minutes of silence at 1 p.m. PST Wednesday, when the memorial service began.

The strike involves many of Greyhound's 9,000 union drivers, baggage handlers, mechanics, ticket agents and reservationists.

The last strike against Greyhound was in 1983 and lasted 48 days. Greyhound was sold in 1987 to a group of Dallas-based investors headed by Fred G. Currey.

Late last year Greyhound offered the union a new contract that included what the company described as a 6.9 percent increase in wages and benefits in the first year of the three-year contract. The union rejected that offer but has refused to disclose its demands.

The company has accused drivers, who now average $24,700 a year, of asking for wage hikes that could be financed only through a fare increase. Each side has accused the other of distorting its positions.

The company carried 22 million passengers last year, and is particulary crucial to low-income travelers who live in smaller communities.

WASHINGTON (MARCH 7) UPI - Members of Congress pressed Wednesday for passage of a resolution calling on President Bush to appoint a special envoy to negotiate the release of Americans held captive in Lebanon.

The resolution's sponsor, Rep. Louise Slaughter, D-N.Y., said the administration should act on recent reports from Iran and Syria that the hostages could be released soon, rather than ''wait for those rumors to run their course.''

Saying that Congress should seize ''a most opportune moment,'' Rep. Mervyn Dymally, D-Calif., chairman of the House Foreign Affairs international operations subcommittee, sidestepped usual procedure and sent the resolution to the full committee ''to propel the process of releasing the hostages.''

But Rep. Olympia Snowe, R-Maine, urged caution in pushing for a special envoy, saying lawmakers may not be aware of administration efforts to secure the release of the hostages.

''Sometimes timing is everything,'' Snowe said. ''This may not be the right time with everything that is happening.''

Slaughter hoped to win congressional approval for the resolution before March 16, the fifth anniversary of captivity for the longest-held American Terry Anderson. Members of Anderson's family live in Slaughter's New York district.

''Media reports suggest that the hostages' release is 'imminent' ... and yet the hostages are still in shackles,'' Slaughter told the subcommittee.

''Terry sits and waits while the State Department sits and waits,'' she said.

Slaughter said she was ''perplexed'' by the State Department's opposition to naming of a special envoy, since ''the secretary of state himself has invited everybody to weigh in.''

But Michael Kraft of the State Department's Office of Counterterrorism said idea has been ''very carefully considered'' since it was first suggested by Slaughter and Sen. Daniel Moynihan, D-N.Y., two years ago, and has been rejected as ''not the most productive or potentially useful particular technique.''

Kraft added, ''There's a great deal being done (to release the hostages) that is not necessarily being publicized.''

#90066u2019 03/07/1990 ~United Press International

SAN FRANCISCO (MARCH 7) UPI - A government prosecutor portrayed indicted federal judge Robert Aguilar in closing arguments Wednesday as a liar and a behind-the-scenes manipulator who attempted to influence other judges in criminal cases.

The month-long trial may be in the hands of jurors by the end of Wednesday's session.

Aguilar, 58, the first federal judge in the nation charged with racketeering, allegedly conspired with Rudy Tham, 66, a convicted Teamster Union embezzler and Abe Chapman, 83, a self-described mob assassin of the 1930s and convicted drug dealer.

If convicted on all eight counts, Aguilar could face 55 years in prison and a $2 million fine. Chapman and Tham would each face 10 years in prison.

Justice Department attorney William Keefer, in a low-key summation of his case, accused Aguilar of lying to federal marshals about his knowledge of a fugitive hiding in Mexico, asking to have his notes shredded in one case and disclosing to Chapman that the FBI might have his phone tapped.

Keefer said Aguilar lied to the FBI about his involvement in the Tham case in June 1988.

Aguilar acted behind the scenes in Tham's case and the bank fraud case of Fresno businessman Ronald Cloud to affect the outcome with other judges,

Keefer said.

Keefer accused Tham and Chapman of using code words to cover their involvement with Aguilar.

In FBI wiretaps, Tham and Chapman allegedly referred to Aguilar as ''the banker'' and legal documents as ''loan papers.'' Chapman was even recorded calling Aguilar's court office and calling himself ''Dr. Green.''

Keefer loudly exhorted jurors, ''The evidence compels one result, that Abe Chapman, Michael 'Rudy' Tham and sadly U.S. District Judge Robert Aguilar are guilty as charged.''

Aguilar allegedly used his judicial office in a failed attempt to influence U.S. District Judge Stanley Weigel to hear Tham's request to overturn his 1980 embezzling conviction.

He is also charged with trying to influence U.S. District Judge Sam Conti to look favorably on Cloud, of Fresno, an ex-casino owner convicted in a $20 million bank fraud in 1987.

The government contends Aguilar helped his former secretary Vera Hoff remain a fugitive in Mexico for nearly 10 years while she avoided a two-year prison term for tax evasion.

In exchange for his favors, Aguilar purportedly was able to buy Hoff's custom home in San Jose, Calif., in 1979 for $700 a month and no downpayment, get a warehouse job from Tham for his alchoholic brother and turn a $12,000 loan from Cloud in 1983 into a lifetime, interest-free gift.

Keefer said Aguilar told an ''unequivocal lie'' when he denied to FBI agents in June 1988 that he ever discussed the Tham case with Tham's attorney, Edward Solomon.

Keefer pointed to a series of huge charts for the jurors showing 17 telephone contacts between Aguilar and Solomon purportedly about the Tham case.

''Judge Aguilar knew the FBI would report that to the grand jury. It (denial of involvement with Tham) was an attempt to derail the grand jury '' Keefer said.

Keefer told jurors said, ''His efforts in the Cloud case were all behind the scenes.''

Keefer reminded jurors that Aguilar's ex-girlfriend, Susan Penland, was told not to mention Hoff's name or their visit to Hoff in Mexico in 1982.

''He did that because he knew she (Hoff) was a fugitive,'' Keefer said.

In the last decade three federal judges have been indicted: Harry Claiborne, Nevada, in December 1983, Walter Nixon, Mississippi, 1985, and Alcee Hastings, Florida, 1981.

All three were impeached and removed from office by Congress. Claiborne and Nixon were convicted of various charges. Hastings was acquitted.

#90066u2027 03/07/1990 ~United Press International

BOSTON (MARCH 7) UPI - In findings hailed as the most definitive evidence yet that the French ''abortion pill'' is safe and effective, researchers Wednesday released the results of the largest study to date of the controversial drug.

The drug RU 486 produced a 96 percent success rate among 2,115 women in France without causing side effects such as pain or profuse bleeding more frequently than conventional abortions.

The study, published in The New England Journal of Medicine, confirms earlier smaller studies. It was conducted by the French pharmaceutical company Roussel Uclaf, which developed the drug but only sells it in France, in part because of fierce opposition from anti-abortion groups.

Dr. Sheldon Segal of the Rockefeller Foundation in New York, who wrote an accompanying editorial, said the study was ''very important - the definitive study we've been waiting for.''

The research ''should give Roussel Uclaf assurances about the drug's safety that they need in order to introduce it into other countries,'' Segal said in an interview.

A company spokesman in Paris called the study ''definitive,'' and added the firm now believes the drug's safety is not in question. The drug works by blocking the hormone progesterone, causing a fertilized egg to be dispelled.

The company spokesman added, however, that the firm is committed to a lengthy and extensive testing program and the new study alone will not hasten the drug's introduction into the United States or other parts of Europe such as Great Britain and the Scandinavian countries, where other tests are under way.

Dr. Louise Tyrer of the Planned Parenthood Federation of America said the study ''confirms RU 486 as a major breakthrough - the most major development for women since the invention of the birth control pill.''

She predicted the study will put pressure on Roussel Uclaf to forge an agreement with a licensing agent in the United States to apply to the Food and Drug Adminstration for permission to test it in this country.

However, Richard Glasow, vice president of the National Right-To-Life Committee, said the study ''doesn't offer any new information about the drug as far as we're concerned.''

The drug ''has the potential for being devastating to a woman's health,'' he said. He noted the study was ''conducted with a carefully chosen group of women'' and contained ''no information about the possible long-term effects of RU 486.''

But Dr. David Grimes of the University of Southern California, one of the few U.S. researchers studying RU 486, said the drug's safety ''is not in doubt and Roussel does not need any more studies'' to begin making steps to market it outside France.

''You can't stop science, and scientifically, this is an exciting and revolutionary concept,'' he said, noting the drug also shows promise as a treatment for a variety of diseases including breast cancer and an adrenal disorder known as Cushing's syndrome.

The new research involved women who sought abortions at 73 centers in France. All of the women were seven weeks pregnant or less. They were given a single 600 milligram dose of RU 486. Within 48 hours of receiving RU 486, the women were given doses of one of two types of hormones that causes the uterus to contract.

Of the 2,040 women who returned for follow-up visits, the drug failed to work for 20 women, or 1 percent. Another 2.1 percent, or 43 women, experienced incomplete expulsions. These women underwent standard surgical abortions.

A small percentage of women experienced side effects such as nausea, vomitting, dizziness, abdominal pain and excess bleeding. One women required a blood transfusion. But the rates of side effects were about equivalent to those produced by conventional abortions.

KATMANDU, Nepal (MARCH 7) UPI - Tribhuvan University, where students have participated in a pro-democracy movement, has postponed final examinations for a month without explanation for all 30,000 students, officials said.

Nearly 250 professors of the university on Tuesday had threatened to ''take suitable action'' if the government attempted to interfere with academic freedom, but they did not specifically say what they would do.

An estimated 1,500 activists protesting for a multi-party system, many of them students, have been arrested in the Himalayan kingdom in recent weeks.

Political parties were banned 29 years ago by King Mahendra, father of present King Birendra, on grounds that party politics led to divisive tendencies in the land-locked Hindu kingdom.

#90066u2078 03/07/1990 ~United Press International

EDGARTOWN, MA (MARCH 7) UPI - Jacqueline Onassis and the Wampanoag Indians settled a 10-year dispute over beachfront lands on the popular resort island of Martha's Vineyard with cash and a land swap approved Wednesday in probate court.

The case stemmed from Onassis's refusal to allow public access to a 1 1/2-acre site in the Gay Head section of the island, land that the Indians consider sacred. The site is surrounded by her sprawling 380-acre oceanfront estate.

Under the agreement, negotiated over several months by representatives for Onassis and the Wampanoags, the Indians relinquished all rights to that land in exchange for $120,000, court costs and a 2-acre parcel at nearby Zacks Cliffs.

The settlement was approved in open court by Dukes County Probate Judge John Macdougall.

''We feel she was understanding and generous in the resolution. It was a logical move, but it required a lot of negotiation,'' said attorney Paul Sulla of Boston, who represented most of the Wampanoags involved in the case.

''My clients are satisfied with the settlement, and Mrs. Onassis has secured her privacy. The issue was never about money. It was about land - about why they should have to move to satisfy the white man,'' Sulla said. ''The settlement had to have a sweetener to it. They received a fair amount of money for their heritage, and a parcel of land that is very accessible.''

According to Wampanoag legend, Chief Moshup and his wife, Squant, are buried in the disputed 264-foot stretch of coastal property on Gay Head, a landmark whose red clay cliffs take on brilliant colors when the sun reflects off the ocean spray.

''The Indians didn't give up anything more sacred. Zacks Cliffs is far more prominent in their culture,'' Sulla said.

Though Onassis owns the parcel with 20 other people, including several Wampanoags, she refused others access to it. She posted guards at both ends of her estate to keep people out. The widow of President John F. Kennedy and shipping tycoon Aristotle Onassis bought her share of the land for $1,000 in the late 1970s.

The Wampanoags claimed they had a right to share in the land, the site where, legend says, Moshup and his wife retreated in colonial times to escape the white settlers. According to tribal legend, the chief threw his children into the ocean and turned them into whales so they could be free.

The parcel the Wampanoags received in the land swap was located at one end of Onassis's landholdings. It is about 1,000 feet from the disputed site.

''The other site had no parking and required a 2,000 foot walk to get to it. The new parcel on Zacks Cliffs has parking and public access. For the elderly in the group and for general uses, it is far more satisfactory,'' Sulla said.

NEW YORK (MARCH 7) UPI - The Soviet Union and Iran have agreed to build two nuclear power plants in Iran and conduct joint research on the peaceful uses of nuclear power, OPEC's news agency said Wednesday.

''Both sides ... agreed to cooperate in building two nuclear power plants in Iran and also launching joint research on peaceful uses of nuclear power,'' Opecna said in a dispatch from Tehran.

Opecna is the official news agency of the 13-nation Organization of Petroleum Exporting Countries, which accounts for more than a third of the world's crude oil output.

No comment could be obtained from the Soviet Embassy in Washington.

The agency said an accord was signed Tuesday, at the end of a joint Iranian-Soviet economic, trade and technical meeting by Iranian economic and financial affairs Minister Mohsen Nourbakhsh and Soviet railways Minister Nicolai Konarev.

Konarev was quoted as saying last summer's meeting between Soviet leader Mikhail Gorbachev and Iranian President Ali Akbar Hashemi Rafsanjani paved the way for the new agreement.

Nourbakhsh was quoted as saying technical problems also had been removed from exporting Iranian natural gas to the Soviet Union and that negotiations on price would begin soon.

In September, Opecna reported Iranian oil minister Gholamreza Aghazadeh as saying a natural gas export agreement had been reached in June during a Rafsanjani visit to Moscow and that deliveries would begin this month.

He said Iran would gain between $2 billion and $2.5 billion in foreign exchange in the first five years by the export of 3 billion cubic meters of natural gas annually to the Soviets.

Opecna also reported Wednesday that the Soviets had reached an agreement with South Korea to export enriched uranium to Seoul over the next decade for use as a nuclear fuel.

This is the first time South Korea will be importing enriched uranium, the agency said.

Until now, Seoul has been buying uranium ore from Australia, France and Canada and having it processed in France and the United States at an average cost of more than $1,000 a kilogram, Opecna said.

It said the Soviet Union will be charging only $700 a kilogram.

NEW YORK (MARCH 7) UPI - Stocks closed lower Wednesday in moderate trading as profit taking and computerized program selling derailed an early attempt to extend Tuesday's rally.

The Dow Jones industrial average, which jumped 27.25 Tuesday, fell 7.21 to close at 2669.59.

Among broader market gauges, the New York Stock Exchange composite index fell 0.40 to 185.77 and Standard & Poor's 500-stock index fell 0.98 to 336.95. The price of an average share fell 7 cents.

Declines nosed out advances 742-726 among the 1,970 issues crossing the NYSE tape. Big Board volume totaled 163,580,000 shares, up from the 143,590,000 shares traded Tuesday but off the brisk earlier pace.

The law of averages caught up with the market after the gain of 112.61 points in the Dow industrials recorded over the previous seven sessions. After gaining in early trading on momentum from Tuesday's broad-based rally, prices drifted at little-changed levels until a late bout of profit taking and futures-related program selling surfaced. Traders turned cautious, feeling that the market may have reached a short-term peak.

"The market has been up six of the last seven days, so we had some profit taking," said Alfred Goldman, market strategist with A.G. Edwards and Sons Inc. in St. Louis. "But the pullback was well contained, a 'time out' (from the recent gains)," he said.

Anticipation of the February job data to be released Friday also contributed to the nervousness and the late downturn, analysts said. The report is expected to show that non-farm payrolls rose by 268,000 last month.

"It's one of the 'in' economic indicators," said Goldman, referring to the

perception that the data has become a key report used by the Federal Reserve in setting monetary policy. "The message of the market is that the rally is getting tired but it's not on a resuscitator yet," he said.

On the trading floor, American Express was the most active issue, up 5/8 to 27 7/8. W.R. Grace followed, off 1/8 to 29 1/2. Philip Morris was third, unchanged at 38 3/4.

Among the other blue chips, AT&T added 3/8 to 41 after announcing that it has agreed to cooperate with NEC Corp. of Japan on a wide range of semiconductor products and technologies.

IBM was off 1/4 to 105 1/2 amid reports that it would consider licensing the chip technology used in its newest line of computers. Eastman Kodak rose 1 1/2 to 39 7/8, Merck fell one to 69 1/2, General Electric gained 1/4 to 62 5/8, and General Motors lost 3/4 to 45 1/4. GM reportedly forecast that its U.S. auto sales would fall to between 14.5 million and 15 million units from 15.2 million in 1989.

Elsewhere, MGM/UA Communications surged 3 3/4 to 17 3/4 after agreeing to a $20-a-share takeover bid from Pathe Communications.

Compaq Computer, which unexpectedly reauthorized Businessland to sell and service its products, jumped 3 5/8 to 92 1/4. Businessland soared two to 10 3/4.

Hilton Hotels sank 5 3/8 to 61. Reports said its board was expected to meet to decide whether to accept a sweetened takeover bid from JMB Realty, to recapitalize or to take itself off the market.

AAR tumbled 4 1/8 to 27 1/2 after reporting late Tuesday unchanged earnings despite an increase in sales.

And Bandag jumped 3 1/4 to 83 3/4. Morgan Stanley was said to repeat its "buy" recommendation on the stock.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 194,776,200 shares, compared with 175,552,700 shares traded in the previous session.

Prices closed slightly higher in active trading on the American Stock Exchange. The Amex Market Value index rose 0.22 to close at 359.03. The price of an average share gained one cent. Advances led declines 321-234 among the 802 issues traded. Composite volume totaled 21,860,640 shares, compared with 18,739,100 traded Tuesday.

Jan Bell Marketing led the Amex issues, plummeting 5 3/8 to 9 1/8 after reports that the jewelry marketer could lose two of its major customers.

The National Association of Securities Dealers composite index inched up 0.14 to 432.47.

(MARCH 7) UPI - Libya apparently is making poison gas again. The White House says the ''available evidence suggests'' that Libya is producing chemical weapons... pointing to the need for- quote- ''vigorous efforts to stop the operation.'' Spokesman Marlin Fitzwater refused to say what the ''vigorous efforts'' might involve, but would NOT rule out the possibility of a military operation. In Fitzwater's words- ''We WON'T rule out anything.'' Published reports earlier said Libya had resumed the limited manufacture of poison gas.

Sources in Pakistan say Afghanistan's defense minister has arrived in Pakistan and has been taken into custody. The defense minister yesterday led a failed coup attempt against Afghanistan's President Najibullah... and sources say he now wants to defect to Pakistan. The move apparently signals an end to the coup attempt, but Western diplomats say fighting is still going on in Kabul . The Afghan government says the rebellion has been crushed.

There are conflicting reports about how many people were killed in today's subway train derailment in Philadelphia. A police captain who was on the scene says one person was killed, but a police spokeswoman says three are dead. A spokeswoman for the Southeastern Pennsylvania Transportation Authority reports two people were killed in the derailment, which happened during the morning rush hour. Officials say 93 people were hurt, and two others are still trapped in the train. At least three of the injured are in critical condition.

A howling snowstorm that closed airports and schools in the Rockies pushed eastward today, pelting Iowa with freezing rain. The storm yesterday dumped 50 inches of snow in the Colorado mountains and about a foot in Denver. Several hundred airline passengers were stranded at Denver's Stapleton International Airport, but all runways were expected to be open later today. Nearly all schools in northeast Colorado were closed today.

#90066u2167 03/07/1990 ~United Press International

NEW YORK (MARCH 7) UPI - A rampant dollar shrugged off intervention by the Federal Reserve and other central banks Wednesday but ended mixed in New York trading on a report that Group of Seven officials meeting in Japan were preparing for an even heavier barrage of dollar-selling.

Traders said the dollar gained on the Japanese yen and the West German mark for most of the session despite the selling of dollars for the two currencies by the Fed and its European central bank allies. But the dollar slipped on a Japanese news report that G-7 officials agreed to escalate intervention beginning Thursday.

The threat of a "joint planned attack" by the major industrialized countries brought the dollar fall which low-level intervention failed to achieve, said Shearson Lehman Hutton Inc. currency analyst Lisa Finstrom.

Late in the New York session the dollar was quoted at 1.6995 German marks, off from 1.7028 marks Tuesday. The U.S. currency was fetching 150.25 Japanese yen, up from 149.75 yen late the day before.

"It's prompted a little pullback, but we'll have to see whether the actual intervention matches the rhetoric," said Earl Johnson, foreign exchange vice president with the Harris Trust & Savings Bank in Chicago.

The yen was rendered more vulnerable by the departure from Japan for Europe of Bank of Japan Governor Yasushi Mieno. Players took this to mean an interest rate hike was ruled out until his return at mid-month.

Johnson pointed out that Germany's Bundesbank will be constrained from upping its interest rates until after the East German elections March 18.

Also boosting the dollar are U.S. economic data which, while mixed, "tend to put the recession scenario on the back burner," Johnson said. He concluded, "The dollar looks pretty good here, short term."

In New York the British pound slipped to $1.6450 from $1.6470. Other dollar rates: 1.4995 Swiss francs, unchanged; 5.7405 French francs, off from 5.7560; and 1,253 Italian lire, down from 1,257.25.

In Europe the dollar closed higher against the main currencies, finishing in Frankfurt at 1.7070 German marks against 1.6993 Tuesday. It also moved up in Zurich, to 1.5035 Swiss francs against 1.4970.

In Paris, Brussels and Milan the U.S. currency climbed to 5.7615 French francs against 5.7345, 35.35 Belgian francs against 35.30, and 1,256.85 Italian lire against 1,252.95. In London the pound slipped to $1.6400 from $1.6490.

In Tokyo trading the dollar shrugged off heavy Bank of Japan intervention and hit a nine-month high against the yen on speculation the central bank will not raise its discount interest rate immediately. The dollar closed at 150.75 yen, up 1.25 yen from the previous day's close.

Republic National Bank in New York closed cash gold at $400.25 an ounce,

off from $404.30 Tuesday. The New York Commodity Exchange settled gold at $400.20 an ounce, down from $403.60. In Zurich gold declined to $401 an ounce from $406. London gold fell to $400 an ounce from $404.75.

Republic closed cash silver at $5.125 an ounce, down from $5.13. Comex spot silver rose to $5.122 an ounce from $5.116. Zurich silver was unchanged at $5.15 an ounce. London silver was off to $5.14 an ounce from $5.15.

(MARCH 7) UPI - Federal agents are in Crested Butte, Colorado, searching the rubble of a bank building for clues that might show a bomb caused an explosion that leveled the building and killed three people. 14 others were hurt in yesterday's blast at the Crested Butte State Bank. Officials say there were two bomb threats made to businesses in the southwestern Colorado town during the weekend.

Coast Guard inspectors placed booms to contain oil that oozed from a barge blown nearly in half during an explosion in the waters between Staten Island and New Jersey. Coast Guard officials this morning were conducting a flight inspection of the Arthur Kill waterway near Linden, New Jersey. So far, there's NO word on how much of the barge's four-point-four-Million gallons of heating oil cargo spilled into the waterway.

The mayor of Beijing says Chinese officials are still investigating and prosecuting those involved in last year's pro-democracy movement. At a news conference today, the hard-line mayor vowed to suppress any further anti-government UNrest. He also dismissed complaints that Chinese were harasssed by police for contacts with foreign journalists.

#90066u2211 03/07/1990 ~United Press International
MOSCOW (MARCH 7) UPI - Foreign Minister Eduard Shevardnadze warned Wednesday that the failure of perestroika could unleash anarchy or lead to the seizure of power by a dictator.

In an interview with the weekly Ogonyok magazine, released before its Sunday publication date, Shevardnadze said President Mikhail Gorbachev must obtain strong powers to salvage his perestroika reform drive.

''The need for such power is also prompted by (ethnic) outbursts and the irreconciliability in inter-ethnic relations,'' Shevardnadze said. ''The Soviet Union needs a strong presidency endowed with considerable powers but leaning for support on democratic institutions.''

Shevardnadze's dramatic warning and plea for a strong chief executive was

released by the official Tass news agency five days before the Congress of People's Deputies meets to consider electing Gorbachev to a strengthened presidency.

''Clever people in the West understand the failure of perestroika would unleash the reign of anarchy in the country and that would lead to a complete disintegration of the state or, more feasibly, to a dicator usurping power,'' Shevardnadze said.

The same dangerous scenario could await East European countries or a unified Germany, he said.

The only safeguard is to speed the process of reaching agreement on security in Europe, ''but to do this the Soviet Union has to remain stable '' he said.

''The way out consists in strengthening democratic institutions in the Soviet Union and creating strong administrative and executive powers capable of defending democracy and perestroika,'' Shevardnadze said.

The presidential law to be debated by the 2,250-member Congress of People's Deputies beginning Monday would allow the chief executive to declare states of emergency in any part of the country, veto laws and dissolve parliament.

But the measure also limits the president to two five-year terms, forbids the president to send troops abroad without parliament's approval and provides for impeachment of a chief executive who violates the constitution.

Direct election by the people is also enshrined in the measure, but the first such president, certainly to be Gorbachev, would be chosen by the Congress.

By linking stability in the Soviet Union to that of Europe and the world, Shevardnadze implied that the entire world has a stake in perestroika and Gorbachev's future.

The Tass excerpts of his interview with the popular Ogonyok magazine began with Shevardndaze describing ''the Soviet Union as one of the pillars of the modern world's stability.''

Shevardnadze, one of the most astute political analysts in the leadership, countered the arguments of conservatives that Gorbachev has unleashed anarchy by saying only a strong Soviet leader can prevent chaos.

Shevardndadze, a member of the ruling Politburo, was selected in 1986 by Gorbachev to become foreign minister, replacing Andrei Gromyko who had run

foreign affairs for two decades.

Discarding almost every facet of Gromyko's polices that had earned the Soviet Union the reputation of the country of the diplomatic ''nyet,'' Shevardnadze has based Soviet diplomacy on conciliation and cooperation.

#90066u2229 03/07/1990 ~United Press International

HARRISBURG, PA (MARCH 7) UPI - A leak at the Three Mile Island nuclear power plant ended Wednesday after releasing minute quantities of radiation into the atmosphere for 28 hours, authorities said.

The breech released two-thousandths of a millirem of radiation into the atmosphere during the 28 hours, said Mary Wells, a spokeswoman for plant operator GPU Nuclear Corp. A person is typically exposed to one millirem of naturally occurring radiation each day, she said.

The leak was discovered in the No. 1 reactor Tuesday morning when operators attempted to restart the reactor following a two-month routine shutdown for maintenance.

The leak was traced to a steam generator, where primary water circulating inside the reactor core began leaking into secondary water, which powers the steam generator to make electricity.

Because of the radiation in the primary water, the two systems are supposed to be kept separate. Water was leaking from the primary system into the secondary system at under one gallon per minute.

''As of now, we're in cold shutdown. We got there early in the morning, and shortly after noon today the small release was completely halted,'' Wells said.

''We expect to have some equipment in place, hopefully tomorrow, to take a look at the steam generator and find where the leak is,'' she said.

Plant officials called Tuesday's shutdown a ''precautionary measure'' and no emergency condition existed.

Three Mile Island, located about 10 miles south of Harrisburg, was the site of the nation's worst nuclear accident in March 1979 when the Unit No. 2 reactor suffered a near meltdown. That reactor has been idle since.

#90066u2293 03/07/1990 ~United Press International

(MARCH 7) UPI - World oil prices nose-dived Wednesday in the wake of U.S.

gasoline supplies growing into what one well-known analyst called a pricing ''danger zone.''

Unleaded gasoline for April delivery fell 1.03 cents to 56.73 cents a gallon on the New York Mercantile Exchange. Unleaded gasoline dropped 0.95 cent to 55 cents a gallon on the New York Harbor cash market.

The standard-setting West Texas Intermediate crude ended the day on the Merc at $20.93 a barrel, down 37 cents, near what some analysts consider the next $20.90-a-barrel support level.

May delivery WTI slipped 31 cents to $21.17 a barrel and June contracts declined 23 cents to $21.29 a barrel on the Merc.

On the U.S. Gulf Coast cash market, WTI for prompt delivery dropped 33 cents to $20.95 a barrel.

Late Tuesday after the Merc closing, the oil industry's American Petroleum Institute reported the nation's gasoline inventories rose for the eighth week in a row. The rise of 1 million barrels brought supplies to 246.4 million barrels.

First Boston Corp. analyst William Randol has been warning in his ''Key Petroleum Refining Indicators'' weekly publication that ''above 245 million barrels is a danger zone.''

Randol explained Wednesday that ''if you want strong gasoline prices during the driving season, you want to get stocks below 220 million barrels before Memorial Day.

''In order to do that, you can't have stocks too high in early March. I've observed in past years that when you get above 245 million barrels in early March, it's difficult to get the stocks down to a level you want them.''

But this year could be an exception to ''Bill Randol's Rule of Thumb,'' the analyst said, because of the possibility more refiners than usual are conducting their annual maintenance ''turnarounds'' from heating oil to gasoline production this month.

''My sense is that there are more such refiners,'' Randol said. He said one independent refiner was estimating that March daily gasoline production would be 500,000 barrels below normal.

As gasoline supplies build and the demand for crude oil slackens with the onset of turnarounds, the markets recently have been exhibiting what is called ''a negative bias.''

''There's a lack of refiner buying of front-month crude,'' said Peter Beutel of Elders Futures Inc. in New York.

''The market continues to show weakness in nearby products and nearby crude,'' confirmed Randall Rothenberg of Dean Witter Reynolds' International Energy Futures Group.

The weakness also extended Wednesday to the posted price oil companies pay for crude at the wellhead.

Four companies - Sun Co., Radnor, Pa.; the Marathon Oil Co. subsidary of USX Corp. in Findlay, Ohio; the Conoco Inc. Houston unit of Du Pont and Citgo Petroleum Corp., Tulsa, Okla. - reduced their wellhead prices by 50 cents a barrel to $20 a barrel for WTI.

On the European spot market, Britain's widely traded North Sea Brent fell 27 cents to $18.88 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East shipped mainly to the Far East - lost 20 cents to $16.08 a barrel.

On the Merc, home heating oil fell 1.03 cents to 56.19 cents a gallon and 1.10 cents on the New York Harbor cash market to 58.60 cents a gallon.

-30- 3504

#90066u2298 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - The Senate, working its way through new clean air legislation, voted Wednesday to preserve states' rights to set more stringent limits on radioactive industrial emissions than those set by the federal government.

By voice vote, the Senate stripped out a so-called pre-emption section of the bill that would have eliminated the authority of the Environmental Protection Agency - and thus the states - to regulate radioactive emissions under the Clean Air Act. An earlier test vote was 61-36 against the pre-emption language.

By wiping out the EPA's regulatory authority, the provision also would have eliminated states' powers to set their own limits for radioactive pollution from nuclear power plants, uranium mines and other facilities using radioactive materials, such as hospitals and universities.

The pre-emption section, quietly inserted in the during Senate committee action last fall, would have given the Nuclear Regulatory Commission sole authority to regulate radioactive emissions under the federal Atomic Energy Act, which bars states from overseeing NRC-licensed facilities.

Opponents of pre-empting state controls questioned the NRC's vigilance on radioactive emissions and said the EPA and state authorities provided ''an important safeguard'' to ensure regulations were tough enough.

''If the NRC is not doing its job, then the EPA and the states will act to assure the public health is protected,'' said Sen. John Glenn, D-Ohio. ''States must be free to act to protect their citizens.''

Glenn said the NRC's rules on radioactive emissions were - for many types of nuclear facilities - 50 times weaker than existing EPA standards.

However, supporters of the pre-emption provision said that in the 13 years states have had regulatory authority over radioactive emissions, few have exercised those powers, indicating state officials feel the NRC is doing a good job.

''There is not an inkling of an argument that the NRC is not adoting rules that are stringent enough,'' said Sen. Bennett Johnston, D-La.

Johnston also maintained pre-emption was necessary because states would be increasingly tempted to misuse their regulatory powers to block unpopular nuclear projects.

''It is nothing less than a state veto of nuclear waste repositories and a state veto of nuclear power plants,'' he said.

In particular, Johnston cited efforts by Nevada officials to prevent the government from putting a nuclear waste dump in their state.

''Our friends in Nevada have made it perfectly clear they are going to use anything they can get their hands on to stop that nuclear waste repository '' he said.

More broadly, Senate Republican leader Robert Dole of Kansas said allowing states to retain regulatory authority over radioactive emissions would give anti-nuclear activists a potent weapon to attack the nuclear industry.

''It gives another opportunity to nuclear critics to shake their heads,'' said Dole.

#90066u2318 03/07/1990 ~United Press International

WASHINGTON (MARCH 7) UPI - A jury was seated Wednesday to hear the Iran-Contra trial of former national security adviser John Poindexter and a federal judge ruled that Oliver North would be the first to testify about his former boss.

It took only three days to seat the jury - seven women and five men - compared to the two weeks it took to select the panel for North's trial last year.

Several hours before the jury was empaneled by U.S. District Judge Harold Greene, he revealed that Poindexter's lawyers had filed two sealed motions involving North, the gung-ho Marine lieutenant colonel convicted of three charges in the scandal.

The first, which Greene denied, asked that North not be allowed to testify against Poindexter because North allegedly committed perjury during his own Iran-Contra case.

The second motion by Poindexter's lawyers sought to limit North's testimony about the November 1986 destruction of a secret 1985 presidential authorization explicitly describing the Iran initiative as an arms-for-hostages deal. Greene withheld a ruling on that issue.

Poindexter told Congress that he ripped up the presidential ''finding'' when the scandal became public because it would be politically embarrassing to Ronald Reagan.

Poindexter also seeks to limit North's testimony about a briefing of key congressmen that withheld key facts about covert aid to the Contra rebels in Nicaragua. The meeting is important because Poindexter is accused, among other things, of obstructing the congressional investigation of the scandal.

Greene said he would rule on those issues Thursday. The legal battle involves a dispute over whether North's knowledge on these key matters comes from Poindexter's testimony to Congress in the summer of 1987 - given under a grant of immunity, meaning it cannot be used against him at this trial.

Poindexter's lawyer, Richard Beckler, filed the motions under seal and objected to their public release. But The New York Times and The Washington Post quickly filed a joint motion asking Greene to unseal the Poindexter briefs, citing freedom of the press.

Late in the day, Greene ordered the motions ''unsealed forthwith,'' saying reporters had a right to them.

In the effort to block North's testimony, Poindexter's lawyer argued that ''the government'' - that is, special Iran-Contra prosecutors - had said North's testimony in his own defense was ''in some respects unreliable.''

During North's 1989 trial, associate special prosecutor John Keker accused North of lying about a cash box. North said it was bolted to his closet

floor and he emptied his pocket change into the box every night.

It eventually amounted to $15,000, including an insurance settlement, North testified at the time. North ultimately was convicted of obstructing a congressional inquiry, destroying government documents and accepting an illegal gift, a security fence for his home.

North said at his trial that he dipped into the $15,000 from the cash box to buy a car and a horse for his daughter, a notion that Keker ridiculed, arguing the money came from profits out of secret arm sales to Iran.

Yet except for the fence, North was acquitted on other charges he personally profited from his Iran-Contra dealings, and he has not been charged with lying during his trial.

Poindexter faces five felony charges, including accusations he obstructed congressional inquiries and made false statements to Congress.

A red pen in hand, Poindexter huddled with his lawyers at the judge's bench Wednesday to help ''strike'' jurors he did not like.

Opening statements were expected Thursday morning and North will then be sworn in to testify against Poindexter. There were indications his testimony would last several days.

Before sending the jurors home, Greene warned them to avoid all press accounts of the trial and to discuss the case with no one.

The jurors are a diverse group - two men served in the Army during Vietnam two men are pursuing higher education, one woman reads Gothic romance novels ''to escape'' and another woman asked the judge if she could read during the trial. She was told she could not.

Poindexter, who was Reagan's national security adviser, is accused of trying to thwart the congressional investigation of the administration's secret arms-for-hostages deals. Poindexter was North's boss on the National Security Council staff.

Poindexter, 53, is the highest-ranking administration official indicted in the scandal. He resigned his White House post in November 1986 when the scandal was exposed, and later retired from the Navy at the rank of rear admiral.

The scandal, which marred Reagan's second term, involved the secret sale of weapons to Iran in an effort to win freedom for U.S. hostages in Lebanon and the diversion of money from the weapons sales to aid the Contra rebels in Nicaragua. Congress had banned such military assistance at the time.

#90066u2332 03/07/1990 ~United Press International
GA-RANKUWA, SOUTH AFRICA (MARCH 7) UPI - Mobs in the troubled black homeland of Bophuthatswana went on a rampage of arson and looting Wednesday after police fired on thousands of residents demanding reincorporation into South Africa. Eight people were killed.

Bophuthatswana President Lucas Mangope declared a state of emergency in the eastern portions of the homeland where the unrest erupted, and South African Foreign Minister Roelof ''Pik'' Botha said South African security forces were providing ''cooperative assistance'' to their homeland counterparts.

Only South Africa recognizes Bophuthatswana as an independent nation and in 1988 South Africa deployed troops to reinstate Mangope after a military coup attempt.

Wednesday's violence of looting and arson - centered in Ga-Rankuwa, about 60 miles north of the South African capital of Pretoria - subsided by late afternoon, but boulders, rusted barrels and tree branches were left in the middle of roads and made them almost impassable. A burning delivery truck stood before a ransacked gasoline station near Ga-Rankuwa Hospital, which is just outside the boundaries of the homeland.

''Hey black man, kill your brother, kill your brother for their rights,'' one angry Bophuthatswana resident yelled at an armored personnel carrier carrying homeland security forces. ''Everything can happen from tomorrow. They can kill us all.''

The violence in the eastern portion of Bophuthatswana, which is divided into seven separate sections across northern and central South Africa, comes three days after a successful military coup in the coastal homeland of Ciskei deposed President-for-life Lennox Sebe.

Renewed unrest also has swept large sections of black communities within South Africa, with at least 40 people killed in internecine fighting during the last four days. Commenting on the violence, South African President Frederik de Klerk said the government was adament that ''real negotiation and change'' could only take place in an atmosphere of stability.

''We will not allow the country to fall into a state of anarchy or chaos and strong steps where necessary will be taken,'' de Klerk said during a photo session.

Lifting of the country's 44-month-old state of emergency in its entirety

is one of the African National Congress' conditions before power-sharing negotiations begin with the South African government. But de Klerk warned that the state of emergency was not ''a pawn in the negotiation process.''

''While (violence) prevails, we cannot lift the state of emergency. We need the additional powers ... to maintain the stability of the country,'' he said.

On the issue of Bophuthatswana, de Klerk said if necessary South Africa would deploy troops but in consultation with the homeland government. South African troops were stationed outside a South African bus company depot Wednesday in Bophuthatswana but no other South African forces were seen.

Demonstrations against Mangope and unrest in other South African black homelands and semi-autonomous regions have been on the rise since the Feb. 11 release of black nationalist leader Nelson Mandela. Bophuthatswana residents said after Wednesday's violence they wanted to become part of South African once more.

''We are not being paid the way we are supposed to be paid,'' said one resident, who declined to give his name. ''If we go back to South Africa, we will get extra pay. ... We have had enough. The way everything now is corrupt'' in Bophuthatswana.

South Africa's controversial homelands policy, which provided independence to Bophuthatswana in 1977, has stripped millions of blacks of South African citizenship since 1976 by placing them in four homelands.

Bophuthatswana is regarded as one of the wealthier homelands with its platinum mining industry, extravangant Sun City casino and entertainment complex and an internationally known game reserve.

Wednesday's violence began after more than 20,000 residents marched from Mabopane to Ga-Rankuwa less than 10 miles away to protest high rent and utility bills and to demand reincorporation into South Africa. Residents in the two towns and surrounding communities stayed away from their businesses, schools and government offices as part of their protest.

Residents said the march was progressing peacefully when Bophuthatswana security forces opened fire with tear gas, rubber bullets and live ammunition without warning. Mobs then rampaged through Ga-Rankuwa looting and burning, residents said.

Hospital officials confirmed eight people, including one member of the Bophuthatswana security force, were killed and about 400 wounded.

From a helicopter earlier Wednesday, Alan Matthews, a reporter for the independent Radio 702, reported black smoke rising as mobs rampaged,

burning shops and government offices.

WASHINGTON (MARCH 7) UPI - John Dunne, President Bush's nominee to head the Justice Department's Civil Rights Division, told a Senate panel Wednesday he regretted his longtime membership in two male-only social clubs but said ''on balance'' he has a good record.

Dunne, 60, a former 23-year Republican New York state senator and lawyer from Garden City, N.Y., also pleaded ignorance during his confirmation hearing before the Senate Judiciary Committee about $20,000 worth of stock he owned in companies doing business in South Africa. He explained that the stock was purchased by his brother, a stockbroker.

When asked by Sen. Howard Metzenbaum, D-Ohio, if he would have made a different decision today on joining a male-only club, Dunne replied, ''I believe I would have.''

Dunne admitted he joined the clubs ''perhaps for my own selfish comfort, maybe for my own self-advancement'' but said ''on balance'' he was

''someone who is sensitive to the needs of women as well as any other group.''

''Regardless of how I vote, you're going to be confirmed,'' said Metzenbaum, Dunne's harshest critic on the panel. ''I don't think we're going to get anybody better'' nominated by Bush if Dunne is rejected.

Prodded by Democratic senators who told him they wanted ''a charger'' in the administration's top civil rights post, Dunne vowed that if confirmed he would be a strong champion for civil rights.

''I want to be a forceful advocate,'' Dunne said.

He said that despite his age, ''I still have the commitment, the energy and the sense of justice ... that this job demands.''

A vote on Dunne's nomination is expected later this month and the Yale Law School graduate is expected to be confirmed.

Spurred last year by opposition from civil rights groups, the Senate Judiciary Committee rejected by a 7-7 vote Bush's nomination of William Lucas to head the Civil Rights Division.

NAACP Executive Director Benjamin Hooks released a statement saying the nation's largest civil rights group is ''concerned at (Dunne's) lack of experience in civil rights.''

''However, our investigation leads us to believe that he does approach the position ... with a degree of sensitivity toward basic social issues,'' Hooks said. ''In light of this, we will neither endorse or oppose his nomination at this point.''

#90066u2440 03/07/1990 ~United Press International

BOSTON (MARCH 8) UPI - Bank of New England Corp., after a week's delay, won agreement from former Bank of Boston executive Lawrence Fish to become the struggling company's chairman, a source familiar with the deal said Wednesday.

Fish, whose appointment was expected to be announced Thursday or Friday, will likely preside over the dismantling of much of the troubled, four-state holding company as it struggles to shrink and shore up its capital base.

Federal regulators, who recently issued orders that give them an active role in the operation of the bank, gave uncharacteristically prompt approval of the appointment, the source said.

The company reportedly was ready to name him to the post as early as last week, but Fish himself said then that there were still things to be worked out.

Fish, 45, came up through the ranks of Bank of Boston's foreign operations in Brazil, Japan and Hong Kong.

Some analysts worried he may not have the kind of experience needed to solve the company's critical real estate problems and halt the rapid erosion of its capital base. Also, they expressed concern that Fish has little or no experience in working out bad real estate loans, Bank of New England's biggest problem, or in turning around troubled institutions.

''I think he's a builder, not a turnaround guy,'' said one analyst who did not want to be named.

Another analyst, Gerard Cassidy of Tucker, Anthony, said, ''The one area that he falls short in is the area of turning banks around. The key question for him is does he have the ability to turn this around. His background is not heavily in the commercial real estate area, where the bank's problems are concentrated.

''He obviously has experience in managing large numbers of people, but you wonder if the bank would be better off in hiring someone who has experience in working out real estate loans. He's going to have to surround himself with experienced people.''

Fish would replace H. Ridgely Bullock, who was named interim chairman in January on the dismissal of Walter J. Connolly Jr., the man regarded as the architect of the company's fast growth and subsequent enormous losses. Last month, the company reported a $1.23 billion loss for 1989 that threatens its survival.

After about four years as head of Bank of Boston's New England group, Fish left the company after his path to the top position apparently was blocked by the appointment of a new chairman there. Later, he spent 17 months as the No. 2 man at Columbia Savings and Loan Association of Beverly Hills, Calif., which was troubled by a huge investment in junk bonds. He left that job in August after he and the institution said he had succeeded in helping trim its junk-bond portfolio.

#90066u2441 03/07/1990 ~United Press International

(MARCH 7) UPI - Former White House aide Oliver North will take the witness stand in the Iran-Contra trial of his ex-boss John Poindexter. Federal Judge Harold Green revealed Poindexter's lawyers filed sealed

motions asking that North be barred from testifying because he allegedly committed perjury at his own trial. North was convicted last year on some charges in the Iran-Contra scandal... but perjury was NOT one of them. Poindexter is accused of five felony charges...including accusations he made false statements to Congress.

Officials and witnesses say at least two people were killed in a subway train derailment today in Philadelphia. At least 102 people were injured... three of them critically... in the accident in a tunnel just west of the busy 30th Street station. Police say two passengers are still trapped in the train, and authorities have NOT been able to communicate with them. The accident occurred during the morning rush hour.

The White House says ''available evidence suggests'' that Libya is making chemical weapons. Spokesman Marlin Fitzwater says the Bush administration is ''very seriously concerned'' and says ''vigoruous efforts'' are needed to stop the operation. Fitzwater declined to say what the ''vigorous efforts'' might involve, but would NOT rule out the possibility of a military strike. He says Washington wants to cut off the supply of chemicals to Libya, which it considers a terrorist state.

Italian Prime Minister Giulio Andreotti is urging the United States to keep its soldiers in Europe to support peace and stability. The Italian leader told Congress that a new relationship among the United States, its allies, Eastern Europe, and the Soviet Union must first deal with the issue of security. Andreotti says the United States can play an important role in Central Europe and in bringing the Soviet Union into the community of democratic nations.

Two U-S Army sergeants are among 20 people indicted on cocaine conspiracy charges in Miami. U-S Attorney Dexter Lehtinen says there's NO direct link between the indictments and the U-S invasion of Panama in December... but one of the sergeants did serve in Panama. He was arrested in October and has since co-ooperated with federal investigators. Lehtinen says the group helped funnel cocaine from Colombia to Florida, through Panama.

#90066u2603 03/07/1990 ~United Press International

LOS ANGELES (MARCH 8) UPI - Jefferies Group Inc., planning to expand its activities in the taxable fixed-income and capital markets areas, said Tuesday it has hired two former Drexel Burnham Lambert employees who specialized in those areas.

Jefferies Group said Jess Ravich will be responsible for trading and Marc Rapaport will concentrate on capital markets.

Also, Jefferies Group said it is holding discussions with other former Drexel employees about joining the company and hopes to add five or 10 additional professionals, as well as some support personnel.

Drexel collapsed last month and filed for bankruptcy protection from creditors.

Jefferies Group's founder, Boyd Jefferies, was sentenced last year to five years probation and fined $250,000 for two securities fraud counts he pleaded guilty to in 1987. He is forbidden to have any business dealings with the firm.

#90066u2642 03/07/1990 ~United Press International

SEATTLE (MARCH 8) UPI - A judge ruled Wednesday that Nordstrom Inc. must warn its employees that participation in a company-instituted claims process for back pay could adversely affect any money they might receive from a class-action lawsuit brought against Nordstrom by a Seattle-area union.

Last week, the United Food and Commercial Workers union sued Nordstrom on behalf of approximately 50,000 current and former employees nationwide, charging that Nordstrom's practice of allowing employees to perform duties ''off the clock'' may have cost them millions of dollars in lost pay.

The suit seeks back pay for the employees, as well as damages and penalties arising from any proven violations of labor laws in the states where Nordstrom has operations.

The company, anticipating the union lawsuit, instituted a $15 million

reserve fund and a claims process that allows employees to be paid in lump sums of up to $1,000, with the amount to be determined by length of employment.

The union said that many of the back pay claims it has seen far surpass that amount and that employees owed money could wind up getting as little as 10 cents on the dollar.

When the company sent letters explaining the claims process, it didn't discuss the pending union lawsuit. The UFCW claimed the omission could lead employees to sign waivers that might preclude them from receiving any money resulting from a settlement or victory in the lawsuit.

The union asked King County Superior Court Judge Joan Dubuque to halt the claims process. Dubuque refused, but she said Wednesday the company must send another letter to employees clearly explaining that Nordstrom is the target of a class action and that claims made under the company program could affect any future award resulting from the suit.

Nordstrom officials were not immediately available for comment. UFCW Local 1001 President Joe Peterson, however, said: ''We are extremely pleased that the court has ordered Nordstrom to apprise its employees of their rights.''

The union said that it has received claims from employees worth $3.4 million and that Nordstrom's liabilities could climb to as high as $300 million if statutory penalties are factored in.

The union filed suit against Nordstrom on behalf of all current and former employees, even though it represents only about 2,000 Nordstrom workers in the Seattle metropolitan area. Most of the company's 30,000 employees do not have union representation.

Nordstrom also was hit recently with a shareholders' lawsuit that claims top company officers knew its pay policies could adversely affect its earnings, but failed to tell the general public. That suit seeks unspecified damages on behalf of all Nordstrom shareholders.

-30- 2971

#90066u2645 03/07/1990 ~United Press International

(MARCH 7) UPI - Pakistani authorities have taken Afghan Defense Minister Shah Nawaz Tanai into custody. Tanai, his family and several aides landed in Pakistan today in an apparent defection. The Soviet-backed Afghan government says it has effectively crushed Tanai's coup attempt... but United Nations officials say fighting rages on.

Rescue crews have now pulled all the passengers from a subway train that

derailed this morning in Philadelphia. Officials say at least two people were killed, including a woman who was trapped in the train for two hours. 103 people were hurt in the accident... one of the worst in the city's history.

White House spokesman Marlin Fitzwater says the United States is working with its allies to try to cut off the flow of chemicals in Libya. Libya denies U-S media reports that say it's operating a plant to produce chemical weapons. Libyan officials say the plant produces pharmaceuticals.

Representative Richard Gephardt wants the United States to give aid to the Soviet Union to support the move toward democracy, but the Bush administration is rejecting the idea. The White House says the Soviets have indicated they DON'T want direct support. Another administration official says the time is NOT right for such aid.

Jury selection in John Poindexter's Iran-Contra trial apparently is almost complete. 45 qualified jurors have been picked, and the judge in the case says a jury will be selected this afternoon. Earlier, U-S District Judge Harold Greene rejected a defense motion and ruled that Oliver North would be the first witness.

-30- 1756

#90066u2668 03/07/1990 ~United Press International

TORONTO (MARCH 8) UPI - Denison Mines Ltd. announced Wednesday it will lay off 450 miners, representing 28 percent of the work force at the company's Elliot Lake, Ontario, uranium mine, by August.

The move is aimed at protecting Denison's remaining operations, the company said.

''The inescapable reality all of us must accept is that the Elliot Lake orebody is very low grade,'' Jake Fowler, president and chief operating officer, said in a statement.

Fowler also said weak uranium prices were not expected to rebound in the immediate future and can't support current production levels.

About 30 percent of the uranium Denison produces at Elliot Lake, located 400 miles north of Toronto, goes to fuel nuclear power stations operated by Ontario Hydro. Denison's contract with the utility runs until 2012.

The rest of Denison's output is sold to Tokyo Electric Power Co. under a contract due to expire in 1997.

Fowler said the layoffs were necessary to protect the jobs of the remaining 1,090 workers.

In January, Rio Algom Ltd. said it would close two of its three Elliot Lake mines in 1991, throwing 1,600 people out of work, if the company can't secure new contracts.

Denison's operations include uranium, coal and potash mines in Canada and oil and gas developments in Canada, the United States and several other countries.

#90066u2705 03/07/1990 ~United Press International

(MARCH 7) UPI - The Colombian military says it has captured units from two leftist guerrilla groups in three large cities. The arrests deal a blow to rebel plans to disrupt Sunday's congressional elections. Among the rebels arrested were members of Colombia's major labor unions. But military officials say they doN'T suspect union connections to terrorism.

Rescue officials in Peru are searching the turbulent waters of the Amazon River for about 80 people missing and believed drowned. A passenger boat with 220 people on board lost control and crashed into an anchored ship. 140 people swam to safety or were helped by other boats. Officials have recovered one body and hold little hope of survivors.

Israeli Prime Minister Shamir has adjourned a meeting of the Inner Cabinet without voting on a U-S peace proposal. Shamir delayed until Sunday a vote on the proposal to form a Palestinian delegation for peace talks in Cairo. Cabinet ministers from the Labor Party will meet Monday to discuss leaving the government if the cabinet rejects the proposal.

Officials in Barstow, Florida, say a man has been arrested after allegedly posing as a doctor and asking female clerks at a convenience store to bend over so he could give them vitamin B-12 shots. Hurtis Proctor is charged with practicing medicine without a license. The shots were given to three clerks last month.

It's called a ''She-inal,'' and inventor Kathie Jones says she thinks women who use public restrooms will be ''very excited'' about it. The urinal for women is manufactured by Jones's firm, Urinette Incorporated, of Pensacola, Florida. The first production model will be installed at a regional airport next month.

#90066u2714 03/07/1990 ~United Press International

TORONTO (MARCH 8) UPI - Brascan Ltd. reported Wednesday fourth-quarter earnings of $54.4 million, or 55 cents a share, down 6 percent from $57.8 million, or 61 cents a share, in the 1988 quarter.

Revenues increased to $2.1 billion from $1.65 billion in the year-ago quarter.

Brascan's year-end earnings rose to $235.9 million, or $2.44 a share, from $220.8 million, or $2.31 a share, in 1988. Revenues jumped to $8.08 billion from $7.2 billion.

Brascan said earnings from its natural resources and consumer products divisions declined while income from financial services, other operations and investments increased.

Corporate developments in 1989 included the sale of its investment in Scott Paper for $200 million, the acquisition of a 50 percent stake in nickel producer Falconbridge Ltd. for $873.6 million and the takeover of Seattle-based Pacific First Financial Corp. for $212 million.

Brascan, a diversified company whose subsidiaries include mining company Noranda Inc., brewer John Labatt Ltd. and Trilon Financial Corp., said it expects lower earnings in 1990.

-30- 1272

#90066u3063 03/07/1990 ~United Press International

(MARCH 7) UPI - Libya denies allegations that it's producing chemical weapons.

The Libyan news agency Jana quoted a source at the Libyan foreign ministry as saying the allegations were made ''in order to create doubt about the harmony'' in the Arab community.

The White House says ''the available evidence suggests'' that Libya is producing chemical weapons. And spokesman Marlin Fitzwater says ''vigorous efforts'' are needed to stop such production.

Fitzwater declined to say exactly what those efforts might involve... but he refused to rule out a possible military strike.

He says Washington has been in contact with its allies and wants to shut off the supply of chemicals to Libya.

Libya's alleged production of chemical weapons drew world-wide attention in 1988 when the C-I-A said Tripoli was building such a plant. Libya said then that the plant was for pharmaceuticals. It repeated that claim today.

The American Medical Association today joined the call for employers to provide health insurance for all workers.

The A-M-A plan also calls for expanded Medicaid coverage for the poor. The plan was announced today in Washington, and officials say the expanded Medicaid coverage would cost state and federal governments some 30-BILLION dollars.

A-M-A officials declined to estimate the costs of employers' providing health insurance... saying simply that the plan would require new taxes. A-M-A spokesman Dr. James Todd says he's concerned that the need for coverage will be overshadowed by an emphasis on costs.

Todd says the A-M-A is approaching the situation- quote- ''from the point of view of what it is that Americans should have for access to health care.''

The A-M-A plan follows last week's recommendations by the bipartisan Pepper Commission. That panel called for a slightly different form of insurance provided by employers... combined with an expanded public program.

-30- 2104

#90066u3093 03/07/1990 ~United Press International

(MARCH 7) UPI - A federal judge has given the go-ahead to let Oliver North be the first witness at the Iran-Contra trial of North's former boss John Poindexter.

U-S District Judge Harold Greene rejected a motion by the defense to have North's testimony barred. The sealed motion by the defense charged North's testimony would be unreliable because of alleged perjury at his own trial.

Greene revealed that Poindexter's attorneys filed a second sealed motion... seeking to limit North's testimony. Greene plans to hold a hearing on that issue later today.

Full details of the motions are NOT clear because they were filed under seal and kept secret.

The judge also announced that a jury would be chosen after lunch today from a pool of 45 approved potential jurors. 12 jurors and six alternates will be chosen from the pool after further questioning from lawyers.

Opening statements are expected tomorrow morning... then North will then be sworn in to testify against Poindexter.

Hopes were raised today for the possible release of Western hostages in Lebanon, but a statement issued later by a terrorist group dimmed expectations.

The group called Justice Organization holds two Americans, and it says it has NO intention of releasing them without- quote- ''a positive atmosphere.''

In a statement sent to the office of a leading Beirut newspaper , the group hinted the hostages would be released only as a result of diplomatic activity.

The group also warned the United States against resorting to what it termed ''the difficult option'' of military force.

Earlier today, the official Iranian news agency quoted Iranian President Rafsanjani as saying the hostage issue ''is going to be solved.''

And in the Syrian capital of Damascus, a Hezbollah Council member hinted that the 18 Western hostages might be released soon.

-30- 2040

#90066u3191 03/07/1990 ~United Press International

(MARCH 7) UPI - Two U-S Army sergeants have been indicted for allegedly shipping cocaine to the United States through the army mail to avoid customs agents.

A Fort Lauderdale, Florida, federal grand jury indicted the sergeants and 18 other people on charges stemming from a smuggling ring that shipped cocaine from Panama to the United States in duffel bags.

U-S Attorney Dexter Lehtinen says there's NO evidence linking soldiers sent to Panama for the December 20th invasion to the drug smuggling ring. He also says there's NO evidence linking the recent bombing of a Panama City night club to drug smuggling.

Both sergeants charged in the case were stationed in Panama before additional U-S troops were sent in. Both men will be tried in federal court in Miami before being turned over to the Army for court-martial.

Nine Colombians are in custody in Miami and one Panamanian is being held in his homeland. The other defendants are fugitives.

Colorado is trying to get back on its feet today after a blizzard crippled Denver and closed airports and schools.

Two main runways are open now at Denver's Stapleton International Airport, where several hundred stranded commuters spent the night. But most schools are closed.

The storm pushed east this morning, coating much of Iowa with a glaze of

ice. State troopers complained it was hard for people to stand... let alone keep sanding trucks on the streets. Insterstate 35 has been re-opened since the ice has melted.

Many commuters in Denver never made it home last night... sleeping instead in hotels, churches, offices, schools or bars.

One suburban bar owner marveled at how people who could NOT make it home or to work could still navigate their way to a bar.

Yesterday's storm packed 40-mile-an-hour winds, and dumped about a foot of snow in Denver and up to 50 inches of snow in the mountains.

#90066u3258 03/07/1990 ~United Press International

(MARCH 7) UPI - It's the worst transit accident in Philadelphia's history. Officials say a six-car subway train derailed near a busy station during rush hour this morning, killing three people and injuring 152 others. Four are in critical condition.

A self-confessed member of a South African police death squad testified that he and three accomplices killed a black human rights lawyer in 1981 on instructions from senior police officers. The testimony came before a commission that's probing alleged political killings.

The Coast Guard says most of the 100-thousand gallons of oil spilled yesterday in the waters between Staten Island and New Jersey has been contained by booms. The spill occurred when an explosion and fire nearly blew an oil barge in half.

About 100-thousand babies are exposed to cocaine in the womb each year... and federal officials say the cost of providing hospital and foster care for those children up to age five will reach five-BILLION dollars annually.

Anti-apartheid leader Nelson Mandela told crowds in Tanzania he has an ''atomic bomb'' of peaceful change for South Africa in his heart. Tanzania's government has long supported Mandela's struggle.

Denmark, Sweden and Norway are virgorously complaining about Britain's decision to keep dumping sewage into the North Sea until 1998. As part of an effort to clean up the polluted sea, Britain had agreed to stop dumping in 1995.

The producers of ''Miss Saigon'' plan to charge an un-heard-of 100-dollar ticket price when the show opens on Broadway next March. A report says the price for Mezzanine seats will be 40-dollars more than other shows' top-price seats.

11-year-old girl Jennifer Ann Hawkins of West Palm Beach, Florida, found a purse with 200-thousand dollars in jewelry and returned it to the owner. Betty Shepard of Holland, Michigan... who didN'T realize her purse was missing... gave Hawkins a 100-dollar reward.

#90066u3576 03/07/1990 ~United Press International

(MARCH 7) UPI - A jury has been picked for John Poindexter's Iran-Contra trial, and opening statements are to begin tomorrow in federal court in Washington. The first witness to testify will be Oliver North, who has already been convicted in the scandal. Poindexter's lawyers asked that North NOT be allowed to testify because he allegedly committed perjury during his own trial last year. U-S District Judge Harold Greene denied the motion.

Philadelphia officials say the cause of today's subway train derailment apparently was a motor that dropped down from under one of the cars and dragged along the tracks. The derailment killed three people and injured 152... four of them critically. The fourth car of the six-car train was nearly cut in half by the impact. Philadelphia's transit chief says it's ''clearly the worst'' such accident in the city's history.

Afghanistan's defense minister is in Pakistan in an apparent effort to defect following a failed coup attempt against President Najibullah. Pakistani sources say a helicopter carrying Defense Minister Shah Nawaz Tanai, his family and 11 other people landed in Pakistan today. They were taken into custody.

Nicaragua's Contra rebels say that as a first step toward disbanding they will retire to enclaves inside Nicaragua... if the Sandinista army returns to its barracks. Most Contras stay in camps in Honduras near the Nicaraguan border. The offer was made during talks between the rebels and representatives of President-elect Violeta Chamorro's government.

#90066u3584 03/07/1990 ~United Press International

(MARCH 7) UPI - Health and Human Services Secretary Louis Sullivan has announced the first major government effort to improve food labeling in 17 years. Sullivan promised his office will be proposing rules to require nutritional information on all food... establish uniform serving sizes and standardizing currently unregulated descriptions like ''low fat'' and ''high fiber.''

The House has failed to override President Bush's veto of a bill to create a commission for settling the Eastern Airlines strike. In a mostly

party-line vote, Republicans blocked the over-ride attempt in a 261-tothirds majority. Opponents say the commission would interfere with bankruptcy proceedings.

#90066u3942 03/07/1990 ~United Press International

(MARCH 7) UPI - A federal judge in Washington today ruled that Oliver North will be the first witness in the Iran-Contra trial of former national security adviser John Poindexter. The selection of the jury was completed today after just three days. U-S District Judge Harold Greene denied a motion by Poindexter's lawyers to keep North from testifying. But Greene will begin a hearing tomorrow to consider limiting North's testimony.

A priest who saw the scene of today's subway accident in Philadelphia says it looked- in his words- like ''being in a tunnel in your very worst nightmares.'' Authorities say three people died and 152 were injured after the train derailed during rush hour. Some victims were crushed by the wreck. Transit officials say the train went off the tracks when a motor beneath one car dropped off and dragged along the tracks.

Libya says it's just making medicine, but the White House says ''the available evidence suggests'' Libya is producing chemical weapons. News Secretary Marlin Fitzwater says the United States has been in contact with its allies to co-ordinate unspecified ''vigorous efforts to stop the operation.'' Fitzwater says it's NOT clear where Libya's getting the ingredient chemicals. Libya says the plant makes pharmaceuticals.

Italian Prime Minister Andreotti told members of the U-S House and Senate today that the United States still has an important role to play in a changing Europe. Andreotti says U-S troops should remain in Europe for security reasons. But he said the best guarentee of security would be the success of democracy in Eastern Europe.

#90066u4231 03/07/1990 ~United Press International

(MARCH 7) UPI - A federal judge in Washington, D-C, has cleared the way for testimony to begin tomorrow in the Iran-Contra trial of former national security adviser John Poindexter. The first witness to take the stand will be Oliver North. But the judge must first rule on a defense motion to limit parts of North's testimony. A jury of seven women and five men was chosen today to hear the case.

Prosecutors in Anchorage, Alaska, rested their case today in the trial of former Exxon Valdez Captain Joseph Hazelwood. A prosecution alcohol expert told the court Hazelwood's blood alcohol level was probably above the

legal limit when his tanker hit a reef and spilled 11-Million gallons of oil. The only test conducted on Hazelwood found him to be below the state limits on blood alcohol level... but that was taken 11 hours after the accident.

The Bush administration warns there is evidence that Libya is producing chemical weapons. Spokesman Marlin Fitzwater says the United States must take ''vigorous efforts to stop the operation.'' He would NOT describe what President Bush might do, but refused to rule out a military strike. News reports have quoted U-S sources saying Libya has resumed making poison gas at its Rabta plant.

The death toll stands at three in Philadelphia's worst-ever subway train crash. 152 other people were injured. Four are in critical condition in hospitals, and one man is in guarded condition with a spinal column injury. Transporation officials say the morning rush-hour train was packed with commuters when an engine dropped and dragged on the tracks... causing the train to derail.

-30- 1797
#90066u4277 03/07/1990 ~United Press International
(MARCH 7) UPI - The House failed today to override a presidential veto of a bill that would've created a special commission to try to bring an end to the strike against Eastern Airlines. Opponents of the commission said it would hurt the airline's attempts to reorganize and emerge from bankruptcy. Most Democrats voted for the bill for a 261-160 majority, but that fell short of the two-thirds needed to override the veto.

Eight people are reported dead following riots today in the eastern portions of the South African black homeland of Bophuthatswana . More than 20-thousand residents marched to protest high rent and utility bills and to demand re-incorporation into South Africa. Residents say security forces opened fire with rubber bullets and live ammunition. Mobs then looted and burned shops and government offices. The president of the homeland has declared a state of emergency.

The Afghan defense minister who launched a coup attempt against Soviet-backed President Najibullah reportedly arrived in Pakistan today. Some sources in Pakistan say Shah Nawaz Tanai flew by helicopter to Pakistan with his family to defect and was taken into custody. Other sources say he conferred with rebel leaders in Pakistan and then returned to Afghanistan.

A lawyer for William Hurt told a New York appellate court today the actor never had a common-law marriage with Sandra Jennings and took legal action to be sure he would never be her ''accidental'' husband. Jennings lost a palimony suit last summer against the star of the film ''The Accidental

Tourist.'' The former ballerina is appealing the decision because she says she and her son Alex are living in ''poverty'' on the 65-thousand-dollar annual child support payments Hurt makes.

#90066u4460 03/07/1990 ~United Press International

(MARCH 7) UPI - From Washington to Philadelphia to Miami... from Nicaragua to the Soviet Union... U-P-I has the latest news details and developments from across the nation and around the world.

Health and Human Services Secretary Sullivan announced plans in Washington today to improve food labeling so consumers have a better idea of what they're eating.

Sullivan said the labels will be made more consistent. He called the current assortment of food labels a ''Tower of Babel.''

Sullivan said the Food and Drug Administration will propose requiring the listing of fiber, cholesterol, saturated fat, and calories from fat.

Other changes include establishing uniform serving sizes, and standardizing descriptions like ''low fat'' and ''high fiber.''

Currently, the F-D-A requires nutrition labeling only when a food company adds vitamins, minerals or protein or makes a nutritional claim. About 60 percent of all packaged foods bear nutrition labels. Most are provided voluntarily by manufacturers.

The Grocery Manufacturers of America says the labeling effort ''is on the right track,'' but warns any new rules must apply uniformly.

The Center for Science in the Public Interest called for a deadline for the changes to take place, noting the F-D-A first proposed many of the same steps 10 years ago.

Three people are dead and four more are in critical condition in the wake of Philadelphia's worst-ever subway crash. 152 people were injured and it took four-and-a-half hours to dig them all out of the wreckage.

A packed six-car train was pulling out of the busy 30th Street station and picking up speed during rush hour this morning when a motor apparently dropped and dragged on the tracks... causing the train to derail and crash.

Officials immediately cut power to the tracks... plunging the cars into darkness and confusion and trapping people in twisted metal wreckage. A priest who visited the scene compared it to being- quote- ''in your very worst nightmare.

The injured, including six children, were taken to nine hospitals. Most of those hospitalized received minor cuts and bruises or broken legs.

-30- 2324

#90066u4480 03/07/1990 ~United Press International

(MARCH 7) UPI - Two U-S Army sergeants were indicted in Florida today on charges that they worked with a ring that shipped cocaine from Panama to the United States through the Army's mail system.

18 others were also indicted. Prosecutors say none of the soldiers sent to Panama in the December invasion were involved. The two sergeants were stationed in Panama before the invasion.

A federal grand jury in Fort Lauderdale indicted Sergeant Raphiel Fultz, who's in custody in Miami... and Sergeant Jarvis Earl Worelds, who was arrested in Fort Ord, California.

U-S Attorney Dexter Lehtinen said both men will be tried in federal court in Miami before being turned over to the Army for court-martial.

Nine Colombians and one Panamanian are in custody. The other defendants are fugitives.

A jury has been selected for the Iran-Contra trial of former national security adviser John Poindexter... and the first witness jurors will hear will be Oliver North.

U-S District Judge Harold Greene in Washington denied a motion by Poindexter's lawyers to keep North from testifying.

But Greene will rule tomorrow on another defense motion to limit North's testimony. Poindexter's lawyers want to limit testimony about the destruction of a secret 1985 presidential authorization describing the Iran initiative as an arms-for-hostages deal.

Poindexter told Congress that he ripped up the presidential ''finding'' because it would be politically embarrassing to then-President Reagan.

Poindexter also seeks to limit North's testimony about a briefing of congressmen that withheld key facts about secret aid to the Contra rebels in Nicaragua. Poindexter is accused of obstructing the congressional investigation of the scandal.

North, a former Marine lieutenant colonel, was convicted of three charges in the scandal.

-30- 2011
#90066u4499 03/07/1990 ~United Press International
(MARCH 7) UPI - The Soviet Union's foreign minister says if Soviet lawmakers don't give Mikhail Gorbachev more presidential power, Gorbachev might be forced out and replaced by a dictator.

Foreign Minister Shevardnadze says Gorbachev must obtain strong powers to salvage his perestroika reform drive.

In a magazine interview released by the Soviet news agency Tass, Shevardnadze claims ethnic unrest shows anarchy could break out if the president is NOT given greater authority. But the foreign minister maintains Gorbachev would get his support from democratic institutions.

Those statements come five days before the Congress of People's Deputies meets to consider electing Gorbachev to a strengthened presidency.

Shevardnadze warned anarchy or dictatorship could also await East European countries or a unified Germany if the Soviet Union loses stability.

The Nicaraguan Contras are offering a compromise to the Sandinistas. The Contras aren't offering to disband yet... but they say they'll return to enclaves in Nicaragua from their foreign bases if the Sandinista army returns to its barracks.

Both the Sandinistas and the incoming government of President-elect Chamorro have asked the Contras to disband immediately. But the Contras say they won't lay down their weapons until Chamorro's in power and the Sandinistas NO longer control the army.

The Contras made their offer today in Honduras in negotiations with Chamorro's representatives.

They're offering to retire to barracks near the Honduran and Costa Rican borders and they will allow themselves to be monitored by the United Nations and the Organization of American States.

-30- 1840
#90066u4515 03/07/1990 ~United Press International
(MARCH 7) UPI - The Coast Guard says yesterday's explosion of a barge in the Arthur Kill Waterway between New Jersey and Staten Island spilled about 100-thousand gallons of home heating oil into the water.

The Coast Guard describes the figure as an educated guess because it's NOT clear how much oil burned off in the fire yesterday. It's the second oil spill in the area in a week.

Most of the oil was contained by booms, and 56-thousand gallons had been recovered by late afternoon. Environmentally sensitive areas... including a bird sanctuary on nearby Prall's Island... also were ringed with booms.

The barge was carrying four-point-four-Million gallons of oil from a Citgo Petroleum Corporation terminal in Linden, New Jersey, to Boston when it was hit by two explosions yesterday.

New Jersey Governor Jim Florio says he's sick of coming out to look at oil spills in the Arthur Kill.

Greyhound officials declared today that they won't resume talks with striking workers because the union is NOT ready to change its demands.

Greyhound chief negotiator Anthony Lannie says union president Edward Strait requested an ''off-the-record'' meeting with company negotiators. But Lannie said Strait made NO new proposals. Lannie says Strait- quote- ''engaged in a rambling conversation that was nothing more than a rehash of issues discussed at the negotiating table.''

The Dallas-based bus company has court orders in at least 11 cities, including Los Angeles, Chicago and Philadelphia, limiting the activities of pickets at terminals and bus yards after several violent incidents. Greyhound says it's operating at 31 percent capacity.

About 300 mourners marched in Redding, California, today to remember Robert Waterhouse... who was smashed against a wall by a bus driven by a replacement driver. His widow, Dorie, led the march. Robertson had planned to retire in June after 32 years with Greyhound.

#90066u4657 03/07/1990 ~United Press International

(MARCH 7) UPI - Mixed messages today about the fates of the American hostages in Lebanon. Iran's president is quoted by his nation's news agency as saying the issue of the hostages held by pro-Iranian radicals ''is going to be solved.'' The White House says it's encouraged by the remarks.

But in a statement to a Beirut newspaper, a terrorist group holding two U-S hostages says it had NO intention of releasing its captives without ''a positive atmosphere.'' The Justice Organization also charged the United States was mounting a military operation to free the hostages.

Members of Congress are pressing for passage of a resolution calling on President Bush to appoint a special envoy to negotiate the release of Americans held captive in Lebanon. Lawmakers say the administration should

take advantage of reports of the hosatges' ''imminent'' release.

A jury has been seated and opening arguments are to begin tomorrow in the Iran-Contra trial of John Poindexter in Washington, D-C. Oliver North will be the first to take the stand, but the federal judge hearing the case says he'll rule tomorrow on defense motions to limit North's testimony.

Federal experts arrived in Crested Butte, Colorado, today to determine the cause of yesterday's deadly explosion that leveled a two-story brick bank. Speculation centered on the possibility the blast was caused by a bomb, but methane gas from abandoned coal mines is another likely cause.

The same winter storm that socked the Rockies yesterday moved eastward today, dumping heavy snows from the South Dakota Blackhills to the Nebraska Panhandle. Lighter snow fell in parts of Wyoming and Colorado while freezing rain stung Minnesota, Iowa and Wisconsin.

-30- 1888

#90066u4791 03/07/1990 ~United Press International

(MARCH 7) UPI - The lawmaker who prompted the investigation into Georgia Congressman Newt Gingrich says the House Ethics Committee today ''admonished'' the Republican Whip for failing to disclose a real estate deal with his daughter. The allegation is one of 20 raised against Gingrich by Arkansas Democrat Bill Alexander. NO word on what action the panel has taken on the other charges. Ironically, Gingrich was the force behind the ethic charges that forced former House Speaker Jim Wright from Congress last year.

Department of Health and Human Services Secretary Sullivan says vital information is missing from some food labels, and unfounded health claims are being made. To correct that, Sullivan says a Food and Drug Administration proposal would require most foods to carry consistent nutrition labels. Terms like ''low fat'' and ''high fiber'' are to be standardized. It's the first major government effort to improve food labeling in 17 years.

Israeli Prime Minister Shamir adjourned the country's Inner Cabinet today without taking a vote on a U-S proposal to include more Palestinians in peace negotiations. Labor Party Chairman Peres had urged the cabinet to approve the proposal. After Shamir postponed the vote until Sunday, Labor ministers scheduled a meeting Monday to vote on leaving the coaliton government if the proposal is rejected.

A prominent member of Sinn Fein... the political wing of the Irish Republican Army... was shot dead today, moments after he left a police station near Belfast, Northern Ireland. A Sinn Fein spokesman says the assassination of Sam Marshall proves police in the British-administered

territory are secretly passing information to protestant para-military groups. British detectives are investigating the charge.

-30- 1950

#90066u4818 03/07/1990 ~United Press International

(MARCH 7) UPI - A federal jury in Boston today rejected a widow's claims that a tobacco company was to blame for her husband's death from lung cancer in 1986. The jurors deliberated for less than two hours. Joanne Kotler charges the American Tobacco Company should have disclosed available information about the cancer-causing effects of cigarettes before a warning label was first required in 1966.

Police in the Knoxville, Tennessee, suburb of Farragut are questioning several students suspected in today's pipe bombing of the local high school. NO one was injured in the lunchtime blast that destroyed a row of lockers and blew a hole in the ceiling. Federal agents have been called in to assist local authorities in the probe. The county fire marshal says the remains of the crude bomb have been sent to a Washington, D-C, crime laboratory for analysis.

The state of Massachusetts is ready to compromise with the sheriff who commandeered a national guard armory in Springfield three weeks ago to ease inmate overcrowding at the Hampden County Jail. The state will let him use a smaller armory in Holyoke. The sheriff has agreed to the idea. But the mayor of Holyoke says he'll be in court tomorrow to stop the move because the armory is 25 yards from a child care center.

A six-year-old boy jumped into the driver's seat of an unattended school bus this morning and crashed into a house and two cars in suburban Kansas City. Police in Overland Park, Kansas, say the 71-year-old driver had left the bus running in ''park'' while he went to speak to the parents of one student who'd run back into her house. That's when Justin Wright decided to take the bus for a spin. NO one was injured.

#90067b0003 03/08/1990 ~Business Wire

SALT LAKE CITY (MARCH 8) BUSINESS WIRE - Mining Services International Inc. (NASDAQ:MSIX) announced Thursday that construction of its majority owned CYANCO joint venture, a sodium cyanide plant, is on schedule for mechanical completion at the end April.

The $11.5 million plant is designed to produce 28 million pounds of sodium cyanide annually.

Based on current sodium cyanide prices and production capacity of the plant, and provided the plant has no significant start-up or operating

difficulties, the company expects revenues from CYANCO to exceed $20 million annually. The first full year of operation is expected to generate about $2 million in after-tax profit to Mining Services.

Air, water and other permits have been issued by governmental and regulatory agencies in Nevada and the plant management team has been hired. Raw material supply arrangements have been finalized.

''We are encouraged at the response the new plant is receiving from the mining industry. We have already signed approximately $11 million in contracts and purchase orders for delivery of sodium cyanide to more than a dozen Nevada mines, including Alta Gold. This brings the plant to about 50 percent of annual capacity,'' said Dr. John T. Day, executive vice president at Mining Services.

''We anticipate this project will position us as a major supplier to the western U.S. precious metals industry.''

Mining Services International Inc. is a leading developer of explosives technology and a supplier of high-quality explosives to the mining industry. The company markets its products in five of the major mining countries worldwide. The company will also be involved in the production of liquid sodium cyanide with its newly constructed plant outside Winnemucca.

SAN RAMON, CA (MARCH 8) BUSINESS WIRE - U.S. Audiotex announced Thursday the addition of Bruce A. Anderson, 43, in the newly created position of director of sales engineering.

Anderson, a recognized pioneer in the development of the fast growing Audiotex industry, most recently designed and provided the highly acclaimed 1-900 emergency relief fund service during the aftermath of the Oct. 17, Northern California earthquake.

Anderson brings over 20 years experience in the computer and telecommunications field to U.S. Audiotex. In 1976, while with VISA USA, Anderson was one of the first to recognize the power of marrying the telephone and the computer, creating a blueprint for the future of Audiotex applications.

In a recent Link Resources report, the audiotex services and products market was estimated to exceed $1.5 billion in 1989, growing to over $3 billion by 1992.

''With a solid reputation,'' commented Anderson, ''and excellent clients, U.S. Audiotex is well positioned to deliver the innovative products necessary to meet the demands of the explosive growth expected in this industry.''

Since 1986, U.S. Audiotex has been a leader in providing equipment and services to the Audiotex industry. Applications include Talking Yellow Pages, voice mail, 1-900 information services, court systems, call routing and many more.

''Our strengths have been high quality applications, reliable equipment and attention to customer service,'' said Ken Stern, president of U.S. Audiotex. ''With clients like Security Pacific Bank, Lucasfilm, Kaiser Hospitals and Pacific Bell Directory, a company has to be a cut above in order to meet their requirements. The addition of Anderson continues that tradition.''

PALO ALTO, CA (MARCH 8) BUSINESS WIRE - Earth Day 1990 announced Thursday a new national corporate sponsor, California Energy Company Inc., a San Francisco-based company involved in the development of geothermal resources.

Funds contributed by the company will be used for education programs on and around Earth Day that are designed to promote awareness and usage renewable energy resources such as solar, wind and geothermal.

''As the largest independent developer of clean, environmentally benign geothermal resources, California Energy Company represents the kind of conscientious support and interest we have been seeking from the corporate community,'' says Denis Hayes, chair and chief executive officer of Earth Day 1990.

''Not only is the company striving to provide productive solutions to our environmental problems, but they are also rolling up their sleeves and educating their employees, investors and stockholders regarding the important issues and dilemmas surrounding our earth's atmosphere.''

Earth Day 1990 is an international movement whose goal is to bring awareness and explore solutions to the many environmental problems the world faces today. A worldwide series of celebrations will culminate April 22. For questions please call 415/321-1990.

TEMPE, Az (march 8) business wire - MicroAge Computer Centers Inc., Thursday announced the winners of the 1989 MicroAge Franchisee of the Year New Franchisee of the Year, Outstanding Franchisee of each Zone, Outstanding New Franchisee of each Zone, MicroAge Awards of Excellence,

and the ''Positioned to Win'' awards at Solutions '90, MicroAge's annual vendor exposition and symposium held Feb. 9 - 13, 1990 in Phoenix, Ariz.

''MicroAge is proud to recognize the Solutions '90 award winners for their exceptional performance throughout 1989, and for adding value to everything they do at their MicroAge location,'' said MicroAge Computer Centers Inc. President William Keiper. ''Their achievements in 1989 demonstrate the strength and knowledge of the MicroAge Network and the ability of MicroAge Computer Centers to aggressively and profitably market value-added services.''

Winning the coveted Eagle Award for the Franchisee of the Year were Gary Stooksberry and Steve Pilgrim of Memphis, Tenn. Stooksberry and Pilgrim have operated the MicroAge location in Memphis since November of 1983 and have accomplished particular success selling and supporting IBM, Compaq, Apple and Hewlett-Packard products.

Recognized as the New Franchisee of the Year was Jerry Engle of Grand Rapids, Mich. Engle earned the honor because of his success as a new member of the MicroAge Network and his ability to provide superior service and support to his client base. Engle has more than 10 years of computer industry experience.

DENVER (MARCH 8) BUSINESS WIRE - Cellular Inc. (NASDAQ:CELS) announced Thursday that it is actively considering an offering of $75 million of convertible subordinated debentures in the Euro Markets.

The company expects the offering to be sold at some point in the next two months.

The net proceeds to be received by the company from the sale of the debentures offered will be used to finance the acquisition, construction and development of cellular properties. Pending such use, the proceeds will be invested in short-term, interest-bearing securities.

Cellular Inc. is engaged in the operation, management and financing of the cellular interests of independent telephone companies (''telcos'').

Currently the company has affiliations with 156 telcos in 17 states and has interests in 11 operational metropolitan statistical area (MSA) markets and 69 rural service areas (RSA) markets, the majority of which

will become operational during 1990. The company is awaiting regulatory approval on the acquisition of three additional RSAs; Wyoming 3, Idaho 5 and Iowa 6.

The company is developing an integrated network of contiguous cellular systems, designed to provide cost-effective service to portable and mobile cellular telephone users as well as relatively low-cost, fixed cellular alternative to traditional landline service to business and residential telephone users.

The debentures will not be registered under the United States Securities Act of 1933 and may not be offered, sold or delivered directly or indirectly, in the United States or any of its territories or possessions or to any person who is a citizen, national or resident thereof or to any person purchasing for the account of or for resale to any such person.

FRESNO, CA (MARCH 8) BUSINESS WIRE - ValliCorp Holdings Inc. (NASDAQ, NMS:VALY), an independent regional bank holding company, Thursday announced earnings for the year ended Dec. 31, 1989.

ValliCorp on Nov. 30, 1989 became the successor corporation following the consolidation of Fresno Bancorp and Western Commercial Inc. During 1989, both institutions extended a great amount of time, energy and resources to extensively review their loan portfolios, establish the overall operating policies and procedures for the new company and integrate their physical operations. The focus in 1989 was to create a stronger company with long-term growth and profitability potential.

Net income for the fourth quarter ended Dec. 31, 1989 was $378,000, or 15 cents per share, down from $418,000, or 22 cents per share, reported in 1988 by Fresno Bancorp whose earning history will be carried forward by ValliCorp. Net interest income increased 23.1 percent to $2,941,000 from $2,390,000 in the fourth quarter of 1989.

For the year ended Dec. 31, 1989, net income was $1,239,000, up 2.9 percent from $1,204,000 reported by Fresno Bancorp in 1988. On a per share basis, 1989 net income was 60 cents per share as compared to 65 cents per share for 1988. Net interest income grew 11 percent to $9,842,000, up from $8,867,000 in 1988.

At year-end, ValliCorp achieved a .59 percent return on average assets and a 9.54 percent return on average shareholders' equity. Average total

assets grew 15.6 percent to $209,581,000, up from $181,321,000 for the year ended 1988. Average loans were $136,871,000, up 19.1 percent and average deposits grew 15.2 percent to $192,223,000. Average shareholders' equity was up 28.5 percent to $12,992,000. Total shareholders' equity on Dec. 31, 1989 was $28,220,000, or $6.85 per share. The resulting increases have occurred principally because of the merger.

ValliCorp Holdings Inc., headquartered in Fresno, ranks by total asset size in the top 25 California independent bank holding companies. Management's objective is to be the dominant local financial institution in California's Central Valley and create a confederation of independent banks which stretches from north of Bakersfield to south of Stockton. ValiCorp operates two banking subsidiaries: Bank of Fresno with seven branches in Fresno and one each in Clovis, Sanger and Kingsburg, and Merced Bank of Commerce N.A., which operates one branch in Merced.

PHOENIX (MARCH 8) BUSINESS WIRE - The Movie Superstore Inc., a Phoenix-based chain of six Valley video rental superstores that went public in an offering of 1.5 million units, has signed a letter of intent to purchase three additional Valley superstores.

The purchase price is valued at approximately $2.45 million, a portion of which will be paid in restricted common stock at $3 per share. The seller is Dr. R. Max Hair, a Phoenix resident who currently operates the stores as franchises of the National Video Superstore.

The initial stock offering, which closed Feb. 28, sold 1.5 million units at $2 per unit and raised net proceeds of about $2.6 million that the company said would be directed toward expanding operations and paying off certain debts.

At the close of trading Wednesday, the stock, listed under the symbol TMSIU on the National Association of Securities Dealers Automated Quotations system, sold over-the-counter at 2-7/8 bid and 2-15/16 asked.

According to the managing underwriter, Biltmore Equities and Securities Ltd., there were more than 1.1 million units traded in the first eight days of trading which is in excess of two-thirds of the initial offering.

Patrick Clifton, chief executive officer of the two-year-old chain, said that the three stores to be acquired have aggregate revenues of about $2.1 million with net profits of about $420,000.

''The purchase gives us more of a market share in Phoenix, particularly in the East Valley, where we will have locations in Mesa and Tempe,'' Clifton said. The transaction is expected to be finalized in 60 days after an audit of the stores is completed.

DALLAS (MARCH 8) BUSINESS WIRE - Southwest Airlines announced that effective with its April 16, 1990, schedule, it will be offering additional flights from several of its most popular destinations.

Also, on April 16, the airline will inaugurate service from Burbank to Oakland with 10 daily roundtrip flights between the two cities.

''With the delivery of the first 737-500 aircraft in February, and additional deliveries scheduled throughout 1990, Southwest will continue to expand its existing route system in order to offer the most convenient, well-timed air service available to the cities it serves,'' said Herbert D. Kelleher, chairman of the board, president and chief executive officer of Southwest.

From Dallas, Southwest will be adding one flight per day to Albuquerque, and one flight per day to Houston.

Flight No. 158 to Albuquerque from Dallas is perfectly timed for the business traveler, departing Dallas Love Field at 8:00 a.m. and arriving in Albuquerque at 8:35 a.m. With the addition of this flight, Southwest offers four daily nonstop flights from Dallas to Albuquerque, along with other direct and connecting flights.

The new flight from Dallas to Houston will be No. 145, departing Dallas at 5:15 p.m. and arriving Houston Hobby at 6:10 p.m. -- just in time for the Houston business person to return home from Dallas at an early hour. The addition of this flight brings to 32 the total number of daily flights from Dallas to Houston.

As an added convenience to customers flying into Houston Intercontinental Airport, Southwest has changed the departure time of its first flight from Dallas to Intercontinental. Flight No. 119 now departs Dallas Love Field at 7:45 a.m. and arrives in Houston at Intercontinental at 8:35 a.m. This change was made to accommodate those customers.

Flight No. 204 departing Houston at 7:15 a.m. and arriving Dallas at 8:10 a.m. will give the business traveler one more opportunity to get an early start. Southwest has also added a 4:15 p.m. flight from Houston arriving in Dallas at 5:10 p.m. With the addition of these two new flights, Southwest brings to 34 the number of daily departures to Dallas Love from Houston Hobby.

Southwest is also offering a new daily roundtrip flight between Houston and New Orleans. Flight No. 425 departs Houston Hobby at 6:30 a.m. and arrives at New Orleans at 7:30 a.m. Flight No. 588 departs New Orleans at 7:30 a.m. and arrives at Houston Hobby at 8:35 a.m. This additional roundtrip brings to 17 the number of daily nonstop roundtrip flights between New Orleans and Houston Hobby.

Additional nonstop service to Houston will be offered from El Paso, with flight No. 969 departing El Paso at 1:25 p.m. and arriving in Houston at

4:00 p.m., bringing to six the number of daily nonstop flights from El Paso to Houston Hobby.

A new flight will depart San Diego at 10:35 a.m. and arrive in El Paso at 1:15 p.m., bringing the number of daily nonstop from San Diego to El Paso to two.

With the addition of flight No. 468 from Albuquerque to Las Vegas, Southwest will offer five daily roundtrip flights between these two cities. The new flight departs Albuquerque at 8:50 a.m. and arrives nonstop in Las Vegas at 9:10 a.m.

Southwest Airlines has increased its San Antonio-Phoenix service by adding two nonstop flights, one in the morning, the second in the afternoon.

The conveniently timed new service consists of flight No. 718, which departs San Antonio at 7:50 a.m. and arrives in Phoenix at 9:05 a.m.; and flight No. 587, leaving San Antonio at 5:45 p.m., arriving in Phoenix at 7:00 p.m. Both flights have convenient connections to most of Southwest's West Coast destinations.

Southwest also has a new nonstop from Phoenix to San Antonio. Flight No. 637 departs Phoenix at 9:20 a.m. and arrives in San Antonio at 12:20 p.m.

Southwest will also offer a new nonstop flight from Las Vegas to San Diego bringing to six the number of roundtrips between the two. The additional flight departs Las Vegas at 9:25 a.m. and arrives San Diego at 10:15 a.m.

BEVERLY HILLS, CA (MARCH 8) BUSINESS WIRE - Litton is providing two welding systems valued at $10.5 million to Cosma International, a Brampton Ontario, Canada-based major supplier of automotive subassemblies.

Litton's Lamb Technicon division, based in Warren, Mich., designed and is providing the systems, which will be operational by mid-1990. The systems will be used in the assembly of fenders and deck lids for Ford's redesigned rear wheel drive Crown Victoria and fenders for new Mercury Grand Marquis cars, both planned for introduction in 1992.

Lamb Technicon is a U.S. market leader for the design and engineering of integrated, high-volume machining and welding systems for the worldwide automotive and off-the-road vehicle industries.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

PALO ALTO, CA. (MARCH 8) BUSINESS WIRE - In response to a number of inquiries from the financial community, ALZA confirmed Thursday that a once-a-day oral controlled-release dosage form of diltiazem is being clinically evaluated by Merck & Co. Inc. of Rahway, N.J., for the treatment of angina and hypertension pursuant to a licensing agreement between ALZA and Merck.

In addition, ALZA confirmed that Merck is also evaluating an oral, controlled-release dosage form of the combination of diltiazem and Merck's ace inhibitor, enalapril under the same agreement.

These once-a-day products employ osmotic controlled-release technology to which both ALZA and Merck have contributed. The agreement between the companies provides for both products to be marketed by Merck worldwide under a royalty-bearing license from ALZA, with ALZA in some cases retaining certain marketing rights in the United States.

ALZA Corp. develops, manufactures and markets pharmaceutical products based on it's proprietary drug delivery technologies which provide for rate-controlled programmed administration of medication for both human and veterinary applications.

LOS ANGELES (MARCH 8) BUSINESS WIRE - First Interstate Bancorp Thursday announced the appointment of Richard L. Barkhurst to executive vice president of the holding company.

In his new post, Barkhurst, 48, will be responsible for projects to enhance profitability throughout First Interstate's 14-state territory with special focus on further developing profitability at its 1,041 branches.

A 26-year banking veteran with an extensive background in California

retail banking, Barkhurst began his career at First Interstate Bank of California in 1964. He held several positions in the former National and Metropolitan divisions before being promoted to senior vice president and regional administrator in 1981.

He became manager of the bank's Northern Division and a member of its managing committee in 1985. He was appointed executive vice president and manager of the bank's Bay Area Division in September 1986, when that division was formed.

A native of Ohio, Barkhurst attended Ohio State University in Columbus where he earned a bachelor's degree in business administration.

He later earned an master's in business administration degree from Golden Gate University in San Francisco.

First Interstate provides the largest geographical coverage of any retail and business banking system in the United States.

Including licensees, First Interstate Banks operate nearly 1,150 full-service offices in 21 states. These offices serve 5 million households in more than 650 communities, including seven of the 10 fastest growing metropolitan markets in the United States. Other offices serve U.S. and international customers in 19 countries.

LOS ANGELES (MARCH 8) BUSINESS WIRE - Miles R. Adam has been appointed a senior vice president of First Interstate Bancorp, it was announced Thursday.

Adam, 45, will serve as a primary resource for the holding company's Policy Committee for Operations and Information Services. He will support its role of optimizing operations at its 27 banks in 14 states and improving productivity.

Adam joined First Interstate Bank of California in 1984 as vice president and manager of the Los Angeles Item Processing Department and later was promoted to manager of Retail Market Services for the bank's Operating Services Group. He was appointed senior vice president in 1986. In 1988, he joined the banks Los Angeles North Division as manager of the San Fernando Valley District.

Prior to joining First Interstate, he had served as senior vice president

at Citicorp's Diners Club where he worked in a variety of service related business areas.

A native of Wisconsin, Adam attended the University of Wisconsin where he earned his degree in business administration. Continuing at the university, he later earned his master's in business administration degree.

PROVO, UT (MARCH 8) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL) Thursday reported net revenue of $105.9 million for its first quarter ended Jan. 27 1990, up 7 percent from net revenue of $98.6 million for the comparable period in fiscal 1989.

Net income for the first quarter increased 37 percent to $15.1 million from $11 million posted for the same period of fiscal 1989.

Net income per share was 45 cents, up from 33 cents earned during the corresponding period in fiscal 1989.

''Our first quarter results were as expected, and although they reflect our seasonally slowest revenue quarter, income was increased by improvements in gross margin due to Novell's expanding software product-line and our attention to control of period expenses,'' said Raymond J. Noorda, chairman, president and chief executive officer of Novell.

For the first quarter gross margins increased to 68 percent of net revenue. This continues a trend of gross margin improvement paralleling the growth of software sales as a percentage of total Novell revenue. Software sales reached 72 percent of total revenue during the first quarter, compared to 61 percent a year earlier.

International sales were especially strong during this period, accounting for 42 percent of net revenue, the highest ever recorded by Novell, and up from 39 percent of net revenue during the fourth quarter of fiscal 1989.

On the balance sheet for the first quarter, asset control resulted in cash and short term investments increasing by 24 percent, or $30.7 million, and inventories being reduced by 21 percent, or $4.8 million.

Novell is the leading provider of network server operating system software that integrates desktop computers, servers, and minicomputer and mainframe hosts for information sharing. Novell's NetWare network computing products manage and control the sharing of services, data and applications among PC workgroups, departmental networks and across business-wide information systems.

PORTLAND, OR. (MARCH 8) BUSINESS WIRE - Pope & Talbot Inc. Thursday announced that it is implementing a plan to sell or trade its remaining Oregon timberlands.

About 37,000 acres are involved, with the timberlands being in several parcels located in the Willamette Valley between Portland and Oakridge.

The timberlands contain second-growth timber of various ages. Sale in 1989 of the company's Oakridge sawmill made retention of the lands unnecessary. Sale or trade of the properties are comtemplated over the next two years. Market value of the timberlands is estimated to be $30-$40 million.

Pope & Talbot Inc. is a publicly held, Portland-based pulp and wood products company traded on the NYSE. Pope & Talbot was founded in 1849 and has operations throughout the United States and in Canada.

VANCOUVER, B.C. (MARCH 8) BUSINESS WIRE - In order to acquire mining properties of interest in Chile, South America, Naxos Resources Ltd. has entered into a Letter of Intent to form a joint venture with Mr. R.R. Culbert, PhD., PEng., and Mr. Andrew Harmon.

Mr. Harmon and Mr. Culbert will conduct a follow-up exploration evaluation program on selective targets identified by their preliminary research program carried out in 1989. The program will concentrate on properties in

the south and south central Chile from the Rancagua area to the Porta Aisen area in southern Chile covering a distance of 1,000 miles.

Naxos has agreed to provide funding totalling $150,000 for the first phase of this project scheduled for completion by May 31, 1990. Naxos may elect to continue with the project by providing a further $350,000 on or before October 1, 1990.

Naxos will incorporate a wholly owned subsidiary in Chile to hold all property acquired as a result of this program in Chile. All properties acquired by the Joint Venture will be the property of Naxos and subject only to a five percent net profit interest to Culbert and Harmon.

Following the completion of 90 holes on the Company's Franklin Lake Property the drill program has been suspended pending receipt of approval from the Bureau of Land Management to continue drilling in the portion of the Franklin Lake Property designated as a wilderness study area. Upon receiving approval, the Company plans to resume drilling on the property.

At present samples from five holes located near the discovery hole are in for assay. The remaining 85 holes will be analyzed as soon as possible. At the request of the Alberta Stock Exchange, the Company has retained the services of an independent Engineer and independent Geologist to collect and analyze samples from the Franklin Lake Property.

The Company is pleased to report that the Engineer and Geologist have supervised the drilling of two additional holes close to the discovery hole. The Company has been advised that the samples obtained by the Geologist and Engineer have been submitted for assay.

The Company has, subject to regulatory approval, granted a stock option in the amount of 10,000 shares, exercisable within two years at a price of $1.95 to one employee.

Note: The Alberta Stock Exchange has neither approved nor disapproved the information contained in this release.

CHICAGO (MARCH 8) BUSINESS WIRE - Sears, Roebuck and Co. (NYSE:S) and the Dean Witter Financial Services Group announced that Sears indirect wholly owned subsidiary, Discover Receivables Financing Corp. (''DRFC''), offered for sale $500 million of Discover Card Trust 1990 A 9.00 percent Class A Credit Card Pass-Through Certificates through an underwriting syndicate managed by Dean Witter Reynolds Inc. and Salomon Brothers Inc.

The securities have an expected average life of three years. Principal payments to certificate holders will commence Sept. 15, 1992. The securities were priced at 99.498 percent of par plus accrued interest from Feb. 1, resulting in a yield of 9.23 percent.

The principal assets of Discover Card Trust 1990 A will consist of customer receivables generated or to be generated by the Discover Card. The certificates represent undivided ownership interests in the receivables owned by the trust. The certificates will be rated Aaa by Moody's, AAA by Standard & Poor's and AAA by Duff & Phelps.

Net proceeds from the sale of the certificates will be transferred to Sears and its subsidiaries Greenwood Trust Company and SCFC Receivables Corporation, which will apply the proceeds initially to reduce short-term borrowings.

A copy of the prospectus may be obtained from Dean Witter Reynolds Inc., Two World Trade Center, New York, NY 10048 and Salomon Brothers Inc, Prospectus Department, Two New York Plaza, New York, NY 10004.

HOUSTON (MARCH 8) BUSINESS WIRE - Santa Fe Energy Resources Inc., an independent oil and gas company, has priced its initial public offering of common stock at $18.25 per share.

At this price, the indicated gross asset value of Santa Fe Energy Resources Inc. is in excess of $1.6 billion, including approximately $450 million of the company's debt.

Santa Fe Energy Resources Inc. will offer to sell 11.7 million shares of common stock. In addition, the company has granted the underwriters, Goldman Sachs & Co., Kidder, Peabody & Co. Inc., and Shearson Lehman Hutton Inc., an option to purchase up to 1,170,000 additional shares to cover over-allotments.

Santa Fe Resources Inc.'s common stock will be traded on the New York Stock Exchange under the symbol SFR.

Prior to the offering, the company was a wholly owned subsidiary of Santa Fe Pacific Corp. (NYSE:SFX), a Chicago-based company with operations in natural resources, transportation and real estate. After the offering, Santa Fe Pacific Corp. will own approximately 81.7 percent (80.2 percent

if the underwriters' over-allotment options are exercised in full) of the company's common stock.

Santa Fe Energy Resources Inc. is one of the largest independent (non-integrated) oil and gas companies in the United States in terms of domestic proved oil and gas reserves. At Dec. 31, 1989, the company had proved oil and nautral gas reserves of approximately 251.1 million barrels of oil equivalent, of which approximately 88 percent were oil and 12 percent were natural gas.

All of the company's reserves are located in the United States. Santa Fe Energy Resources Inc.'s daily production averaged approximately 50,700 barrels of oil and 81.6 million cubic feet of natural gas in 1989.

The company has interests in major fields throughout the United States, including: Midway-Sunset, South Belridge, Kern River and Coalinga in the San Joaquin Valley of California; and Wasson in the Permian Basin of West Texas.

Santa Fe Energy Resources Inc. is headquartered in Houston.

#90067b0202 03/08/1990 ~Business Wire

SANTA ANA, CA (MARCH 8) BUSINESS WIRE - Alpha Microsystems (NASDAQ:ALMI) and its AMS Products Group Thursday announced a new concept in Pick/UNIX ''open-systems'' architecture with the introduction of APIX; an operating system that supports the concurrent operation of two of the most popular generic multiuser operating systems, Pick and UNIX.

APIX will become AMS' standard version of Pick, optionally permitting the execution of standalone Pick applications, standalone UNIX applications, or the concurrent execution of applications in both environments.

APIX is of further note because it represents one of the earliest implementations of AT&T UNIX System V Release 4, a significant enhancement that functionally merges the most popular and widely used versions of UNIX. UNIX System V Release 4 was announced in November, 1989, by AT&T's UNIX Software Operation and UNIX International, an international organization of users, systems vendors, software developers and standards bodies.

The UNIX System V Release 4 foundation of APIX strengthens its competitive position and insures that AMS' dealers and their end-users will receive the benefits of one of the most feature-rich Pick/UNIX operating system environments available.

In addition to all currently supported AMS Pick Release 6 features, APIX contains the necessary software bridges to move files and data between Pick- and UNIX-based applications, and embodies all UNIX System V Release 4 features. APIX also supports environment switching, allowing UNIX- and Pick-based applications to run under operator or program control, without requiring knowledge of which environment is being used.

With headquarters in Santa Ana, Alpha Microsystems with its AMS Products Group and RBM Products Group manufactures, markets and services multi-user multitasking computer hardware and software products.

Operating software environments are provided for Alpha Microsystems' AMOS, and RBM's RECAP, proprietary, multi-user business-oriented operating systems, as well as industry-standard software including XENIX, Pick OA and R83, Thoroughbred Basic and MS-DOS.

Distributed worldwide, the company's families of high-performance systems provide cost-effective, multi-user computer solutions for businesses of all kinds.

SAN FRANCISCO (MARCH 8) BUSINESS WIRE - Sierra Real Estate Equity Trust '83 (NASDAQ/NMS:SETB) reported the declaration of an increased regular dividend of $.0875 per share for the first quarter of 1990, payable on March 30 to shareholders of record on March 21.

This represents an increase to a 35 cent annual rate which is a 40 percent increase over the 1989 rate.

Thomas B. Swartz, chairman, said that the increased dividend reflects the improved performance of the trust's properties, which are 94 percent occupied. Trust '83 owns six light industrial and warehouse complexes and one community shopping center in Southern and Northern California, Memphis, Phoenix and Spokane.

Sierra Capital Realty Trust IV Co. (ASE:SZD) reported the declaration of a regular dividend of $.075 per share for the first quarter of 1990, payable on March 30 to shareholders of record on March 21. The dividend is the same rate as the prior quarterly dividend.

Thomas B. Swartz, chairman, said that the occupancy of the trust's light industrial, warehouse and retail properties remains strong at a 95 percent level.

Both trusts are affiliated with and advised by the Sierra Capital Companies, an asset manager and investment advisor specializing in the acquisition and management of light industrial buildings and community shopping center properties for its public and institutional clients.

Sierra Capital Companies manages over $550 million of commercial real estate that represents 11,600,000 square feet of leasable space nationally and is 95 percent occupied.

SEATTLE (MARCH 8) BUSINESS WIRE - CELEREX Corp. Thursday announced a net loss of $2,891,708 for 1989 on revenues of $782,673 compared to a 1988 net loss of $4,318,791 on revenues of $6,000.

Loss per share was 13 cents on 22,041,900 weighted average shares compared to a 23 cent loss on 18,898,900 weighted average shares in 1988.

Jose Porto, president of CELEREX, attributed the net loss of the company to development, sales, and marketing costs associated with the completion and introduction of its ''Faster Than Cash'' credit card and check authorization/verification system which was designed for merchants in the previously cash only, high volume, low ticket value markets. Also contributing to the net loss was the establishment of corporate processing and service facilities to process merchant transactions. Full production and delivery of the company's newest system began in April 1989.

Porto stated that, as of Dec. 31, 1989, the company had systems operating in 124 merchant locations, up from 26 on Dec. 31, 1988. The company's customers include, among others, in the fast food industry: Skippers, Burger King franchisees in Portland and Philadelphia, Jack-in-the-Box Corporate, a Godfathers Pizza franchisee in Portland, and a McDonald's franchisee in Seattle; among major parking facilities: The Will Rogers International Airport (Oklahoma City), Systems Parking, Airlines Parking and Doug Fox Parking; and among independent grocery stores: Garguile Enterprises (Red Apple Markets), Harbor Thriftway and Raceway Foods. Of the above, Burger King, Jack-in-the-Box and McDonald's are performing pilot tests of the system.

Founded in 1986, CELEREX is in the electronic payment systems business specializing in high speed credit card authorization, electronic draft capture, check verification and high speed data capture and reporting systems for high volume, low dollar ticket applications. The company markets its systems and services through banks, as well as through its own sales force. CELEREX stock is traded through NASDAQ under the name CEXY.

ANAHEIM, CA (MARCH 9) BUSINESS WIRE - General Automation Inc. (ASE:GA) Thursday announced that Sanderson Electronics PLC of the United Kingdom has increased its shareholding in General Automation from 35 percent to 49 percent.

In taking this step, Sanderson Electronics has acquired a further 2.4 million shares of the General Automation common stock by exercising part

of previously granted warrants and conversion rights entitling the company to acquire up to 51 percent of General Automation.

General Automation reported in February a second quarter net income of $23,000, vs. a loss of $989,000, for the same quarter in 1988. This was the fourth successive quarter's profit announced by General Automation.

General Automation's total revenues for the year to June 30, 1989 were $41.448 million, of which over 50 percent were based on international sales.

General Automation is a worldwide supplier of computer systems, software and field service to the database-oriented business systems market.

General Automation is part of a multinational group of computer marketing and service companies with total revenues in excess of $75 million. The group comprises a global distribution, service and support network and includes GA's own U.S. and European operations, as well as SGA Pacific Ltd. (SGA) and Sanderson Electronics PLC (SEL).

GA products are sold in the Americas, the South Pacific, East Asia, Europe and the United Kingdom. GA's products include the GA/Maxial Hotel Property Management system, currently installed in many countries worldwide.

FORT WASHINGTON, PA (MARCH 8) BUSINESS WIRE - Greenwich Pharmaceuticals Inc. (NASDAQ: GRPI) reported that it met with representatives from the Food and Drug Administration on Monday, March 5, to review the results of a recently completed double-blind placebo-controlled study designed to demonstrate the efficacy of THERAFECTIN as a treatment for rheumatoid arthritis.

At the meeting, representatives from the FDA confirmed that this study demonstrated efficacy with statistically significant results in favor of THERAFECTIN. The confirmation of THERAFECTIN's efficacy significantly strengthens its potential to be a therapeutic advance in the chronic treatment of rheumatoid arthritis.

As a result of this meeting, Greenwich plans to commit the necessary financial and professional resources to initiate the production and evaluation of a comprehensive data base for THERAFECTIN. Analysis of this data base will determine the timing of a filing for a new drug

application. Greenwich will also conduct additional Phase III studies to support the anticipated use and marketing of the drug.

Under the terms of a February 1989 agreement with Syntex Corp., Greenwich granted to Syntex the co-exclusive right (together with Greenwich) to manufacture and sell amiprilose HC1 for the treatment of rheumatoid arthritis in the United States.

Greenwich also granted to Syntex exclusive marketing rights to amiprilose HC1 in Canada, Mexico, the Bahamas, Australia, New Zealand and Brazil. Upon receipt of the necessary regulatory approvals, Greenwich plans to sell amiprilose HC1 under its brand name THERAFECTIN. Greenwich will receive royalty payments from Syntex based on net sales by Syntex of amiprilose HC1.

Pursuant to the agreement, Syntex has funded $2.5 million of costs for the clinical development of amiprilose HC1 for the treatment of rheumatoid arthritis. Syntex has the option to extend its financial support for further amiprilose HC1 clinical developmental programs.

Greenwich is a development stage company in business to identify and develop synthetic carbohydrate drugs for the treatment of chronic inflammatory diseases.

COSTA MESA, CA (MARCH 8) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV), a leading supplier of tape drive products, Thursday announced that its wholly owned subsidiary, CAC Corp., has extended its all cash tender offer for all outstanding shares of common stock of Cipher Data Products Inc. until midnight New York City time on Wednesday, March 14.

The tender offer was previously scheduled to expire on March 7. All other terms of the offer remain unchanged. In a related development Archive and Cipher also announced the commencement of negotiations directed to a possible negotiated acquisition of Cipher by Archive.

Archive also announced that as of 5 p.m. California time on March 7, 11,832,963 shares of Cipher common stock has been tendered pursuant to the tender offer and not withdrawn. When added to the 675,000 shares already owned by CAC Corp., these shares represent approximately 85 percent of the outstanding shares of Cipher based on outstanding shares reported in Cipher's most recent public filing.

Founded in 1980, Archive today is a leading manufacturer and supplier of data backup products to original equipment manufacturers and resellers. Archive and Maynard Electronics, an Archive company, offer a complete selection of tape drives and subsystems for economical computer data backup for fixed-disk drives in workstations, multi-user systems, and personal computers.

SAN JOSE, CA (MARCH 8) BUSINESS WIRE - EMCON Associates (NASDAQ:MCON) Thursday announced the signing of a merger agreement with America North Inc., an Anchorage-based environmental consulting firm.

Upon completion of the proposed merger following satisfaction of customary closing conditions, America North Inc. will be a wholly owned subsidiary of EMCON.

Principals of both firms are pleased with the results of the negotiations. ''The addition of America North Inc. will give EMCON an excellent

presence in the Alaskan market,'' stated Ted Briggs, EMCON's president and chief executive officer, ''and we look forward to a long and profitable working relationship together.''

Briggs noted that North America Inc. has 47 employees and provides a wide range of environmental-management services, many of which are complementary to those offered by EMCON, including environmental permitting, oil spill contingency plans, regulatory compliance reviews, marine biology/chemistry research, and site investigations.

EMCON provides comprehensive engineering and consulting services in waste management and environmental protection. Established in 1971, EMCON today is a leader in the design and development of waste management facilities and remediation programs. EMCON serves public and private clients throughout the Western United States.

FREMONT, CA (MARCH 8) BUSINESS WIRE - WaferScale Integration Inc. (WSI) Thursday announced it has selected Mike Callahan as president and chief executive officer.

Callahan was also elected chairman of the board replacing Irwin Federman who had been acting board chairman and who will now become a permanent board member.

Callahan previously was senior vice president of the Programmable Products Group for Advanced Micro Devices. At AMD, he managed the Programmable Products, Military Products, Programmable Gate Arrays and Standard Logic Divisions. Prior to AMD, Callahan served as president and chief operating officer at Monolithic Memories (MMI).

Callahan was formerly with Motorola for 17 years where he last served as director of R & D and director of Linear Operations. He holds a bachelor of science degree from the Massachusetts Institute of Technology.

''WSI's combination of technology, products and people has enabled the company to achieve a leadership position in certain non-volatile memory and programmable system product markets,'' said Callahan. ''I hope to leverage this capability to expand our participation in these and other rapidly growing market segments.''

WSI is a leading producer of high-performance programmable non-volatile memory products for a variety of system applications.

Based on its patented split-gate EPROM technology, WSI's EPROMs, PROMs and unique Programmable System Devices (PSDs) have enabled electronic system designers to increase system performance, reduce system size, reduce power requirements, shorten development cycles and get to market faster.

#90067b0635 03/08/1990 ~Business Wire
CUPERTINO, CA (MARCH 8) BUSINESS WIRE - Apple Computer Inc. Thursday announced that all Apple hardware products sold in the United States after Jan. 1 will be covered by a one-year limited warranty.

The limited warranty provides coverage around the world for U.S. customers who can obtain warranty service from any authorized Apple reseller in more than 80 countries worldwide. Previously, the U.S. warranty covered a 90-day period, and warranty service was available from only U.S. resellers.

The company also announced that customers who purchased hardware products in the U.S. prior to Jan. 1 are eligible for a special promotional price on AppleCare, Apple's extended service plan for out-of-warranty products. AppleCare is available through authorized Apple resellers in the United States and covers replacement parts and labor.

All Apple systems made since 1978 and purchased in the United States can qualify for this special promotion.

In the United States, customers who require hardware repairs during the

first 12 months of ownership simply take the system to any Apple authorized service provider, present proof of purchase, and their Apple hardware is serviced at no charge.

For warranty repairs on products purchased in the United States but serviced outside of the United States, customers are required to pay the Apple authorized service provider for the repairs and then must file a claim for reimbursement from Apple USA.

The promotional AppleCare price, which is available from March 19 through May 31, offers an additional six free months of coverage when six months are purchased.

For example, the promotional price for one year of AppleCare for an Apple IIe computer with color monitor and ImageWriter II printer is $90; for a Macintosh SE computer with an internal 20 megabyte hard disk the price is $162; and for a Macintosh IIcx with an internal 40 megabyte hard disk and a color monitor the price is $246.

Volume discounts up to 25 percent are available depending on the number of Apple products covered.

#90067b0638 03/08/1990 ~Business Wire

TOKYO (MARCH 8) BUSINESS WIRE - Lawyers for Koito Manufacturing Company, Ltd. appeared in court Thursday to give Koito's initial statement in response to Boone Company's complaint regarding the inspection of Koito's financial records.

Koito's statement was based upon the Written Response filed yesterday with the Eighth Section of the Civil Department of the Tokyo District Court.

Characterizing Boone Co.'s allegations as ''baseless, contrary to fact, and made solely to further T. Boone Pickens' greenmailing schemes'', Koito asked that the suit be dismissed.

The Company further said that Boone Co.'s demand for inspection ''was not an exercise of a justifiable shareholder right, but rather part of a plan to pressure and embarrass the Company in connection with Picken's greenmail attempts.''

In making its argument, Koito recounted the secretive and questionable process leading to Boone Co.'s acquisition of Koito stock from a known Japanese greenmailer, as well as Mr. Pickens' own well-known history as a U.S. greenmailer and corporate raider.

The Koito response also cites the fact that the Boone Co. demand covers important trade secrets and proprietary information, such as costs and individual sales prices. In its filing, Koito pointed out that the Boone Co. demand for this information was transmitted with an arbitrary, unrealistic, and unilaterally imposed deadline that was impossible for Koito to meet and, ultimately, was designed to serve as a pretext for initiating Pickens' groundless law suit against the Company.

In an unrelated Company matter, Koito denied that the Company had already decided to increase its annual dividend, as one source in the Japanese press had erroneously reported.

The Company stated that no decision on the annual dividend has yet been reached. Koito's Board of Directors will consider its annual dividend policy only after the results of the fiscal year, ending 31 March 1990, are available.

The decision on the dividend will be made solely on the basis of 1989 business results and projections for the succeeding years.

MINNEAPOLIS (MARCH 8) BUSINESS WIRE - Dayton Hudson Corp. Thursday reported that its net retail sales for the four weeks ended March 3, 1990,

increased 13.1 percent to $821 million from $725 million a year ago.

Comparable-store sales were up 6.3 percent from the same period a year ago.

Kenneth A. Macke, chairman and chief executive officer, said all three of Dayton Hudson's operating companies had sales increases for the month that exceeded their plans. ''These increases are strong against a solid February last year,'' he said.

''Target's mature store increases were excellent. Mervyn's mature store sales were achieved on a less promotional calendar. Dayton Hudson Department Store Co.'s increases are on top of its single best month in 1989 when comparable stores increased 15 percent. We are encouraged that our businesses continue to show strong, steady growth and we are optimistic about 1990.''

February sales by business segment were as follows:

-- Target's total sales rose 18 percent while comparable-store

sales were up 7 percent.

-- Mervyn's total sales increased 8 percent and comparable-store

sales increased 7 percent.

-- Dayton Hudson Department Store Co.'s total and

comparable-store sales were up 5 percent.

At the end of February, Dayton Hudson operated 665 stores in 33 states.

#90067b0646 03/08/1990 ~Business Wire

HUNTSVILLE, AL (MARCH 8) BUSINESS WIRE - Intergraph Corp. (NASDAQ:INGR) Thursday announced the signing of a systems contract with Lee County, Fla.

Intergraph will install its premier UNIX-based computer-assisted dispatching (CAD) system in Lee County's Communications Center. The center serves 17 fire districts countrywide, and houses the centralized dispatching operation for Lee County Emergency Medical Services and Lee County Division of Emergency Management.

''Lee County selected Intergraph's system to automate its current manual dispatching operations because we believe Intergraph's map-based graphics approach to be next-generation CAD,'' explained Ben Holycross, Lee County's director of communications.

''Our research indicates that the next generation of CAD will require the use of interactive graphics in conjunction with relational database capability. This integration is necessary to bridge the gap between public safety CAD systems and GIS systems.

''Our management is looking to the future and wants to implement a system which represents the best technology available today, while also making sure the system will be easily expandable and won't become obsolete next year. Intergraph's CAD system best meets these criteria,'' he concluded.

A Proven Partnership in Innovation

''While Intergraph's Dispatch Management System is new, the company is a compter graphics veteran, with over 20 years of experience, and a large, loyal customer base around the world,'' noted Jim Meadlock, Intergraph's chief executive officer. ''We develop a partnership with our customers, and have built a strong reputation for leading-edge technology which is standard, integrated, and compatible from one generation of the product to the next.''

Lee County has been an Intergraph customer since 1984, when an Intergraph mapping and GIS system was installed to automate the county's basemaps, zoning information, and property ownership records.

Lee County was recently presented with the 1989 County Achievement Award by the National Association of Counties (NACo), in recognition of the progress made in efficiency automating mapping operations.

As part of the CAD agreement, Intergraph will also work closely with Lee County engineers to ensure that basemaps developed as part of the geographic information system, are up-to-date, accurate, and properly formatted for use with the new emergency management system. The Map Makes the Difference

The investment already made in building digital basemaps of the county will facilitate inplementation of the new computer-assisted dispatching system.

Accessing data from these basemaps, the CAD system will provide

dispatchers with an interactive tool for monitoring incident and service vehicle locations. Each vehicle's status and position are updated on the map display in real-time as the unit is dispatched, arrives at an incident scene, and completes an assignment.

Using map-related, information, such as street segments, geographic attributes, jurisdictional boundaries, and traffic patterns and obstructions, the system recommends service routes to an incident based on shortest distance or shortest time.

Intergraph emphasizes that the new system provides decision-support capabilities by integrating all of the information a dispatcher needs to make split-second emergency decisions.

Technology and Expertise for Emergency Management

''Lee County will continue to provide us valuable insight into the specifics of CAD operations, as they and other potential customers have done all along,'' said Roger Coupland, director of Intergraph's Dispatch Management Systems Division.

''We're excited about this opportunity to work closely with Lee County's emergency management professionals. Lee County's Department of Public Safety has been recognized as one of the most progressive, innovative public safety organizations in the Southeast. We will benefit greatly from their expertise, as will future customers.''

System implementation is expected to begin in April 1990. The computer-assisted dispatch system order includes:

-- four calltaker/dispatcher workstations with dual 19-inch color graphics monitors,

-- a 6000 series, state-of-the-art UNIX file server,

-- a comprehensive suite of Intergraph's new Dispatch Management Systems software,

-- core software and networking tools, and

-- relational database software for records management applications.

Intergraph will offer Lee County opportunities to implement future CAD software enhancements and upgrades as part of this agreement. The Lee

County Communications Center will be an ideal multi-agency showcase for Intergraph's Dispatch Management System.

New Market Represents Natural Extension of Products

Last year, Intergraph formed its Dispatch Management Systems Division to develop and market systems for public safety agencies in municipal, county state, and federal governments. The company requested input from professionals in the field throughout product planning and development.

Intergraph's CAD system, introduced last August, integrates traditional dispatching with interactive mapping, and capitalizes on over 20 years of experience in geographic information systems, networking, and database management. ''Public safety professionals see the value in an integrated system,'' Coupland said, ''and the fact that Intergraph can provide a single source for hardware and software is definitely recognized as a benefit.''

Intergraph Corp. offers a product line ranging from microprocessor modules to workstations and complete application-specific systems for mapping and geographic information systems, computer-aided engineering, design, manufacturing and publishing.

A ''Fortune 500'' company, Intergraph is the world's largest company dedicated to developing and manufacturing interactive computer graphics systems.

NEW YORK (MARCH 8) BUSINESS WIRE - Millicom Inc. (NASDAQ:MILL) announced Thursday that a joint venture, in which its subsidiary, Millicom Mexico Corp., participates as a shareholder, has been awarded a cellular telephone license covering nearly nine million people in the Northeast portion of Mexico.

The license area, known as Region Four, encompasses the industrial city of Monterrey, as well as other cities including Ciudad Victoria, Nuevo Laredo Matamoros, Reynosa, Saltillo and Tampico/Madero.

J. Shelby Bryan, chairman and chief executive officer of Millicom Inc., stated, ''Millicom has a proven record of working with local partners to provide state of the art cellular telephone service, in a timely manner, to customers around the world. We are eager to put this experience to work for the people of Northeastern Mexico.

''Initially, the 800 MHz AMPS cellular system will provide service to the cities of Monterrey and Saltillo. We will continue to build out the system over the next few years to include the cities listed above and major connecting highways. Within a few years the system will approach 100 cell sites in size.''

The Secretary of Communications of Mexico has awarded a license for each of eight regions of the country. Currently, only Mexico City has cellular telephone service which is provided by two operators.

Millicom, which holds a 33 percent interest in the venture, will build and operate the system with the Swedish company, Comvik International AB, part of the Kinnevik group, which holds a 16 percent interest. The local partner, Grupo Portexa, a major Mexican industrial corporation, holds a 51 percent interest.

The initial phase of the system will be operational within nine months after specifications of the license have been finalized with the Secretary of Communications. The other cities will follow shortly thereafter. The system will have full roaming capability with the existing millions of AMPS cellular subscribers in North America and Latin America.

Millicom Inc. is a diversified international telecommunications company with primary interests in cellular telephone and alphanumeric paging systems. Millicom has a significant presence in Latin America with additional cellular licenses currently held by affiliates in Chile, Costa Rica and Guatemala.
